Above, flames leap from a relief valve and the trailer of a transport in an incident late Sunday evening.

## Sunday Fires Keep Fire Department Busy

Eldorado Volunteer Firemen spent much of the afternoon Sunday responding to various alarms throughout the evening. In all, the firemen responded to four alarms, three grass fires and one oilfield related incident. Firemen quickly extinguished small grass fires in the northeast section of town and at Jerry Edmiston's residence just east of town. It took quite some time to douse a grass fire on the Walter Pope ranch in the southeast part of the county. Approximately 200 acres of rangeland were burned.

Late Sunday evening, firemen were called to the Delta pump station located about 4 miles from town off the Mertzson Highway. A Tom Thorp Trucking Service keel truck was loading when the rear of the truck suddenly burst into flames. The driver reported that as he proceeded from the rear of the truck towards the cab he heard a small explosion, turned to find the rear of the truck

completely in flames, and quickly left the scene before further explosions erupted. The driver was uninjured. At the time of the explosion, the truck was almost completely loaded. Firemen with the help of Lester Paul Nixon from the Co-op, disconnected the electrical power to the station, shutoff most of the gas flow into the station, and let the truck burn itself out in order to avoid further explosions and risk of injury. The trailer sustained heavy damage, while the tractor was damaged only minorly. A small amount of grass was burned. No amount was placed on the damage to the truck.

Cause of the explosion was not determined. However, sheriff Orval Edmiston noted that due to the dry conditions each citizen of Schleicher county should use extreme caution and discretion in burning any amount of materials.

## Christmas Lighting Fund Grows

The list grows longer! The Schleicher County Progress Council reports that donations as of press time totaled \$1,501.71 or enough to purchase 9 Christmas lights. The following names were added this week:

Cathy's Florist, Jewelry & Gifts \$165.00  
Quardra Corporation \$50.00  
Eldorado Wool Company \$50.00

Meador-Peters Agency \$50.00  
Mrs. Paul Page, Sr. \$50.00  
Eldorado Eagle Mart \$25.00  
Johno Mayo, Cotton Buyer \$25.00

Elizabeth Ballew Abstract \$25.00  
Jimmy & Nancy Doyle \$20.00

The Eagle Mart and Johno Mayo have both given a total of \$50.00 apiece.

The challenges issued 3 weeks ago still stand. Still unanswered is the challenge from Beta Sigma Phi for another organization to give \$165.00 or the cost of one light. Several businesses have taken W.T.U.'s challenge and contributed \$50.00 or more. Individually, Ada West Bowder has been met by Lucy Page. Other individuals are encouraged to speak up. Response has been good and

the Schleicher County Progress Council appreciates all the pledges and donations, including the ones made in the contribution cans placed around town no matter how small. Together, Eldorado will have lights for sure. Plans include ordering the lights around the latter part of August for a September or early October arrival.

In their meeting last Thursday noon, the Progress Council discussed final plans for the Schleicher County Days events. Rick Sterling's committee mailed out written invitations to participants in past Eldorado craft fairs. Local organizations and church groups are encouraged to

use this opportunity to raise money for their use in local projects. Anyone interested in having a booth may contact Rick Sterling at the First National Bank (853-2535) or any member of the Progress Council. Booths may sell crafts, food, or drinks.

The Parade is scheduled for Saturday morning August 16 at 10:00 A.M. in the downtown area. A special surprise being planned for those in attendance. A bicycle parade will be held for children 8-12 years of age. These youngsters are invited to decorate their bicycles for the event. More information will be coming in the near future.

## Officers Investigate Burglary at Sofge's

Sofge's Grocery, located on the Menard Highway, was the scene for an early morning burglary last Friday, July 18. The thieves left the scene with an undisclosed amount of small items according to investigating officer Sheriff Orval Edmiston. The burglary occurred sometime during the early morning hours and was discovered around 4:45 by

Included in the items taken were various amounts of cigarettes, candy, and beer. Investigation continues into the incident by Schleicher County law officer.

Cramer Sofge, owner. The thieves gained entry to the store by virtually tearing the door from the facing, entering and exiting hastily.

Fireman Sam A. Whitten and Jerry Richards along with Deputy Barry Hale discuss the procedure to use in putting out the fire in the background.

## From City Hall

Many of you will be glad to hear that Water Well #1 behind City Hall is again functioning after being out of operation for several months. After receiving award of bid for repairs, Billy Green Water Service ordered the special order equipment to replace below-surface worn out equipment. Because of the size and type equipment necessary to match above surface equipment, it was a long time coming, but it came. The well puts approximately 450 gpm. into the water system which includes 5 wells. We in Eldorado might take our water for granted - even in dry weather times. Superintendent Whitten and his crew must regularly check and service the City's 5 wells

to keep water levels up. Occasionally pumps must be turned on manually, but for the most part, the system is fully automatic. Sensors in the storage tanks activate auxiliary pumps when the water reserve falls below the desired levels. Many of you may have noticed a milky color in our water. This was an indication that the pumps needed choking back - not low water level. Adjustments have been made to eliminate this problem. Let's enjoy our water but not waste it.

As you may or may not know, the Schleicher County Appraisal District was formed as a requirement of S.B. #621. This Board composed of Billy Williams, Chairman; Floyd

Butler, Secretary; Mike Moore, Bob Bradley and Ruben Minor were chosen by each taxing jurisdiction's governing body. The purpose of this Board is not to raise taxes - they must be law attempt to provide uniform values for all jurisdictions. This would provide the same value to the school, the city, the county, etc. By law, the Appraisal District must be fully functioning by the tax year 1982. This Board has chosen to begin one year early - in 1981. The reappraisal will begin in January 1981 and provide new, uniform values by Mid-1981. Although the

Appraisal Board may elect to also provide joint collection of taxes, in 1981 each jurisdiction will be sending out tax statements and collecting their own taxes.

This new law eliminates assessment rates. In the past the City has used a 33.3 percent assessment ratio and a tax rate of approximately \$1.50 per \$100 assessed value. For example, a house with a full market value of \$3,000 was taxed on only 33.3 percent or \$1000. A tax of \$1.50 per \$100 assessed value was levied for \$15. Under an assessment rate of 100 percent as required by the new

law, the tax rate will be adjusted to approximately 50 cents per \$100 value. Therefore, on \$3,000, a 50 cent tax rate would set a tax of \$15. -the same amount. As you can see, the tax rate is adjusted in relation to the assessment rate. Under H.B.#18 each jurisdiction is limited on the total taxes levied over the previous year to 3 percent unless a hearing is held and action taken.

By setting up the Board, reappraising in 1981 and setting 100 percent assessment now - we can more easily adapt to the specifications of this law. Overall, the law

once implemented will save the taxing jurisdictions money and simplify the taxing process. Each home or parcel of property will be reclassified and re-valued in relation to surrounding property and therefore make your taxes more fair.

There have been many misunderstandings develop over this law. Should you have any questions about this process, please contact one of the tax assessors or a member of the Board. Better yet-why not attend meetings of the governing bodies, including the Appraisal District Board meetings.

# Local AFS Chapter Hosts Finnish Student

Do you know which is half the size of Texas, but can boast of more than 60,000 lakes? The country whose only natural resource is woodland, the country which with only 4.5 million people is one of the most sparsely populated in

Europe? If you can answer these questions, you are probably ready to meet Mia Kuikko from Finland. (Finlanders call their country "Suomi") Mia is this year's AFS Student, due to arrive on Aug. 23 to spend the next year with the Duwain Sauer family. Mia comes from a very small town in southeastern Finland, Nuijamaa, pop. 1200 (smaller than Eldorado!) whose main income source is strawberry and cattle farming. Mia has successfully passed all screening, aptitude and attitude tests which is very tough, and finalists are selected for communicative ability, adaptability to new situ-

Mia Kuikko

ations and also academic achievement. Mia looks forward to her year in the

States. She writes: "In the future I hope to have a job which has something to do with languages. The coming year would help me to gain my ends with studies. I also like to know people who have different backgrounds and people who live under different conditions. I anticipate many new experiences so I can get a bigger outlook on life."

However, as much as the Eldorado AFS Chapter is looking forward to having Mia, we still have not been able to raise our share of the Scholarship fee. Dear Schleicher County citizens, if you want to help welcome Mia and many more students in the years to come, please give us your support. Send your check to: AFS International, Sherry Lux, Treasurer, Box 613, Eldorado or directly to First National Bank, Eldorado, AFS International Scholarships, Acct. 10-0273-7

United Blood Services of San Angelo will be at the Memorial Building Tuesday, July 29, from 1-6 p.m. Due to increase in demand and drops in supply levels, we urge everyone to give "the gift of life". Seventeen-year-olds may pick up minor donors permits at the Leadr Office.

# Booster Meeting Scheduled

The Booster Club will meet Thursday, July 24th, at 7:30 pm in the Band Hall classroom at Eldorado High School. On the agenda are plans to discuss various

fund raising projects for the upcoming year. Let's get behind our school this year. Be an active member and attend the meetings.

# Duplicate Bridge

Winnie Helen and Tom Ratliff won the weekly bridge event held last Thursday. Tying for second was the team of Helen Bebe and Mary Christian of Eldorado,

and Lottie Puckett and Fred Atkins of Sonora. Fourth place went to Tom Peasley of Sonora and Billy Porter of Eldorado. There were 6 tables at this week's meeting.

# Watermelon Supper Held

The monthly Ladies Auxiliary function for the nursing home was held last Tuesday evening. This month's function was held last Tuesday evening. This

month's function was a watermelon supper for Frank Van Horn and Mrs. Maxine Page. Approximately 30 residents and guests attended.

# First Baptist Church Musical Friday, July 25th

The youth of the First Baptist Church will present a musical presenting the gospel entitled "Make It Clear" Friday, July 25, at 7:30 pm in the First Baptist Church. Members of the musical cast are Ray Blair, Janet Bradshaw, Mary Byrd, Della Heffermand, Carl Igo, Judy Lipsett, Kim

Payne, Andy Robinson, Denetta Robinson, Stephanie Thomas, Margaret Turner, and Michelle Walker. Also noted, was that the Paisano Youth Encampment is scheduled for July 28-August 2, approximately 20 to 25 youth are planning to attend.

# EHS Band Student Attends Camp

Two Eldorado students are participating this week in the sixth annual Angelo State University Band Camp which attract junior and high school students and band directors from across Texas. Those attending from Eldorado are Derek Engdahl and George Orr.

About 500 persons are attending this year's camp which offers clinic sessions in conducting, ensembles, drum majoring, twirling, and other areas as well. In addition to the workshop sessions participants are being treated to a variety of evening entertainment.

At a time when most Americans are trying to cut energy costs within their budget and conserve more, Texans should be proud of themselves. During the last fiscal year, Texans alone conserved 128 trillion BTU, according to a recent report released by the Department of Energy.

The DOE report summarized that within the United States, some 570 trillion BTU (7 percent of the Total U.S. consumption) were conserved in 1979 from energy-saving measures mandated by the State Energy Conservation Program. Texans lead all others by conserving an immense 22 1/2 percent of the total national conservation. Texas is not only one of the largest producers in the U.S. now, but also the largest conserver. Each of us, as Texans, should take the time to pat ourselves on the back and know that we have done our part in combatting the invasion of our petroleum market by the OPEC nations.

"draft" registration are 19 and 20 year old males. Registration is only temporary as of now pending a Supreme Court ruling. One page 5, a copy of the Selective Service Registration card is being exhibited in this issue.

A lot has been said about the "Devil's River Minnow," the federal governments latest attempt to control our freedom. Although the area affected includes only several counties adjacent to Sutton County, publication and condemnation has already reached the northern part of Texas. Truly, there must be something better for the Department of the Interior to do, rather than to raise noise about a small subspecies of minnow. Wasted taxpayers money in the last three years is substantial for the minnow, residents of southern Schleicher county will suffer losses due to the water runoff restrictions that will be imposed. In West Texas, the last thing we need to lose is any amount of surface water. Take action! Write your Congressman of local representative: Voice Your Opinion.

Observing the local scene, I have noticed something that probably receives less attention than anything else, but as a community service it should be a priority. What I am talking about is the efficiency of our Volunteer Fire Dept. I personally want to praise them for their time and consideration and I am sure most of the citizenry of Eldorado stands behind me. But at the same time, after observing a local fire run Sunday, it must be noted that some of the Eldorado VFD equipment is in poor condition. This happens not because of poor maintenance, but simply because the equipment is almost outdated. Maybe the problem of the equipment is minor, but it is something each of us should be concerned with because in a situation in which seconds could make a difference, faulty equipment could mean a great loss in both money and life. I am confident that this will not happen in the near future because of the efficiency of the men who volunteer their time and efforts to man our local volunteer fire department.

# The "How To's" of Energy Conservation

By far the best way to save gas is to stay out of your car.

Without becoming a recluse, you can cut down on your driving enough to save a bundle of money if you go about it systematically.

First, keep a driving record. It can be a detailed record that would pass an

audit by a CPA, or just a small notebook of mileage and gallons intries each time you buy gas. You'll get more benefit if you record the purpose of the longer trips and for a few weeks jot down every trip you make.

With the record, you'll

be able to tell how much of your driving is essential. Then you can set a realistic target for reduction.

For many people, a 20 percent mileage reduction for the first three months makes sense. Until you have a month-by-month record for a full year, you won't be able to make steady reductions because your pattern of driving varies too much with the seasons.

It may help to divide your trips into categories such as:

- Work
- Home (shopping, school, errands)
- Recreation

### WORK

Only you can tell whether it is essential that you drive alone to work every day. But before you decide it is impossible to carpool and is unreasonable to take the bus, bike, or walk, ask yourself: "If gasoline were \$10 a gallon, would I still drive?"

Even one day a week of carpooling or riding the bus could cut your work driving by nearly 20 percent.

### HOME

Household driving is easy to reduce, but only if you keep records. Without records, it is like trying to lose weight without ever stepping on the scales: You could spend a lot of time fooling yourself.

If you chaffer the kids to school or to little league, work out a ride-sharing routine with a neighbor. Or, if it's safe, insist the kids ride their bikes three days a week, or that they walk every Friday.

If you run numerous errands for yourself or the children, set some limits. Like: only one trip a day, or three days a week, or only between four and five p.m.

When shopping for unusual items, call ahead to find a store that has them. Then jot down the miles you saved by not making a useless trip. And congratulate yourself.

You also can save gas by combining errands into one trip. A car that has been warmed up gets better mileage than one that is cold. Even if you have to make six stops on a trip, you make better mileage with the warmed-up car, and you'll probably save miles as well.

### RECREATION

Don't eliminate recreation. But do set a goal of reducing the amount of gas you burn. If you own a boat, reduce your use of it (and the drive to the lake) by one fourth. And reward yourself with a dinner out in a nearby restaurant or a visit with friends.

Study your pattern of recreational driving. Then set a modest goal. Each time you substitute a short recreational trip for a longer one, give yourself a miles-saved credit. Add up the credits once a month.

### GOALS AND REMARKS

Goals and rewards are very important, especially if there are several drivers in the household. You may want to keep a household chart in the kitchen to record your progress. And, if there are teenage drivers, you need to make the rewards fairly substantial.

Rewards should be frequent: once a month for children, perhaps once a quarter for adults.

In the next article, we'll tell you how to drive farther for less in both the city and on the highway.

# Austin Festival Slated For Aug. 1-10

Aqua Festival has been slated for August 1-10, however, some events have been scheduled outside of that time. Aqua Festival, held each year in the state capital, is one of the ten largest festivals in the nation composed this year of a unique assemblage of 60 water, air, and land events.

Pre-festival events include an Invitational and Texas State Championship Ski Tournament, as well as canoe races, two art exhibitions, a children's theater, the annual River City Road Race, two Autocross events, and a Junior Tennis Open.

Festival week officially opens Friday, August 1, with the Twilight Land Parade. Opening day also sports a boxing tournament, a raquetball tournament, craft shows, and a symphony. Other events

scheduled during Festival week include Bergstrom AFB's Aerofest, pet shows, coin shows, childrens sporting events, a 15 heat Mile Run classis, men and women's golf tournaments, tractor pulls, peagantry, a skeet shoot, all types of motorcycle and auto racing, water parade, softball tournaments, basketball tournaments, judo tournament, and more.

New events scheduled this year ar International Ski Tournament, the world's biggest, an International Folk Dancing Workshop, a trap shoot, and the Texas Broadhead Archery Championships, bowling and volleyball tournaments, and a gymnastics meet. Nighttime entertainment includes dances by Larry Gatlin, Mel Tillis, and Johnny Duncan. Nighttime is also the time that the Festival goes international bringing six different cultures on separate nights to Auditorium Shores. All events take place at various locations around the Capital City.

Do you want a happy, fulfilling, and secure life? I am sure most of you would quickly say yes. Everyone is looking for happiness and peace of mind, but most people go to the wrong source for these things. According to the world, happiness is doing what we want, when we want, the way we want. People follow this philosophy and find they have a temporal, surface level happiness but still do not have a deep sustaining joy and contentment. The world tells us to be secure is to have money and power but after obtaining money and power people still do not know security.

The only source that will give people a happy fulfilling life is the source most people reject. God is the only way a person can have a deep, fulfilling life and the only way I know God is through his son, Jesus Christ. Jesus says in John 14:6, "I am the Way, the Truth, and the Life; no man cometh unto the Father but by me."

Isn't it tragic so many people are deceived as to where the real source of happiness and peace of mind comes from? Do you know a deep abiding joy and happiness? Do you have a sustaining contentment and security in your life? Do you want the real source of happiness and peace of mind? Jesus says in Revelation 3:20, "Behold I stand at the door, I will come in to him, and will sup with him and he with me." Jesus is standing at the door to your heart waiting to give you a happy fulfilling life. All you need to do is realize you are a sinner condemned to eternal hell and separated from God. Ask God to forgive you of your sins and let his son, Jesus Christ, come to live in your heart as you then begin to live a life of victory and freedom. ## Tips On Eliminating Garden Pests

Japanese beetles are one of the most serious garden pests. They destroy a wide range of flowering plants and relish roses in particular. The beetles can be combated effectively with traps instead of with poisonous insecticides.

Just as you love beautiful flowers, so do insects. Flowers that are a feast for the eyes serve as breakfast, lunch, and dinner for these pests. Luckily there are some safe, effective ways to keep a garden from being devoured by predators.

Aphids can cause all kinds of damage to flower beds. These tiny lice-like pests, which come in a variety of colors, settle under the foliage and on new shoots. They suck the plant's juices, causing malformations of the leaves and flowers; they can also spread diseases from one plant to another.

### Take Action

Get rid of these insects by washing them off with a strong stream of water from a hose. If this treatment doesn't discourage them, kill them with a safe, plant-derived insecticide. (Check with your garden supply store for specific recommendations.)

Beetles also can be a big problem. Adult beetles destroy leaves, flowers and fruit; their larvae can damage plant roots. One of the most voracious types is the Japanese beetle, a metallic-green, half-inch long creature that is particularly fond of roses. If roses are not around, the beetles will eat almost any plant. In the past sprays were used against them, though these poisons did not prove to be entirely effective.

Now, however, there is a safe, easy-to-use new trap called BAG-A-BUG™ that will help fight Japanese beetles without hurting flowers, people, pets or the environment. This trap is unique in that it uses a synthesized beetle sex attractant, known as a pheromone, along with a floral scent to lure insects away from valued flowers and vegetables.

Beetles of both sexes fly toward the enticing aroma, hit a plastic vane and fall into a plastic bag from which they cannot escape. When the replaceable bag is full, simply throw it away.

### Beware Of Cutworms

Other destructive garden pests, cutworms, live in the soil during the day and, at night, come out and attack flowers and vegetables, chewing through and completely destroying their stems.

## Reports from Washington

### TAX REDUCTION NOW A NECESSITY

Our forefathers built our economic system on the firm belief that free men should be able to determine their economic destiny. At no time in our history is this principle more threatened than it is today.

Inflation and recession are combining with rising unemployment to dim the American promise of opportunity for all. For the first time in history, Americans expect the next five years to be worse than the last five.

Considering current economic facts, it is easy to understand the reason why so many Americans feel their economic future is threatened.

We're experiencing today what may well become the worst recession in a half century. Inflation, though dropping some, is still well into the double digit range. At the same time, nearly 8% of all Americans are out of work. Some 1.8 million Americans lost their jobs in the last three months alone.

More tragic than the problem itself, however, is the solution now being embraced to battle it. For the first time in this country's history, national economic policy is aimed at fighting inflation by causing a recession. Our nation cannot tax itself out of inflation. Nor can it tolerate increased unemployment as a result of recession. Americans are paying for the Administration's fight against rising prices with their jobs and their life-long savings.

Deliberately bringing the economy to a standstill is a cruel price to pay for an artificial solution. It simply will not work.

It is generally recognized that recession would have to last for years to have any significant or lasting impact on inflation. Unemployment resulting from such a recession would be disastrous.

I firmly believe things did not have to get as bad as they are. And they don't have to stay this way. But they will unless we act decisively now to restore hope to working Americans and prosperity to our economy.

I believe the answer is to formulate a policy that allows workers to work, savers to save, and investors to invest.

Calculated recession is not that policy. The way out of this inflation-recession, boom or bust economic cycle is a consistent and comprehensive policy of growth.

If we want to get the country working again, we must get the country producing again.

The first step is a permanent 10% across-the-board reduction in personal income taxes, to be effective January 1, 1981. This must be coupled with an accelerated depreciation schedule for the Nation's businesses, now overwhelmed to the point of collapse by government's regulations and government's taxes.

Lower taxes on personal income will stimulate savings. These savings and improved depreciation allowances for businesses will free more resources for investment in productive, job-producing business, at lower interest rates.

There are those who say that providing tax cuts now is political double-talk — that tax cuts and balancing the budget cannot be achieved at the same time.

I unequivocally reject that thinking.

The fact is that a deeper recession is already killing chances for a balanced budget. The calculation is that for every one per cent increase in the national unemployment rate, the budget suffers a \$20 billion loss from declining Federal revenues, and higher costs for unemployment insurance.

At 7.8% in May, the highest in the past three and one half years, unemployment is already higher than the White House projected for the end of 1980.

Simply put, economic growth is the answer.

If we had grown only 1.5% faster each year since 1950, we would now have a \$3.75 trillion economy instead of a \$2.5 trillion economy. We would have \$250 billion more in Federal revenues. Our living standard would be 50% higher. Millions would have available to them real and lasting jobs. Prices would be stable. We would have a productive economy, three times the size of the Soviet Union's, instead of one twice their size.

I believe it's time to unleash this country's productive capacity, and return the determination of our economic destiny to its rightful place — the American people.

Tax reduction is only the first step. But it's the most important step in that direction.

# Spotlight On Business

Buckhorn Digging Service Staff: (left to right standing) Kurtis Homer, Leonard Sticker, Pam Moody, Melanie Moody and Anne Hyde; (left to right, top) Jay Behrens, Steven Short and Duwain Moody. Not pictured are Lori Bell and Carl Wells.

Buckhorn Digging Services, home-owned and operated, have expanded their operations and can handle all of your digging needs. Located at the corner of South Main and the Old Sonora Highway, owner Pam Moody, along with co-owners Melanie and Duwain Moody, offer a variety of services from line construction to ditch digging.

The late Deral Moody founded Buckhorn Digging Services in the March of 1978, being sole owner-operator-digger. Buckhorn has now expanded to

include a fourman line crew, 24 hour service, and much more. Present operations include hole digging, line crews, ditch digging, hot line construction, cold line construction, anchors set, fence post hole dug, and electric or telephone lines constructed, business or private. As these personnel put it, Buckhorn has "holes dug to order".

Present equipment includes hole digger, bucket truck, line and wire trailers, compressor, a Ditch Witch, and nine capable employees. Employees include Carl Wells, a lineman

and hot line construction foreman; Leonard Sticker, lineman and cold line construction foreman; Steven Short, lineman and Ditch Witch operator; Jay Behrens, digger operator and mechanic; Kurtis Homer, welder and digger's assistant; and Anne Hyde, secretary and public relations.

Further expansion is planned, and Mrs. Moody adds that "we are looking for more yard space and a bigger office building." Located in the old Anna's Drive-In, Buckhorn offers a variety of services for the rancher, farmer, oilman, or businessman alike at 853-3020.
