Sanderson Schools to Offer Course in Shop Work

Other Courses to Be Added Later to Aid Students

Plans have been completed for the beginning of a course in general woodwork for boys in high school and in the upper elementary grades in the Sanderson School for next year, according to an announcement from Superintendent R. D. Holt's office. This course is in keeping with the present trend to make school work more practical and more closely related to the lives of the pupils. The course also offers in training for a vocation but will perhaps be more helpful in training each boy how to use tools, and make and repair furniture, and teach him the fundamentals of the carpenter trade. One credit will be offered in this course this year.

Later it is planned to add other courses in this field such as mechanical drawing, the fundamentals of concrete and cement work, metal work, and auto mechanics. Each of these stresses the work for the use of the individual in actual life and not so much training for a definite trade.

The Sanderson High School now offers courses in homemaking, commerce, science, and shop work in the field of vocational training.

Plans for Fourth Annual Rodeo Well Under Way

Arrangements are rapidly being made for the big Fourth Annual Rodeo to be held at Sandeson on August 18-19. Livestock, including some of the buckingest buckers of West Texas, have already been arranged for, according to Joe Chandler, manager. Two full days are promised with two big modern dances and two old-timers' dances scheduled.

Free Barbecue

Besides the regular rodeo events visitors will be treated to a real old-time Western barbecue to be staged the first day under the shade trees on the courthouse lawn. There will be barbecued beef, barbecued goats and mutton, according to Mr. Chandler, and there will be enough for everyone.. All this, with the trimmings that go with such a dinner should have a lot to do with making an affirmative decision as to whether to attend the rodeo or not.

Good Purses

In the many events which go to make up a good rodeo, bronc riding, steer riding, wild cow milking, calf roping, goat roping, steer break-a-way, and all the other events, there will be liberal prizes offered. Entrance fees will be added to each prize offered, thus increasing the reward money. There will also be other prizes offered by the local business firms which will be ample reward for the places won.

Rodeo Queen

There will also be a rodeo queen chosen in the morning of the first day of the rodeo. The queen will lead the big parade scheduled for about 1 o'clock in the afternoon, and will also receive a prize offered to the winner holding that title.

Winner of the local group who will be named previously to the grand contest, will compete with entrants from other towns and communities for the title of rodeo queen. Towns, firms, and individuals are invited to send entrants and as many as may be desired may be sent from the same town. It is urged that at least one be sent and if possible more. Send name of entrants to Stump Duke, Sanderson, who has charge of arrangements.

Four Big Dances

At the close of each day of rodeo events two big dances will be given. One to be a modern dance and the other to be an old timers' dance. Music will be furnished for the modern dances by Joe Buzze and his orchestra, and will be held at the CAC Hall. The old timers' dance will be on an open-air platform.

There's nobody barred from the rodeo events, and with Earl Sellers as arena director and Jack Hoey, San Antonio, as announcer, there will be little time for anything but the watching of events—no dragging moments. Start planning now to attend the big Fourth Annual Rodeo at Sanderson, August 18-19.

KITCHEN COOLNESS

All Summer Long

★

WITH A *Modern* ELECTRIC RANGE

Kitchen coolness depends a lot upon the type of equipment you use. Electric ranges are built to lock in heat. Thick insulation all around the oven does the trick. The outside stays so cool you can actually rest your hand on the top, even while baking. And there's no circulation of hot air through the oven and into the kitchen. Heat retaining construction in the surface units likewise concentrates heat where it belongs, does not wastefully diffuse it. Your kitchen stays as cool as any other room in your home when you cook electrically.
