El Dorado, Schleicher County, Texas, Friday, February 10, 1928 No. 6

NEW FORD TO ARRIVE THIS WEEK END.

F. M. Bradley, of the Bush Motor Co., informs The Success that they received a telegram that a new Ford would be in Dallas for them Friday. Mr. Bush expects to drive it to Eldorado from Dallas.

Bradley is not sure that Mr. Bush will use the high gear in coming over or not.

WEST TEXAS UTILITIES MAN VISITS ELDORADO

Howard Barrett, of Abilene, Texas, of the publicity department of the West Texas Utilities Company, was in Eldorado Friday and made The Success office an appreciated visit. He reports that the line from Sonora to Eldorado is now being surveyed, and that a large crew of men are at work from Ozona to Sonora. A 22,000 volt line will be extended from Sonora to Eldorado. They expect to take over the plant here about April.

Mrs. A. J. Pratt of Naples and Mrs. E. B. Knighten of Silsby, who have been with their mother Mrs. R. J. Page, through her illness, returned to their homes Thursday.

Notice To Public.

This is to notify the public that we will have to have cash for all title papers done by us, so please do not ask for credit as we will have to refuse you. All knowing themselves indebted to us will please call and settle. Benton Abstract & Title Co.

ELDORADO DEFEATS SONORA

The Eldorado Eagles defeated the Sonora Bronchos Tuesday Jan 31, for the third time this season. The score Eldorado 40 Sonora 11.

The excellent team work of the Eagles and the ineligibility of two of Sonora's players account for such uneven score. The high point men were Ratliff and Ballew of Eldorado and Strigler and Taylor of Sonora.

The Bronchos are coming here Wednesday to return the game. Come out and see the game. The season will soon close and there will be no chance to see a good basket ball game.

BIG LAKE GAME BOYS

The Eldorado Eagles showed their wonderful ability when they defeated Big Lake Saturday. The score was 39 to 10 in favor of the Eagles.

The Eldorado boys have proved themselves excellent basket ball players. For this week they have four games scheduled. They play Mertzon here Tuesday, Sonora here Wednesday, Mertzon Friday at Mertzon, Big Lake Saturday at Big Lake. Come out and see the boys win. The season is going to close soon. You should come support the home team before it is too late.

GIRLS BASKET BALL GAME

The Eldorado basket ball Girls gained another victory last Saturday, February 3, when Big Lake was here. It was a thrilling game from the first blow of the referee's whistle to the last. The score at the end of the game was 20 to 4. The girls have played five games this season and have been victorious in all.

They will play at Big Lake Saturday.

During the last three years, the team has lost only one game. They expect to make this another victorious year. If nothing interferes, the team is hoping to go to Dublin, Texas and try for state Championship.

ASSEMBLY

The entire school enjoyed last Wednesday's chapel exercises. Mr. Curry had charge of the humorous program. Hick McElroy gave a good demonstration how to throw one's voice. R. J. and Taylor seemed to be implicated in the art. The P. T. A. had donated one hundred new song books and the student body enjoyed singing several old favorite numbers. Jym Nowson, pianist, and Mable McCathey, soloist, rendered some good numbers.

SENIOR NOTES

Members of the Senior class (Continued from first page.)

TO HOLD SECOND QUARTELY CONFERENCE.

The second Quarterly Conference for the Eldorado Methodist Church will be held at the Methodist Church Sunday night.

Dr. Fisher, presiding Elder, will preach Sunday night preceding the conference. Come out Sunday night and remain over for the conference. Every member should turn in their finances to the Board of Stewards before the quarterly conference so the church finances can be brought up to normality.

Mr. and Mrs. L. T. Barber and Master Bobbie Luther, left early Monday for Brady to make their future home. We regret very much to have them move from our midst but glad they dropped into Brady, which is the next best town to Eldorado. We trust that Brady will be glad to receive them, and that Harry Schwinker and A. D. Wright will see that they live honorably before God and man, and be an asset to Brady.

Mrs. Barber is a former Angel in The Success office and Bobbie Luther is the only grandson of the old "devil" himself (Editor A. T.) and Mrs. Wright.

Yes they are gone but not gotten.

John I. King was in from the ranch Saturday, while here made The Success office an appreciated visit. John I. seems to think that wool will readily sell at 45 cents per pound before April 1st. We hope he is right.

Bill Smith of Marfa was here last week, came here to his father's funeral, and accompanied the remains to Brady.

JOE SMITH.

Joe Smith, of Nine McCulloch County, died at the home of his son Tom Smith in Eldorado, Sunday January 29, and was carried to Brady for burial Monday.

Mr. Smith had been in bad health for some time and had only been in Eldorado about two weeks, when he grew suddenly worse which resulted in death.

His children all attended the funeral at Brady, they were Tom and John I. Smith of Eldorado, Will Smith of Marfa and Mrs. Emma Gulhinn, of Alpine.

INDUSTRY HELPS AGRICULTURE BUILD UP THE SMALL TOWN

Decentralization of Manufacturing Brings Markets for Products Closer to the Farm—Gives Employment and Better Standards of Living to Rural Communities.

By T. R. PRESTON
President, American Bankers Association

NO class of people has been more diligent in trying to understand the agricultural problem than the bankers of this country. The agricultural problem is a real problem and demands the best thought of everyone. This country cannot continue along happy lines with only sections of the country prosperous. Prosperity must be passed around if anybody is long to enjoy it. This question cannot be solved by the farmers alone, but the majority opinion is that there is no legislative remedy for agriculture. It is an economic question pure and simple and must be worked out accordingly.

A few years ago it was contended that agriculture did not have sufficient credit facilities. That proposition was often made a political question. I do not presume there are many who will question the fact that agriculture now has ample credit facilities.

Mixing Farms and Factories

It is a fact that no community and no state has ever become great purely from agriculture. It is not to the interest of New York and other great centers to see the small communities and the agricultural sections losing their wealth and importance. In the end it will react upon them to their disadvantage.

There seems to me a real remedy for these small communities and also for agriculture. This remedy, which is the mixing of industry with agriculture, is now being applied in many localities with satisfactory results.

Industry and agriculture are better balanced in Ohio, North Carolina and Pennsylvania than in any other states of the Union, and in these states there is no serious agricultural problem and we hear little complaint from the farmers. This mixing of industry

ing examples from my own state to prove this proposition, and I mention these because I am more familiar with conditions there than elsewhere.

Twelve years ago Kingsport, Tennessee, had a population of about one thousand. Great industries like a large camera company, a big cement plant and a number of other industries were located there partly through the influence of an outstanding New York business man. In a little more

Mixing Industry With Agriculture Means Prosperity for Rural Districts

and agriculture is called by some decentralization of industry.

I would not suggest that manufacturing institutions move from the cities to the small villages, but I do think it would be better for this country for future industries to be placed in these small villages rather than to be further congested in the great centers. This would in part also be a solution of our labor problem. The bringing of industries to small villages increases the market for agricultural products, gives employment to surplus labor, elevates the standards of living, increases public revenue, reduces taxes and vastly increases educational facilities.

Two Striking Examples

I believe I can give you two striking

A fugitive, attempting to get away from police officers, stepped on a banana peel, fell and was captured. There is a suggestion in that if they again have become plentiful.

Well, if rubber prices go too high, one recalls that the human race got along pretty well on tires of other material for an eon or so. A lot of trouble would be saved if rubber-rimmed wheels quit turning.

than twelve years these have brought the population of that city up to seventeen thousand. Just a few miles away, at Elizabethton, they are building a great rayon plant, the first unit to cost \$5,000,000. The population of that town is now two thousand, but it is estimated that this will be multiplied by five in less than two years. It is stated that the total investment in manufacturing industry in that community within a period of five years will probably reach \$50,000,000.

The balancing of industry and agriculture will solve most of our so-called agricultural problems and we will not need such political measures as will in my opinion, do harm if enacted to the very class they pretend to benefit.

The present-day fashion in light, slender girls must be of a great help to all young men who have to row them around a lake on the Sunday school picnic.

Police arrested a man for hurling an alarm clock through a window into the home of a city fireman, which it has to be admitted, is not the proper way to send in an alarm.

Are Your Eyes 'O. K.?'

City Variety Store

Sam (Silent) Mather, of Eldorado, one of the greatest ropers in West Texas and only recently married, has quit the roping game and in the future when rodeos are staged in West Texas will be sitting on the sidelines as a spectator.

That his decision to cease roping is not a mere gesture is shown by the fact that his favorite roping horse carried over West Texas in his rodeo participation, is now the property of his brother, Tom Mather, of this city.

This horse, "Brownie," although 27 years old, is said to be the fastest horse in this section today and in the polo matches played here out distances the rest of them with ease.

Sam Mather's great roping contest at Ozona last year and the keen competition between him and Allen Holder at Eldorado in 1927 are outstanding in the minds of West Texas rodeo lovers.—San Angelo Times.

Information Is Need of Poultry

Market Man Must Base His Operations on Limited Knowledge.

(Prepared by the United States Department of Agriculture.)
Need for more complete poultry statistics with which to enable producers and the trade more efficiently to meet consumption demand was emphasized by Rob R. Slocum, poultry marketing specialist of the bureau of agricultural economics, United States Department of Agriculture, addressing the National Poultry, Butter and Egg association at Louisville, Ky.
"Under present conditions," Mr. Slocum declared, "the market man must base his operations on such limited information as is now available and on his own opportunities, often decidedly limited, to form an opinion of probable production. The pro-

ducer, likewise, must adjust his production program on a decidedly inadequate basis on which to judge of the probable size of the poultry and egg crops which will be available during the ensuing season. The industry needs a much clearer picture of current conditions and of the probable trends of the immediate and the more remote future to enable it to regulate production most intelligently and to market the poultry and egg crops to the best advantage."

Value of Product.
The poultry industry, according to Mr. Slocum, accounted last year for 10 per cent of the total value of live stock and its products, but because the industry is widespread and because of the relative invisibility of the crop, accurate and complete poultry crop information is particularly difficult to obtain. A Department of Agriculture committee has been giving careful consideration to the problem of developing more adequate basis statistics for this industry, the collection, tabulation and release of which, the committee believes, may be performed most logically by the state and federal government.

Collection of Statistics.
A tentative program formulated by this committee includes the collection of statistics on producing stocks on hand, hatchings, young stock on farms, and receipts at country concentration points, a great deal of other important data can be derived.
"To undertake the collection of these basic statistics," Mr. Slocum said, "it would be necessary for the department to expand considerably the reports which it now receives, probably to reclassify its list of voluntary reporters and to extend their number considerably, and very likely to employ some paid observers. It would also be necessary to employ a competent statistician with adequate assistants who could devote their entire time to work for the poultry industry. The wholehearted support and co-operation of the trade would be required."

The philosophy of blazing weather is summed up in a few words—"That's the intention of it."

MRS. J. R. PAGE

Mrs. J. R. Page was born in Parker County July 26th 1859 and died in Eldorado February 6th, 1928.

Mrs. Page united with the Primitive Baptist Church in 1888 and has lived a consecrated Christian life ever since.

She is the mother of five children, one died in infancy and two sons and two daughters survive her. They are Bert and O. B. Page. Mrs. E. B. Knighten, of Silsby Texas, and Mrs. A. J. Pratt, of Naples, Texas all were with her during her last illness and death.

The passing away of Grandma Page, closes along and useful life, for the past 15 years she has resided in this community where she has built up a circle of friends who weep with those of passing away, today she is at rest with those of Gods children who have already entered the portals of glory.

Bro C. H. Richard, the family pastor for many years conducted the funeral services at the home and cemetery, and by request the Rev. Guy Davis made a short talk also. The remains were put away in the Eldorado Cemetery Tuesday afternoon in the presence of a large number of friends who wished to pay tribute to this christian mother.

Besides her children she leaves a husband to mourn her departure.

D. 1927 in a suit, numbered on the docket of said Court No. 378, wherein E. P. Sweatt, is Plaintiff, and R. H. Blaylock, is Defendant, and said petition alleging that heretofore, to-wit: On the 7th day of February 1921, Walter Oliver sold and conveyed to the defendant R. H. Blaylock certain lands situated in Schleicher County, Texas, one tract being eighty acres, being the S. E. 1-4 of Section 62, Block A, T. C. Ry. Co., and 158 acres being the N. W. part of Section No. 58, Block A, G. C. & S. F. Ry. Co., and as part of the consideration for said land the said R. H. Blaylock executed his six notes, numbers one to six, inclusive, and in said deed and in said notes the vendor's lien was retained to secure the payment of said consideration.

Notes No. One and Two of said series being for the sum of \$180.00 each, the next two for the sum of \$360.00 each, and the last two for \$540.00 each.
Note No. One due November 1st, 1921, has been paid. Note No. Two for the sum of \$180.00 was due Nov. 1st, 1922, and one note due Nov. 1st, of each year thereafter until all were paid, all of said notes bearing interest at the rate of 8 per cent per annum from date until paid, interest payable annually, and providing that if said notes were placed in the hands of an attorney for collection 10 per cent of the amount then due shall be added as attorneys fees.

All of said notes are long past due and no part thereof have been paid, save and except the interest has been paid to Nov. 1st, 1923. That all of the above described notes have been sold and conveyed, endorsed and delivered to E. P. Sweatt, plaintiff herein for a valuable consideration, and that he is now the hold-

er of all of said notes.
Herein Fail Not, but have before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.

Given under my hand and the Seal of said Court, at office in Eldorado, Texas, this, the 18th day of January A. D. 1928.

Life of Farm Machinery Depends on Winter Care

Many claims are made on the amount of saving made by housing farm implements, says John W. Sjogren, in charge of farm mechanics, Colorado Agriculture college.

One authority states that the life of a machine can be doubled through proper care and housing. There is no doubt that placing farm machines under cover will keep them in better running order, and in many instances increase the life of the implements.

If a machine shed is not available, Professor Sjogren states, the implements should at least receive enough care to place them in some corner where they will be out of the way. All parts such as plowshares and cultivator shovels should receive a coat of heavy axle grease to prevent the formation of rust. Tongues and other wooden parts should receive a coat of paint to keep moisture out of cracks as far as possible.

While putting the machinery away a card should be made out for each machine and a list made of all overhauling that should be done and of repairs to be ordered. Repair work can then be done at odd times during the dull season.

Two Coats of Paint Are Usually a Sufficiency

A little paint is good, but more is better. A single coat of paint serves its purpose as a preservative for a while but it does not have the staining weathering action so very long. If it be reinforced with a second coat, it will have much greater efficiency. It is estimated that a two-coat job of painting will last well and give as good results as three separate single coats put on at different times. In other words, single coat painting costs 50 per cent more to get the same efficiency.

Two coats are usually sufficient to cover a surface well if the paint is properly mixed and properly brushed out. Three coats are usually not necessary unless the surface is in exceedingly bad condition. If the paint is applied too thick it is likely to peel and blister and thus be impaired in value.

Make and Store Butter for Use During Winter

"Making and Storing Farm Butter for Winter Use" is the self-explanatory title of Leaflet No. 9-L, just issued by the United States Department of Agriculture. It is designed for use in farm homes where there is a surplus of butter in the summer and where the winter supply is not always adequate for the needs. For butter which is to keep for months, it has been found by experiment that pasteurized sweet cream should be used, and the butter churned at a fairly low temperature. After being churned it should be washed carefully, salted, wrapped in rolls or punts and covered in a strong brine and kept in a cool place. The brine method of preservation in stone crocks was found far superior to covering with parchment paper, storing in dry salt, or covering with paraffin. This leaflet is devoted primarily to suggestions for storage and supplements the more detailed bulletin No. 57-C, "Making Butter on the Farm." These publications may be obtained by application to the United States Department of Agriculture, Washington, D. C.

JESUS PICTURES THE KINGDOM OF GOD

LESSON TEXT—Mark 1:14,15; 4:1-34

GOLDEN TEXT—Thy kingdom come, thy will be done on earth as it is in heaven.

PRIMARY TOPIC—How God's Kingdom Grows.

JUNIOR TOPIC—How God's Kingdom Grows.

INTERMEDIATE AND SENIOR TOPIC—How the Kingdom Grows.

YOUNG PEOPLE AND ADULT TOPIC—The Growing Kingdom of God

I. Jesus Preaching the Gospel of the Kingdom of God (Mark 1:14, 15).

1. The time.
After the voice of John the Baptist was stilled because of his imprisonment, Jesus took up the message.

2. What He preached.
It was the gospel of the kingdom of God. Since "gospel" means "good news," the good news which He preached was that Christ had come to establish His kingdom.

3. How He preached.
He said, "Repent, for the kingdom is at hand." The King was then ready to set up His kingdom if the Jews would receive Him.

II. Jesus Pictures Four Classes of Hearers (Mark 4:1-20).

1. The place—the seashore—(v. 1).

He was obliged to enter a boat to escape the pressure of the crowd.

2. Why He taught in parables (vv. 9-12).

It was not until the rulers had set their hearts against Him that He employed the parabolic method.

3. The parable of the four kinds of ground—(vv. 3-8; 13-20).

Observe that the seed and the sower are the same in all these instances, but the results are entirely different, determined by the condition of the soil.

(1) The Wayside (vv. 14, 15).

The wayside means the track beaten by the hoofs of animals and the feet of men. Because the soil was broken and uncultivated the seed could not get beneath the surface, therefore was devoured by fowls, which represent the agents of Satan (v. 15).

(2) The stony ground (vv. 5, 6, 16, 17).

Stony ground means stones with a thin layer of soil upon them. Under such conditions the seed springs up quickly and is soon scorched because it has not much depth.

(3) The thorny ground (vv. 7, 18, 19).

In this case the ground is good, but has thorns in it. It is mellow and has depth, but has not been cleaned of the thorns. The thorny ground hearers of this age are: (a) Those who are so immersed in worldliness, business and anxious care that the good seed cannot mature; (b) those who are rich. The effect of riches is often to blind the spiritual perceptions; (c) those who are running after the pleasures of life. All these things choke the Word.

4. The good ground (vv. 8, 20).

This ground differs from all the rest. It is soft and mellow, deep and moist, therefore is capable of bringing forth fruit in varying degrees of abundance.

III. Jesus Pictures the Growth of the Kingdom (Mark 4:21-34)

1. The parable of the candle (vv. 21-25).

The bushel stands for the cares and material things of life, and the bed for ease and comfort.

2. The parable of the growing grain (vv. 26-29).

(1) The attitude of mind of the gospel preacher (vv. 26, 27).

He should with the utmost fidelity cast seed into the ground, preach the Word, and leave results to God.

(2) The processes of the spiritual life are gradual (v. 28). It is "first the blade, then the ear, after that the full corn in the ear."

(3) The consummation of the spiritual process (v. 29).

Despite the difficulty under which sowing is done, we can be assured of a harvest time.

3. The parable of the mustard seed (vv. 30-34).

(1) The unimportant beginning (v. 31).

(2) Its vigorous growth (v. 32).

The greatest power on earth today is that which had its inception in the preaching of the gospel.

(3) Its lodging capacity (v. 32)

The birds which lodge in the branches represent the children of the evil one who find protection and food in that which was inaugurated by Jesus Christ.

Dreaded Aches, PAINS Disappeared

"My health had been poor for ten years, before I took Cardui," says Mrs. Anna Cronin, of Rockport, Ind. "I was lifeless and no account. I dragged around day after day, every move an effort, and never feeling the joy of being well."
"At times, I had a dreadful ache across my back, and my sides hurt me. I worried along, sometimes hardly able to leave my bed, but the demands of a growing family had to be attended to; so I would get up, do what was absolutely necessary, and then lie down again."
"One day, someone suggested Cardui to me. I took it for several months, and all the time I was growing stronger, and less nervous. My aches and pains finally disappeared."
"That was two years ago. My improvement has been permanent. The good health, which followed the taking of Cardui, is still with me, so I do not hesitate to recommend it to my friends."
