74TH YEAR

ELDORADO—SCHLEICHER COUNTY, TEXAS (76936)

Thursday, May 22, 1975

Number 21

by Lyndell Williams  
Texas Press Association

Austin, Tex.—Legislators are moving toward adoption of a scaled-to-income school finance bill, their No. 1 priority item in closing weeks of their 1975 session.

The House, on the third day of trying, finally reached narrow agreement on a \$721 million version of education finance overhaul.

Under terms of the bill, now before the Senate, school teachers would draw a starting pay of \$8,000 a year.

House Speaker Bill Clayton, who engineered the House bill after representatives scammed out of running the cost up to nearly \$2 billion, termed the effort a "responsible compromise."

However, it far exceeded the \$500 million to \$600 million then expected to be available for additional school spending.

Comptroller Bob Bullock was expected to send in a revised revenue forecast any day which could make it possible to spend as much on schools as contemplated by the House without additional taxation.

Test votes in both the House and in Senate subcommittee have gone against Gov. Dolph Briscoe's so-called weighted-pupil approach to distributing state school aid.

Indications are the bill finally agreed on in conference committee will follow pretty close present formulas for state education spending, and critics claim there isn't enough money to do an adequate job of equalizing opportunities.

### Bills Advanced

Three bills designed to curb rising cost of medical malpractice insurance, which has led to doctor strikes in California, were passed by the Senate amid heated debate.

One of the bills provides for a malpractice pool to guarantee coverage for doctors and hospitals who cannot buy policies on the open market. Another sets up a system of rate filings with the State Insurance board. The third fixes limits of \$500,000 on recovery for malpractice, not including actual medical bills.

State Insurance Board Chairman Joe Christie expressed sharp displeasure over some of the measures.

### Short Snorts . . .

Don B. Odum resigned as Texas Insurance Commissioner, one of state government's top regulatory jobs.

Texas Bureau of Business Research at The University of Texas sees signs of an economic revival just around the corner.

Local and regional chambers of commerce have been called on by the Governor to coordinate the new Texas First program to generate 4,000 new jobs in the next year.

Legislation to encourage development of geothermal energy resources has been sent to the governor.

The 1976 presidential preference primary bill also has been finally passed and awaits signature.

Drouth in the High Plains may cut winter wheat to 137.5 million bushels, according to Agriculture Commissioner John C. White.

Smoking in public places will bring fines up to \$200 if the Governor approves a bill sent to his desk last week.

### Area Scouting Changes Name To Amangi Dist.

Two local Boy Scout Districts have emerged into one large district. These two districts, previously known as Tri-Rivers and Twin Mountain, will now be named Amangi Trail District. Amangi, an Indian word meaning "Large One," is indeed a fitting name for the new district which covers 12 counties. Communities in the Amangi Trail District include Bronte, Robert Lee, Ballinger, Miles, Big Lake, Brady, Rochelle, Eden, Menard, Junction, Eldorado, Sonora, Ozona and San Angelo.

John Smith, Concho Valley Council president, explained that the merger of the two districts will result in improved efficiency and effectiveness in program operation and growth potential and in achievement of projected goals.

The merger was approved by the Council Executive Board meeting in Del Rio in February and ratified by the Two District Committees in March.

The name for the new district was suggested by Kolon Kedziora, Troop 2, San Angelo. Scout Kedziora will receive a trophy as winner of "Naming the District Contest."

use it wisely!

### Reddy's helpful tips for your Room Air-Conditioners

Your air-conditioner will operate inefficiently if filters are not cleaned regularly. Dirt and lint, collected on the filters, restricts air flow to the coils. Clean filters every two weeks.

Let nature help you save energy by shading your home with trees and shrubs to help cut down on summer cooling costs. Draw draperies against afternoon sun.

Remember to keep outside doors, windows, and fireplace dampers closed. If you have window units, close the heating vents near the floor, as cool air falls and can escape through vents.

You purchased fine-home comfort when you bought your air conditioning unit. Properly maintained, it will offer you years of efficient service. A once-a-year check-up by your dealer pays dividends in savings on operating and breakdown costs.

THE HEARTY ROSE

If roses are your favorite flower, join the ranks of rose lovers through history. Fossil roses have been found in Oregon dating back 35 million years.

One reason for the popularity of the rose is that it is marvelously hearty and will grow in almost any soil in every section of the country. The basic requirements are that the ground be well drained and the site receive full or partial sunlight. To plant roses start with a hole 12 inches deep and 18 inches in diameter. Loosen the bottom soil and form a small cone of earth in the center. Carefully fan out the roots, place the bush over the cone and fill in soil over the roots to about four inches from the top of the hole. Tamp firmly so the roots are well anchored, and water thoroughly. Fill the hole completely and fill the soil one or two inches up the stock of the bush. After that, fertilize your roses two or three times a year with a fertilizer that's high in phosphorus and water them steadily and regularly, so the roots are always kept moist.

Rose lovers without much garden space will be happy to know that roses can be grown in containers. Any place that enjoys 4 to 6 hours of sunlight daily is suitable.

When you cut your roses, it's best to cut just above the topmost spray of fine leaves. It's better to cut off too little than too much, though pruning usually stimulates growth and helps prolong the life of the roses.

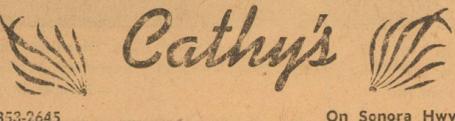

A rose is a rose... is a flower that grows luxuriantly with a small amount of care, a moderate amount of knowledge, and a lot of love.

**Brush Management and Range Seeding**

Since sometime back in December the control of undesirable brush and range seeding are two conservation practices being carried out in the Eldorado-Divide Soil and Water Conservation District. To date 4,239 acres of brush management and 4,543 acres of range seeding has been carried out and cost share assistance has been received from the Great Plains Conservation Program.

It is estimated that some 780,000 acres in the district is infested with medium or heavy stands of brush such as mesquite, cedar, lote, agavito, and pricklypear.

Bill Rountree, District Conservationist assisting the district said—"During the past years brush has continued to get thicker on rangeland already infested. Also, brush is fast becoming a problem on rangeland where there was very little undesirable brush a few years ago. If we control brush at the rate of some 18,000 to 20,000 acres each year it will take approximately 39 years to get the brush controlled."

How long can we afford to allow undesirable brush to use our moisture that should be used for growing grass for our livestock and wildlife? Research has proved that it takes three times as much moisture to grow a pound of brush as it does to produce a pound of grass. Brush control alone will not as-

A good umbrella keeps you dry—unless the wind starts blowing. In this case, you are bound to get soaking wet!

There is really no such thing as total protection; neither in an umbrella nor in living through just one day. There are all sorts of windstorms, and they sweep into our lives and upset the best made plans. When this happens there is no such thing as finding an umbrella under which to hide.

Since life is so complicated, each of us has to learn to face it in his own way. Those with a strong and unshakable faith are the lucky ones. They have gained a sense of proportion and basic values through their church. And they didn't just "get" faith! They had to start looking for it. YOU do, too. And where? In church, of course!
