Number 25

Dr. Peterson To Begin Residency, San Antonio

Dr. and Mrs. R. K. D. Peterson and family are arranging to move soon to San Antonio where he will begin a residency in radiology about the 1st of July.

The Petersons have placed their house here on the market. It is the landmark Doty house located about two blocks north of the Court House; they have fenced in the yard and renovated and added to the house since they have owned it. The house was previously owned by Mrs. Milligan and Mrs. Pat Martin.

Bids Called For By Commissioners Court

At their June 11 meeting, the Schleicher County Commissioners Court voted to advertise for bids for an air conditioning and heating system for the Memorial Building auditorium.

The Commissioners also ordered purchase of a '73 automobile for the sheriff's department, and the purchase of two new '73 6-cylinder 1/2-ton pick-up trucks for the county road department.

The official notice is on page 5 of this Success issue.

At the same meeting, the Commissioners authorized Sheriff Orval Edmiston to attend the Sheriffs' Conference July 22-25.

Par-Tee News

In the Brownwood Ladies Partnership Tournament recently, Ernestine Hext and Wanda Neville tied for first place in the championship flight.

In Ozona's Ladies Partnership Tournament Ernestine Hext and Mary Robinson took the first flight with a 63.

In Big Lake Ladies Partnership Tournament Ernestine Hext and Wanda Neville won the championship flight.

Mary Waldron and Eddie Kinsler won third place in the first flight. In our last mixed foursome June 10, winning first place was the team of John Pitts, Guy Whitaker, Steve Whitten, Charlie Hahn, and Lora Adams.

Winning second place was Ernestine Hext, Granville Hext, Bob Whitten, Gary Derrick.

This Sunday afternoon at 1:30 is mixed foursome play. Be sure to join us.

Howard and Gary Derrick took first place in the first flight in Sonora in the Father and Son Partnership Tournament June 16 & 17.

Salvation Army Camp Has Three From Here

Three boys from Eldorado will be given a free, one week vacation this summer at The Salvation Army's Camp Hoblitzelle near Dallas, according to Orval Edmiston, the Salvation Army Service Unit camp chairman.

Boys chosen to attend the camp this summer are Romon Espinosa, Bobby Joe Lozano and Jose Hernandez. They left for camp on June 17, 1973.

"This will be an excellent experience for these boys who have never been to a real camp," Orval Edmiston said. "At Hoblitzelle they will enjoy boating, hiking, archery, horseback riding, fishing, swimming, handicrafts, movies and baseball as well as worship services and Bible study."

All organized activities are supervised by coaches and counselors. The campers are housed in brick and redwood cabins and receive well-balanced meals in the camp dining hall.

"Each boy's trip was financed by the Eldorado Service Unit Committee with donations from private citizens in our community," Edmiston said.

Camp Hoblitzelle is built on 360 wooded acres with a 30 acre lake and is fully equipped with modern recreational facilities. The Salvation Army operates Camp Hoblitzelle for children and families who could not otherwise have the opportunity to enjoy camp life. This summer over 4,000 are expected to attend camping sessions.

The three local boys will remain at the camp through this coming Sunday.

Elizabeth Brame and Lori Griffin left Sunday for Girl Scout Camp Jo Jan Van where they are spending this week.

Post Script

The 1974 political year is six months away, but already Bob Bullock is announcing in Austin that he will be a candidate for State Comptroller.

It remains to be seen how much interest builds up in races between now and next year. Dolph Briscoe will complete a two-year term as Governor and will doubtless throw in his hat for a new four-year term.

Recently the Legislature has been involved in some redistricting problems that pertain to state legislative and senatorial districts as well as Congressional districts. Some of these will have to be ironed out before the end of this year.

Games continue at the Mexican baseball field on the north edge of town. It is located on land belonging to Mrs. V. H. Humphrey.

Leaders of the Girl Scouts have set July 25th for an Arts and Crafts Day. Further information and a registration form are on page 4 of this Success issue.

News of building:

The outside of Gene McCalla's Eldorado Variety Store building has been painted a pale green color, and workmen this week were cutting openings between the old and new parts.

Guy Whitaker's house is being remodeled with Griffin Service Co. doing the work.

Jimmy Powell has remodeled two ranch houses on the Thomson place.

The residence of Charles and Lee Gates is being painted.

The old A. L. Jones house a block south of the school is being torn down.

With our subscribers: James Mika is a new subscriber at Park Motel, 2819 N. Chadbourne in San Angelo.

The Steve Samples' new address in San Angelo is 3025 Red Bluff Road.

T. K. Stanford is a new subscriber at 5108 Edenvue Drive, San Jose, California 95111.

Thomas D. Bradley's new address is P.O. Box 22, Junction City, California 96048.

Carroll Ratliff Injured As Cars Collide

Carroll Ratliff, long-time Eldorado resident, was injured late Sunday when his Chevrolet Vega was in collision with a Ford station wagon driven by a Garcia girl. The mishap occurred near the swimming pool.

The Ratliff car was caved in and sustained major damage while the Ford had slight damage to a headlight.

The two drivers of the cars were taken by ambulance to the local hospital for treatment. Miss Garcia was treated and released while Mr. Ratliff sustained more extensive injuries and was kept for treatments and observation. He was still in the hospital Tuesday.

The accident was investigated by Patrolman Hervey Willis, Sheriff Orval Edmiston, and Deputy Sheriff Jack Jones.

Summer Gymnastic Program Under Way

School coaches announce that Summer Gymnastic Program (basic tumbling) is now under way at the school with the following schedule:

2nd, 3rd & 4th grade boys and girls — Monday, Tuesday, Wednesday 2:00 p.m. to 3:00 p.m.

5th through 8th grade boys, Monday and Wednesday, 3:00 to 4:30.

5th through 8th grade girls, Tuesday and Thursday, 3:00 to 4:30 p.m.

High school boys, Monday and Wednesday, 7:00 p.m. to 8:30 p.m.

High School girls, Tuesday and Thursday, 7:00 to 8:30 p.m.

Donaldson Receives Degree From Tech

Lubbock, Texas.—One student from Eldorado received degree in commencement exercises at Texas Tech University this spring.

Graduating from Eldorado was Gary King Donaldson, who received his Bachelors Degree in Architecture.

Coaches, Teachers, Hired For School

New members of the coaching and teaching staffs of the Eldorado schools were hired recently to serve for the coming school year.

Gary Tolar, who coached the past two years at Yorktown, has been hired to be new first assistant coach. He and his wife and children, ages 7 and 2, have moved to one of the teacherages and he is conducting gymnastics classes this summer. He will teach health and physical education.

Larry Mitchell, a recent graduate of Southwest Texas State at San Marcos, has been hired new Junior High coach replacing Lynn Meador. Mitchell will help with football and will coach the Junior High basketball and track teams. He is married and he and his wife have moved to the Baptist parsonage vacated a while back by Pat Ragsdale.

Mitchell will teach Junior High studies.

Tim Terry has been hired to teach biology and Junior High science and he and his wife will move here about the 1st of August; He is graduating from Angelo State University as a chemistry and biology major.

Reed and Carol Washmon have been hired to the teaching staff.

She is receiving her degree in English from Texas Christian University this summer and will teach High School English.

Reed Washmon is receiving his Masters from North Texas State at Denton and has been an engineer with Ling Tempo Vaught and College Reading Corp. They have taught three years at Pearsall. He will teach science and math.

Mrs. Phillips, whose husband is here with Sweetwater Pump and Supply, has been hired lunchroom manager to succeed Mrs. Gausemeier who will continue to work part-time.

School administrators report that summer maintenance and upkeep work is being done to the school plant. Sandy Donaldson is painting some rooms in the high school wing.

The coaches will go to the state coaching school at Dallas around the first of August, at which time plans will be announced for summer football and band practice.

Attend Graduation

Mrs. E. H. Dannheim and granddaughter Karen attended graduation exercises of Central High School in San Angelo. The exercises were held in the Coliseum.

Alan Peterson was among some 700 to receive diplomas. Alan attended school here when the family lived here a few years ago. He is the son of Mr. and Mrs. Dale M. Peterson of San Angelo and grandson of Mr. and Mrs. E. H. Dannheim.

Bullock To Seek Comptroller Post In '74 Primary

BOB BULLOCK announced at a news conference in Austin on Thursday, June 21, that he will be a candidate for the Office of Comptroller of Public Accounts subject to the Texas Democratic Primaries in 1974. The office has been held for many years by Robert Calvert. Bullock has pledged an active campaign.

News Of The Sick

Sheriff Orval Edmiston is able to get around on crutches and now spends several hours each day at his office.

Carroll Ratliff was still a patient Tuesday in the local hospital following his vehicular accident that occurred Sunday.

Sam McGinness has been a patient in the local hospital.

Claude Ditmore of Bronte, father of Mrs. Elton McGinness of this place, has been a patient in St. John's hospital but is now back at his home.

Mrs. L. E. McCalla underwent surgery in the local hospital recently.

Mrs. P. A. Olson had surgery in the local hospital a few days ago.

Bob Page underwent gall bladder surgery last week in Shannon hospital, and he remained a patient there early this week.

More Girl Campers To Be Accepted

Girl Scout camp Jo Jan Van's Session III, originally for two week campers only, has been opened to one-week campers. Campers may come either the week of July 1-7 or July 8-14. Both Girl Scouts and non-Scouts may attend camp. The fee for one week is \$30 for Scouts and \$35 for non-Scouts.

If a girl should want to stay the two weeks, the fee is \$60 for Scouts and \$70 for non-Scouts.

Campers enjoy horseback riding, swimming, crafts, boating, and hiking. Anyone interested may call or write the El Camino Council for more information.

The office number is 655-8961; or write 304 W. Avenue A, San Angelo, Texas.

Youths Employed Thru Federal Grants

High School Principal Guy Whitaker reported that 13 local young people from low-income families are employed for nine weeks this summer through a Federal grant of over \$5,000 allocated to Schleicher county. They are being paid \$1.60 per hour. The program is administered by the Concho Valley Council of Governments through the Texas Employment Commission.

There are 5 working at the hospital, one at the Soil Conservation office, two at the Neighborhood Center, and 5 at the school.

The young people employed must be qualified by family income in order to be given these jobs. The program started June 4th.

Mr. and Mrs. Larry Blair and Cody spent the week end visiting Sybil Blair here.

County Extension Agent's Column

By MRS. DIANE LUBE

Sew 'N Swim

Swimmers who like sewing their own water fashions aren't so rare as they used to be.

Versed in both aquatic and sewing arts, they know correct application of elastic to swimsuit edges has a lot to do with swimming confidence.

Not just any elastic will do — regular elastic will stretch out of shape. Swim elastic is treated for chlorine resistance.

To determine exactly how much elastic is needed, measure the swimsuit edge it's to fit. If working with three-eighths elastic, subtract an inch for every seven inches of fabric. If the elastic is 3/4 inch wide, subtract an inch for every five to six inches of fabric. Test length for comfort by holding it around the place it's to go. Cut and join the elastic ends. Mark off eight equal parts of the elastic with pins, then do the same with the fabric edge to which it will be sewn.

Match up pin markings and pin elastic to the wrong side of the swimsuit, putting elastic edge next to the cut swimsuit edge.

Stitch in a wide, long zig-zag, along inner edge of elastic.

As you go, stretch just enough to meet the swimsuit.

Fold the elasticized edge to the inside of the suit and stitch next to the cut edge.

Energy Savers

Cloths and brushes can save electricity.

Lighting equipment needs regular care and cleaning if it's to give consumers their money's worth in use of power.

A collection of dirt, dust and insects on bulbs, tubes, diffusion gloves and lampshades acts as a screen, letting only part of the light through—and the consumer pays for light trapped in the fixture where it benefits no one.

All lighting equipment should be cleaned from four to six times a year for efficient performance. Clean portable lamps monthly for good reading light.

When cleaning make sure power is turned off.

Clean lampshades with a small dusting brush attachment on a vacuum cleaner. Silk or rayon shades sewed to the frame with no glued trimmings may be washed in mild, lukewarm suds and rinsed in clear water. Quick drying, important to prevent rusting of the shade frame, can be done with a hair dryer blowing hose or a fan.

Light bulbs can be wiped clean with a damp, soapy cloth and dried.

Cleaning ceiling fixtures calls for extra safety precautions. Electricity must be turned off, and a safe stepladder or stool should be used—a helper makes the job faster and safer.

Remove shields and bulbs, wash in warm soapy water, then dry with a lintless cloth. Dust exposed parts of fixtures carefully, then replace bulbs and shields.

Replace all darkened bulbs—a darkened bulb can reduce light output 25-50%. Use darkened bulbs in places where less light is needed, such as hallways or closets.

Replace fluorescent tubes that flicker or have darkened ends.

Love Cares, Shares

Love—a respectable feeling—requires a capacity to care. Lamenting the idea that love is too readily thought of as Hollywood decadence or as something for adolescents. Love has a place in everyone's life.

It involves a willingness to invest ourselves in others, be involved with them and listen to them.

One can love only to the extent that he regards himself as worthy. Relationships shared with other persons are a mirror to the relationship with self.

Love is sharing the self with others—family, friends, co-workers, even strangers.

We think of love as giving, but it has to be a two-way street—with the accepting of gifts, material and non-material, from others.

Interaction of love is somewhat like a dance.

Partners do not need to hold tightly, because they move confidently in the same pattern, intricate but free. There's no place here

Mrs. Faught, 84, Buried Saturday

Funeral services were held Saturday afternoon in First Baptist Church for Mrs. Bertie Luellen Faught, 84. Burial was in the Eldorado cemetery.

Mrs. Faught died Thursday in a Big Spring hospital.

She was born March 28, 1889 in Doss and had lived in Eldorado 29 years.

Survivors include one son, Chester J. Faught of Big Spring; one brother, Otto Mund of San Angelo; one sister, Mrs. Paul Corneli of Fredericksburg and two grandchildren.

McGinnesses Back From Germany

Mr. and Mrs. Elton McGinness returned last Thursday from a 2½-week trip to Germany and other European countries.

They flew to Germany where they were met by his nephew, Lt. and Mrs. Larry McGinness who accompanied them to many places of interest. The Larry McGinness and two baby daughters have been stationed in Germany for some time.

The party visited in southern Germany, in Switzerland, and in Lichtenstein. They also made one trip by bus to Paris, France. They report everything clean and green in the areas they visited and that the German people are very courteous and friendly, but that they drive at high speeds on the roads and freeways which have no set official speed limits.

The McGinnesses flew both ways on their trip, and made good flight connections. They reported that Watergate was the major topic of discussion encountered abroad.

Mr. and Mrs. E. L. Carlman spent their vacation in San Francisco, California, recently, visiting Mr. and Mrs. Terry Carlman.

The C. J. Niblett family left recently on a trip to Colorado.

For a possessive clutch. Those in a love relationship know they're partners, and they trust each other.

They provide time for self-development as well as development together.

Love should be the hallmark of all people's dealings.

Everything In Its Place

Adequate storage space puts "everything in its place"—even where closet and cabinet space is limited.

Also, it lessens clutter and confusion within the home to make it more liveable.

Containers for "custom-made" shelves and drawers are available for the asking as grocery, hardware and furniture stores.

Fruit boxes, of heavy cardboard with finer holes in the ends for easy carrying, made storage compartments for sweaters, out-of-season coats, ice skates, seldom-used purses, or even copies of receipts and past tax returns.

Several of these boxes can be painted or covered with paper, stacked together and labeled.

For added convenience, build a rack to hold them so they will slip out like a drawer—or they will line up on a closet shelf.

For added space on that one shelf in the closet above the rod, get heavy boxes and cut tops out. Lay them on their sides, fitted together to make compartments into which handbags, gloves, hats and shoes will store.

Extra shelves are easy to add. Two screw-eyes of appropriate size screwed into the wall on each end—so they're properly anchored to something solid—will support a shelf.

For toys, egg shipping cases solve storage problems, and cinder blocks or glass bricks will hold another shelf for books.

Odds-and-ends storage becomes attractive using clean ice cream or pretzel cans covered with paper or fabric. Also, they can be painted, laid on their sides and stacked pyramid fashion, held together with paper clips or clothes pins.

On a desk, the cans will wedge into a shoe box, or fasten together with epoxy glue, and hold pencils, letters, bills or stamps.

Disaster Aid Is Always Available

A disaster is unpredictable. Tornadoes may strike with little or no warning and the path of a hurricane often changes erratically with little advance warning.

Texas and the nation this year have felt the brunt of Mother Nature's violence, and tornadoes have roamed the skies. With summer, the hurricane season lies ahead, reminds the State Health Department.

Both natural disasters are capable of causing unforeseen numbers of victims requiring immediate medical attention, plus the threats of disease brought on by unsanitary conditions, disabling of public utilities, contamination of water supplies and disruption of medical service. Floods also may produce rapid buildups in mosquito populations, a nuisance as well as a health threat.

When a disaster strikes, the Health Department joins with other state and local agencies and organizations to fight back with efforts to restore affected agencies and organizations to fight back with efforts to restore affected areas to normalcy. State disaster headquarters is in a sub-basement at the Department of Public Safety in Austin, where a corps of public officials coordinate disaster activities.

In the State Health Department, the Disaster Health Services Program of the Division of Civil Defense and Traffic Safety provides additional resources at the point of need. This is a part of the Texas plan for disaster health and medical care.

Seventeen disaster relief districts, each with a physician directing disaster medical care, are tied into a district Civil Defense Council which coordinates activities of state agencies with disaster functions. In case of disaster or severe threat—such as an impending hurricane along the coast, the Civil Defense Council is mobilized. Within each district are zones from which supplies and personnel requests emanate.

The State Health Department sends representatives of the Disaster Health Services Program to each disaster area to help coordinate activities of other health department personnel. In the case of hurricanes, program personnel are pre-positioned in cities along the Texas coast to await and plan for the storm.

Always quick to arrive on the scene are engineers of the Sanitary Engineering Division whose primary function is checking water supplies. Investigators from the Food and Drugs Division check damaged food and drug products, and Communicable Disease Services Section personnel may be called in to provide vaccines and serums if needed. Other state personnel may be assigned, and local health departments put physicians, nurses, sanitarians and others on duty immediately.

Within minutes after a tornado

New Way To Make Pastry

What could be more basic than pastry for pie? Flour, salt and fat with just enough water to make the ingredients hold together. Yet there are half a dozen different ways to put it all together. Make it the old fashioned way with lard or with solid vegetable shortening. Make it with a pie crust mix. Even use a frozen ready-made pie crust. Or take the polysaturated route and make an oil pastry or one with margarine as the only fat. Newest and most innovative is a real mayonnaise pastry, also high in polysaturates. Instead of cutting in shortening, stir in creamy smooth real mayonnaise. It couldn't be easier.

Mayonnaise Pastry

- 2 cups sifted flour
 - 1 teaspoon salt
 - 1/2 cup Hellmann's or Best Foods real mayonnaise
 - 1 teaspoon grated lemon rind (optional)
 - 3 tablespoons cold water
- Mix flour and salt; blend in real mayonnaise with fork. Sprinkle on lemon rind and water; mix well. Press firmly into ball. Makes enough pastry for double crust pie or two single crusts.

TO CONDUCT SERVICE

The service this Sunday afternoon, June 24, at the Nursing Home will be under direction of the First Christian Church.

dipped down into the heart of Lubbock the night of May 11, 1970, nurses and others picked their way through the rubble to check and salvage vaccines and get them to pre-planned emergency headquarters. A disaster health representative of the State Health Department was on the scene of the tragedy within two hours even though the city telephones and electricity were knocked out and transportation disrupted.

The Corpus Christi-Nueces County Health Department had its personnel on duty when Celia slammed into that city on August 3 of the same year. The State Health Department was also there. The personal automobiles of two representatives of the Disaster Health Services Program, who were in Corpus Christi awaiting the storm, were severely damaged. In addition, district engineers and personnel from state headquarters were on the scene.

Equipment from a Packaged Disaster Hospital was set up in a church at Aransas Pass to provide needed medical equipment after Celia.

Just recently the Health Department took over the medical inventory of a hundred 200-bed Packaged Disaster Hospitals, similar to the one from which equipment was used during Celia.

A major disaster isn't the responsibility of one agency but demands the coordinated efforts of many to snap back after tragedy. During spring tornadoes which hit Burnet and Hubbard on March 10, for instance, the Texas National Guard responded quickly with trucks, personnel and helicopters. Representatives of the State Health Department were on the scene within an hour of notification, coordinating disaster health relief.

Once a hurricane or tornado has struck, there's little one can do.

In a hurricane situation, there normally is enough warning to allow residents to leave the area or take shelter in solidly-constructed buildings.

If the possibility of tornadoes exists, individuals should listen to radios and television stations for latest advisories. Some cities and towns have sirens and other devices warning residents to take cover. It's possible to move out of the path of a tornado if sighted in time.

The State Health Department and its local and regional units have responded quickly and effectively in past disasters. With the resources and personnel at its command, it stands ready always to meet the future emergency needs of the citizens of Texas.

Price Controls May Trigger Shortages

Waco, Texas.—The President's 60-day freeze on retail food prices is a "stop-gap measure that carries with it some real dangers for consumers as well as farmers," J. T. Woodson, president of the Texas Farm Bureau, said today.

"There is a real possibility that we may soon see shortages of milk, eggs, and meat if prices are too low for farmers to make a profit," the head of the state's largest farm organization said.

"Although farmers appreciate the President's exemption of prices of raw agricultural products, the freezing of prices at the retail level does affect prices all the way back to the farm," Woodson said.

Commenting on the cost-price squeeze, Woodson said that some producers have absorbed all the increased production costs they can handle.

"Farmers will not produce for very long when their prices are at or below the cost of production," he said. "When producers feel the pinch badly enough, it won't be long before the consumers will, too, in the form of empty grocery shelves and meat counters."

The farm leader said the only way that consumers can be assured of a bountiful supply of food at reasonable prices is to have adequate production and that this can only come from price incentives in the marketplace.

Woodson said that food prices are not out of line.

"The American consumer spends only about 16% of his take home pay on food," he said. "This is lower than any other nation on earth and lowest of any time in our history."

The Farm Bureau leader said that the "real culprit behind inflation is still wasteful and deficit spending by government."

"Until we cut out spending beyond our means, we will continue to have our pocketbook robbed by inflation," he said.

NEWS OF ECOLOGY

Health Authority Calls For National Pollution Policy

Lack of a "national materials policy" that contains comprehensive guidelines for environmental control and resource conservation is hampering our efforts to conserve resources and protect the environment in the United States, according to an environmental health authority.

Dr. George Kupchik, program director and professor of environmental health science at Hunter College, New York City, says that a national materials policy was recommended by the Resource Recovery Act of 1970. "Unfortunately we hear little of the implementation of this document," he said.

"I would hope that we might soon develop a national policy that would spell out what we want to do, how to conserve our resources, how to collect and process the materials we want to recycle, what incentives and subsidies are needed to encourage recycling, and how to reclaim our other wastes, whether as compost or landfill or as a fuel for energy," Kupchik said in a recent interview.

He added that, "Until we have a national materials policy, it is grossly unfair to condemn any one material or group of products as being responsible for the solid waste problem."

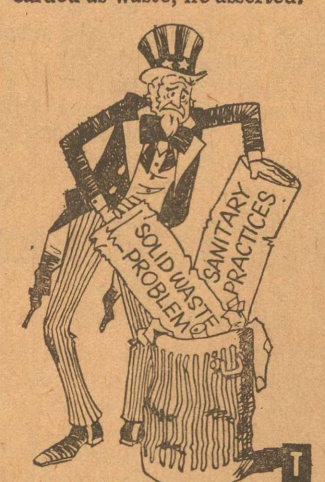

The problems of solid waste are complicated, Kupchik said, by the absence of a "health perspective," which has led to confusion on topics such as the recycling of wastes.

"People tend to think of solid waste as a relatively clean and simple material that anyone can collect and store and manage as he will," Kupchik said, "but in reality waste is a potentially hazardous material."

"Not only are there real problems with injuries—cuts and punctures from broken glass and exploding aerosol cans, but there is the problem of disease," Kupchik said. Garbage is not an inert pile of sand or gravel. It contains organic material which decomposes, causes offensive odors, breeds flies and feeds and harbors rats. It provides a tremendous potential for the

spread of all kinds of insect and rodent borne diseases."

Just as the public is unaware of the hazards of handling waste materials, it is unaware of the purpose of many of the products being discarded as waste, he asserted.

"Sanitation has become so much second nature in our society that we have forgotten why we insist on it. Food packaging, for example, was designed primarily to keep and store foods and beverages in a sanitary manner. If the consumer were more conscious of this health benefit, he would not be so quick to disclaim the use of certain products and materials."

He said the history of the preventive health movement has revolved around serious efforts to eliminate those items that carry infections from individual to individual. Consumers should be more conscious of the health benefits such "single service" items as the paper or plastic cup and plate provide, the environmental health expert said.

"Way back when, every public place had its common drinking cup or glass. You drank from a cup everybody shared, and quite often you shared a variety of diseases from the harmful germs deposited on the cup. The same was true of the common towel," he said.

"For years, public health people fought against use of the common cup and towel. It was only with the advent

of single-use items that the battle began to turn in their favor. Even today nobody regards these sanitary food service articles more favorably than the health officer and sanitarian."

Dr. Kupchik said many environmental activists do not understand the necessity for such products in terms of the public health. Among their recommendations for saving the environment, he said, is one urging abandonment of paper towels in favor of the "good old rag."

"When I hear consumers being told they can help lighten the waste load by using a rag to clean up, washing it, and using it over again, I become somewhat exasperated," Kupchik said. "I think of the cost of the 'good old rag' to the consumer in time and effort, and what the cost would be to other resources such as power and water if everybody started using washing rags. Most of all, I think of the cost in sanitation and preventive health, because rags can be disease carriers. A return to rags or to other notorious germ-carrying objects is a lot more serious than adding a paper towel, paper cup, or other sanitary disposable item to our waste load."

He cited two recommendations of the 1971 National Conference on Food Protection, which was held under the auspices of the U.S. Food and Drug Administration and the American Public Health Association. The conference recommended that government agencies officially establish consumer advisory councils, and that a massive program of consumer education be developed to provide the public with information about food protection and food service sanitation.

"It seems to me that only an appropriate program of consumer education and enlightened consumer involvement can result in widespread appreciation of preventive health practices and a refusal on the part of the consumer to trade his well being for a simplistic solution to the complex solid waste problem."

A pair of silk stockings produced in 14th century France sold for the equivalent of \$3.86—2 1/4 times a laborer's annual wage.

NEWS OF ECOLOGY

A CURIOUS PARADOX

To paraphrase Mark Twain, Everybody talks about ecology, but not too many people are doing anything about it. Would you believe that there are even regulations on the books that make it impractical for ecology-minded people to increase the practicality of recycling?

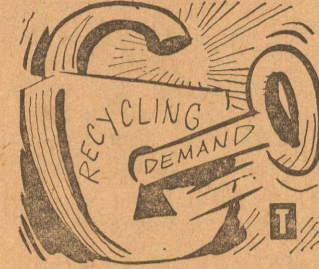

The scrap iron and steel processing industry is a good case in point. It has the wherewithal to recycle material into your next car, refrigerator, and air conditioner, yet the industry is put at a distinct disadvantage.

The scrap iron industry must compete with virgin iron ore for use in the consumer market. Yet freight rates to haul scrap iron are about 2½ times higher than the rates of virgin iron ore. A recent study conducted for the Institute of Scrap Iron & Steel documents that this discrimination in freight rates presently results in a \$4.21 higher cost than necessary to produce a ton of steel using purchased scrap as the raw material. The freight rate alone pushes the recycled material to a tremendous disadvantage.

Moreover, the Interstate Commerce Commission, a regulatory agency established by the Federal Government, refuses to acknowledge the fact that scrap and iron ore compete as raw material inputs in steelmaking.

It is one thing to increase the number of recycling centers around the nation to

reclaim our wastes, conserve our natural resources and beautify the landscape. That is the way it should be. But to increase our supply of recycled material, we must also increase a demand

for its use, as well as allow scrap to compete fairly and equitably with virgin resources. Or else recycling centers serve no purpose but waste heaps, and doing something about ecology becomes an exercise in futility.

The objective, certainly, is recycling, but attention now must be directed first to the need for more demand, not more supply. When the demand for recyclable materials is stimulated, the supply will be forced to follow, and it will follow in the natural course of events. But there is no need for that supply as long as markets cannot or will not absorb what is already available. When the demand is present, the scrap processing industry will be able to handle the supply.

The key to the lock on recycling is demand, and that is what must come first.

Austin, Tex.—Texas state government may see far-reaching new changes in budgeting techniques, hopefully to save money and curb a tax increase.

Gov. Dolph Briscoe expressed enthusiasm for the Georgia "zero base" budget methods inaugurated by Gov. Jimmy Carter two years ago.

Lt. Gov. Bill Hobby and a delegation of Texas budget experts, including Sen. A. M. Aikin of Paris, visited Georgia last week for a briefing by Carter's aides.

When the officials returned, Briscoe said he expects to "be proceeding with implementing (changes) very shortly."

Hobby is chairman of the Legislative Budget Board, which ramrods the Texas budget process. Briscoe said he will instruct his own budget office to take the Georgia system as a model in preparing the executive department's spending recommendations.

Under the "zero base" system, all agencies are instructed to start "from scratch" in drawing up their appropriations requests rather than taking present levels of spending as their beginning point.

Governor Carter asked all Georgia agencies to detail how they would operate under existing revenues, a 15% cut and a slight increase. He also insisted that they list their own priorities of programs as a guide to the legislature in directing economies.

Briscoe has emphasized repeatedly that he proposes to follow that procedure in weighing the value of existing educational programs, as he maps his recommendations for revision of the public school finance system.

Education Study Ordered
The State Board of Education agreed to go along with Governor

Briscoe's request for a complete restudy of the school system after some griping that the job already had been done.

Some board members claimed they had gone over the system with a fine-toothed comb since the initial Rodriguez case decision in 1971 faulting present finance methods for public education.

Briscoe, meanwhile, said he isn't asking for "just another study." What is needed, said Briscoe, is to determine the fair market value of each school district. A fundamental change, he insisted, is necessary in methods of evaluating wealth of a district. There will, pledged the Governor, be no sacred cows in his coming study.

"It would be unfair to commit the people of Texas to another spending increase measured by billions without taking every step to first correct the crumbling foundation of public school finance," said the Governor.

Energy Crisis Steps Ordered

State agencies have been called on by the Governor to cooperate in fuel supply and energy-saving plans including travel curtailment and use of car pools.

Brig. Gen. James Rose was named to coordinate energy conservation efforts among state agencies. At the same time, it was announced bids on the state's annual fuel contract will be three cents a gallon higher than at present for gasoline and four cents more for diesel fuel. The State Board of Control was able to contract for about the same amount of gasoline and slightly less diesel fuel, although consumption usually increases about 10% per year.

The agencies, directed the Governor, must not only keep fuel consumption within given allotments but attempt to build up reserves due to uncertainty of future supplies.

HMO Hearing

The State Insurance Board held a hearing this week (June 19) to study possibility of establishing Health Maintenance Organization—pre-paid medical plans—under Texas law.

Board Chairman Joe Christie said development of HMO's as an alternative to traditional health care should be examined thoroughly to see if runaway medical bills can be checked.

HMOs offer a comprehensive range of medical services and facilities to a single organization at a fixed contract fee paid in advance by subscribers. Christie termed the system "insurance to stay healthy." He said national figures indicate a saving to a family with three children of about \$115 a year.

Community Calendar

June 27, Wednesday, Lions Club meets 12:05, Memorial Building. June 28, Thursday, Social Security man at Court House, 9:30 to 11:30 a.m. June 29-30, Mias Amigas meeting here. July 2, Monday, Lions Club ladies night and officer installation. July 4, Wednesday, Independence Day holiday. July 8-12, Gospel Meeting at the Church of Christ on Merton hwy. July 23, Wednesday, Girl Scouts Arts & Crafts Day, starts 9:30 a.m. Aug. 14, Tuesday, Annual meeting of Southwest Texas Electric Co-Operative, Inc.

In Those Days

ONE YEAR AGO

June 22, 1972—The Lions Club installation program and ladies night was coming up, with Elton McGinnes being installed new president.

Michael Watson, Billy Caveness, and Ricky Flora were attending Camp Hoblitzelle near Dallas, sponsored by The Salvation Army. Derl Griffin of Del Rio bought some lots in the north part of town to be a future warehouse location.

FIVE YEARS AGO

June 20, 1968—Miss Chris Edmiston was chosen All-Star basketball player, for the North-South All-Star Game in Duncanville coming up July 20.

A son was born to Mr. and Mrs. Jack Stanford of Brownwood.

Johnny Mayo was planning to attend college at Ruston, La., on a track scholarship.

Following many weeks of planning and promotion, the Eagle Band were all set to pull out Tuesday for Dallas to march in the parade at Lions International convention.

In Hermosa, N. M., Miss Charlotte Ann Sherwood became the bride of William Jarrett III.

In Big Spring, Miss Jacquelyn Gayle Crawford became the bride of Joe Phillips.

Mr. and Mrs. C. O. Neff announced the engagement of their daughter, Nell, to Leland Craig.

A Historical Marker was being placed north of town to mark the site of the early town of Verand. Western Geophysical seismographs were here making inquiries to house 14 men here in the near future.

12 YEARS AGO

June 22, 1961—The State Firemen's meeting was held in Austin and Palmer West was newly-elected Second Vice President. Mrs. West retired as president of the Auxiliary.

A son was born June 17 to Mr. and Mrs. Dan McWhorter. He was named Paul Jackson.

Coach Earl Barnett announced that football practice would start August 14th.

W. O. Alexander Jr. received his Master of Science degree in Mathematics at Stanford, California.

Fred Watson accompanied local Boy Scouts to Camp Fawcett for a week. Those attending included Phil McCormick, Richard Preston, Buzz McCormick, David Meador, Steve Blaylock, Jerry Stigler, Chris McCravey, Phil Edmiston, Joe Edmiston and Roy Lynn Love.

Myrtle Westbrook and Joe B. Luttrell were married.

Mrs. Oliver Teele was hostess at a meeting of the Thursday Bridge Club, at her ranch home.

The Russell Beach family moved to Sebastopol, California. Dr. M. D. Paul also moved to California after practicing here for a while.

Ford Oglesby Sr. was a patient in Shannon hospital, San Angelo.

65 YEARS AGO

June 26, 1908—On June 19, a boy was born to Mr. and Mrs. John Goad, and on June 21st a girl was born to Mr. and Mrs. Al Jones.

E. P. Sweatt and family returned Saturday from the Pecos where they went on a fishing trip. They report catching lots of fish while gone, and a nice time.

Jeff Enochs and Rob Wright returned from a fishing trip to the South Concho.

Thursday evening, Mr. Ota Smith and Miss Bessie Holland were married. Judge J. A. Whitten officiated.

J. B. Murrah was here Thursday on his way to San Angelo. He had been at Del Rio visiting his brother Jake who has a ranch in the Devil's River country.

Sam Williams and family who ranch about 16 miles east of town are visiting relatives in Mason county.

Frank Murchison left Monday for Oklahoma where he went to look after the interest of Murchison & Silliman. He will ship out some of the Murchison and Silliman cattle right away.

Payne Robinson, who has been in Waco attending school, returned home Monday.

Mrs. A. D. Wright left Monday morning on the stage for Christoval to spend a few days visiting friends and relatives.

Tom Palmer has returned from Missouri where he visited his brother, Allen.

Miss Cora Spencer became the bride of Alfred Stevens in a ceremony June 21st.

The big barbecue was set for July 2nd and was to include speeches by all candidates for local office.

ELDORADO LODGE

No. 890 - A. F. & A. M. Stated meeting 2nd Thursday in each month, at 7:00 p. m. from Oct. 1 to April 1, and at 8:00 from April 1 to October 1. Visiting brethren welcome.

I WISH TO EXPRESS

my great appreciation for the many cards, visits and get well wishes I received during my stay in the hospital, both here and in San Angelo. Thank you, and may God Bless each of you. Darrell McDonald 1*

CARD OF THANKS

We would like to express our appreciation to all the people who were so thoughtful in our time of need. We especially want to say "Thank you" for all the food, cards, flowers and other expressions of sympathy so many of you contributed.

Time for forage production this year is rapidly running out. There are approximately 111 days left for summer growing plants to make their growth before the first frost. Management needed to produce the maximum amount of forage for use by livestock and wildlife, will be one of the most important factors involved.

Rainfall in the amount needed, will be one of the most important factors affecting forage production that is not controllable by man. The right management of the grass now on the land will keep the maximum amount of the rainfall received where it falls and is needed. A good vegetative cover at all times is one of the best tools that can be used to keep the water where it falls for maximum forage production. How much rainfall received is important, but it's the rain that is kept that counts.

Soil Conservation Service technicians assisting ranchers in Soil Conservation Districts have made numerous tests on moisture penetration following rains. Here are some interesting and revealing examples of moisture penetrations. From an article in The Cattleman, written by C. A. Rechenthin of the Soil Conservation Service.

On a denuded range near Robert Lee moisture from a badly needed 2.25 inch rain penetrated only 3 inches. This means that only about one-half inch of the rain soaked in; the other 1 3/4 inches, or 75%, ran off. Within four days, the range was parched and shimmering in the hot sun because the little moisture that soaked in had evaporated.

You had to count that 2.25 inch rain as a total loss on bare rangeland. Rechenthin's statement concluded.

Ranchers throughout all America have learned by experience that they can do many things that will assure maximum forage production. One of these important con-

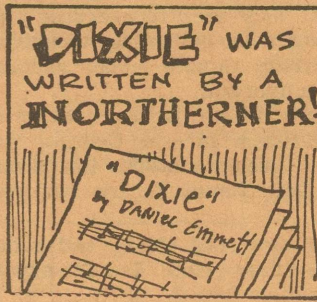

servation practices is deferred grazing. Deferred grazing promotes recovery of the forage stand and permits desirable plants to produce seed. Feed reserve for fall and winter grazing or emergency use and the improvement of hydrologic conditions are more of the benefits of deferment.

"Another system of deferment known as rotation-deferred grazing system is now being used throughout this area," states Lloyd B. Johnson of the Soil Conservation Service. Some of the many advantages of a rotation-deferred grazing system are: the vegetation improves in mulch cover, plant vigor, and spread of the better species of plants. Forage has more variety and yield. Many more advantages of this system will not be mentioned here. However, this last one should be of interest to all ranchers, more net return per acre.

Proper grazing use is another of the practices needed to produce the maximum amount of forage per acre for use by domestic livestock and wildlife. Proper grazing use is leaving 50% or more, by weight of the annual growth at the end of the grazing season on the grass species selected to judge, proper use (the key species) on the key area in each pasture.

The principal target for ranchers should always be the most efficient livestock production possible.

In striving to accomplish this goal the right use and treatment of all rangeland must be carried out. By applying and maintaining all the needed soil, water and plant conservation practices on rangeland the maximum amount of forage can be produced. Without any doubt the most net income should be achieved when maximum potential forage is produced and properly utilized by domestic livestock and wildlife.

MEMORIAL PROGRAM

Your Memorial Gift is a fitting tribute to a loved one. This remembrance helps support the research, education and service programs of the American Cancer Society.

Memorial gift funds may be sent to your local Unit of the Society.

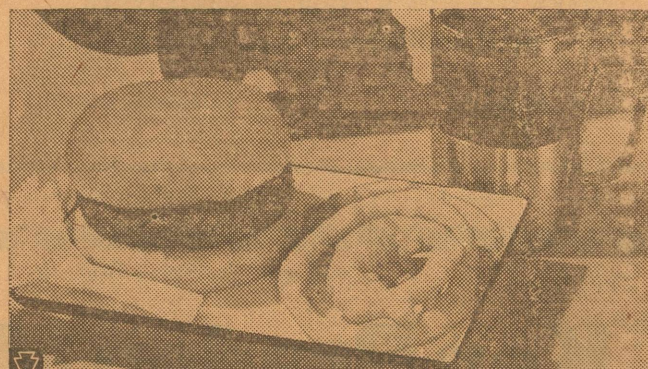

AMERICAN CANCER SOCIETY

We have the appropriate cards to send to the family and to the donor, and will send your check to the American Cancer Society in Austin.

HELEN CARLMAN Memorial Chmn. Schleicher County

SALES PADS, just 10c each at the Eldorado Success office.

Teen-agers and hamburgers make up a nearly inseparable duo; but the juicy ground beef patties are popular family fare, too. — So popular, in fact, that mom may occasionally wish for a bit more mealtime variety.

Next time hamburgers are on the menu at your house, team them up with these Easy Onion Rings. Rings of onion are dipped into a flavorful enriched corn meal batter, then deep fried 'til crunchy-coated outside, tender and moist within. They add a new flavor dimension to the familiar hamburger — great with steaks and other meats, too!

EASY ONION RINGS

Makes 4 servings

1 large onion 1/2 teaspoons salt 3/4 cup enriched corn meal 1 cup milk 3/4 cup all-purpose flour 1 egg, beaten

Slice onion horizontally into 1/4-inch slices; separate to form rings. Let stand in cold water for 15 minutes. Combine dry ingredients. Add milk and egg. Drain onion rings, coat each with flour and dip in batter, draining off excess. Fry in hot deep fat (375°F.) until golden brown, turning once. Drain on absorbent paper. Sprinkle with salt. Serve hot.

Door To Door Sales Are Now Regulated

(by John L. Hill, Attorney General) Austin, Tex.—Both the consumer and the door-to-door salesman will have reason to think twice about an at-home sale now that there is a new state law which gives the buyer the right to change his mind.

The "Home Solicitation Act" by Dallas Senator Bill Braecklein and Representative Chris Semos of Dallas became law when the governor signed it June 13.

Basically, this law provides that if a consumer is solicited at his home for a sale or merchandise or services costing \$25 or more, and subsequently decides that the goods weren't what they'd been cracked up to be, he can back out of the deal within a three-day period.

But it also imposes some strict responsibilities on the consumer, as well as the seller.

For instance, the Home Solicitation Act does not cover sales of farm equipment; insurance regulated by the state; realty sales in which the transactions are being negotiated by a licensed real estate broker or attorney; or sales made pursuant to a preexisting retail charge account, or based upon prior negotiations at a business establishment where the goods were displayed.

The original offer must have been made and agreed upon at your doorstep. And that seems fair enough, since the whole idea was to put the consumer on equal footing with the itinerant salesman whose sales pitch may be better than his product.

The salesman is required to give the consumer a "fully completed" receipt of contract—written in English or Spanish, or in whatever language the sales presentation was made—at the time of the transaction.

Also, he must tell the signer about his cancellation rights, and furnish him with a copy of this printed statement:

"You, the buyer, may cancel this transaction at any time prior to midnight at the third business day after the date of this transaction. See the attached notice of cancellation form for an explanation of this right."

The form recites a detailed description of the duties of both parties.

The buyer has the duty to meet the three-day deadline by letter or telegram, and he must be prepared to take "reasonable care" of the goods or property in his possession until the cancellation procedure has been completed.

If unacceptable home improvements are involved, the merchant has to restore the property to its prior condition, unless the consumer says otherwise.

Violation of the act by a door-to-door seller not only would make him liable for actual damages to the consumer, reasonable attorney's fees and court costs, but he risks having the contract voided.

And if the merchant doesn't refund the consumer's payment and recover the goods which have been rejected within 20 days after receipt of the cancellation notice, the buyer does not have any more duty to return the goods.

Hopefully, merchants specializing in home solicitations will accept the challenge of this new law by making certain that the goods and services they offer are worth keeping.

Editorial Comment From Our Neighbors

Once again it's time for the Advocate editor to get a skinned noggin (from banging it up against the wall) in an effort to round up some interest in the long range value of a comprehensive municipal plan.

Van Horn isn't a particularly pretty little town. We're strung out like the truck route loop around some big cities. We have messy abandoned buildings and huge gaps between businesses along Highway 80. Now we are faced with the very real threat of the interstate by-pass.

Our town is going to change. How it changes is up to us. I believe we have a choice. We can doze along and let whatever fate has in store just happen or we can try to organize ourselves and our town and try to make it a better place to live and do business.

We need to take the time given us and apply it to our best advantage. We need to plan and prepare and most of all work together. We need a municipal plan.

We haven't had a plan in the past and we've survived as a community. But we believe we need to do better in the future than we have in the past now that we are faced with a challenge and we need to meet it head on. We need to design ourselves a town and then spend the next half century building it. When we're through we'll have something to be proud of. Without such a plan we have no idea what to work toward. We may have just what we have now, then again we may not even have that!

—Van Horn Advocate.

Consumer Scene

Abandoned Refrigerators—Tot Traps

An unused or abandoned refrigerator or freezer can be a serious—even fatal—hazard to children.

A child doesn't know a refrigerator is constructed airtight to preserve food. He climbs inside to play "hide and seek," or because he thinks he will escape summer's heat, and death from suffocation can come within 25 to 30 minutes.

Over the last five years, more than 80 children nationwide—most aged three to six—have died as a result of becoming entrapped in stored or abandoned refrigerators.

The problem is not confined just to old units sitting in the weeds in some vacant lot or junkyard. Even more accessible—and thus more likely to be fatal—are the ones in storage or limited use in garages and basements.

Modern refrigerators and freezers are designed to be pushed open from the inside with very little force being exerted. But the older models, and there are literally millions around, have doors that latch securely and cannot be opened from the inside.

It's obviously not just a case of telling kids to "stay away from that old refrigerator." The old appliances represent such tempting play areas—impregnable "forts" and great "jails" in which to lock up "outlaw" playmates.

What can be done about the ever-present problem of refrigerator entrapment?

Engineers at General Electric Company's Appliance Park in Louisville, Kentucky, point out that a few simple precautions are all that is really needed to keep an old refrigerator from becoming a deathtrap.

For one thing, it's against the law in many communities to discard an old refrigerator or freezer without first removing the door. It's against common sense in any community. And this means removing the door right away—not an hour or a week later. It only takes a few minutes for a child to climb in and suffocate.

If you plan to keep an old model, but not use it right away, you can remove the door, or tie a sturdy rope around it with the knot at the back and push the unit up against the wall. Even better is to get a chain and padlock from the hardware store. The man of the house can install this child-saving device for just a few dollars and a few minutes of his time.

Other ways to combat the problem—which is always at its peak during the summer months—include mobilizing civic groups to go in search of abandoned units and to remove their doors, or reporting to authorities anyone who keeps such hazards on property accessible to small children.

Children and old refrigerators—with a little effort they don't have to be a fatal combination.

Some Produce Now Higher Priced

College Station, Tex.—An unusually late spring has delayed ripening of products in most Texas growing areas resulting in relatively short supplies. Mrs. Gwendolyn Clyatt said this week.

Specifically, the consumer marketing information specialist, Texas Agricultural Extension Service, Texas A&M University System, pointed to dry onion prices, noting some moderation, but added they're still "on the high side."

"Cabbage, carrots, potatoes, corn, celery, mustard greens, squash, turnips, radishes and green onions generally are the most economical vegetables."

Also oranges, grapefruit, bananas, lemons, and avocados. "There's a wider choice of small fruits as new items make their appearance on Texas markets."

"These include apricots, cherries, peaches and nectarines—mostly in the high-price bracket."

"Watermelons are more plentiful with more attractive prices."

"Honeydew melons, mostly from the Texas Valley, are on the market now with prices likely as low as they will be this year. Their season is relatively short, so enjoy them now," she advised.

Turning to meat and poultry counters, the specialist suggested chuck roast for family cookouts.

"Cut it into cubes, marinate for kabobs and grill."

"Also, ground beef and liver make good menu choices—no bones, no waste."

At the pork section, Mrs. Clyatt cited values on smoked picnic, ham, some brands of bacon and sausage.

"Fryer chickens are featured at more attractive prices in some markets—but not near last year's bargain prices. Grade A, large-size egg prices offer the best combination of quality and economy for the money," she concluded.

DUPLICATE BRIDGE WINNERS LAST WEEK:

Sanders and Frankie Williams and Zeila Baker died for 1st; Winnie Jackson and Sue Barber, San Angelo, 2nd; Flora Hubble and Melissa O'Harrow, 3rd.

The Santos Pina family spent Sunday at Christoval.

Pete Bryant was fishing Sunday at Christovla.

Farmers Can Save On Use Of Fuel

College Station, Tex.—With the nationwide fuel shortage now a reality, farmers as well as all Americans are being called on to stretch each gallon of fuel as far as possible.

Although farmers are in a priority group to receive special consideration for allocating fuel, it's still vital that they take measures to conserve fuel consumption, emphasizes Henry O'Neal, agricultural engineer for the Texas Agricultural Extension Service.

What are some of the key things a farmer can do to reduce fuel use?

O'Neal lists a few: Reduce tillage practices. Make just one trip over the field, covering as many operations as possible. For instance, plant and apply herbicides or fertilizer at the same time.

Don't cultivate unless necessary. Use the right tractor for the job, if there is a choice. Use a light tractor for light jobs and a bigger tractor for heavier jobs. Use a diesel tractor where possible as diesel fuel is more plentiful than gasoline.

Operate the tractor at proper speeds and keep it properly tuned. The operator's manual is a good guide on proper use.

Don't let the tractor idle for lengthy periods.

Consider moving large equipment by truck rather than driving it on the highways.

Where possible, delay certain operations that will not affect the current crop season, such as ditch clearing and land leveling.

The Texas A&M University System specialist points out that farmers should inform their local county Agricultural Stabilization and Conservation Service office regarding any problems in obtaining fuel.

The Big Thicket

(U. S. Senator John Tower)

Texas is blessed with one of the most unique biological extravaganzas in the entire North American Continent. This is the sprawling semi-wilderness north of Houston and Beaumont known as the Big Thicket. This great region is located at the crossroads between the forests of the South and East, and the vegetation of the West. It is a bonanza of lushness found only in this region, and it contains at least 15 of the trees that have been designated by the United States as National Champions.

At one time, the Big Thicket stretched westward from the Sabine River almost to the banks of the Brazos, an area as large as many of our smaller states combined. Although this legendary wilderness no longer exists in its original state the Big Thicket remains, and is worthy of preservation for future generations.

Attempts to create some type of a Big Thicket National Preserve have been made in Congress for a number of years. In the past, there have been a great number of divergent views, and this in itself has made it very difficult to come up with any consensus on Big Thicket.

But I now believe that we are close to a consensus—at least a big majority of those who have such a vested interest in a Big Thicket Preserve. I have this week introduced a bill which hopefully is acceptable to nearly all who are involved.

My bill calls for a national biological reserve that would include 11 separate units totaling not more than 100,000 acres. These sections would be located in Tyler, Hardin, Jasper, Polk, Liberty, Jefferson and Orange counties. The various units would be known as Big Sandy, Hickory Creek Savannah, Beech Creek, Turkey Creek, Joe's Lake, Neches Bottom and Jack Gore Baygill, Beaumont, Lance Rosier, Upper Neches Corridor, Lower Neches Corridor, and Little Pine Island Bayou Corridor.

I have included in the proposed legislation a provision to protect homeowners in the area. It would allow the homeowner to retain a right of use and occupancy of his property for residential purposes for his or her lifetime. I have attempted to draw the boundaries of the Reserve so as to affect as few homeowners as possible.

Because of the possible loss of tax revenues in the counties in which the Reserve would be located, there is a provision to allow the Secretary of Interior to return portions of the lost taxes to the counties.

Another provision would permit

KENT'S AUTOMOTIVE NOTICE

We appreciate your continued patronage very much. Thanks,

—Richard and Gloria Kent and Employees.

the Interior Department to immediately purchase any section of the proposed Reserve if there is a threat that the section would be damaged or seriously altered.

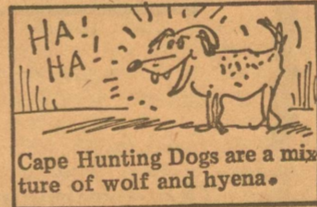

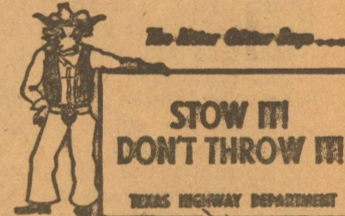

One matter of concern to a great number is that of recreation and hunting, fishing and trapping within the Reserve. Because of the very nature of a biological reserve, I do not think that specific recreational facilities or areas should be developed within its region. My bill permits some hunting, fishing and trapping within the Reserve, but this would be under the strict control of the Interior Department and according to federal and state laws. I have been assured that such things as wilderness trails and other forms of recreation that do not affect the ecosystems of the Reserve would be developed. While there is no provision for the development of organized recreational areas, I have tried to encourage the creation of recreational facilities in areas surrounding it. The Department of Agriculture has informed me that the Forest Service, Bureau of Outdoor Recreation, Texas Parks and Wildlife Department, Sabine River Authority and Deep East Texas Development Association have recently completed a study on the recreation situation and outlook for East Texas. Among other things, the report suggests that the Texas Parks and Wildlife Department concentrate its immediate efforts on recreational facilities around Lake Livingston and other reservoirs outside the National Forests in East Texas. Other developments are suggested for Toledo Bend, Lake Conroe and the Sam Rayburn Reservoir. I will make every effort to assist both state and federal agencies in developing these needed recreational areas.

Some of the nation's foremost biological experts look on the Big Thicket as one of the most richly

substructured regions in existence. Efforts to preserve portions of this great area have spanned 30 years.

We must all realize that there will be no Big Thicket reserve unless the legislators, lumbermen, conservationists, and area residents are willing to discuss and work together on the issue. I believe that now is the time for action to preserve this unique area.

During the last session, the Senate passed a Big Thicket proposal, but the House did not take final action on it. Now, it is time for the House to take early action so we can again move in the Senate on it. Hopefully, by the end of this Congress, we can say that the entire Texas delegation to Congress has reached a consensus and the bill has been passed.

PUBLIC NOTICE

Sealed bids addressed to the Commissioners' Court of Schleicher County, Texas, will be received at the office of the County Judge of said County in the Courthouse, Eldorado, Texas, until 10:00 o'clock A. M., July 9, 1973, at which time the bids will be opened and considered by said Court, for the purchase of—

One (1) 1973 Model Sedan Automobile
All bids submitted to have allowance for trade-in for 1970 four door Chevrolet.

For inspection contact the Schleicher County Sheriff's Department.

Two (2) 1973 Model 1/2 Ton Trucks.
Specifications may be obtained at the office of County Judge.

Bids to consider a 1968 1/2 Ton Chevrolet Truck and a 1959 1/2 Ton Ford Truck as trade-ins. May be inspected at the Schleicher County Maintenance Building.

Heating and Air Conditioning System for auditorium of the Schleicher County Memorial Building.

Specifications may be obtained at office of the County Judge.

J. P. ENOCHS, County Clerk,
Schleicher County, Texas.

JUNE

June 21-Aug. 25 (Nightly except Sundays) Texas production in Palo Duro Canyon. A musical drama of Panhandle history, this show, staged outdoors in the scenic canyon, features 78 actors and singers and a wealth of special effects. Tickets: adults \$2-\$4, children \$1-\$4. Curtain time 8:30 p.m. Information and tickets: Texas, Box 268, Canyon, Texas 79015.

The following events, selected by the Texas Tourist Development Agency, are but a few of the many excellent recreational opportunities offered by communities across the state. A more complete listing of Texas events may be obtained free of charge by writing TTDA, Box 12008, Austin 78711.

June 1, 8, 15, 22, 29 Symphony on the Sidewalk, Houston. Members of the Houston Symphony perform from 12-1 p.m. on the sidewalk in front of Houston National Bank.

June 2, 3 The 14th Annual Tour of Medallion Homes and Historical Places, San Augustine. An antique show and sale is held in conjunction with this event. Sponsor is the Ezekiel Cullen Chapter of the Daughters of the Republic of Texas. Write P. O. Box 480, San Augustine 75972 for additional information.

June 7-9 Fiesta del Concho, San Angelo. A river parade, street dancing and ethnic food highlight the 7th. Exhibits and programs at historic Fort Concho plus a series of dances are slated the 8th. The 9th events at the fort continue, there is a barbeque and in the evening opening of the outdoor pageant "The Land and the River." Presentation of the pageant will continue each Thursday, Friday and Saturday evening through June.

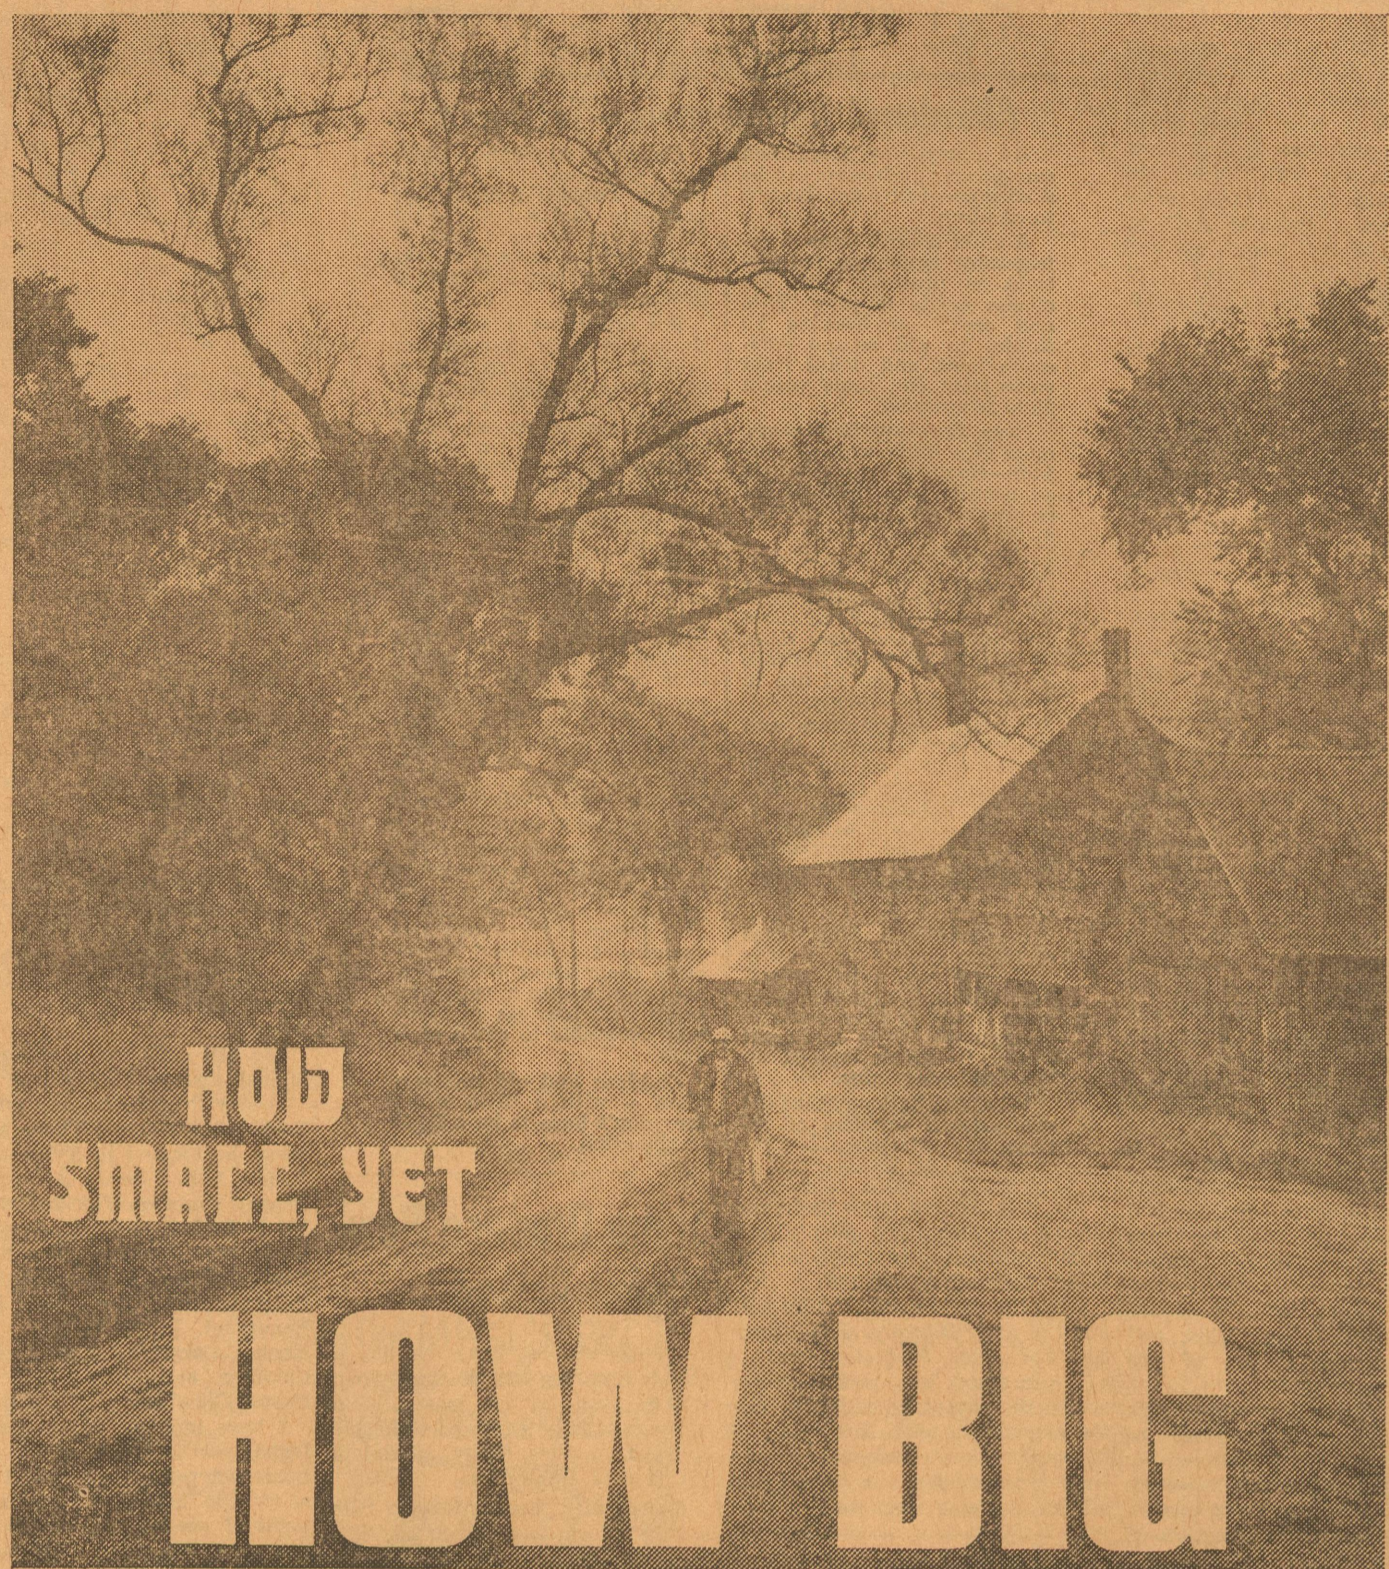

June 10 Alamo 500, Texas World Speedway, College Station.

June 21-23 & 28-30 Fandangle, Albany. This community event, winner of the TTDA's special award for community involvement in tourist development, is in a class by itself. Staged in its own outdoor theatre, Fandangle is filled with the vibrant spirit and exciting action of the pioneer days it attempts to recapture. It is history set to music, and it's all done with local talent. The annual parade is set for 6 p.m. June 21. Tickets \$2-\$3.50-\$4-\$6. Fandangle, Box 185, Albany 76430.

June 22 Houston Symphony performance, Round Top. This free evening performance, guest conducted by Maestro Sixten Ehrling of the Detroit Symphony, is a part of the annual James Dick Festival-Institute. Site will be historic Henkel Square, a large green edged by carefully restored buildings.

June 23 The 13th Annual Coaches All American Game, Lubbock. Sixty top collegiate football players participate in this East-West encounter. Kickoff 7:30 p.m.

June 28-July 1 The 20th Annual Watermelon Thump, Luling. Big days Friday and Saturday. Among the events are seed spitting contests, fiddlers contest, watermelon eating contests, melon auction and carnival.

HOW SMALL, YET

HOW BIG

How small a man seems—walking down a lonely road on a rainy day, with gaunt trees towering over him.

How small man is, and how frail in body. The trees in the picture and even the chimneys on the old house will probably long outlive the man.

Yet how big man is—in the things that are not of the body, but are of the mind and soul. God has not made man mammoth. But He has made him potentially great—

if he will but accept the blessings given him, and use the tools of Christian teachings.

Man finds in the Church, the encouragement and the instruction to enable him to make from his God-given divine spark something great and enduring—and of benefit to all human-kind.
