Austin, Tex.—Governor Dolph Briscoe has assigned top priority to curbing soaring state governmental spending and thwarting predictions of a major state tax bill in 1977.

At the same time, the governor said all his political options for the future remain open, although he emphasized he is making no present plans for a third term.

Briscoe's predictions that the state can avoid a tax bill in two years fly in the face of forecasts by Texas Research League and Comptroller Bob Bullock. TRL only a week earlier said the legislature may have to raise \$750 million to balance the next budget in view of 1975 spending levels.

However, Briscoe stated: "I am optimistic that we can meet the fiscal needs of the state for a third term without new and additional taxes. We can't do it unless we try. That is our No. 1 priority. I will work toward that end."

Briscoe said he is hopeful the new Joint Advisory Committee on Government Operations will point the way to how to economize, increase efficiency and reorganize government effectively.

As for his own plans, the governor said it's too early for serious talk about a third term. But he acknowledged the subject has been discussed in private conversations—"just passing the time of day."

Democrats Moving

Texas liberal Democrats are getting organized for the 1976 presidential preference primary, while, at the same time, challenging legality of the primary.

Democratic National Committee-woman Billie Carr of Houston and others are inviting Democratic presidential candidates to a September 20 meeting here. The group calls itself "Texans for Somebody Else"—somebody else, that is, besides U. S. Senator Lloyd Bentsen or Alabama Governor George Wallace.

Ms. Carr and others filed a challenge with the national Democratic Compliance Review Commission, contesting the 1976 presidential primary act, passed by the legislature this year, was largely to help Bentsen.

Short Snorts . . .

Actual start of the Senate impeachment trial of 229th District Judge O. P. Carrillo may be delayed until September 22.

Texas liberal Democrats have filed a challenge of the Texas presidential preference primary law and proposed 1976 party delegate selection procedures.

Top brass of the Republican party will be in Dallas September 11-13 for the 18th biennial convention of the National Federation of Republican Women.

Texas farmers produced a record wheat crop and the second largest sorghum crop ever, Agriculture Commissioner John C. White reported.

An end to the slide of the Texas economy is in sight, according to a Texas Business Review report. Industrial production is up for the second straight month.

Texans are paying higher long distance rates—but not nearly as high as requested originally by Southwestern Bell Telephone Company. Atty. Gen. Hill blocked the initial proposal and forced a court compromise last week.

TO CONDUCT SERVICE

The Church of Christ on the Mertzton highway will conduct the services Sunday afternoon, August 24th, at the Nursing Home starting at 3:30 p.m. Gene Baden came on the job as new pastor of the church a few weeks ago.

**Six Flags To Present
Rock And Roll Revival**

Arlington, Tex.—Solid gold sounds will be heard at Six Flags Over Texas when the big theme park presents four legendary names in rock and roll.

On Friday, August 22, Motown's Marvelous Marvelettes will share the stage with the original Coasters. Bo Diddley and the Shirelles will appear on Saturday, August 23.

Owners of seven gold records, with over 20 million records sold, the Marvelettes have appeared on every top television show and in every top night club in the United States and Europe. Their show features their biggest hits including "Please Mr. Postman," "Beechwood 4-5789," "Strange I Know," and "Too Many Fish in the Sea." Showtimes for the Marvelettes are 7:00 p.m. and 9:00 p.m.

Also appearing will be the original Coasters. Their consistently successful comedy/novelty act began in the mid-1950's, and over the years they have placed records on the national popularity charts repeatedly. Such tunes as "Smokey Joe's Cafe," "Down In Mexico," "Searching," "Charlie Brown," "Yakety Yak," "Along Came Jones," "Little Egypt," and "Poison Ivy" are included in their long list of favorites. The Coasters' shows will be at 8:00 p.m. and 10:00 p.m.

On Saturday, August 23, singer, songwriter, and guitarist Bo Diddley will perform. He is one of the few artists in history to write a song about himself, title it after himself, play and sing it himself, and then make it into a rock "standard." Bo Diddley will appear at 7:00 p.m. and 9:00 p.m.

Also appearing on Saturday will be the Shirelles. Their first song, "I Met Him On A Sunday," gained virtually instant fame. It was followed with hit after hit including "No Sugar Tonight," "Dedicated To The One I Love," "Soldier Boy," and "Foolish Little Girl." Their shows will be at 8:00 p.m. and 10:00 p.m.

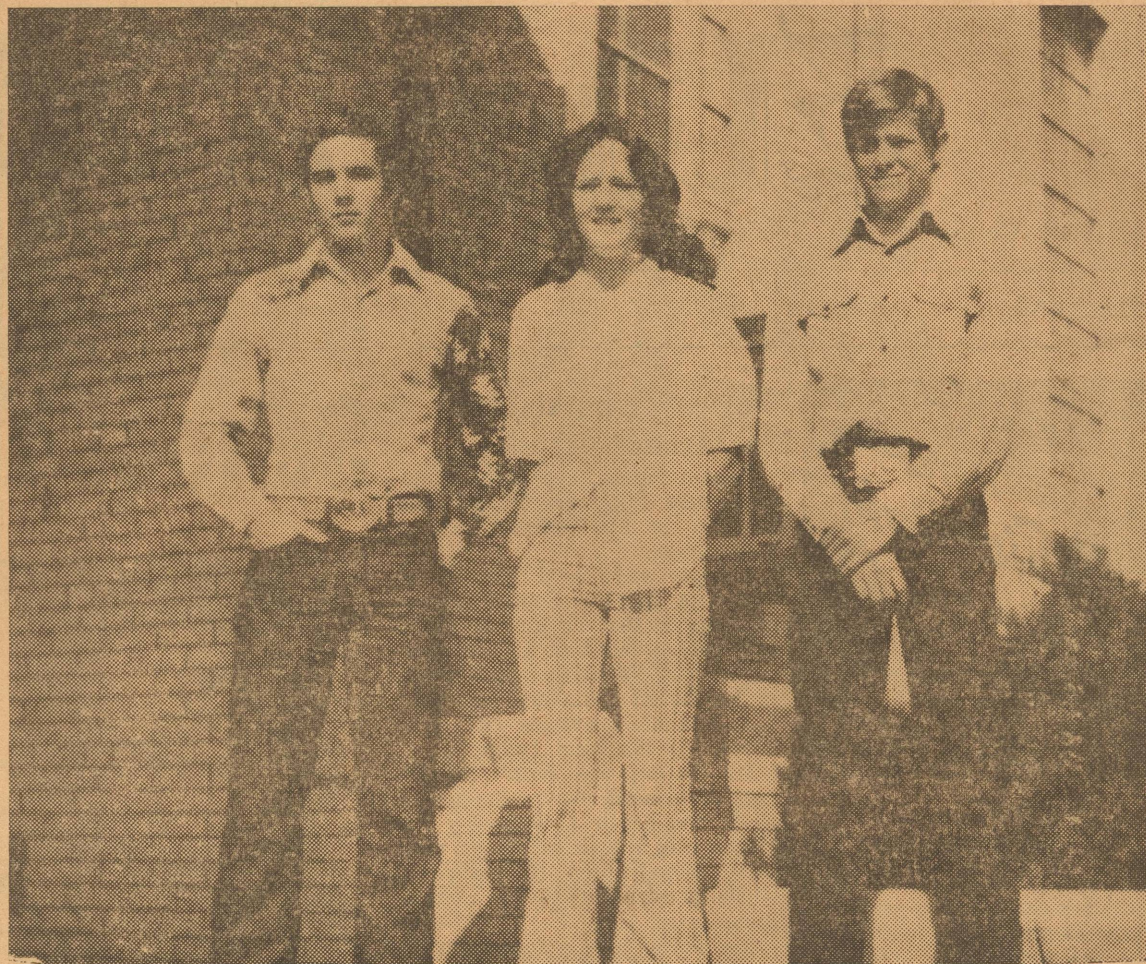

Six Flags Over Texas will present the rock and roll favorites in the Music Mill Theater.

The park will be open from 10:00 a.m. until midnight both Friday and Saturday.

Food Weapon?

WASHINGTON—Will the United States ever use its abundant food basket as an international weapon?

That is a question being asked more and more as American supremacy in military and industrial strength continues to slip.

No one doubts American supremacy in food production. According to an official government study, the whole world has become dependent upon America for grain. The U.S. now supplies nearly three fourths of the net global exports. Trends in population, food production and climate indicate that American supremacy in food production will become even greater in years to come.

What should U.S. policy toward the rest of the world be when our country becomes the sole exporter of food? One alternative is to use food as a weapon for political blackmail of other countries. But this is something we should not do.

First, any decision to withhold food probably would stimulate production in other countries which could potentially cut into our own export markets. Other countries could produce more food if they were willing to pay the price.

Second, if the U.S. chooses to withhold food as a tool of national policy, what happens when the "needy" countries become the Soviet Union, China, or other, developed, but food-scarce nations? As long as the U.S. is dealing with clearly inferior military powers, it would perhaps be possible to use food as a "weapon" to exact diplomatic concessions. But it could be very dangerous to use such tactics against a nation that is as strong militarily as ourselves.

If food becomes so scarce that the major military and industrial powers are threatened, the world could see a forced migration to food producing areas, backed by military force and nuclear threats. The instability and resultant chaos in urban centers would make traditional civilized methods of problem-solving unworkable.

Another reason for rejection of a policy that would turn food into a tool of international diplomacy is moral. We would be turning our back on the proud record we have set of selfless aid to other nations which desperately need it.

In the event of world food shortages of such magnitude that the U.S. has a life-or-death power over the neediest countries, we would be false to ourselves to withhold the bread of life from starving peoples. I cannot think of any political advantage we could gain that would compensate for the sacrifice of our best impulses as a people and as a nation.

Screwworm Surge Continues

Screwworms! Screwworms! That's about all Texas livestock producers are hearing these days. And the situation will probably get worse in the coming weeks as peak fall build-ups occur.

The current year is shaping up as the worst in total number of confirmed screwworm cases since the disastrous 1972. Cases totaled 1,164 in June, 1,383 in July, and as of Aug. 10 the 1975 Texas total stood at 3,775. The seven-month total for 1972 was a monumental 36,428 cases.

New counties having their first 1975 screwworm cases confirmed within the past week were Burleson, Callahan, Coke, Crane, Ector, Houston, Kent, Reeves, Rannels, and Wichita, on the Texas-Oklahoma boundary.

With the sterile fly production program at the Screwworm Eradication Lab at Mission operation at maximum capacity, the main responsibility for keeping screwworm numbers under control rests on the shoulder of producers.

Herds should be checked regularly and worm samples from infested wounds should be sent in to the Mission Lab to confirm whether or not the pests are actually the flesh-eating screwworms. Once confirmation is made the area where the cases was reported is bombarded with sterile flies that mate with the native screwworm flies. This results in sterile egg masses, and the screwworm's life cycle is broken.

Besides regular herd inspections, we advise producers to postpone until cooler weather such animal surgery operations as dehorning, branding, castrating and ear-marking. The navels of newborn animals should be treated with a recommended protective smear as soon as possible, since they are the sources of a high percentage of confirmed cases.

Containers for mailing worm samples are available at the county Extension office and from veterinarians and livestock inspectors.

Samples should be sent to the Screwworm Eradication Lab, P.O. Box 969, Mission, TX 78572.

Indoor Gardening

Many home gardeners like to practice their skills during the winter as well as the summer by raising foliage or flowering plants indoors.

With today's high prices many homeowners are considering the possibility of producing vegetables in the home. This can be an interesting hobby and at the same time can provide a limited amount of tasty food for the dinner table.

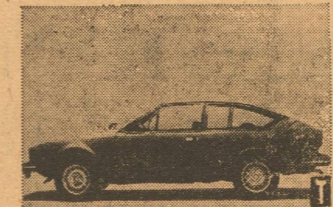

Vegetable crops which normally do well indoors include chives, parsley, peppers, tomatoes, leaf lettuce and radishes. Others have been suggested for the indoor mini-garden, but require considerably more skill and attention for success.

The basic requirements for indoor gardening include suitable containers, a good fertile soil mix, adequate water and sufficient space with adequate light for plant growth, but will run from 6 inch pots for small plants to 3 to 5 gallon containers for plants such as tomatoe and pepper. Regardless of the type containers used, they must be well drained. The soil mix should be high in organic matter and can be purchased at nurseries or made at home. Good growth will result if the containers are watered occasionally with a diluted fertilizer solution.

Family Film To Be Shown August 31st

TIME TO RUN, a film that is a mixture of problems and solutions, will be shown at the Eldorado High School Auditorium by the First Baptist Church on Sunday, Aug. 31. The feature, filmed in Eastmancolor by World Wide Pictures, will be shown once beginning at 7:00 p.m.

Viewed purely as entertainment, it's the suspenseful story of Jeff's attempts at sabotage in the nuclear generating plant conceived, designed and managed by his father. Jeff strongly feels that the plant is a threat to the environment, and he puts his feelings in action.

Viewed on an emotional level. TIME TO RUN is the deeply moving drama of the conflicts that are tearing a family apart—conflicts that develop between husband and wife, and between father and son. In an attempt to find freedom from the ever-growing hostilities, Jeff takes to the road, hoping to discover some meaning in his confused life.

In an attempt to find freedom from the ever-growing hostilities, Jeff takes to the road, hoping to discover some meaning in his confused life.

Approached from a religious perspective, TIME TO RUN is also a story of friction between Jeff and his girlfriend, Michelle, played by Barbara Sigel, who is a familiar face to television viewers. Michelle has discovered a spiritual dimension in her life, and this aspect is very confusing to Jeff, who has little time for "a God who would allow war, hatred, and suffering on earth." But his life is shattered by an avalanche of personal problems, and he finds himself at a Jesus people gathering with Michelle, where he glimpses the possibility of a new life-style based on love and understanding.

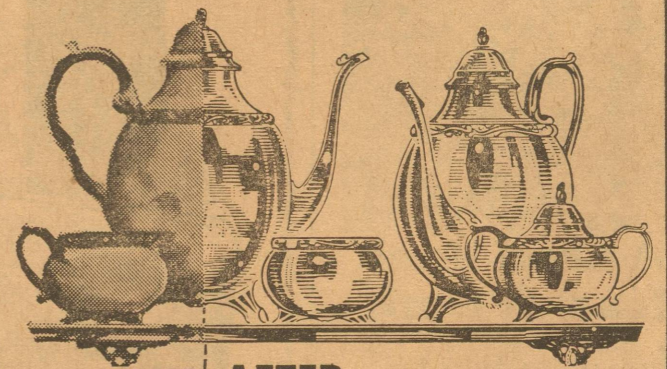

TIME TO RUN is a film that can help strengthen love relationships between people. It's a film that was made for families to attend together.

Following the movie, all junior high and high school students are invited to the First Baptist Church for refreshments and discussion in the church fellowship hall. This will be the first meeting of the Union Youth Fellowship, sponsored by the Eldorado Ministerial Alliance, for the 1975-76 school year.

AND-S-AND

The sign & is called the ampersand from the phrase "and per se and" or "& by itself means and." The character is believed to have originated as an abbreviation of the Latin et meaning "and." It is pronounced Am-per-sand.

Convenience Foods Good Bargain

Despite the higher costs, convenience foods may be the best buy for the homemaker with limited time or cooking skills—and for the small family or person living alone.

Convenience foods are those which have been processed or prepared before reaching the grocer's shelf, saving the homemaker from doing the work "from scratch."

These foods usually save preparation time and energy—and some, such as frozen orange juice, are even more economical.

Homemakers can ask themselves these questions when deciding whether to purchase convenience foods or not:

—Would the product relieve me of work I would rather not do?

—Would it meet the quality of my home-prepared variety?

—Will this product provide as many nutrients as my home-prepared product?

—Will the time I save by using this product allow time for other activities?

—Will it require special storage facilities?

—Will it cost more or less per serving than the home-prepared product?

Read the label on convenience food packages to be certain that convenience foods similar to enriched and fortified home-prepared foods are also enriched or fortified.

Mobile Home Safety

Potential mobile home buyers should be particularly aware of safety considerations. Below is a suggested checklist for mobile home safety:

—Are there at least two outside doors, preferably on opposite sides of the unit in case of overturn?

—Does each bedroom have a window large enough for escape in an emergency?

—Do you have to pass the furnace to escape from any bedroom?

—Are there different floor levels which could be dangerous in darkness?

—Does the unit have built-in anchorage straps for anchoring against wind damage?

Safety should be the most vital factor when choosing a mobile home.

THE SIZE OF THE CREATURE

No doubt the dinosaur thought—if dinosaurs thought at all—that he was big enough, powerful enough to survive anything. But the dinosaur is extinct.

Man used to think that his brain, his cleverness, his frightening weapons made him a cinch for survival. Now we talk seriously about man's "hope of survival."

No wonder the dinosaur has become fascinating. Poor fellow—so big and powerful and extinct. Surely if he'd had our intelligence and our nuclear war-pile, he'd have made it!

But there's always that gnawing uncertainty—maybe it takes something else!

Come to church and you'll be rubbing shoulders with people who are sure it does. For them, mankind's hope is not in the size of the creature... but in his soul.
