County Fathers Look For Cost Cut Measures

The Schleicher County Commissioners met Monday, July 28, with a full court present and resolved many of the issues currently facing them. After approval of the minutes and this month's maintenance bills, the commission discussed the expenditures toward gasoline and resolved within themselves to cut their costs and re-outline the court policy pertaining to gasoline expenditures within the various departments.

A special session was called for Friday, August 1st, behind closed doors to re-outline the expenditure policy currently practiced.

Other action taken by the Court included the approval for A. G. McCormack to reinvest certificate of deposit no. 1352 into a 90 day certificate of deposit, and transfer the interest into the general fund.

The value of the certificate was \$22,900.

A majority vote was taken in passing a reduction of 5 percent of the current oil industrial tax following heavy consideration and discussion by the Commissioners.

Commissioners adopted a proposal asking for an increase in County Extension Agents' Nancy Lester and Jerry Swift travelling expenses.

Commissioners also scheduled the first meeting in September for their annual public hearing on the budget and tax revenue.

Final action taken by the Court approved Dorothy Evan's delinquent tax roll.

The next regularly scheduled meeting for the Commissioners Court is August 11th.

Loeffler Opposes Minnow Designation

Designating the Devil's River minnow as a threatened species is an action unsupported by facts or by circumstances. U.S. Congressman Tom Loeffler (R-TX) charged today as he urged the Department of the Interior to immediately withdraw its proposed designation.

In testimony filed at public hearings on the issue, Loeffler though Aide Robert Paschal, called the proposed federal action to protect the minnow "unwarranted and unnecessary." Loeffler based his conclusions on careful review of the data used to support the proposal. Although he noted a recognized need to maintain a careful balance between man and nature, the 21st District Representative categorized evidence supporting the designation as "inconclusive and insufficient".

"Those of us in Texas are keenly aware of the critical importance of water in sustaining our citizens, livestock, and wildlife," Loeffler's testimony said, "particularly during times of terrible drought such as is

currently being experienced in our State. While the proposed designation of the species and its habitat is located in an area of Texas where fresh water is in short supply, under the care and guidance of concerned landowners, the Devil's River, its associated springs and tributaries and its natural habitat have remained and will continue to remain relatively undisturbed for many de-

Physical examinations for prospective members of this year's Eldorado Eagles High School boys athletic squads will be given Thursday, August 7, at 12:30 pm in the band hall classroom.

All boys who plan to participate in either football, basketball, track, tennis, and/or golf are urged to attend. The coaching staff at EHS also asks that you eat a normal lunch beforehand and please sus-

tain from candy or soft drinks until after the physicals.

These physical exams are a requirement of the School system and of the University Interscholastic League. This service is rendered at this time free of charge; however, those not attending will be asked to obtain their own physical at their own expense.

Football players should report to the fieldhouse Wednesday, August 6 from 6:30 to 9:00 pm for issuance of

Devil's River Minnow as a species is declining when the Service admits that "little is known about this species," and most importantly, that "no data have been collected on relative numbers of the Devil's River minnow." Without better knowledge of actual numbers of the species, Loeffler said, determining threats to its number would be impossible.

Since the impact such designation might have on water use by agriculture producers of the area is unclear, actions which could only result in severe restrictions on food and fiber production should be considered beforehand, Loeffler maintained, not afterward.

Loeffler questioned conclusions of the Fish and Wildlife Service that the

From City Hall

Heat relief is available to Schleicher County, according to a recent news release.

City Secretary Carolyn Mayo called the Commu-

nity Action Council's office in San Angelo on Monday and requested further information. The representatives were anxious to hear from Schleicher County due to our poor participation in

the C.A.C. programs. As you will remember, the C.A.C. took applicants for the winter program. To our knowledge, only two persons in Eldorado are receiving aid from that program at this time. This program is federally funded and is aimed at assisting eligible senior citizens and handicapped persons. Persons eligible for the

winter program are automatically eligible for the Heat Relief program.

Each approved household may receive up to \$200 in assistance-\$100 for payment of utility bills and \$100 for repair or purchase of cooling equipment.

A C.A.C. representative will be taking applications and answering questions at

City Hall on Monday, Aug. 4, from 9:00 am to 3:00 pm. Persons wanting further information should meet with this representative or contact the C.A.C. office in San Angelo. In San Angelo, Janet Appleton at 658-1739 or Dan McGrew at 658-3147 have been assigned as representatives for Schleicher County. Applicants should pro-

vide proof of income, and if possible, a statement from their physician or County Health Office, Dr. Brame, stating health related need for Heat Relief such as diabetes, high blood pressure, etc.

If you know anyone needing this assistance, please contact your local City Hall at 853-2691. There is a free booklet

available at City Hall upon request. It is "Taxpayer's Rights, Remedies, Responsibilities!" You will find it down-to-earth and informative during this period when the tax laws are becoming more and more confusing. Ask for it the next time you are in City Hall. I am happy to report that the Progress Council is

Traffic Tips

Have you ever seen a boll weevil standing by a coffee pot kicking the donuts on some old iron?

Sure you have, you just didn't describe it in the special lingo that truckers use. Boll weevil is a novice driver; coffee pot is a restaurant; when you kick the donuts, you're checking the tires; and iron refers to an old model truck...Its all in the Truck Driver's Dictionary, published by the American Trucking Association.

Grim statistics department: Driver's 15-24 make up about 21 percent of all drivers; yet they are involved in 35 percent of all traffic accidents, 33 percent of all traffic fatalities, and about 68 percent of all fatal accidents in which alcohol is involved.

Would it scare you to know there is a disease that injures 2 million Americans a year at a cost of over \$50 billion? These are the figures on the conse-

quences of traffic accidents, but it hasn't caused any panic among the public. Guess we're used to it, or just plain dumb.

But you didn't know department: 45 percent (11

million tons a year) of all the salt produced in America is used by state highway departments to de-ice winter roads... only 2.3 million tons are dumped on food...

Ancient History...The first Texas auto traffic law was passed in 1907. It required vehicles to be equipped with a bell or some other device to warn of their approach.

Owens To Receive Award

Dana Ray Owens of Eldorado will be presented an award by the Vocational Homemaking Teachers Association of Texas at the organization's awards banquet in the Grand Ballroom of the Dallas Hilton Hotel, Wednesday, July 30. The

award is in recognition of her service to the teaching profession.

Ms. Owens, a teacher in the Eldorado school, will also participate in a three and one-half day State In-service Conference for the professional development of vocational homemaking teachers. The conference, arranged and planned by the homemaking education division of the Texas Education Agency, will be highlighted by twenty special interest sessions offering a diversity of subjects for home economists.

National business authorities and educators will present sessions on creative teaching, curriculum development, classroom motivation, consumer education, the food service

industry, education for parenthood, and programs for older Americans. Special emphasis is given by professionals in the field on the training and motivation of the disadvantaged and handicapped. All sessions will provide an opportunity for homemaking educators to integrate new knowledge and instructional techniques in classroom discourse.

Hosting the 84 club this week was Opal Parks in her home on Tuesday, July 22. Present were Lois Etheredge, Annie Speck, Lillian Mikeka, Louise Logan, Bessie Doyle, and Opal Parks.

Driveline

Did You Know? Nearly 100,000 American children are injured every year in car accidents. Over 800 fatalities a year are children under five. Now isn't that a good reason to slow down and buckle up?

History Lesson: the first speeding ticket was issued in 1902 to T.H. Shevlin of Minnesota, who was the first of the hot rodders. He was fined ten dollars for going over ten MPH.

Consumer Tips: The subject today is tires. A recent study suggests that one car in four has at least one seriously underinflated tire (4-6 lbs. under manufacturer's recommendation). An underinflated tire is more likely to blow out, wears ten percent faster, and reduces gas mileage by up to one mile per gallon.

Carry your own air pressure gauge (they're cheap) and check the pressure often. And always check pressure when tires are cool, since driving can heat up tires, and that heat can increase the apparent air pressure by 4-8 pounds.

At 70 MPH, your car encounters wind resistance equal to 30 horsepower. That's twice the wind resistance encountered at 55 MPH, which translates into 3-5 more miles per gallon at the lower speed.

DWI Beware...Texas law now requires automatic suspension of a driver's license even for a misdemeanor conviction for DWI... And there's a reason for it. Experts believe at least half of all traffic fatalities are related to drinking.

Across The Desk

Education has been the main topic in the Capitol City for the past week. It seems that following a Texas Supreme Court ruling, one that states that "the burden of public education for illegal aliens rests upon the State," legislators in Austin are taking sides. Attorney General Mark White leads those opposed to the ruling.

White contends that because illegal aliens are not citizens of the state, and the burden of their being here falls upon the Immigration Service, then the Federal government should pick up the tab. White has appealed the ruling to yet higher courts, and stands firmly resolved to continue his efforts all the way to the Supreme Court if he has to.

Leading the proponents of the ruling is State Comptroller Bob Bullock. Bullock has carefully analyzed the effect on the Texas Education system budget, and relates the insignificance of the matter in terms of dollars.

"The state pays local school districts about \$2.8 billion annually to supplement the cost of education. The extra \$40 million it has been estimated to cover the

cost of education for illegal aliens is only 1.4 percent of the state's education budget." There are about 2.6 million children attending Texas Public schools and while nobody knows the exact number of school aged illegal aliens, it's probably not more than 20,000 to 50,000. That's somewhere between 1 and 2 percent."

White continues by adding, "illegal aliens have been paying sales tax, motor vehicle tax, and gasoline tax just like Texas residents. Some may treat them as second-class citizens, but they are first class taxpayers. Frankly, it's time we quit worrying about where some kid was born and start worrying about what kind of education all our kids are getting."

Drought conditions continue in the Schleicher County area, and with each day of blistering sun many farmers and ranchers are slowly watching this year's income sources wither away.

Although several sections of the state received

light to moderate rain showers last week, the areas of the state encompassed by moderate drought conditions continue to expand according to a Texas Department of Water Resources news release. Schleicher County is listed as having a moderate drought level on the Palmer Index, and relief from rain is far from sight.

To whom it may concern: We have had a loyal and trustworthy friend who has lived as a part of our family for fifteen years. U.S. Congressman Tom Loeffler, our representative from the 21st District, warned government bureaucrats from the Department of the Interior the consequences of declaring the Devil's River Minnow an endangered species and improvising critical habitat regulations at a public hearing held in Del Rio last week. We are all aware of the many aspects of the governments latest attempt to control our everyday life due to excessive media coverage.

Loeffler declared the proposal "unwarranted and unnecessary," while categorizing the supporting evidence as "inconclusive and insufficient." Loeffler and many other area citizens hashed out their dis-

Perceptions of American Power: As Important as Power Itself

In international relations, the perception of power and resoluteness is as important as power itself.

Understanding this important principle makes it easier to understand why the Soviets view American protest over the invasion of Afghanistan in much the same way a motorist views the barks of a pursuing collie.

The Soviets have always understood the importance of power, and have used it — or the threat of it — effectively. Until recent years, Americans recognized the importance of a strong and effective military in the conduct of our relations with other countries. Things have changed. It is apparent that our foreign policy leadership today would rather concede to the Soviets than maintain a strong American position. And in one part of the world after another, our unwillingness to stand our ground against the Soviets or their proxies has cost us our prestige and our credibility.

Particularly is this true among our allies in Western Europe. Our original basis of power in Europe was a strong military, ready and capable of holding back the Soviet threat. Until recently, in fact, the Europeans were convinced that their national security was assured by their alliance with the United States.

No longer are they so convinced. The Europeans fear — as many others do — that the United States has neither the military strength, nor the will and determination to stand by its commitments.

Declining American military capability over recent years has left NATO vulnerable. The Soviets have not been standing by idly. While the Warsaw Pact countries of Eastern Europe have a manpower strength of some 1,140,000 troops, NATO has about 975,000. Of this number, 300,000 are American.

The Warsaw Pact has a tank force of some 20,000. NATO's tank strength numbers about 7,000. And of these, 2,000 are American. Beefing up strategic strength in Western Europe has been stalled by debate over the deployment of a neutron bomb, and over the stationing of middle-range missiles. The Soviets, meanwhile have continued to upgrade their systems.

The Soviet arsenal, in capability, already far exceeds anything the NATO forces have. The backbone of the Soviet strategic force is a new generation intermediate range ballistic missile. Moreover, the Soviets have complemented their missile arsenal with the Backfire bomber, a strategic, supersonic bomber capable of penetrating targets deep within any NATO country. Most military experts believe the Backfire bomber numbers some 90 aircraft now, and this number increases by a rate of 30 per year.

Western Europe has always looked for economic leadership from the United States as well. That strength has been eroding equally as fast as our military strength. Last year, the nine nations of the European community surpassed the United States in their combined Gross National Product.

Europeans are enjoying a continually rising standard of living. European products are making inroads into markets traditionally the province of America. More independent, economically, the countries of Western Europe are now more reluctant to follow American leadership they view as indecisive and contradictory.

We've given them no basis for considering us any other way. Our leadership has become weakened and lacking in strength, both militarily and economically. Equally as serious to the NATO countries, we have failed to inform our allies of what is happening, much less consult them on matters of mutual concern.

Alliances are built on strength and commitment. In the past, this country recognized that principle of international relations — and practiced it.

It's time we did so again.
