Electric CoOps to Help Farmers Home Administration In Rural Development

The Farmers Home Administration has recently requested the Rural Electric Cooperatives of the nation to assist in informing residents of America's rural areas of the new rural home building and rural development programs that are now available for financing to qualified people in the low to moderate income brackets.

In many areas, because of the heavy load of applications, the local Rural Electric Cooperatives will even be requested to help facilitate some of the clerical work involved in processing applications.

Because modern homes are usually larger electric power consumers, the additional effort required by the Cooperatives should be more offset by increased electric

power sales.

Recently several seminars were held throughout Texas by the Farmers Home Administration to groups of Rural Electric Cooperatives Managers and Directors at which the entire program was outlined in detail and the need for assistance from the Cooperatives was emphasized due to the lack of adequate office personnel by Farmers Home Administration to process applications.

It was pointed out in the meetings that although only 30% of America's population lives in rural areas, 50% of all sub-standard housing in the United States is located in rural areas.

A rural area is legally defined as open country and towns of 5,500

population or less. This then would qualify the entire area served by Southwest Texas Electric Cooperative and eligible residents of all towns, farms and ranches in the area would be qualified to apply for a farmers Home Administration loan.

One billion, four hundred eighty million dollars (\$1,480,000,000) have already been appropriated for this program in 1971, of which seventy-five million (\$75,000,000) has been designated for Texas. This is strictly a loan program and each applicant's ability to repay the loan must be satisfied according to the FHA formula prior to approval, but a favorable interest rate and payment schedule makes this program very attractive to the low to moderate income group.

erate income group.

For example, under the program's Section 502, eligible insured loans are made to approved applicants at 6 3/4% interest. Farmers Home Administration makes the loan and sells it to cooperating private banks at 7 3/4% interest. Limits under this program usually do not exceed \$15,000 with up to 33 years to repay the loan. Borrowers under this section are usually in the \$4,000 to \$8,000 income group as formulated by FHA.

Other programs are also available to fit the needs of rural communities, and examples were shown with pictures showing the results from loans made to do repairs on old houses for people who were unable to repay loans required to

build new homes, on up to multiple housing developments for rural migratory workers. The program is far ranging and very flexible.

There are 140 county offices for Farmers Home Administration in Texas, several of which are multiple county offices. In San Angelo, the FHA Supervisor is Carson Bivin, 7 West Twohig Building, phone 655-5518, and it is suggested that interested persons inquire directly of their County FHA Supervisor for information and loan applications.

Manager Elton McGinnes of Southwest Texas Electric Cooperative, Inc., in Eldorado, phone 853-2544, will also be glad to assist any one in this field.

40th Mias Amigas Meeting Coming Up

Friday and Saturday are the days set for the 40th annual meeting of the Mias Amigas Club, composed of those students who attended the Eldorado schools prior to 1930.

The usual good turn-out of members and guests is expected. Homes for out-of-town guests are provided and Mrs. Lavita Brooks and Miss Ruth Baker are hospitality chairmen.

Friday morning at 10:00, ringing of the old school bell will mark the official start of events. At 10:30, a business meeting will be called to order in the Memorial Building. At 12:00 noon, luncheon will be served to members and guests.

Friday afternoon, from 3:00 to 5:00, an Open House honoring Friends of Mias Amigas will be held in the home of Mrs. L. W. Steen. At 7:00, a sandwich supper will be held on the courthouse lawn and at 8:00 the Evening Program will be directed by Mrs. Ida C. Neill.

For Saturday morning, the Coffee and Closing Business Session is set for 9:00 to 10:00 in the home of Misses Miltia and Katherine Hill.

Construction Costs Hiked 7.5% Last Year

Austin, Tex.—Construction costs across the nation rose an average of 7.5% for the year ending March 31, as compared with a 6% increase in the cost of construction labor and materials for the year ending March 31, 1969. These figures were released by the Dodge Building Cost Services department of McGraw Hill Information Systems Company.

Increased costs for land, land development and higher wages account for much of the recent increase in construction costs. Building material prices were up only 1.8% at the March date in 1969 and 5.9% as of March 31st of this year.

Tom Yager, president of the Lumbermen's Association of Texas, an 84-year-old non-profit trade association, advises prospective home buyers not to put off purchasing a new house. "Many families are hesitant about shopping for a new home because of higher interest rates and the talk of 'tight money', but wise buyers will realize that increasing construction costs will make a home more expensive in the future. The time to buy is now," Yager urges.

Joint Bridal Shower Set Friday Afternoon

A Gift Tea honoring Mrs. Allen Belk and Miss Sherry Littlejohn, bride-elect of Jimmy Belk, is set for this Friday, June 26, in the Methodist church educational building. Calling hours will be from 3:00 to 5:00 p.m.

Hostesses will be Meses. Steve Blaylock, Leonard Lloyd, Billy F. Blaylock, David Lloyd, Walter Powell Jr., Billy Jack Reynolds, Genelle Johnson, Delbert Edmiston, Elton McGinnes, Victor Sauer, Nick Jurecek, W. C. Parks, Jack Wade, Milton Faught, W. V. Lux, Joe Kreklow, Evelyn Stigler, Kenneth Richardson, Edgar Sauer, Ronnie Sauer, E. H. Sweatt Sr., Thaxter Faught and Misses Lynda McGinnes and Nancy Jurecek.

Miss Sammye Mayo has been visiting her parents, Mr. and Mrs. John Mayo, after teaching this past year in a school in the Azores.

Post Script

Work is continuing on the building just north of the bank that will house Olson's Laundry starting sometime in July.

Phil Olson, Mike Olson and P. S. Dudley have been at work along with electricians and plasterers to ready the building for its new business establishment.

The building is owned by Mrs. Ruth McGinnes.

—ps—
Cement tile and re-rod have been unloaded at the hospital where work on a 16-bed addition to the nursing home wing will get under way in the near future.

Oscar Wagner Construction Co. of San Angelo is general contractor.

The rains of recent days have presumably delayed the start of work.

—ps—
On page 2 of this issue, Billy Gene Edmiston reports in an ad that his Handy Hardware Store is now dealer for Maytag automatic washers, dryers, dishwashers, and garbage disposers.

Two of the washing machines are now on display in the store.

—ps—
The woman who lost a set of car keys may claim them at Eldorado Variety.

—ps—
Gibbert Lowe of Lowe's Repair Shop is having to take a two-week enforced vacation and hopes his regular customers will bear with him until he can be back on the job.

It came about as result of eye surgery which he had done in the Clinic-Hospital June 15th. He returned home last Saturday but he is now wearing an eye patch and figures it will be two weeks before he can do much work.

—ps—
BAND RECORDS ARRIVE
Persons who ordered records made by the Eagle Band, may get them at the bank, during bank hours, or from Sarah McCravey at her home after hours or on the week end.

To Medical School

GORDON SCHRANK

Two Angelo State University seniors who will graduate in August have been admitted to the University of Texas Medical Branch in Galveston.

Gordon Schrank, Eldorado, and Charles E. (Chuck) White, San Angelo, have been approved for admission to the UT Medical Branch this fall. They are to receive their degrees, with majors in biology, from Angelo State in August.

Schrank also has been awarded a \$3,000 teaching assistantship in the UT Medical Branch. He will study toward both the M. D. and Ph. D. degrees. He is the son of Mr. and Mrs. Raymond A. Schrank of Eldorado and graduated from Eldorado High School in 1967. He has been president of the ASU Biological Society since last fall.

Gospel Meeting Set At West Side Church

A week-long Gospel Meeting will start this Sunday at the West Side Church of Christ with Virgil Scott of El Dorado, Arkansas, in charge. Meetings will be at 8:00 each night. Dinner will be served at the Memorial Building both Sundays at 12:00 noon.

All members and friends of the church are invited, it was stated.

Elijah B. Mace Dies

Mr. and Mrs. J. H. Mace were called to Fort Worth over the week end where funeral services were held Monday for his father, Elijah B. Mace, who died at age 86.

The funeral was held Monday afternoon at the Owens-Brumley Chapel, with interment at Kennedale.

The elder Mr. Mace is survived by daughters, Mrs. Roxie Thornton and Mrs. Elsie Holloway, both of Fort Worth; sons, A. L. Mace of Eugene, Ore., and J. H. Mace of Eldorado, Tex.; 8 grandchildren; 13 great grandchildren; two brothers and one sister.

The Maces returned home Monday night.

Church Youths Staging Car Wash Today

The Eldorado United Youth Fellowship is staging a car wash Thursday, June 25, beginning at 8:30 a.m., at the Griffin Gulf Station.

The purpose of the car wash is to raise funds for a UYF choir tour to the Corpus Christi area in July. Your patronage will be helpful and will be appreciated.

The tour will be directed by Mr. Pat Ragsdale and will be accompanied by parents of the various churches.

CHURCH WORKERS THANKED

Our thanks go to the teachers and workers in our Vacation Church school this year, which was a joint venture of the Methodist and Presbyterian churches:

Director, Rev. Bobby C. Palmos.

Assistant Directors, Mrs. Ed Meador, Mrs. B. C. Palmos.

Kindergarten, Mrs. Bob Bland, Mrs. John Pitts, Carolyn Page, Randy Yates.

Primary, Mrs. Sherwood Barker, Vickie Preston.

Junior, Mrs. Lynn Meador, Peggy Hill.

Music, Mrs. Oliver Teele, Karen Hight, Gene Newport.

Kitchen & Fellowship, Marian Bland, Jeanne McCravey, Sherwin Jackson, Jennie Sue Martin, Patti Olson, Sheila Redwine.

McCormack Retires As Lions Club President

Boss Lion A. G. McCormack presided his final time at the meeting this week of the Eldorado Lions Club. The meeting was held at noon Wednesday in the Memorial Building and was a business session.

L. D. Mund will officially take over the reigns of the club at the meeting on July 1st. He and his slate of officers were installed at a ladies' night meeting June 15th by Harry Wisehart of Junction.

As McCormack retires, he can look back on a busy club year that has included the usual money-raising events of Halloween candy sale, broom sale, and the queen's contest and program.

Patients Admitted

To Local Hospital

Between June 16 and 23, 1970:
Vernon Hazelwood
Bonnie Lowe
Stacy Lynn Lowe
Wenona Isaacs
William Fry
Sarah Vargas
Baby Boy Vargas.

Patients Dismissed:

Sam A. Whitten
Minnie Reynolds
Mark Bland
Vernon Hazelwood
Roy Andrews
Essie Andrews
Wenona Isaacs
Eugenia McWhorter
Kitty Buchanan
Bonnie Lowe
Stacy Lynn Lowe.

E.H.S. EXES SOUGHT

The graduating class of 1960 is planning its 10 year reunion on Saturday, Aug. 1st, and we have been unable to locate the following people:

Jerry Nolen
D-metrio Belman
Bill Reesor.

If you know the address of any of these, please contact Mrs. Sandra Helmers, Sonora Rt., Christoval, Texas 76935.

Welcome Rain Visits County Over The Week End

After a week or more of dry, 100-above days, Eldorado citizens were aroused early Sunday morning to the sound of a hard-driving rain shower.

It continued intermittently all through the day and again Sunday night and Monday. Totals for the period for city of Eldorado averaged about 1 1/2 inches.

For the county reports show precipitation very spotted—from half an inch up to perhaps 3 inches. A few figures:

Parker Bros. Bailey	Ranch, nearly	3.00
Aaron Steward		2.60
H. A. Belk	over	2.00
W. V. Lux		2.70
Clemens Sauer		1.60
Henry Moore		0.70
George Humphrey		0.80
C. O. Bruton		0.80

Paper To Print Old Time News

Publication of a new monthly newspaper, reporting news 70 to 170 years old, has been announced by the publishers, Western Horizons, Inc., Box 3508, San Angelo, Texas 76901.

Called the Pioneer News-Observer, it is designed to recreate the heritage and struggles, the humor and excitement of our western ancestry, say the publishers.

Editor and one of four co-owners of the monthly is Elmer Kelton, well-known writer of western and historical fiction and associate editor of the West Texas Livestock Weekly, headquartered in San Angelo. Kelton has written many novels, one of which was named best western novel of 1957.

Managing editor Jerry Lackey, present editor and publisher of the Sheep and Goat Raiser Magazine, is also co-owner along with Kelton, E. R. Talley of San Angelo, president of Western Horizons and Forrest Salter of Kerrville, vice president. Lackey is author of two books. Salter is publisher of the Kerrville Mountain Sun.

The new publication will concern itself with news stories taken from old newspapers and periodicals written in the period of 1801 to 1901.

"In a tabloid format, our newspaper voice is aimed at events which shaped the west," said Lackey.

"There are many magazines published to give readers stories of the old west," he went on, "but as far as we could find out, ours is the only newspaper devoted solely to reporting news events of the old west in newspaper style."

Did You Know That—

The Historical Society met Friday June 19, 1970. We had a good crowd and some interesting material on the old Forts. Mrs. Ford Ogleby served lemonade and cookies. Our next meeting will be July 17, 1970.

In June of 1909 the two graduates of Eldorado High School were Misses Essa Alexander and Bertha West.

There were ten grades in the school in 1909 and a total of 201 pupils.

In July of 1909 the Eldorado Independent District voted \$20,000 worth of bonds to erect a brick school building.

Texas to Have Most Miles of Interstate Highway

Austin, Texas.—Texas has more miles of Interstate highways open to traffic at this moment than any other state and will have when the giant national system of super-highways is completed sometime in the mid-1970's.

The designated Interstate network in Texas will total 3,170 miles—more than any other state, naturally.

As of May 31, Texas had 2,283.84 miles of Interstate highways open to traffic.

That happens to 2.84 miles more than California (with the second-largest designated mileage) will have when the network is complete.

The U. S. Bureau of Public Roads reported on March 31 that California had 1,632 miles open to traffic of a 2,281-mile designated Interstate system.

The Texas mileage includes sections of Interstate highways complete to full Interstate standards and others on approved locations which are complete to standards deemed adequate for present traffic volumes.

Assuming that construction money from the Federal Highway Trust Fund is received on schedule, the Texas portion and the national system will be complete sometime in the mid-1970's.

The trust fund was set up at the beginning of construction on the

Interstate System in 1956. It is a depository for federal levies related to the operation of motor vehicles, including the 4-cents-per-gallon federal gasoline tax. From the trust fund comes 90% of the cost of building the Interstate.

The other 10% comes from state funds. In Texas, this revenue is derived from state highway user taxes. Mainstay of state financing is the 5-cents-per-gallon motor fuel tax, the lowest in the nation.

In addition to matching Federal Highway Trust Fund apportionments for construction of Interstate Highways, State funds also are used to match federal trust fund monies on a 50-50 basis for construction of some primary and secondary highways. In addition, a sizeable amount of highway work in Texas is done with pure state funds.

The state pays 100% of all maintenance on Interstate US- and State-numbered highways and Farm and Ranch to Market roads.

Thus, highways are supported in Texas by those who use them.

In a sense, however, good highways pay for themselves. In the case of the Interstate system, Texas already is enjoying many benefits from the mileage already in use.

Some of these benefits are lower operating costs, reduced travel time, increased safety and a dra-

matic decrease in driver strain and fatigue. Highway users are expected to save about \$11.5 billion a year in such reduced costs when the system is completed. At that rate, American motorists will save in less than five years a sum equal to the entire cost of the Interstate system.

There are other advantages. Business and vacation trips take less time, driving is more comfortable, deliveries of foodstuffs and other goods are faster and more efficient and job, recreational and educational opportunities are more accessible.

Unquestionably, the most important benefit from the Interstate system is the lives saved. The Federal Highway Administration has reported that the fatality rate on Interstate highways throughout the nation is about 2.99 persons for every 100 million vehicle miles of travel. That compares with 5.62 fatalities for 100 million vehicle miles of travel on other roads.

Future progress on the Interstate system is keyed to the future of the Federal Highway Trust Fund. The fund's life was linked to the estimated time needed to complete the system and the fund is presently scheduled to expire in 1972.

However, the system cannot be completed on that date. For one thing, the original system has been

expanded by 1,500 additional miles.

Also, of course, the cost of practically everything has risen since 1956.

In addition, design standards are higher than before—more safety and convenience are being built into the system. It actually will be better designed than originally conceived.

Congress has extended authorization for the Interstate at an annual level of \$4 billion through 1973 and a final authorization of \$2.2 billion in 1974. If the authorizations are to be funded, the Highway Trust Fund will have to be extended past the 1972 expiration date. The matter is pending before Congress now.

Need is clear for the Interstate system—and better highway facilities of all types. Motor vehicle registration in the U. S. has soared from 65 million in 1956 to almost 105 million today and probably will hit 158 million in 20 years or less.

The Interstate system will provide much-needed highway capacity to handle the ever-increasing volumes of traffic. It is estimated that the system will carry 20% of the nation's traffic, even though it constitutes only a little more than 1% of the total mileage of roads and streets.

Clean Up Your MEDICINE CHEST

12 Safety Rules To Prevent Accidental Poisoning

1. Keep all medicines and household poisons (cleaning fluids and insecticides) out of the reach of children.
2. Never refer to medicine as "candy" to your child.
3. Read all labels carefully and follow directions.
4. Don't take a medicine prescribed for someone else.
5. Never increase the dosage or the frequency of a dose of medicine—unless your doctor suggests it.
6. Throw out the contents of all old medicine bottles.
7. Keep internal medicines in one cabinet and external medicines and poisons in another.
8. Do not place poisonous liquids in soda bottles.
9. Throw out all unlabeled medicines and containers.
10. Do not take or give medicines in the dark—when you may be sleepy.
11. Protect your skin when using insecticides, solvents or cleaning agents. Remember some products can be absorbed through the skin; use as directed.
12. If someone takes a potentially toxic substance in your home, call a physician immediately. Don't wait for symptoms to appear.

Robert F. Frost, Jr., came in Sunday for a week's visit with his mother, Mrs. R. F. Frost. His home is in Severna Park, Maryland.

What's right about America?

Today, the surest means of a book becoming a best seller is for the author to highlight and denounce bitterly the faults of this country. The same can be said of television and the movies, which prefer in these modern days to depict the seamier side of life in America.

But there's hope. As I have moved across this state, I have sensed that our people are growing weary of gloom. It's becoming easier to strike up a conversation on what's right about America.

I always suggest that there are a lot more level heads in this country than we are sometimes led to believe. There are a lot more decent, law-abiding citizens than there are criminals and cheats and sharks. There are a lot more young people in the "now" generation who want to improve America than the handful of radicals who want to burn it to ashes and start all over.

I can understand why the "majority" has broken its "silence." There's a growing impatience with agitation and controversy. But I feel we should continue to approach our nation's problems with a cool head and an open mind.

I've listened to the voices of dissent. I think I know what they're asking of their government.

One thing they want is confidence. They want the assurance that their public officials have the courage to meet the issues of the 1970s with imagination and integrity, and not with some form of "old politics" that thrashes around with problems but never quite locates the workable solutions.

It was my desire to answer this urgent need that prompted me in January to seek the office of United States Senator.

Paid for by Bentsen for Senator Com., John Mobley, Chrm.

Time To Stock Pantry With Home Made Fruit Goodies

College Station, Tex.—Jelly, jam, conserve, marmalade and preserves can all add zest to meals. Most of them also provide a good way to use fruit not at its best for canning or freezing, such as the largest or smallest fruits and berries and those that are irregularly shaped, Gwendolyn Clyatt, Extension consumer marketing specialist, notes.

"Surprise your family with a batch of sparkling, colorful jellies, jams or preserves," Mrs. Clyatt suggests. "You can make good use of fresh fruits now available and others coming to the market soon."

Basically all of these products are much alike; all of them are fruit preserved by means of sugar, and usually are jellied to some extent, Mrs. Clyatt said. Their individual characteristics depend on the kind of fruit used and the way it is prepared, the proportions of different ingredients in the mixture and the method cooking, she noted.

Many have asked what the differences are among preserved fruit products.

"Jelly is made from fruit juice; the product is clear and firm enough to hold its shape when turned out of the container," she said.

"Jam, made from crushed or ground fruit, tends to hold its shape but generally is less firm than jelly."

"Preserves are whole fruits or large pieces of fruit in a thick syrup, often slightly jellied."

"Marmalade is a tender jelly with small pieces of fruit distributed evenly throughout; a marmalade commonly contains citrus fruit."

"Preserves are whole fruits or large pieces of fruit in a thick syrup, often slightly jellied."

Pectin, acid and sugar form the jelly trio.

"Pectin is the natural substance found in fruits which makes the jelly 'jell,'" Mrs. Clyatt said. "The amount varies in different kinds of fruits, and to take the guesswork out of present-day jelly making, natural pectin is carefully extracted from apples or the skins of citrus fruits, refined, concentrated and standardized to specific jelling strength."

"The two commercial forms are liquid fruit pectin and powdered fruit pectin. These differ slightly in composition and can't be used interchangeably. Powdered fruit pectin won't dissolve in high sugar concentration and must be added to the fruit before the sugar. Liquid fruit pectin, on the other hand, must be added last of all,

after the fruit and sugar have boiled."

Acid is needed for flavor and for gel formation, Mrs. Clyatt said. The acid content varies in different fruits and is higher in underripe than in fully ripe fruits, she noted. With fruits that are low in acid, lemon juice or citric acid is commonly added in making jellied products, Mrs. Clyatt explained.

"Sugar helps in gel formation, serves as a preserving agent, and contributes to the flavor of the jellied product," she said. "It also has a firming effect on fruit, a property that is useful in making of preserves."

"Because we can't calculate accurately the fruit's content of sugar and pectin, standardized recipes are essential. Guesswork is foolhardy and can be costly; it's best to select recipes from reliable sources and follow instructions to the letter."

Experiment a bit by adding flavorful herbs and spices to jams and jellies or substitute flaked coconut in conserves for the nuts called for in the recipe, but never change the specified amounts of sugar, prepared fruit, and fruit pectin, Mrs. Clyatt warned.

May Runge Bride Of Mr. Kisco

Miss May Runge and Michael Jay Kisco, both of San Angelo, were wed Sunday, June 7, in a ceremony performed at the Runge ranch home. Judge John M. Winslow, the bride's uncle, officiated.

The bride is the daughter of Mrs. James Forrest Runge and the late Mr. Runge.

Honor attendants were Mrs. Jene W. Moore of Pueblo, Colorado and Rick E. Kisco of San Angelo.

Following a wedding trip to Santa Fe, N. M., the couple will be at home at 1417 Mackenzie in San Angelo where the bridegroom is employed in the sales division of West Texas Utilities Company.

Fern Parrent has gone to work as waitress at a cafe in Sonora.

Mrs. Robert F. Frost, Robert F. Frost, Jr., and Mrs. F. M. Bradley went to San Antonio Sunday afternoon to meet an Eastern Airlines flight bringing Aaron Shewbart, age 5, for a month-long visit with his grandmother, Mrs. Frost. Aaron's home is in Springfield, Va.

Mr. and Mrs. George Graf and family have returned to their home in Illinois after visiting here with his parents, Mr. and Mrs. Herbert Graf.

TEXAS GOVERNOR Preston Smith discusses safety afloat with boating enthusiasts and state safety leaders as he proclaims June 28-July 4 Texas Safe Boating Week. J. M. Beall, left, Austin, Water Safety Services, Texas Parks and Wildlife, shows a coast guard approved life vest, as the Governor signs the official proclamation. Lloyd F. Palmer, second from right, Austin, General Manager, Texas Safety Association, watches as Jack Ezell, Austin, Commander Austin Power Squadron, exhibits another of the required life saving items for boat owners in Texas, the fire extinguisher. Texas Safe Boating Week is part of a nationwide campaign to call attention to need for increased safety on the nation's rivers, lakes, and other waterways.

Boat Crashes Up In Texas
Austin, Tex.—The president of the Texas Safety Association says boating accidents in Texas are becoming a problem of major concern.

Dallas attorney George William Perry said, "Texas now ranks 2nd in the nation in the number of fatalities that occur as the result of boating accidents. Only California has a worse record."

The leader of the statewide safety group said that during 1969 alone, the Water Safety Services Division of the Texas Parks and Wildlife Department recorded 204 boating accidents in which 99 persons were killed.

The TSA president called attention to the fact that Texans are taking to the water for recreational activities more and more each year. Perry said that nearly a quarter of a million pleasure boats have been registered in Texas this year.

Perry stated that the three summer months were the most dangerous time of the year for boating, but also stressed that most week-ends are also high hazard periods.

Through May 1 of this year, there were 88 boating accidents on Texas waterways in which 27 persons lost their lives.

Perry said the loss of life from boating accidents could be reduced dramatically if Texans would follow a few simple rules of safety while afloat.

The Texas Safety Association leader said there is one general rule of boating safety, "It is as simple as A. B. C., 'Always be careful.'"

Perry also outlined what he called some other basic rules for safer and more pleasurable boating activities.

1. Always provide required life

saving equipment for boats. Under state law there must be an approved flotation device for every person aboard.

2. Be prepared to fight fires. State law also requires each powered boat to be equipped with a fire extinguisher.

3. Take no chances with rough weather. Respect wind and storm warnings. The best policy is to stay ashore if bad weather threatens. If caught out in rough weather, don't life saving devices, head for the nearest sheltered shore, and above all keep calm.

4. Always observe the capacity rating of the boat. Overloading creates a greater danger of capsizing.

5. When waterskiing, consideration for others is a must. Don't speed past anchored or docked boats. While towing a skier there must be at least two responsible people in the boat, a pilot and an observer who can watch the skier.

Soil, water and plant conservation must begin with the soils. The soils determine to a large extent the productivity of all land. The application and maintenance of all the soil, water and plant conservation practices needed on the land helps keep it in its highest productive condition.

Crop residue use is one of the essential conservation practices on all cropland in the Eldorado-Divide S & W CD. Crop residue use is utilizing plant residues left in cultivated fields by incorporating them into the soil or leaving them on the surface during the critical erosion period.

The use of crop residue by leaving most of it on top of the soil helps conserve moisture, one of the main elements needed for crop production. The crop residue helps hold the water on the land where it falls and permits the water to go into the soil. The infiltration rate of the soil is increased and more of the water from rain of high intensity is stored in the soil. The loss of soil is reduced by good crop residue. The tilth of the soil is also improved when crop residue is used as needed in a conservation cropping system.

The best use and benefits from crop residue is attained when most of the residue is left on top of the soil. By leaving the residue on top of the soil it helps hold the water where it falls and prevents moisture loss by evaporation.

Soil erosion is reduced since the soil is protected from the direct force of the rain drops and the direct force of high winds. Generally, crop residues decompose faster when left on the surface of the soil; this being due to the fact that any moisture received reaches the crop residue and helps decompose it. Crop residues completely turned under do not protect the soil from wind and water erosion to the extent that residues left on top of the soil do.

All cropland should have crop residue applied as often as needed to meet the needs of the land. Soils can not be kept in their best productive state without the application of crop residue as needed. Therefore, farmers need to plan and follow a cropping system, whereby residue producing crops will be on the land when needed and managed to attain maximum benefits.

By practicing good crop residue use, applying and maintaining all the needed soil, water and plant conservation practices, soil can be kept in its best productive condition.

Assistance in planning and applying a conservation plan on all agricultural land is available from the Soil Conservation Service. Cost-share in applying enduring type conservation practices is available through the Great Plains Conservation Program administered by the S. C. S. Cost share assistance is also available from the Schleicher County ASCS office.

Lint Filter Agitator
Famous Maytag thorough, yet gentle action. Built-in under-water lint filter plus automatic softener dispenser.

Automatic Water Level Control
Saves gallons of water! Matches water level to size of load. Post-fill ends water pressure problems.

Family-Size Tub
Built to handle family-size loads. Maytag Washpower™ Automatics get big or small loads uniformly clean.

Hot, Warm or Cold Wash Temp
Pushbutton selectors give you the right temperature for all your laundry—work or play clothes, delicates or dungaries.

GREAT NEW 525 WARRANTY*
5 year cabinet warranty against rust 2 years on complete washer 5 years transmission assembly

MAYTAG * Free repair or exchange of defective parts or cabinet if it rusts. Free installation of parts is the responsibility of selling franchised Maytag dealer within first year; thereafter installation is extra.

- 3 water temps • Positive metered fill • Full-cycle safety lid stops action in seconds • Swirlaway draining action in lint remover tub • Automatic unbalance load protection • Rust-proof lid ball hinges • Rugged proven helical drive • Virtually indestructible pump • Strong adjustable leveling legs • Famous Maytag Dependability!

Food & Fiber Pavilion

Texas State Fair at Dallas may be losing an agricultural building but it is gaining a "Food and Fiber Pavilion."

Commissioner John C. White has announced that the Texas Department of Agriculture and the State Fair organization will cooperate in refurbishing the old building on the north side of Fair Park in Dallas and in operating it during the State Fair in October.

Planning "to create a pavilion devoted to the agribusiness community" as Commissioner White said, has been under way sometime, and work is beginning to turn the old "pumpkin" into a colorful "chariot."

Exterior face-lifting will be accomplished mainly through the use of brightly-colored surface design, rather than structural change, but the interior will undergo major change.

A theater is planned in one end of the long mall for use in style and fashion shows that will give Texas fibers full exposure, and provide for cooking demonstrations, films, and other entertainment.

Firms that process and market farm and ranch products will have exhibits and demonstrations in the large hall that will be eye-openers to fair-goers.

The exhibits and demonstrations will be right in line with the Texas Department of Agriculture's Texas Agricultural Products (TAP) promotion program which has gained wide acceptance in Texas and elsewhere, Commissioner White said.

FINISHES SUBMARINE SCHOOL (FHTNC) San Diego, June 12—Navy Seaman Apprentice Howard L. Roden, son of Mr. and Mrs. August L. Roden of Eldorado, Tex., was graduated from Submarine Warfare School, San Diego.

In Eldorado on Saturday to attend a party for their niece, Toya Jo Finley, were Miss Anna Pearl Finley and Mrs. H. T. Finley of San Angelo. Also, Mrs. Bob Barber and Mrs. George Stanley Finley were here for this event.

Power Tool Quiz

There are many do's and don'ts when working with electric power tools. Mistakes often end up in mishaps and can be serious. Take the following quiz offered by the Power Tool Institute and see if you're the do-er or don't-er.

1. When using electric tools, it is safe to stand on wet ground or grass—as long as you wear rubber footwear. **T F**
2. If your power tool plug has three prongs and the outlet is a two prong model, the third prong can be removed to fit. **T F**
3. The cord on a power tool is made so that it can double as a handle or hanger. **T F**
4. The proper place for the electric hedge trimmer cord is over the shoulder when cutting. **T F**
5. Double insulated power tools and those with three-prong plugs are equally safe. **T F**

ANSWERS:
 1. NO. Always wait until the ground is dry!
 2. NO. The tool will not be grounded without the prong.
 3. NO. Never put unnecessary pressure on the cord—it can loosen its connections.
 4. YES. This will prevent you from accidentally cutting it.
 5. YES. Double insulated tools and three-prong grounding systems help to prevent the possibility of electric shock.

COUNTY AGENT'S COLUMN

Schleicher County Agricultural Agent

The safe use of dusts and sprays can make them even more effective farmin and home gardening tools.

Here are suggestions on items which should never be overlooked when insecticides are used. Read and understand label instructions before using sprays or dusts. Keep them out of the reach of children, pets and irresponsible persons.

Store them outside the house away from food and feed, and preferably under lock and key, and always in their original containers.

Never smoke while spraying or dusting. Avoid inhaling the material, and if the label directs, wear protective clothing and mask. Avoid spilling sprays or dusts on the skin or clothing. Should it happen, remove contaminated clo-

thing immediately and thoroughly wash the skin.

After completing the job, wash the hands and face and change to clean clothing. All clothing should be laundered after each spraying or dusting job.

Make sure that food and water containers are covered when applications of pesticides are being made around livestock or pet areas. Do not contaminate fish ponds.

Separate equipment should be used for applying hormone-type herbicides in order to avoid accidental injury to susceptible plants.

Empty containers should be disposed of in a manner so they will pose no hazard to humans, animals or valuable plants.

And finally, observe label directions and warnings on keeping residues on edible portions of plants within the limits permitted and if symptoms of illness occur during or shortly after a spraying or dusting job, call your physician or take the patient to a hospital. It is important that medical authorities know the name of the material being used.

Today when Grandma sits at the spinning wheel, chances are she's visiting Las Vegas.

The manner in which fish are cleaned and handled from the time they are caught until they are cooked greatly affects their flavor and eating quality.

The most important factor in proper handling of fish is keeping them alive until they are to be cleaned. This can be done by the correct use of a stringer or by submerging them in a burlap bag or metal fish basket in the water.

One of the most common mistakes is improper stringing. This problem can be solved by passing the point of the stringer through the jaws of the fish instead of the gill cover. First, pass the point through the thin skin just behind the lower jaw bone and then up through the upper jaw. Stringing in this way helps keep the mouth closed and does not interfere with functioning of the gills.

Proper cleaning of the fish should begin as soon as possible after the catch is made. Caution should be exercised to see that all of the entrails are removed and the fish thoroughly washed after cleaning.

Skinnering of all fish, whether catfish, bass or sunfish, often helps remove the distasteful flavor that fish occasionally have. An inexpensive fisherman's made for this purpose is almost a necessity for fishermen.

Pack the fish in ice after cleaning if the trip home involves many miles. And if they are to be frozen, see that they are properly packaged to prevent freezer burns. And be sure the fish are cooked to the "well done" stage before they are served.

Before television, nobody knew what a headache looked like.

Calibrating spray equipment, to make sure it is putting out the amount of chemical you think it is, takes little time but is very important.

Calibrating insures that costly chemicals are not wasted; that excessive amounts of chemical are not present to harm the environment; that damage to crops and livestock is prevented; and pest control is most effective.

The first step in calibrating your sprayer is to make sure it is properly mounted on the tractor. Then thoroughly rinse with clean water, and remove and clean all nozzles and screens.

Use an old tooth brush or a toothpick to clean nozzles because the size and shape of the openings are very critical and must not be damaged. Flush the sprayer thoroughly with nozzles off, then replace the nozzles and check for leaks in connections while the sprayer is operating.

Nozzle spray patterns should then be checked. Patterns should be even and without any large streams or drops. Nozzles wear rapidly under certain conditions and especially where wettable powders are used. If one of a set needs changing, it is a good practice to change them all.

After cleaning, the spray rig is ready for calibration. There are many ways to do this job, but the best is in the field with the same conditions the sprayer will be working under.

Fact Sheet L-764, Pesticide Application Ground Equipment Calibration Guide, available at the county Extension office, should be most helpful in making the final sprayer adjustments.

The connecting link between the animal and vegetable kingdoms is stew.

In Those Days
Compiled From Success Files
ONE YEAR AGO

June 26, 1969—Funeral services were held in San Angelo for the Rev. Gail Dwain Callis, 37. He formerly had charge of a church here.

James Sidney Ball was hired new ag. teacher and Mrs. Ora Deal was named 4th grade teacher, in the local schools.

Miss Micheale Gene Hardegree and Walter Scott McGregor were married in Sonora.

FIVE YEARS AGO
June 24, 1965—Funeral services were held for Lon M. Hoover, 37. He was a pioneer resident of this area and operated Hoover Drug for many years.

Mr. and Mrs. C. O. Neff went to Clyde to attend funeral services for her uncle.

Bob Anderson died at 71.

Work was under way in Sunset Acres on new houses for W. R. Bearce and Bob Sykes.

Rev. D. G. Salter addressed the Lions Club on the topic of "Citizenship."

Rebecca Mund and Mike Moore were married and left for New Orleans on their wedding trip.

Mr. and Mrs. Floyd Farrington of San Angelo observed their 40th wedding anniversary.

Work was going on on General Telephone's new building to house dial equipment and the equipment was already arriving for installation.

Elton McGinness and L. D. Mund attended a Group 4 Managers and Bookkeepers Meeting in Abilene.

12 YEARS AGO
June 26, 1958—Jack Ratliff purchased an 8-section ranch near Pinon, New Mexico.

Announcement was made that the Reynolds community would no longer use their old school building as a voting place but would use the Northern Natural Gas Co. office.

Glenn McDonald was admitted to the Veterans Hospital in Big Spring for medical treatment.

Jack Halbert Jr. became a butane dealer.

City property along So. Divide street was being appraised for re-routing of the Sonora highway.

Ernest K. Nimitz was high individual in judging in the Sonora Wool Show.

Alfred and Cora Stevens observed their Golden Wedding.

Word was received here of the death in Tucson, Arizona of Mrs. W. W. Howard, former local resident. She was the former Maude Bird.

Tony Kerr's drug store was having a one-year anniversary sale. It was a year earlier that he bought the establishment from C. N. Shaw.

35 YEARS AGO
June 28, 1935—The Lions Club were making plans for their annual rodeo set for July 25th.

Van McCormick, county relief administrator, reported that the relief roll of this county had been reduced to the low level of 18 persons.

The Mias Amigas club was having their meeting with two noon meals being served in the West Texas Cafe.

Six barrels of Blue Barrel Soap cost 25c at Wright's Cash Store. Barrel vinegar was 30c a gallon, and 10 lbs. of potatoes were priced at 25c.

Mrs. Hal Ramsey and children of Laredo were guests of Mrs. J. D. Ramsey and Mr. and Mrs. Seth Ramsey over the week end.

Rev. and Mrs. N. P. Wilkinson and Miss Maxine Wilton attended the Presbyterian encampment at Kerrville.

Mrs. O. R. Burden and son of Wichita Falls are visiting her mother, Mrs. Tom Johnson.

Mrs. Ben Hext won high club and Mrs. Van McCormick high guest as Mrs. Elizabeth Hefley was hostess to a meeting of her bridge club. Others present were Mrs. L. H. Ballew, Mrs. Lewis Whitten, Mrs. J. C. Crosby, Mrs. Oscar Martin, Mrs. J. W. Hoover, Mrs. Otis Buie, and Mrs. K. J. Garey, Mrs. L. T. Barber, and Mary Hefley.

Youth Of County Are Invited To Retreat

Mr. Pat Ragsdale, music and youth director of the First Baptist Church, announces that plans are being completed for YOUTH OF THE ENTIRE COMMUNITY to go on a retreat to the Blaylock ranch at Kaffir Friday and Saturday of this week.

Activities will include all kinds of wholesome recreation. There will also be worship and devotional activities. The main speaker is Mr. Cecil Dunning, a psychologist employed by The Texas Education Agency.

Departure will be from the First Baptist Church at 1:30 p.m. Friday. They will return Saturday evening.

All those going are asked to notify either Jean Rountree or Gay Lynn Richardson.

Everyone is asked to bring his own bedding along with clothing and personal articles.

ALL YOUTH ARE INVITED! SINCERELY, CORDIALLY! WE MEAN IT!

Community Calendar

June 26, Friday. Shower honoring Belk brothers and brides, 3:00 to 5:00 p.m., at Methodist church educational building.

June 26-27. Mias Amigas meets.

June 28 to July 5. Gospel Meeting at West Side Church of Christ. Services each night at 8:00 o'clock.

July 1, Wednesday. Lions Club meets 12:05, Memorial Building.

July 2, Thursday. Hospital Auxiliary meets 9:30 a.m., dining room.

July 2, Thursday. Am. Legion post meets.

July 9, Thursday. Masonic Lodge.

July 13, Monday. OES meets.

CARD OF THANKS

We would like to express our sincere thanks and appreciation to those who have remembered us in their prayers during the long illness and loss of our dear loved one. All the kind words and deeds done for us shall be remembered always. May God bless each of you.

NOTICE OF INTENTION OF THE COMMISSIONERS COURT OF SCHLEICHER COUNTY, TEXAS

To Lease for oil, gas and other mineral development one tract of school land owned by it in Gaines County, Texas.

NOTICE is hereby given of the intention of the Commissioners Court of Schleicher County, Texas, to lease for oil, gas and other mineral development at 10 o'clock A. M. on the 13th day of July, 1970, at the Commissioners Court of Schleicher County, Texas, in the town of Eldorado, Texas, to the person or firm submitting the best bid, the following described land situated in Gaines County, Texas, to-wit:

All of Labor 11, League 283, Schleicher County School Land, Gaines County, Texas, containing 177.12 acres, more or less.

No lease will be executed for a primary term of more than ten years from date of execution thereof, nor with a royalty to the lessor of less than 1/8 of all oil, gas and other minerals produced and saved, subject to reduction on the basis of the interest covered by the lease. Such lease may contain a pooling clause, as authorized by Article 5421n, Revised Civil Statutes of Texas, 1925, as amended. Sealed bids for such lease will be received and considered at the time and place specified and all bids must be in writing, sealed and received by the Commissioners Court on or before the time and place above specified. At such meeting a lease for such terms as the Commissioners Court may then determine will be awarded to the highest and best bidder submitting a sealed bid therefor, provided, however, that if in the judgment of said Court, the bids submitted do not represent the fair value of such lease; all bids may be rejected.

This notice is executed and published pursuant to a resolution of the Commissioners Court of Schleicher County, Texas, passed at a regular meeting of said Court on the 8th day of June, 1970, and is made pursuant thereto and to the applicable statutes of the State of Texas.

J. T. Ratliff,
County Judge,
Schleicher County, Texas

Attest:
J. P. Enochs
County Clerk

(Jun 18-25—Jul 2)

ELDORADO LODGE

No. 890 — A. F. & A. M. Stated meeting 2nd Thursday in each month, at 7:00 p. m. from Oct. 1 to April 1, and at 8:00 from April 1 to October 1. Visiting brethren welcome.

For Mothers Only

Mother's Day comes but once a year... but if it finds you storing your presents in the attic, it may come once too often. The gap between what you want and what you get is often vast.

If you're the type of mother who always gets stuck with rhinestone dangle sunburst earrings and gold lame housecoats when you'd really prefer small pearl clips and a red flannel nightgown, it's time to learn how to receive what you'd like.

No woman is ever aloof from the gift-choosing process, whether she's the recipient or not. Directing purchases is an art unto itself. Small children with an abundance of enthusiasm and a lack of cash can be steered into making presents... drawing a picture, writing a poem, molding clay objects... or into the labor-saving-present, like a signed I.O.U. to do the dishes faithfully for a week.

For the man in your life, casual hints may be sufficient if he has a good memory. If not, carelessly (but with earnest in-

tent) drop a few scattered reminders to yourself of things to buy in prominent spots — like next to the telephone, on the nighttable or near the radio.

The art of this kind of gentle nudge is not only in getting the kind of gift you want but in making him think you're something special for wanting it. For instance, the choice of a perfume like Crepe de Chine shows your good taste. This famous French perfume is as captivating to look at as it is to wear in its distinctive crystal-like Crepe de Chine bottle with the prism stopper.

After you've done all the hinting you can behind the scenes, relax. Even if you don't get the presents you want this Mother's Day, there's always next year.

AUTO FACTS

BRAKES
AT 65 MPH YOU'LL GO 70 FEET FROM THE TIME YOU DISCOVER YOU HAVE TO STOP UNTIL YOUR FOOT HITS THE BRAKE PEDAL.

EVEN IF YOUR TIRES AND BRAKES ARE IN GOOD CONDITION YOU'LL GO ANOTHER 250 FEET BEFORE YOU STOP—A TOTAL DISTANCE LONGER THAN A FOOTBALL FIELD BUT AS MANY AS 1/3 OF ALL CARS CHECKED IN INSPECTION STATIONS HAVE BEEN FOUND TO NEED BRAKE WORK.

OFTEN POTENTIAL BRAKE TROUBLE DOES NOT ANNOUNCE ITSELF BY THE FEEL OF THE PEDAL. DON'T TAKE CHANCES — BE SURE YOU CAN MAKE A PANIC STOP IN TIME. THE CAR CARE COUNCIL RECOMMENDS HAVING A BRAKE CHECK-UP TWICE A YEAR.

School Teachers Of Texas Given Pay Hike

Austin, Tex.—Texas public school teachers—those on the state minimum salary schedule—will receive pay raises averaging about \$1,050 per year in 1970-71.

Students will go to school—and teachers will teach—an extra five days (180 days instead of 175). In addition, teachers will be on duty for 10 more days of non-teaching work during the year, and will be paid on a 10-months basis, instead of nine.

These changes in the school year and the basis for figuring teacher pay result from amendments to the minimum foundation program law passed in 1969 by the Legislature.

Under the minimum program, a beginning bachelor's degree teacher in 1969-70 was paid \$593 per month for nine months, or \$5,337 for the year.

In 1970-71, a beginning bachelor's degree teacher will receive \$600 per month for 10 months, or \$6,000 for the year.

Many Texas school systems pay their teachers more than the state-required minimum salaries.

Texas was ranked 38th among states in average teacher pay in 1969-70. The 1970 raises and a long-range improvement plan are expected to move Texas up to a more favorable position among states in the years ahead.

The new law puts into effect in 1971-72 a continuing compensation plan which will give Texas teachers an additional 5% raise each year and cost-of-living raises in 1974 and 1978. It will allow all Texas teachers to reach the top of the pay schedule—\$11,040 for bachelor's degree, and \$12,040 for master's degree teachers—within 10 years of service.

The new law left many people—teachers as well as school patrons—with questions about its work and pay aspects.

The State Board of Education has attempted to answer such questions by drafting an official definition of the 180-day school term and service requirements for teachers in 1970-71 and future years.

Basically, the state board says that beginning on September 1, 1970:

—Texas public schools will have 180 days of actual classroom instruction, (where teachers and students are together in learning situations) instead of the 175 days previously required under foundation program law. (Some schools had already been operating programs longer than the minimum.)

—Most Texas teachers will be paid on a 10-month basis. (Vocational and special education teachers may be paid for 10, 11, or 12 months.)

—In addition to the 180 days of classroom instruction, teachers and other personnel previously authorized for less than 10 months under the foundation program shall be required to be on duty for an additional 10 days, making a total of 190 days, exclusive of holidays approved by the local board of trustees.

—School districts may employ teachers for more than the specified 190 days, but if they do their salaries for work beyond the 190 days must be paid wholly from local funds rather than foundation program funds.

Angora Goat Field Day Set July 9 At Sonora

Sonora, Tex.—(Spl.)—Goats do have a place in the proper management of range resources in the Edwards Plateau area.

Dr. Leo Merrill will describe this position at the Angora Goat Field Day, July 9, scheduled by Texas A&M's Agricultural Research Station near here. Merrill is associate professor in charge of the station.

His talk will touch on one of many subjects related to Angora goat production which will be discussed at the field day.

Leslie Pepper, president of the Texas Angora Goat Raisers Association from Sabinal, will be master of ceremonies for the program which will begin at 9:00 a.m. There will be a noon barbecue catered by the Sutton County 4-H Club, and the field day activities will conclude by 3:00 p.m.

In connection with the field day, there will be an Angora goat judging contest for 4-H and FFA members which will begin at 9:00 a.m. Winners will be recognized at the start of the afternoon program.

Walter Pfluger, secretary of the Mohair Council of America, will give a report on council actions and activities. Other topics to be discussed include: variations in diameter, length and grease content of mohair due to location of the animal's body, new drenches for control of internal parasites in sheep and goats, Angora goats as 4-H or FFA projects, defect and quality classifications in mohair marketing, performance and feeding test results, selection practices for Angora goats, and outlook for mohair.

The Sonora research station is located 28 miles south of Sonora on State Highway 55.

Home Demonstration Agent's Column

Now is the time to store electric blankets. Blankets should be stored clean. Never dry clean an electric blanket because some cleaning materials will damage the wiring system, reminds Wanda Meyer, Extension home management specialist.

Measure the blanket before laundering so you can block it back to its original size. For automatic laundering, place 1/3 cup of mild soap or detergent in the machine and fill with warm water, about 100 to 110 degrees F. Run the machine for two minutes to mix the detergent, then add the blanket, says the Texas A&M University specialist.

For an agitator type washer with two wash action speeds, wash for 1/4 minutes with slow wash action and fast spin.

For agitator and tumbler-type washers with single wash action speed, soak the blanket for ten minutes then agitate or tumble for 15 seconds.

To rinse the blanket, use cool water, about 70 to 90 degrees to remove detergents and then rinse (one minute each time) for best results.

For hand laundering, mix 1/3 cup of mild soap or detergent with lukewarm water, then add the blanket. Soak the blanket for about ten minutes, then squeeze suds through by hand for about two minutes.

Use a soft brush and solution of mild detergent to remove stains and heavily soiled spots from the blanket-binding. Remove from sudsy water by gently squeezing the fabric. Rinse two or three times in cool water, Mrs. Meyer recommends.

To dry in an automatic dryer, place four to six dry bath towels in the dryer with the blanket. Do not use color towels as buffers, as blanket goods may transfer to the towels.

Set the automatic dryer control on the high heat. Time the drying cycle for 15 minutes. The blanket will be damp and steaming after drying cycle. Allow the blanket to cool, then finish drying on a line. This will permit the blanket to be blocked to size as it dries.

For line drying, place the blanket lengthwise over two parallel clothes lines about 18 inches apart. As the blanket dries, keep stretching to block it back to its original dimensions. Dry the blanket in the shade, never in direct sunlight, as sunlight may harm fabric, the specialist advises.

The blanket should look soft and fluffy. If the nap becomes matted, it may be brushed in one direction with a clean, stiff brush to raise the nap.

The nylon binding may be ironed if necessary. Use low iron temperature setting.

Cleaning and stain removal often trouble owners of antique glassware, but they can be problems for everyday glass articles.

Mrs. Doris Myers, Extension home specialist with Texas A&M University, gives solutions to common cleaning problems with glassware. Glass never is stained permanently, the Glassware Institute of America says. It has a hard, smooth, non-absorbent surface that stains cannot penetrate, and surface discolorations can be removed

with treatment. Minerals in water often cause lime deposits and surface discolorations.

To remove lime deposits from the bottom of pitchers, bottles or decanters, Mrs. Myers says to put tea leaves on the stained surface and fill the container with a vinegar solution.

For surface discoloration on decanters, rub the glass with half a lemon, or wash it with vinegar, or partially fill with uncooked rice and vinegar and shake vigorously.

A well-known research laboratory offers this method of removing hard water deposits which have dried in designs and etchings: soak glassware in a solution of one part muriatic acid and four parts water.

This acid, available at drug or hardware stores, should be handled with rubber gloves, adds the specialist. After soaking in the solution, rinse the glass thoroughly and dry.

Vinegar cruets often become stained and should be rinsed with diluted ammonia before washing. Stains in flower vases can be cleaned with a chlorine bleach solution, she added. To brighten glass coffee makers, use a teaspoon of baking soda in the rinse water.

Some facts to remember:

—For a delicious fruit salad cooler, serve Honey Cream Dressing. For one pint blend 1/4 cup honey and 1/4 cup orange juice into one pint sour cream. Chill and serve over your favorite fruit salad.

—If cooking temperature is too high or an egg is cooked too long, the white becomes tough and the yolk mealy.

—If you read it right, the label on federally inspected meat and poultry products can be your best friend when you shop.

For example a can of "Chili Con Carne" must contain 40% fresh meat while "Chili Sauce with Meat" need contain only 6% fresh meat. A "Turkey Pot Pie" must contain at least 14% cooked, deboned turkey meat. "Chicken Soup" under federal inspection can contain no less than 2% chicken meat.

And—those pictures on the outside of the package must truly represent what is on the inside. The label lets you know what you are paying for.

Orange Milk Shake—For 2:

Whip just to blend 1/4 cup frozen orange juice concentrate, 2 scoops orange sherbet, 4 scoops vanilla ice cream and 1 1/4 cups milk. Add a scoop orange sherbet and an orange slice to each glass.

For Best Flavor: choose pineapples that have changed or are changing from their green color to orange or yellow. Always choose a heavy one for its size and if it has a fragrant aroma it is ripe and good to eat.

For Lunch On A Hot Day:

combine a can of chilled tomato soup with a soup can of ice cold milk and blend thoroughly. Season with a dash of Tabasco or a squeeze of lemon and serve in cold mugs.

New Babies

Mr. and Mrs. John Allen Lowe of Eldorado are the parents of a daughter born June 19, 1970, at 6:38 a.m., in Schleicher County Medical Center. The young lady weighed 8 pounds 3 oz., and has been named Stacy Lynn.

Grandparents are Mr. and Mrs. John W. Luman and Mr. and Mrs. Gilbert A. Lowe.

On June 11, a son named Guy Russell and weighing 8 lbs. 14 oz. was born to Mr. and Mrs. Frank O'Banion of Kerens, Texas.

The new baby was welcomed by his two sisters, Gaye age 7 and Rhonda age 5.

"I am presently Music Education and Youth director of the First Baptist Church in Kerens, Texas. I enjoy the Success very much and especially find the political material very helpful. We hope to be in Eldorado before school starts and visit with our many friends who still live there," wrote Mr. O'Banion from Box 236, Kerens, Texas 75144.

James and Gracey Runge of McKinney, Texas, are parents of a new daughter, Rhonda Renee, born May 24 in Austin, Texas. She weighed 9 pounds 8 ounces. Rhonda Renee has a sister, Ramona Rhea, who is two.

Mrs. James Forrest Runge spent a week, May 25 to June 1, with them.

A son was born to Mr. and Mrs. Mike Sudduth on Thursday, June 18 in San Angelo. He weighed 8 lbs. 4 oz. and has been named Michael Allen Sudduth II.

Grandparents are Mr. and Mrs. W. W. Sudduth of San Angelo and Mr. and Mrs. Leon Bowles of Dexter, New Mexico.

Great grandparents are Mr. and Mrs. O. Sudduth of San Angelo, Mr. and Mrs. Bob Aston of Dexter, New Mexico, and Mrs. Mae Taylor of Santa Anna, Texas. Mrs. Clemie Baxley of Modesto, California, is a great-great grandmother.

The new family resides at 4701 Grape Creek Rd. in San Angelo.

RETURN FROM TRIP

Mr. and Mrs. Vernon Hazelwood returned last week from a two weeks' vacation trip in Virginia, Washington, D. C., and nearby points. Their visit was chiefly with their son, Lilburn, and family who reside at Fairfax, Virginia. They returned to Texas on Tuesday, June 16th.

IN SHANNON HOSPITAL

Vernon Hazelwood was admitted to Shannon hospital on Tuesday for examination, treatment and possible surgery later this week.

Guests of Mr. and Mrs. Sherwood Barker this week have been Mrs. Gayle Dismukes and little daughter, Katharine, of Killen. The Barkers, Mrs. Dismukes and Sammie Mayo taught school together in Dickinson, Texas.

William Wiley (Buff) Whitten spent 35 days in the U.S.A. visiting his mother, sisters and brothers and relatives in his home town of Eldorado. He came for Mother's Day and Lisa's graduation. We all enjoyed him so much. He left from New York on the 14th and arrived in Asmara, Ethiopia, Africa on the 16th. His address is:

William Wiley Whitten
YN3 B732 478
U. S. NAVCOMSTA,
Asmara, Ethiopia
APO New York, N Y 09843

Mr. and Mrs. Charles McLaughlin Jr. and Pam and Lisa of San Antonio visited here last week with his parents, Mr. and Mrs. C. C. McLaughlin.

PFC-E3 John T. Whitten and family will arrive in Eldorado in three weeks. Linda and children will live with Mrs. Zella Whitten as Tom goes to Vietnam for 15 months. He will have a 14-day leave before going there.

Mrs. Jonnie Mormon and husband went to Houston to the best brain surgeon in the USA on 15th of June. She had tests and can be treated in Sonora hospital by Eckhardt. She is working in Sonora hospital. She is o. k.

Mrs. Hermie Davis and daughter, Robin, attended Paisano last week. Mrs. Zella M. Whitten cared for her son Byron, John Whitten and Marilyn at the home of the Mormons in Sonora whole Mr. and Mrs. John Mormon were in Houston and Mrs. Hermie Davis was in Paisano. An enjoyable time was had by all.

Visiting here in the Earl Parker home for the past several weeks was their daughter-in-law, Mrs. James Earl Parker and small son from Honolulu, Hawaii.

STATE CAP -- a3eP b(E TE

Austin, Tex.—A massive emigration from the state capitol, followed by a major overhaul and interior remodeling of the historic building, as about to get under way.

Unfortunately, the big reshuffle will take place at the peak of the tourist season, so visitors may be dodging carpenters, painters and movers for awhile.

Soon after July 1, the new \$6.6 million State Finance Building will be ready for occupancy. Employees of the State Treasurer and Comptroller will move immediately from their capitol quarters into the state's largest office facility.

As the finance departments vacate their space in the capitol, remodeling contractors will move in to re-do their quarters.

Between late July and next January when the Legislature convenes, office space for all 150 state representatives, enlarged quarters for many state senators and new committee rooms hopefully will have been built into the vacated space.

A \$1.5 million appropriation was set aside by the Legislature last year for the renovation and a new elevator already is being drilled through the northern end of the capitol.

A painting contractor also is at work on the Senate chamber (a \$32,850 face-lifting job), and approximately \$40,000 more will be spent on 1,200 yards of new green carpet for the senators' floors.

A model committee room is among the Senate's plans. It will include a raised dais for members, individual microphones and theater seating. Senators expect to gain two or three other committee rooms.

Those who will stay in the capitol aren't too happy about the branch post-office moving to the new finance building, but they are assured removal of a lot of temporary, makeshift structures in hallways will restore much of the old building's original basic architecture and dignity.

Penal Laws Being Revised

Texas' 1856 "frontier" penal code is being rewritten by a State Bar Committee for submission to the Legislature.

Major overhaul would eliminate duplicate articles covering the same crime and overlaps.

Proposals further seek to weed out so-called "unenforceable" laws including those against sexual acts between consenting adults. A strong new paternity law is recommended to identify fathers of illegitimate children and make them responsible for financial support.

Bar's draft would leave sentencing of convicted persons to judges instead of juries except in cases where the death penalty is involved. But it would permit judges to refuse to impose the death penalty though assessed by jurors.

Instead of general sentences for crimes, the revision would substitute four degrees of felony and three of misdemeanors, leaving prison terms to be fixed according to the specific nature of the offense and circumstances.

Code redraft also would make corporations criminally liable (as in pollution cases), establish a general trespass article (covering such offenses as college disruption) and define prohibited conduct short of completed crime.

University of Texas Law School Dean Page Keeton said the code, if adopted, would be the "best in the nation."

Galveston Island Park Bought

State closed its deal to buy the 1,781-acre Maco Stewart Ranch on Galveston Island for a seashore park, paying \$390,875 (half to be reimbursed by the federal government).

Actually, Maco Stewart Jr. willed the land to the state in 1950 pending continued use by his heirs for their lifetimes. Parks and Wildlife Commission agreed to pay three heirs \$500 an acre so full title could be obtained immediately.

First development will be on the Gulf beach side, although no date has been set for opening. Galveston County Clerk's office will conduct purchasing details.

Courts Speak

U. S. Supreme Court has held in a Maryland case that voting in state and local elections cannot be denied persons living on federal installations. Secretary of State Martin Dies Jr.'s office says the ruling will affect some areas of Texas.

Atty. Gen. Carwood C. Martin plans to appeal the decision of U. S. District Judge Reynaldo Garza.

in Brownsville, taking jurisdiction of Platoro Ltd.'s case demanding the state return the treasure it recovered from an ancient Padre Island shipwreck. Garza accepted the suit as a salvage case.

Federal jury in Abilene found that the Abilene School Board did not act arbitrarily in giving unexcused absences to 300 Mexican-American pupils who boycotted classes for 10 days last fall.

Appointments . . .

Charles H. Locklin Jr. and William G. Gibbs have been named assistant welfare commissioners for planning and coordination and personnel and training, respectively.

Gov. Preston Smith appointed John C. Taylor of Seguin and Joseph Patrick Kelly of Victoria to board of directors of the Guadalupe-Blanco River Authority. They succeed the late Edgar F. Engelke of Seguin and Reagan B. Cates of Victoria.

James A. Wilson of Austin is the new director of Texas Mass Transportation Commission.

Robert S. Weddle, former Menard News publisher, was named by the Governor as public information officer of the Texas Criminal Justice Council.

Maj. Gen. John White (retired) of Uvalde is the first fulltime executive director of the Nueces River Conservation and Reclamation District.

Lease Sale Set

Second oil and gas and sulphur lease sale of 1970 will be held here at 10 a.m. August 4, Land Commissioner Jerry Sadler announced.

Two hundred and four tracts will be offered in the Gulf of Mexico, 64 in uplands and riverbeds.

Twelve sulphur tracts are located in far West Texas. Minimum bonus is \$25 an acre (\$20 for uplands and riverbeds), delay rental \$4 a year, royalty of 1/6 and primary term of five years.

Nursing Home Rules Told

Public Welfare Department sent 800 to 900 nursing homes regulations implementing new rates they can collect from the state and federal government and supplements collectible from patients' families.

"Skilled" care homes will get a raise from \$360 to \$381 a month, with no supplement. Intermediate Care III facilities will be cut from \$300 to \$294 and ICF II homes from \$210 to \$198, but the latter two groups can collect family supplements of \$25 a patient.

Welfare Department served notice, however, that it will not serve as a collection agency, and homes cannot deny care to any patient for lack of a supplement. Supplement cannot be collected from patient's assistance checks.

Safety Device Required

Railroad Commission ordered all flowing wells in bays, estuaries, lakes, rivers or streams to be equipped with "storm chokes" or similar equipment to prevent pollution spills.

Rule goes into effect October 1 and is aimed at preventing disasters like the Chevron well spill off Louisiana. Commission also adopted a form to be used by oil companies in reportin immediately (by telephone or telegram) all spills of as much as five barrels.

Short Snorts . . .

State Health Department will operate two mobile dentist's offices for poor.

Attorney General Martin has held that school districts must pay tuition fees for pupils sent to another district for training in a 12-grade school system where higher-grade training is not available in the home district.

Alamo State Bank of Pasadena application has been filed with Department of Banking.

Gordon H. Lloyd will retire June 30 after 47 years' service to the state with the Highway Department and as executive secretary of the State Employees Retirement System.

Texas Highway Department reports some \$53.8 million worth of work on U. S. Highway 281 under way, programmed or in advance planning.
