Are you renting land...

when you should be renting money?

There are many good reasons why it takes some land of your own to be sure of a future in agriculture. You're always welcome to drop by our office and talk over the advantages of taking out a long-term mortgage on farm or ranch property. Right now could be the best time for you to start using borrowed money to buy land ... instead of using your own money to rent or lease.

The No. 1 Tisdale Estate, a re-entry operation, was finaled Dec. 5, 1969, to flow 50 barrels of 43 gravity oil, plus 200 barrels of water, on an open choke through perforations at 5,410-420 feet as a shut-in Canyon gas discovery. Production however was assigned to the Hulldale field. Originally drilled by Sinclair Oil & Gas Co. (now Atlantic-Richfield Co.) as the No. 1 Willie Tisdale, it was abandoned July 17, 1956 at 5,900 feet.

Field Extended Into County Canyon gas production was extended five miles northwest in the Sawyer multipay field and into Schleicher county with completion of Amoco Production Co. No. 2-B Edwin S. Mayer, scheduled 8,000 foot wildcat  $\frac{1}{2}$  mile south of production in the three-well Turkey Roost (Pennsylvanian gas) field, 5 miles north and very slightly west of the Mayer Ranch (Canyon) field of Sutton county and 25 miles southwest of Eldorado.

It was finaled for a calculated, absolute open flow of 5.4 million cubic feet of dry gas per day thru perforations at 7,028-054 feet, which had been acidized with 1,500 gallons and fractured with 30,000 gallons and 27,500 pounds of sand. The field now extends approx-imately 50 miles running from southwest Schleicher County north central Edwards county, the latter of which has three Canyon wells.
