

## On The Divide

A riot almost resulted at a local softball game one night last week when Jim Hoover, Gas House team manager, asked the umpire to call time while he talked with the opposing pitcher. It later developed that Jim had heard a "good one" on the sidelines and just couldn't wait to tell it. The team manager didn't risk asking permission to relate the joke to other players, hence the game proceeded.

A. D. Richey, local merchant, says that Schleicher county is donning her Sunday clothes with a bright new neck-tie since the fine rains in all parts of the county.

When it rains in West Texas everyone just seems to appreciate it more than in most places. In no other place does a good rain show its effect more clearly and promptly not only in bringing up vegetation but in the attitude of the people as well.

We have heard more about the city having purchased a fire truck and other equipment to maintain a modern fire-fighting unit in Eldorado. The next step that will likely be taken is the organization of an efficient crew to man the equipment and protect the city against loss of life and property from fire.

In commenting on the fire department that will be organized here in the near future, one of our good friends says that it will take one man to drive the wagon, one to ring the bell and several should go along to squirt the water.

## Farmers, Ranchmen Will Earn Benefits From AAA In 1939

Farmers of Schleicher county are in a position to earn approximately \$81,000 in AAA benefits by participating in the fullest extent possible in the 1939 farm program and ranchmen may earn about \$73,000 benefits by participating to the fullest extent in the range program, according to County Agent W. G. Godwin.

The total amount that Schleicher county producers can expect from the AAA, in both the farm and range programs, would be about \$154,000 in 1939, Mr. Godwin stated.

About \$52,000 of this amount is offered in "conservation" payments, designed to reward farmers for soil conservation accomplished through adjustment of soil-depleting acreage, and for carrying out approved soil-building practices such as terracing, strip cropping, seeding legumes establishing pastures and planting green manure crops.

The other \$29,000 is the estimated total for the county that can be derived through the cotton price adjustment, or "parity" payment. The parity payment is so named because it is designed, as near as possible with the funds available, to make up the difference between the market price and the parity price of the given crop.

These two sets of payments are calculated according to two slightly different sets of rules.

W. G. Godwin, who is secretary of the County Agricultural Conservation Committee, makes the following explanation of how these payments are made.

**Conservation Payments**  
"The conservation payment is 2 cents a pound on cotton and tentatively 84c an acre, adjusted up or down to the farm's productivity index, on general crops.

"The rate on cotton applies to the normal yield of the farm's cotton acreage allotment, and is

## Oil And Gas Leases Extended

Oil and gas leases on Schleicher county property, previously forfeited, have recently been extended, records in the office of County Clerk H. T. Finley reveal.

Several companies that some time ago forfeited their leases on land in this county, have made extensions on considerable acreage, which might be an indication of continued interest in oil and gas development possibilities in the county.

Mr. and Mrs. T. W. Joshson spent last week end in Wichita Falls with Mr. and Mrs. O. R. Burden

**WILL ROGERS STAMPS**

In recognition of the humanitarian work of the late Will Rogers in behalf of the people of Nicaragua after the great earthquake of 1931, that republic has issued a series of air mail memorial stamps in his honor.

The series consists of five stamps, from one to five centavos each of a different design, but each bearing the inscription, Nicaragua to Will Rogers, Homage. A reproduction of the stamps appeared in a recent issue of the Christian Science Monitor.

On March 31, 1931, an earthquake which lasted only six seconds, followed by fire and numerous explosions, virtually destroyed Managua, the capital of Nicaragua, killed 1,000 persons, injured several thousand others and made 25,000 homeless.

Will Rogers immediately flew to Managua, personally donated

\$5,000, and cabled appeals for and back to the United States, to supplement that furnished by our government and the Red Cross. Nicaragua's gratitude for his generous action is expressed in the new stamp issue.

This is only one instance of Will Rogers' philanthropy. He raised \$40,000 at one performance for the Florida hurricane sufferers in 1926, and other large sums for food and drouth relief at various times. He was not only a great humorist, but a great humanitarian as well.

**ORIGIN OF NUMERALS**

Primitive man did not deal in large figures, so he was able to represent numbers sufficiently for his purpose by his fingers, by notches cut on a stick, or by a series of short lines.

As larger numbers of things came to be counted, symbols to represent more than one object were gradually invented. But our present system of so-called Arabic numerals was not perfected until a few centuries ago.

Symbols corresponding to our figures 1, 4, and 6 have been found on inscriptions dating from the third century B. C. in India. The 2, 7 and 9 appeared about a century later, and the 3, 5 and 8 still later. The forms of the figures have undergone much change from time to time.

The system was adopted by the Arabs, who invented and added the zero, or cipher, and gave the figures a place value—units, tens, hundreds, and so on—about the tenth century A. D. The Arabs introduced the system into Europe two or three centuries later.

The decimal point was a still later development, it having been invented and introduced by a mathematician named Christopher Clavius in 1593.

The origin characters, I V, X, etc., is uncertain, and various theories have been advanced concerning them.

Mr. and Mrs. J. W. Lawhon have as their guest, Mrs. Lawhon's sister, Mrs. Murray Kyger and baby of Houston.

**THE WORLD OF TOMORROW (?)**

**Nobody's Business**

By Julian C. Capers

AUSTIN.—They took the \$40,000,000 sales tax-constitutional amendment program out and laid it on the table last week—technically—but actually, they laid it on a slab in the morgue, from which it has only the remotest chance of ever being resurrected. Somebody misinformed Gov. W. Lee O'Daniel about the strength of the program, and when he confidentially predicted over the radio that it would pass the House with a bang, he didn't know there were 60 votes in the House that would withstand all of the terrific pressure that could be put upon them by those members of the House who honestly believe in writing a tax rate and a sales tax into the organic law, backed by all the strength of an organized special interest lobby, plus the personal pressure of the governor himself. So the House test sent the program which was originated by a special interest lobby, and for which that lobby and the Governor have worked day and night for four months, into the boneyard for good.

**LEGISLATORS TAKE THE BALL**

As a result, the lobbyists who with amazing audacity seized the ball at the opening of the regular session and have kept it throughout the first 120 years of the session, have at last relinquished it. It is now an every man for himself scramble, with each individual lobbyist struggling madly to get the special interest he represents exempted, or kindly treated, in the omnibus tax bill which now appears to be the only tax measure that can possibly be enacted—and the devil take the program.

There is still no certainty that any tax measure will be enacted, although the legislators, serving since May 9 at \$5 a day, are earnestly striving to bring out a bill increasing natural resource taxes, and imposing a sales tax on certain luxuries. Unless the turn out to be as strong as they were collectively, some such bill will probably be enacted. But it will raise nearer \$20,000,000 a year than the -40,000,00 proposed in the lobby program. That will be ample to finance a reasonable social security program, including a somewhat liberalized pension list, aid for blind, dependent children, and teachers' pensions. But the plan of taxing poverty for twice as much as is needed for social security, through a sales tax, and writing it into the Constitution, and turning the -20,000,000 surplus into the pot for the relief of special interest taxpayers, is definitely consigned to the limbo of the fantastic dreams

of a lobbyists who, drunk with a delusion of power, lost all sense of balance. The regular session will last at least two weeks possibly longer. House members are definitely desirous of enacting tax legislation to finance the social security program, and, with the legislative power back into the hands of the folks the people elected to do the job, there is a fair prospect they may succeed.

**BRADY GENTRY NAMED**

Last November, four East Texas Senators, including Will Pace, John Redditt, Joe Sill and Harold Beck visited the then Gov.-Elect W. Lee O'Daniel at Fort Worth. They discussed with him the appointment of a man to succeed John Wood as Highway Commissioner. They told him where East Texas is located, and pointed out the geographical allocation of the Commissionerships which has always been observed. Though they have never discussed this particular angle, it is quite likely the names of some likely men were brought up, and if so, it is also quite likely the name of Brady P. Gentry, of Tyler, was mentioned. At any rate, O'Daniel the Senators reported, agreed heartily with their views, and gave them assurance these views would be respected.

Last January, O'Daniel nominated Carr P. Collins, Dallas insurance man, and his No. 1 campaign director. Dallas is not in East Texas, according to the view of the Senators. So Collins was rejected. Then O'Daniel, went far afield and named J. C. Hunter of Abilene. Hunter, facing rejection, withdrew. Then O'Daniel sent up Jim West, Houston oil multimillionaire, and West, too was rejected, but not on geographical grounds.

Last week, O'Daniel nominated Grady Gentry. Gentry, three times Smith County judge, has had plenty of political experience. Those interested in state highway and enjoys the confidence of those interested in state highway development. A quick canvass of the potent East Texas senatorial group indicated he will be promptly confirmed. So in six months, of embarrassment, and avoided learning at least one lesson the hard way. That's how it is done in politics.

**A CORRECTION**

This column last week carelessly referred to Rep. G. C. Morris, of Greenville, a probable opponent of Congressman Sam Rayburn of Bonham next year, as "Joe" Morris, for which your reporter apologizes. G. C. Morris, one of the leaders of the anti-sales tax bloc in the House, is an able leg-

islator, an extraordinary debater and orator, and is reported to be an excellent campaigner. Sam Rayburn's record in Congress as majority leader is too well known to need review here. If Morris takes out after Sam, it ought to be an interesting campaign to keep an eye on.

**MAVERICK IN SADDLE**

Takin advantage of a San Antonio city political machine which was on its last legs and divided against itself, Maury Maverick, the very ex-Congressman from the Alamo City, led three of his ticket of four commissioners to a resounding victory over Mayor Quinn, the ultra-liberal mayer. Notwithstanding loud shouts from Washington columnists who don't know San Antonio politics, hailing it is a comeback for the New Deal, Maverick's victory reflected less strength for the New Deal than did his close race for re-election to Congress last year, when he got almost half of 49,000 votes and was beaten by Paul Kilday. This time Maverick got 18,000 votes out of 45,000—which gave him the election, under San

### HELP STOMACH DIGEST FOOD

Without Laxatives—and You'll Eat Everything from Soup to Nuts  
The stomach should digest two pounds of food daily. When you eat heavy, greasy, coarse or rich foods or when you are nervous, hurried or chew poorly—your stomach often pours out too much fluid. Your food doesn't digest and you have gas, heartburn, nausea, pain or sour stomach. You feel sour, sick and upset all over. Doctors say never take a laxative for stomach pain. It is dangerous and foolish. It takes those little black tablets called Bell-ans for indigestion to make the excess stomach fluids harmless, relieve distress in no time and put you back on your feet. Relief is so quick it is amazing and one 25¢ package proves it. Ask for Bell-ans for indigestion.

MIGHTY HAPPY

THAT'S the reason why we put Service Check Cards in every Humble Service Station. Humble customers are invited to use these cards to tell us what they think of the service rendered, whether it's good, bad, or indifferent, which particular items please or displease. You'd be surprised at how many worthwhile suggestions come to us from customers who use these cards . . . And they make it possible for us to give you, through Humble Service Stations, the kind of service you want . . . In other words, we carry on a continuous study of what motorists need and want to make driving an automobile more pleasant, and then we try to give it to them . . . Do we succeed? . . . The check cards say we do, and their opinion is verified by the increasing number of Texas motorists who make it a regular practice to stop for service where they see the Humble sign . . . Seeing is believing, so we suggest that the next time your car needs a tankful of gasoline, you stop at the nearest Humble Service Station and check the service for yourself . . . Then, if you care to, fill out one of the Service Check Cards you find and send it to us (no postage necessary). It will make us mighty happy to hear from you.

## MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will invite you to dances and parties. BUT if you are cross, listless and tired, men won't be interested. Men don't like "quiet" girls. When they go to parties they want girls along who are full of pep.

So in case you need a good general system tonic, remember for 3 generations one woman has told another how to go "smiling thru" with Lydia E. Pinkham's Vegetable Compound. It helps build up more physical resistance and thus aids in giving you more pep and lessens distress from female functional disorders.

You'll find Pinkham's Compound WELL WORTH TRYING!

**ONE THING  
And  
THEN ANOTHER**  
By Fred Gipson

CORPUS CHRISTI—When it comes my time to quit this hectic and cockeyed vale of sorrow and tears, I look for the hand of death to reach out and grab me some morning when I'm getting up.

Every once in a while in my growings about the country I get into a house with some body who leaps from his bed in the mornings, a lilting song on his lips and running in circles with renewed vigor and eagerness to be up and at the day's work.

But I never was like that. I don't leap from my bed in the mornings. I just groan and gradually ooze of onto the floor. Sometimes I land on my feet. More often, it's on my ear. All the sheets and spreads and quilts invariably follow.

True, I do go in circles when I get up in the mornings. But it's at a slow, aimless pace, much like that of a husband trying to get back home before daylight on the night his wife's out of town. There's nothing vigorous about it.

There is even less evidence of any purpose in my movements.

Of course, what I'm trying to do is get to the bathroom and a tooth brush and razor. But nobody could tell by watching. For the agonizing physical strain of getting up in the mornings always sends me reeling about the house in a blind fog. My eyes won't focus and my brain refuses to function on any one thing long enough for me to do it. My brain just rambles, and I stumbled around, trying to follow it. It's virtually impossible for me to remember what I got up for.

Sometimes, I can't remember at all. That always makes me feel better. Because then I can go back to bed with a clear conscience and sleep awhile longer.

I can nothing by this, of course. For I've still got to get up. But those moments in bed after one awakens and knows he should be getting up are incomparable bliss. You know how it is. A stolen watermelon always tastes sweeter.

But, eventually, I have to come out of it. It's the conventional thing to do. And for the same reason, I must wander about, befuddled of brain, searching for torturous implements of toilet.

Did you ever try to shave with a toothpaste lather on your face? Did you ever brush your teeth with shaving cream? Did you ever come to yourself, using your only clean shirt as a bath towel?

If not, you have no way of understanding the cold, sullen rage that bestes me on awakening, after having got up and prowled about the house for some 30 minutes.

I hate people at that time of

the day. I hate their customs and conceptions that demand that I look at and scrape the same un-beautiful and sleep-wrinkled face every morning. I hate myself. I rate the world. I—well, I'm just hard to get along with when I get up in the mornings.

And nothing makes me madder than for some imbecile in the next apartment to bounce out of his where he starts doing his getting-

up exercises to a vigorous 'Hum! Two! Three! Four!' cracking bed into the middle of the floor, brawny muscles and joints until they can be heard all over the house, then winding up with a sprint down the hall to the bathroom, where he sings and splashes water and lets the whole world know that he's feeling like a million new and shiny dollars, fresh of the mint.

mornings. I feel all down and I don't feel that way in the out and just barely do give a damn. And some morning I'll lose my ragged temper and set out to way lay some noisy bathroom songster and forget who I'm about to murder and hit myself over the head with the boot I've carried along to use as an instrument of death. I wish mornings never did come.

Defending a man accused of larceny, a lawyer in Danzig declared his client to be an honest man who would certainly admit it if he had committed a crime. Overcome by his lawyer's eloquence, the man admitted the theft.

Mrs. Ignazio Rubio, storekeeper of Batavia, N. Y., while listening to a crime never pays radio

program, gave a customer \$4.85 change for a counterfeit \$5 bill.

Since he began preaching in 1880, the Rev. J. M. Morrow, 77, of Lubbock, Tex., estimates he has delivered 25,000 sermons and addresses in the state.

### REES RED & WHITE STORE

**1** figured by multiplying the payment rate times the normal yield times the number of acres in the allotment.

For example, if a farmer has a cotton allotment of 20 acres and the normal yield established for his farm is 200 pounds of lint cotton per acre, the payment is 2 cents a pound on 4,000 pounds (20x200) or \$80.

The rate on general crops applies to the number of acres in the general allotment.

#### Soil-Building Payments

"A part of the conservation payment is in the form of assistance for carrying out soil-building practices. Each practice is measured in units. For example, construction of 200 linear feet of terrace counts as one unit; seeding an acre of alfalfa qualifies as two units; and an acre of green manure or cover crops rates as one unit. And the rate of payment, or assistance, for carrying out such practices is \$1.50 a unit.

"However, each farm is given a maximum soil-building allowance. That is, the farmer is paid at the \$1.50 rate up to a certain limit, the limit varying according to the farm.

#### Parity Payments

"In addition to the conservation payments, the 1939 program provides for a price adjustment or 'parity' payment of 1.6 cents a pound on cotton.

The rate applies to the number of acres in the cotton allotment.

Example: If a farmer's cotton allotment is 20 acres, and the normal yield established for his farm is 200 pounds an acre, the cotton price adjustment payment is 1.6 cents a pound on 4,000 pounds, or \$64.

If the farmer exceedse his allotment by a fraction of an acre he forfeits his right to any parity payment.

#### Range Program

"There are 654,864 acres under the range program for the year 1939, in which the county grazing capacity has been set at 11 acres per animal unit."
