

THE ELDORADO SUCCESS

OF AND FOR ELDORADO AND SCHLEICHER COUNTY. ALL THE TIME

VOL. XXXI

Eldorado, Schleicher County, Texas, Friday, July 10, 1931.

No. 28

High School Receives Affiliation In Public Speaking

The local school authorities have recently received a communication from the high school division of the State Department of Education stating that one credit of affiliation has been granted to the Eldorado High School in Public Speaking. This credit was based upon material submitted at the end of the session of school which closed in May. The course in Public Speaking, open only to juniors and seniors in high school consists of all the fundamentals of speaking in public such as appearance, poise, posture, expression, preparation of various kinds of talks, etc. About one half of the course is given to the study of the fundamentals of debating. The practice and experience which the pupils receive from the course should be of much practical value in later life.

The material submitted for affiliation in Public Speaking was the only material submitted this year by the local high school. All other work except home economics, was already affiliated. This raises the total number of credits now held by the Eldorado High School to 24 1/2, divided as follows: English 4, History 5, Mathematics 4 1/2, Science 4, Spanish 3, Commercial Work 3 and Public Speaking 1. Sixteen credits are required for graduation, 11 of which are required and the others being elective.

During the past session a course in clothing was added to the course of study and the school was given a grade of "B" upon the work which was submitted to the State Board for Vocational Education at Austin. It is thought, however, that credit will not be granted to the school in home economics unless a cottage or suitable rooms are provided for the next session in which the foods may also be taught. About 25 girls took the course in clothing during the last school.

WOMAN'S AUXILIARY MEETING

The Auxiliary met Monday July 6, at the church with Mesdames Otto Williams and Will Isaacs as joint hostesses. The regular program which consisted of a discussion of "Korea Home Life" was given by Mrs. Will Eaton. All were benefited by this interesting talk and also by a thorough study of the 3rd chapter of the book of James which was led by Mrs. Eaton. The Auxiliary is fortunate in having Mrs. Eaton as one of its members.

The President reported a sum of \$45 made during the month of June by the organization. It was decided to have another cake, pie and ice cream sale on the streets Saturday, July 11. Mrs. Sam Jones, secretary of Assechby's Home Missions, is chairman of the sale committee. Mrs. Will Eaton and Mrs. Tom Nix will assist her in this work.

Monday 2:30 p. m. July 13 the Auxiliary will meet at the church and work on the white cross requirements. Old materials will be used in making bandages and other required articles. Those who can't help are expected to furnish absorbent cotton, thread or other needed equipment.

The next regular business meeting will be at the church, July 27, with the young ladies of the church as joint hostesses.

Mrs. W. B. Gray announced that a social would be given in her home, with Mrs. S. M. Oglesby Jr. assisting Wednesday 3 p. m., July 8. Packages are to be brought for the Presbyterian Home Mission Fund.

Members present at the meeting July 6 were Mesdames Bert Page, Tom Nix, Geo. Williams, Jim Williams, Otto Williams, M. McClary, Leslie Baker, W. B. Gray, Will Eaton, R. D. Holt, W. B. Cobb, Will Isaacs, L. Whitten and S. M. Oglesby Jr. Guests were Mrs. Havens, Santa Anna, Texas and Miss Louise Williams.

The fourth chapter of James will be studied July 27, with Mrs. Holt as leader.

Sanitary Notice

This is to notify the citizens of Eldorado that all open cess pools must be done away with and that all pits must be moved away or any other thing that might be detrimental to good health. You are requested to attend to this without further personal visits from the city health officers.

CITY HEALTH OFFICER

Damage Suits For Million By Mexicans

SAN ANTONIO, July 3.—Suits asking \$1,000,000 damages for the slaying of Emillion Cortes Rubio, kinsman of Mexico's president, and Manuel Gomez Mexican college students, who were slain several weeks ago at Ardmore, Okla., may be filed against the state of Oklahoma and the sureties on the bond of the sheriff of Ardmore, M. C. Gonzales, San Antonio attorney, said today.

Gonzales represented the Mexican government at the present trial in Ardmore, Okla., of W. E. (Bill) Guess deputy sheriff who was acquitted of the slaying of Cortes Rubio. Cecil Crosby, the other deputy charged with the slayings, has not yet been tried. The attorney said today that he was awaiting word from relatives of the slain youths preparatory to filing in federal court two suits, each for \$500,000, on behalf of the respective families of the slain youths.

Salvador Cortes Rubio, companion of the two students on the night of the killing, informed Gonzales after the trial of Guess that the families of the two desired him to file damage suits, according to Gonzales. Since that time Gonzales has awaited some official word from the families before drawing up the suits.

Rubio and Gomez were slain after they had been stopped by the two deputy sheriffs on the night of June 7.

The contemplated action of the relatives is independent of any action of the Mexican government, Gonzales said.

PARENT TEACHER CORRESPONDENCE COURSE

The members of the Parent Teachers Correspondence study class have finished their study and several have sent in some of the lessons. Mrs. W. O. Alexander, who is president of the local organization, has completed the course. Mrs. Alexander's grade on all her papers has been "A". We are glad to have a lady who is so thoroughly acquainted with the Parent Teachers work at the head of the organization.

A BUSINESS LIGHTHOUSE

History shows that after every period of depression the business upswing which is as sure to follow as daylight after darkness, carries living and economic standards to new high levels. We all know that this process takes place but during the recession period we are too much inclined to become panicky as businesses built upon poor foundations are swept away. Injury, loss and tragedy result from ignorance or inexperience in dealing with the forces of nature on sea, on land or in business.

A lighthouse along the ocean shore is built to warn against danger. Ships at sea look for it to guide them. It stands on a foundation of solid rock. It has strength and enduring qualities. There is a similarity between the lighthouse and stock fire insurance.

Insurance statistics throw the clear white light of knowledge and experience on the fire hazards which business and individuals must meet in daily life, in good times and in bad. These hazards are just as definite as the rocks which the lighthouse guards against.

But insurance renders a service beyond pointing out the danger; it provides for indemnity after losses occur. In times of business depression, as in times of storms at sea, losses increase and security values decline. Then it is that insurance service stands out in its strength like the rock upon which the lighthouse is built. If there were any weakness in its foundation, it would crumble like the house built upon the sand.

Times of stress emphasize the fact that insurance does in reality stand as the basis of credit and that stock fire insurance, built upon the rock foundation of rates based upon the law of averages, renders its indispensable service without interruption at all times.

Big Reduction in Willard Batteries

ELDORADO ELECTRIC CO.

Mr. and Mrs. Geo. Caraway were in from Station A Tuesday shopping.

H. Leaman and wife and Paul Goodyear made a business trip to Stanton the first of the week.

Schleicher County Again Drenching Wet

Wednesday night and Thursday morning Eldorado and Schleicher County was visited by a several hour downpour and Grand Old Schleicher is slopping in mud again, and a new reign of prosperity is evidenced upon the face of our citizenship and we can all say as the Palmist did, "The Lord is my Shepherd, I shall not want, etc. The green pastures have been with us all this year, and sure the Lord has been merciful unto us."

Alva Hill Given Five Years By Jury

Alva Hill of San Angelo, 23, was given a five year sentence for his part in the killing of J. R. Kiser on June 10, by the jury which heard the evidence. The trial of his father was moved to Abilene.

Geo. Williams' Sheep Net \$20.50 At Ozona

George Williams, who carried 16 yearling ewes and 16 yearling rams to Ozona, to the stock show and sale, sold the 32 head at an average price of \$20.50 per head.

Ed Ratliff's Rams Tops Ozona Market

Ed Ratliff, who carried some of his home raised rams to the Ozona stock show and sale, is well pleased with the price his rams brought, they sold at an average price of \$26.20.

MRS. MELVIN CRABB IS HOSTESS

Mrs. Melvin Crabb entertained the Eldorado Bridge Club on Thursday afternoon, July 2 at the home of Mrs. R. T. Crain, in Eldorado.

Contract bridge was played and delicious refreshments served to a number of twelve guests.

Prizes for the afternoon were awarded Mrs. H. T. Finley, high club; Mrs. Sam Roberts, high guest and Mrs. J. C. Crosby, high cut.

Farmers' Short Course College Station, Texas July 27th To August 1st, 1931

PROMINENT SPEAKERS will discuss the present and future of farm life, as affected by the Federal Farm Board, cooperative organizations, the coming of electricity to the farm and a score of other factors.

SECTIONAL MEETINGS will consider matters of home planning and beautification, new uses for cotton in the textile field, feeding the family, home industries to increase farm income, livestock farming, dairying, poultry raising, meat cutting and canning, marketing quality products, and making field and orchard more productive of dollars.

RECREATION will be offered in the form of community plays and games, singing and motion pictures. Special programs have been prepared for boys and girls.

RAILROADS HAVE REDUCED RATES to permit those on the Missouri Pacific and Southern Pacific Lines to come at one cent per mile each way, and others to get round-trip tickets for two-thirds the regular one-way fare.

MEALS AND LODGING will be furnished by the College for \$6.50 per person for the five days, registrations to be made in advance through county or home demonstration agents. An auto camp ground is equipped on the campus for those who drive through. ALL DEDICATED TO "Profit, Comfort, Culture, Influence and Power". FOR EVERY FARM FAMILY.

S. W. Holland has been confined to his bed this week, being seriously ill, but his friends hope that he will soon be able to be out again.

M. A. Wilson, who sold the Sonora Devil's River News last week, has bought the Big Lake Wildcat, of which he was formerly publisher. He will change the name back to the Big Lake News as was his original publication way.

F. M. Bradley and family attended the July celebration at Brady.

W. L. McWhorter Dies Suddenly

William Lauren McWhorter was born September 4, 1868 at Linden, Texas, died July 4, 1931 at Eldorado, Texas, being 62 years and 10 months old.

He came to Eldorado in 1905 and bought out the Elton Silliman interest of the Silliman & McWhorter Mercantile business, and the business was known from that date as W. L. McWhorter & Bro. Mr. McWhorter moved to Eldorado the following year 1906, and has continued to make this his home since.

He was married in July 1916 to Mrs. Viola Calhoun, a daughter of the late J. S. Pelt, and to this union was born 4 sons, W. L. Jr., Dan, John and Bob McWhorter.

Mr. McWhorter retired from the Mercantile business several years ago and for the past several years had not been in the best of health. During his business life in our city he accumulated considerable wealth, and extended the helping hand to many people as they passed his way. He never affiliated with any church but did not fear to die as he believed his hope of reward was assured, as he knew and told his many friends that his time on earth could not be hoped for many years.

Saturday morning after Mrs. McWhorter had gotten up, he got out of bed and went to the kitchen, and asked her to fix him a toddy, his heart was giving him great pain. She fixed it for him, phoned his brother, C. M. McWhorter, who rushed to his bedside, sent one of the sons for the doctor, but he died before medical aid was received.

Funeral services were held at the First Baptist Church, the Rev. J. L. Ratliff conducting the service, assisted by the Rev. J. D. McWhorter, pastor of the First Methodist Church, Sunday afternoon, a large circle of friends attended the funeral, to pay their last respect to their neighbor and friend.

He was one of 9 children 4 of which survive him, his death makes 3 of the 9 within 16 months. Those surviving is a brother, R. D. McWhorter, Douglassville, Texas; H. H. McWhorter, Linden, Texas; Carl M. McWhorter, Eldorado, and a sister Mrs. Daisy Ford, Denton, Texas all attended the funeral except R. D. McWhorter. Many other nephews and nieces came for the funeral.

The body was laid to rest in the Eldorado cemetery beneath a beautiful floral offering. He is also survived by one step son, Sam Calhoun, of Christoval, Texas.

CARD OF THANKS

We wish to thank our friends for the many kind deeds, and the beautiful floral offering in our recent sorrow. May God bless each and every one of you.

Mrs. W. L. McWhorter, and family. Brothers and Sisters.

FORMER ELDORADO WOMAN DIES AT KERRVILLE

Mrs. C. C. West of our city has received a letter telling of the death of Mrs. I. H. Elder, age 69, who died at Kerrville June 23. Mrs. Elder with her family resided on a ranch west of Eldorado for a number of years, later operated the Elder Hotel in our city for a number of years. She is survived by her husband, three sons and two daughters. The family has many friends here who learn of her passing with regrets.

CRANE COUNTY MAN GETS 30 YEAR SENTENCE

Jack Hall, of Crane County, was assessed a 30 year prison term at Crane City Friday for the killing of Tom C. Barnsley last April. Hall is in jail at Odessa, pending the outcome of a new trial asked for.

Revive that old Battery for \$100. Call 117.

ELDORADO ELECTRIC CO.

Miss Isabelle Isaacs attended the July jubilee at Brady last week end.

Mrs. O. W. Evans and children of Brownwood, visited friends and relatives in Eldorado this week.

Jess Bradshaw and son were Brady visitors for the July celebration.

Wesner Nicks Well Swab Bed Monday And Tuesday

J. D. Wesner No. 1 Nicks, just outside the city limits, which has been shut down since May 25, excepting swabbing, pending a deal, is making preparation this week to resume drilling. The deal has been called off and the local people who have drilled the well from 750 to its present depth will resume the work this week says W. F. Meador. They have contracted some acreage and as soon as the papers can be passed on the drilling will be resumed. The people of this county have purchased leases here-to-fore liberally and with their cooperation the well can be carried another 800 feet deeper, at which pay is expected to be found, in case the deepening at the present showing does not bring production.

The Success feels like the deepening of the test by local people will assure the citizens that if production is found it will be developed. Lets all try to buy a little stock or lease and see that the well is carried on to at least 5,000 feet where production is almost sure to be. Mr. Wesner is selling 2 1/2 acres at \$50.00 per acre and the money will be used to carry the test on to the 5,000 feet depth.

OIL NEWS

The Joe Tisdale well is again drilling this week, after being working on breakdown and cementing pipe together. Work of drilling began Wednesday at 2,525 feet in shale.

The W. H. Williams No. 1 is still shut down awaiting pipe.

W. R. Nicks is preparing to deepen this week end.

BANK HAS CALL FINANCIAL STATEMENT EXCELLENT

The First National Bank of Eldorado, has received a call for June 30, and the statement reflects the stability of the bank and its people, a wonderful statement in a time of depression. All stock holders should be pleased at this statement.

M. E. CHURCH SERVICES SUNDAY

Sunday School at 10:00 a. m.
Preaching Service at 11:00 a. m. by Pastor.
Epworth League at 7:30 p. m.
J. H. Jarvis has resigned from the Superintendency of the Sunday School and A. J. Atkins has been appointed to fill the place by the Pastor. Every one is cordially invited to attend all our services.

PROGRAM FOR HILEAGUE

Leader: Eugene Koy
Hymn: "America".
Silent Prayer followed by the Lord's Prayers in concert.
Introductory Talk by Leader Eugene Koy (Pg. 685 Ep. Era)
Scripture: Acts 17:24-28.

Talk by assistant Leader: Hassel Ratliff (Pg. 685 Ep. Era)
Hymn: "In Christ There Is No East or West."

Talk by second assistant Leader: Junior Isaacs (Pg. 687 Ep. Era)
Talk by third assistant Leader: J. B. Conner (Pg. 686 Ep. Era)
Hymn: "O Beautiful for Spacious Skies."
League Benediction.

UTILITY RATES

A demand sweeps over the state for some reduction in the rates exacted by our utilities consonant with the reduced costs of labor, materials and supplies. Our light and power companies, gas companies, and street railway companies have sailed blithely through the period of the depression with their rates maintained at a point fixed in our most prosperous era.

Recent newspaper editorials revealed the fact that there is no element of consistency in the rates charged for public utility services. Gas sells at Amarillo for 27 cents a thousand because the people threatened to construct and operate a municipal plant. Gas sells in Houston for seventy-five cents a thousand probably because the South Texas city uttered no similar threats.

Congressman Thoma- son Will Make Effort To Save Meers

Congressman Thomason of El Paso has asked the State Department to investigate the case of W. Meers, who was recently given the death penalty in a murder case in Chihuahua City Mexico. Meers killed Miranti, a Mexican, under the mistaken impression that he was the man that killed his father in a holdup in El Paso and had escaped into Mexico.

GOVERNOR CALLS SPECIAL SESSION JULY, 14

Governor Sterling has issued a call for a special session of the Legislature for July 14 at which time oil proration restricting the State, and maybe other needed legislation will be passed. The Legislature adjourned May 23 after being in session 131 days.

The oil development and oil business in our state seems to be in bad shape, just an over supply and a trial to break all independent oil companies.

SAFETY AND HEALTH IN CHILDREN'S SUMMER CAMPS

The children's camp has become something of an American institution. Camps of various sorts, public and private, are the annual vacation sports for thousands of children, and as such play an important part in the development of the next generation. A well equipped, well-operated camp can be a strong influence for good health and citizenship; by the same token, an overly-commercialized carelessly run camp may be a genuine menace.

In order to make a contribution to the solution of the problems of health and safety in camps, the National Bureau of Casualty and Surety Underwriters financed J. Edwards Sanders, Associate Professor of Education at Colgate University, to make a thorough study of the camps. Under the title, "Safety and Health in Organized Camps," the National Bureau has now published Mr. Sanders' summary of his two-year survey of 617 summer camps. It is of prime interest to parents and educators and all who take an interest in child health and safety. It gives information on present state of camps and suggests means of improvement.

The book shows that camps, on the whole, are both safe and healthful places for children. Good camps have medical attendants close at hand, and sanitary conditions are of a superior order. There are, however, camps which are unfortunate exceptions to the rule. It is here that the parent must himself felt by a thorough-going investigation of any camp to which he considers sending his children.

From the standpoint of national health and safety this study of summer camps is an illustration of humanitarian work only secondary in importance to the National Bureau's successful campaign to prevent accidents to school children.

ICE CREAM AND CAKE SALE

The Methodist Ladies will sell Ice Cream and Cake, Pie and Coffee Saturday afternoon, July 11.

C. B. Reagan reports as follows, L. T. Wilson, B. E. Moore and G. W. Lewis went to Mexico's Big Lake fishing last week. L. T. was supposed to direct the boys to the camp site, but his vision became impaired after crossing the border and trouble was encountered getting down to the lake. Mr. Wilson caught a nice fish, staked it at the camp with "Heck", in charge, he fell asleep and the fish disappeared. The boys slipped off from Carl but some how he has obtained the above information and swore with his hand on a Schleicher County history that the facts were facts. Although he said he didn't believe everything he heard on "Heck."

Miss Marjorie Shell of Abilene is visiting her cousin, Miss Lila Watson, an other relatives in Eldorado this week.

Mr. and Mrs. C. R. Johnson, who are attending school in San Antonio, were home for a few days visit recently, including July the 4th.

THE SUCCESS JULY, 10, 1931

Senator Tom Connally spoke at Brady, blaming the Hoover administration for the hard times and the depression, and urging the Democrats to stand together and save the country.

Jim Ferguson spoke at Brady Saturday, said he had been guilty of talking about the Hoover administration, but when Hoover declared for a moratorium, he and his wife wired him congratulations, he blamed the politicians of both parties and urged the people to pay poll tax and vote for men and not politicians. Jim said if he had the control of the government he would declare a moratorium on all debts owed by the people, unless they wanted to pay, for 12 months. Jim talk was well received and his crowd was larger than the Connally crowd.

Between Tom Connally and Jim Ferguson we have decided that Jim is the best politician, his talk was appealing to his hearers while Senator Connally was denouncing his opposing party. Jim says he is not a politician, but if we judge right he was the best politician of the two.

Well the glorious fourth has passed with its joys and with its sorrows. And now comes the time to drop back into our regular routine work and keep the cogs of commerce turning.

Our trip to Brady was most pleasant. We witnessed one of the largest gatherings we have ever seen assembled, one of the soberest crowds we ever witnessed and one of the cheapest entertainments we ever attended. We don't mean that the entertainment was cheap or worthless, we mean you could see and have a good time for nothing. The gates of Richards Park were open to all who wanted to enter. The grounds were full of free amusements, and the entrance fee to the races, roping, and broncho riding was only 75 cents. This was all you were out for the day, unless you chose to spend more, there was in attendance for the three day between 12,000 and 16,000 people each day. Barbecue was served July 3 to all free. In fact Brady pulled off a real entertaining program for all.

Miss Blanche Newlin will attend the summer school at Alpine for the next six weeks she has had The Success sent to her while she will be there.

Mrs. C. C. West returned last week from Arlington where she visited her daughter Mrs. Joseph Elder, and where she met her daughter Miss Pauline, who has been away at school in Kansas City for the past year. Mrs. West brings back the news that Mrs. I. H. Elder of Kerrville was dead.

G. H. Davis was here Monday from his ranch in Sutton county looking after business and trying to dispose of a hay press, which he had advertised for sale in The Success.

Ballew Service Station

HUMBLE GAS AND OILS
 TIRES — TUBES — ACCESSORIES

I have bought the Whitten Service Station and will continue the business with the same courteous treatment, as has been given in the past.

SOUND ABSORBENT VALUE INCREASES DEMAND FOR MOHAIR

CHICAGO, Ill. —Increasing demand for moair fabrics with a consequent stimulus to the mohair industry are forecast as a result of further proof that the sound-absorbent properties of mohair meet the modern need for noise-abatement in theatres, automobiles, railroad trains and offices.

Tests conducted here by Dr. William Braid White, nationally known authority on acoustics, in cooperation with the Mohair Institute, have shown that mohair velvet, or velmo, upholstery absorbs an appreciable amount of noise in railroad cars and automobiles as well as in theatres where it long has been the favorite upholstery because of its service in reducing echoes and other sounds that mar reception of the talking movies.

With apparatus specially devised to actually take pictures of noises, Dr. White has been making comparative photographs which show that velmo mohair upholstery in automobiles and in railroad cars is especially effective in reducing the high-pitched noises particularly, the ones most disturbing to the human ear. Tests are planned in offices to show that judicious use of mohair upholstered furniture, drapes and other articles of mohair velvet is helpful in reducing noise and thereby curbing an evil that, other surveys have shown, costs office workers and other millions of dollars yearly through lowered efficiency.

The outfit Dr. White uses consists essentially of a microphone to pick up the sounds, an amplifier and an oscillograph are made. As the sound waves pass through the "mike" they are converted into electrical impulses as occurs in an ordinary telephone. These impulses are made stronger in the amplifier whence they pass into the oscillograph. Here they cause a tiny mirror to vibrate in exact rhythm with the incoming sound waves. This mirror reflects a beam of light thru a prism upon a strip of photographic film. Since the mirror vibrates with the sound waves, the pattern registered on the film is a true picture or "graph" of the actual sound waves.

By making comparative photographs of the sounds reflected from mohair and from other materials, Dr. White is able to tell the relative sound-absorbing value of the various materials. Marked superiority for mohair was noticed especially in comparison with rattan in railroad trains. The importance of sound-abating material is being stressed in view of the noise reducing campaigns being conducted in several of the large cities and it is predicted that mohair will assume an increasingly important place as an upholstery fabric when its noise-absorbing properties are more fully appreciated.

J. C. Bullion, Joe Muller Christian and Ray Boyer, three erstwhile youths of Eldorado were celebrating July 4 at the chicken dinner at Christoval Park Saturday. Just how much they ate could not be determined but gizzards, feet and necks, looked a like to these young men, when the young ladies passed the pan, they just reached in without looking "in the pan." They report a most enjoyable occasion and were thoroughly convinced that those girls fried that chicken.

Ozona entertained well a large crowd witnessed the attraction of the three day, plenty of eats and entertainment were served and all stock sold brought very satisfactory prices.

MANY FACTORS CAUSE VARIATIONS IN TESTS OF MILK AND CREAM

AUSTIN, Texas, July 5—Don't be too hasty in condemning your cream station if the milk or cream tests vary from day to day or from week to week. M. S. Frazee, weights and measures chief in the department of agriculture, warns dairymen and farmers.

Belying her stolid appearance, a cow has a temperament comparable to that of a grand opera star, Frazee declared, and anything that "upsets" the cow's routine may cause a variation in the milk or cream test.

Since the weights and measures division has been assigned the duty of checking tests made on cream at stations over the state scores of dairymen have indicated in letters to the division that they are unable to understand why their tests do not run uniform. Frazee today prepared a letter to dairymen, outlining a few of the causes.

Some of the more common causes of variations are: length of time between milkings, inherent ability of some cows to produce higher test milk, reaction to weather conditions, physical condition, and age of the cows. "Tests have established," Frazee said, "that cows of the same breed may vary in their inherent ability to produce milk of high butterfat content. Moreover, the breeds vary. The Jersey produces the highest per cent of butterfat, with the Guernsey, Brown, Swiss, Shorthorn, Ayrshire, and Holstein following in that order. "The greater the interval between milkings, the lower the test will be, and the shorter the interval, the higher the test. There is a tendency for the morning's milk to test higher, and if the interval between milkings is 10 to 14 hours, a variation of from 0.5 to 1 per cent may be expected. Needless to say, if the cow is not stripped well the test will be low, since the last part of the milk is, especially rich. There is also a tendency for cows to give richer milk in cold weather; but the test will be lower if they are exposed to severe weather; but the test will be lower if they are exposed to severe weather. The higher test in winter holds true regardless of the time the cow freshens, and a drop in tests must be expected in spring. That season, incidentally, is the season when the milk plant operator gets the most complaints on his testing. Cows that freshen in the fall will produce more milk, as well as more butterfat, than those which freshen in summer. "Physical condition of cows at calving is an important factor. A cow in good physical condition at that time may produce milk of 1 to 2 more butterfat content. Feed is also a factor, but more variable, inasmuch as a cow that is off feed may produce milk of either high or low butterfat content. All experiments, moreover, indicate no positive evidence of any continued direct effect of a feed in stimulating either milk production or increasing the amount of fat. The first month after lactation, milk is richer, than during the following month or two; then it becomes more constant until toward the close of lactation, when the fat percentage gradually increases. The annual yield normally increases from the first lactation until maturity with the maximum production from the ages of 7 to 9.

"Besides all the known and many unknown causes of variation in butterfat content and production of milk, the cream tests may vary because of the inefficient operation of the separator. No separator will skim cold milk as well as warm milk. In winter it is advisable to warm the separator by running hot water through it. "Constant care and adjustment of the utmost importance."

CRIME CAUSES BEYOND
 MERE RESTRICTIVE LAWS

The causes of crime are almost infinite in number. The pressure of social forces, racial influences, poverty, false standards of education, even climatic conditions—all these are responsible to some degree for law breaking, serious or otherwise. And so are the better known causes such as drug addiction, alcoholism, illiteracy, the gang spirit and blood taints, like insanity. The very complexity and number of crime causes is an unanswerable argument against the effort to subdue the criminal by passing more laws. The penologist, the criminologist, the psychiatrist—in their hands lies the true future of crime prevention. Mere legislation prohibiting the use of various instruments or chemicals which might be used to commit a crime, cannot overcome the conditions, physical, emotional and mental, that are responsible for making thieves and murderers.

E. P. Sweatt and John Martin were in Eldorado Monday visiting and meeting friends.

PESTS CUT PECAN CROP PROSPECTS CONTROL STUDIED

AUSTIN, Texas, July 6—Within the comparatively short space of two weeks a large part of the 1931 Texas pecan crop has been destroyed by the nut case-bearer, according to J. H. Burkett, pecan chief in the department of agriculture.

From personal inspections all over the state and from reports by inspectors for the department, Burkett estimates the damage done by the insect the last two weeks in June may run as high as 50 per cent of the crop. Prior to the invasion, prospects had been excellent for a bumper crop.

This pest is the worst enemy of the pecan in Texas, some estimating that it destroys as much as three-fourths of the crop yearly. The insect has as many as three and sometimes four generations a year, making the damage four-fold.

Means of combating the insect are still of doubtful value, Burkett said. Arsenate of lead is recommended by some growers as a spray. If used a careful schedule must be followed, starting in the early spring when the insect first attacks the small nutlets, this being the first or spring generation of the case-bearer.

Control of the case-bearer, Burkett said, may be possible within the next few years, contingent upon the success of experiments being conducted at the Federal Experiment Station at Brownwood by Dr. C. L. Nichols, and by Dr. S. W. Bilsing of A and M College. Dr. Bilsing's work is principally in sprays while Dr. Nichols is experimenting in the artificial propagation of a deadly enemy of the case-bearer, the parasitic insect trichogramma.

The trichogramma deposits its eggs in the eggs of the case-bearer. Dr. Nichols has found that the trichogramma also is a parasite of the corn weevil, and present experiments are concerned with the feasibility of propagating the insect in the corn weevil eggs. Some 200 bushels of corn were used at the Brownwood station this year in propagating the weevil, which in turn was host to the trichogramma. Last month Dr. Nichols began experiments in four experimental groves freeing thousands of the insects in each grove, where they were expected to seek out the case-bearer's eggs. Results of the experiment have not yet been ascertained.

Cost of artificially propagating the parasite is a problem. Whether it can be produced cheaply enough to make the use of the parasite commercially feasible has not been determined.

A. B. (Buck) Bailey, arrived in Eldorado Friday, coming from the University of Washington at Pullman Washington, over land, he will spend the summer with friends and his father here.

Mrs. Frank Webb was in from the Willoughby ranch Monday.

"A Good Place To Trade"

FOR SALE SECOND HAND LUMBER

Can Save You Money
 Apply At Old W. O. W. Hall

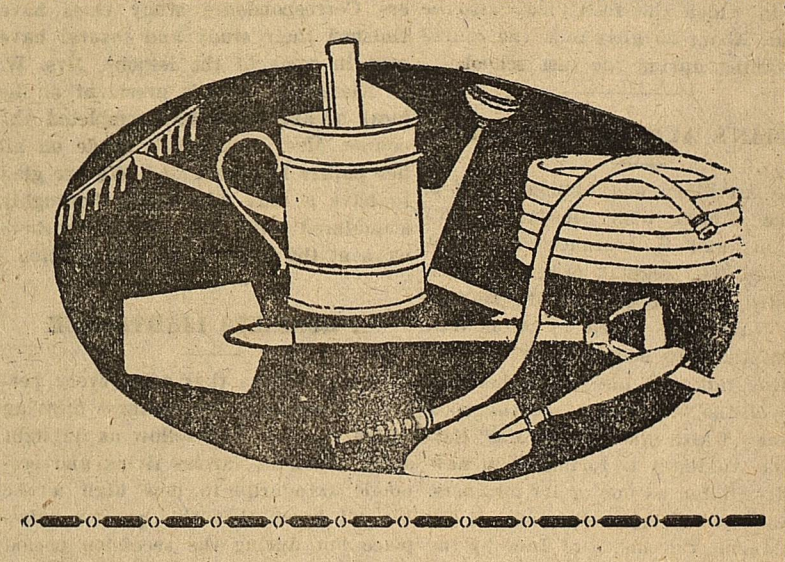

Mrs. Cora Putman who has been visiting in South Texas for the past month has returned to her home in Eldorado.

Mrs. E. E. Bolt of Junction, visited her brothers V. G. Tisdale and Joe Tisdale, and her sister Mrs. Cora Miller and her mother Mrs. Garrett.

V. G. Tisdale and wife, Mrs. Bolt and Mrs. Cora Miller went to Temple Wednesday.

Eldorado had no July celebration, but contributed largely to the gatherings of other towns, were well represented elsewhere.

Mrs. L. J. Shugart is visiting friends and relatives in Eldorado this week.

"THIS AND THAT"

By Jimminy

Has the world gone ga-ga?

Strange things are happening on this globe. Queer things, too, some of them. For instance.

President Hoover proposes that a debtors' holiday be declared among the nations, in order that prosperity may stage a comeback. He would add this holiday of one year's duration to an already long list of legal holidays observed by banks—a moratorium, as it were. And Democrats generally are as enthusiastic in their support of the president's plan as the Grand Old Party members. Has the world gone ga-ga?

Of course, there are a few who feel that the president is getting too big for his breeches, a few who have proclaimed loudly and feelingly that Mr. Hoover has usurped an authority vested only in the congress. But as a rule, the Democratic brethren have accepted the president's proposal as being a momentous suggestion at a time that, if anything, is a wee bit over ripe; in fact, his suggestion "took so good" that there is a fear that the word moratorium was "mistook" for the word natatorium by many of the Democrats, coming in the hot season, as it did. Congressmen are that way, you know.

Has the world gone ga-ga? In Harris County milk producers waged war with other milk producers not members of a milk producers association, in order to "stabilize the industry." They virtually flooded the market with milk so that their opponents would either come to terms or yell "calf rope." At one stage of the battle milk retailed for 5 cents a quart—and, as one editor said, it was enough to make a man ashamed to look a cow in the face. The war was settled by a chamber of commerce committee. Why not let chambers of commerce settle all wars? Maybe ethics would prove more effective than bullets, who knows?

Has the world gone ga-ga? Two aviators start on a projected 10-day flight around the world, for no good reason at all—unless it be to prove that we can get away from the depression quickly. They even landed in Moscow without molestation. And that is strange, too. Has the world gone ga-ga?

A gangster accused, along with other hoodlums, of taking another man for the well known "ride," after being a fugitive from justice for 13 months returns to the scene of his crime and calls the officers to come and get him. He met the officers, introduced himself and accompanied them to a hot cell—in June. A gangster! Has the world gone ga-ga?

Maybe not. It may only be showing progress. At least it looks that way.

"Liquor never obeyed a law of God or man and never will," said Judge E. Y. Webb of North Carolina, in charging the Grand Jury at the opening of the May term of federal court. "The only way to deal with liquor is to outlaw it."

Hollis Miller, of the West Texas Lumber Company, visited in Brady for the July celebration, was a guest of Miss Frances Armstrong while there.

READJUSTMENT OF FARMING METHODS URGED IN SPEECH

WEST, Texas, July 5.—Sounding a plea for adjustment of agriculture to modern conditions, J. E. McDonald, commissioner of agriculture, in an address Friday at West's Independence Day celebration declared that present agricultural practices were antiquated. "Our agricultural boat," he said, "is launched on new waters. The machinery which has been propelling it is antiquated, and it is going to require the special and combined efforts of every institution and agency to again make this boat seaworthy and its passengers happy and prosperous."

As a special example of antiquated methods, McDonald cited the "mad scramble" to produce cotton without attempt to coordinate production with consumption. "In this mad scramble," he said, "we are accumulating structure and if continued will not only bankrupt us financially but socially."

Figures were cited indicating the carryover this year would be from 8,500,000 to 9,000,000 bales of cotton in excess of a year's consumption. "Quite a good many of us," he said, "have seen four cent cotton when we were confronted with only two-thirds of a year's consumption in our carry-over, and when we enjoyed practically a monopoly of the cotton growing industry. It behooves us to pause and reflect at this time and try to vision what conditions will be should we be confronted with a carry-over in excess of a whole year's consumption with no definite and positive means of regulating next year's production so as to protect this huge carry-over."

"Apparently there are three ways to stop wasteful over-production: by voluntary cooperation brought about by educational campaigns and 'school house meetings', the means we have tried for half a century without success; by regulating production through utilization of the government and laws established for the happiness and prosperity of our people; and finally to continue producing cotton without unity of action or supervision until we impoverish our soil to the extent that we can't overproduce."

"The farmer doesn't need coercion; he does need some means established whereby unity of action may be given to his production. McDonald explained the details of

the Olson soil conservation bill, which died on the calendar of the 42nd legislature, declaring that enactment of this bill into law would establish for agriculture the same supervision industry now enjoys. This subject should be, he declared, a major subject before any special session of the legislature.

HOME DEMONSTRATION FAMILIES NOT FED BY FED CROSS

CROWELL, July 3.—Described by the local key banker as "the best thing that has happened in Foard county in 77 years", a food exhibit recently arranged by the home demonstration club women of the county showed at least 100 varieties of home grown food in each club booth, and 207 kinds in the winning booth. To the comment "This does not look as though Foard county had had over 300 families fed by the Red Cross," an exhibitor replied, "You don't understand. We are having this exhibit now to show people that they can live at home if they will plan a food budget and work to get it filled."

Ren McCormick is here from San Antonio this week visiting and meeting old friends.

NEW METHOD OF DOCKING LAMBS SHOWS SAVINGS

BRADY, July 2.—Burdizzo pinchers, which are coming into common use in West Texas for simple live-stock surgical operations, have been demonstrated a paying proposition in docking lambs by James D. Prewitt, county agent of McCulloch county, on the ranch of D. S. Pumphrey of Mercury. After docking 50 lambs with a pocket knife, resulting in a death loss of four, Mr. Pumphrey recently tried the pinchers on 1,200 lambs without a single loss. He estimates that he would have lost 48 lambs worth \$144 had he sustained the same percentage of loss in using the pocket knife on the main lot that he did on the first 50. He notes another important saving in the avoidance of losses of weight and screw worm infestation that often accompany the knife operation.

W. M. Holland was here Monday visiting and looking after business.

W. P. Evans was up from Christoval the past week end and refused to let his brother Bob talk hard times to him. But before Will left he asked Bob, "what in the hell are we going to do."

TO PROTECT THE WORKER AND INDUSTRY

An organized movement to insure stability of employment for several hundred thousand workers has been launched by the electric light and power industry. This action followed a recent address by Gerard Swope, President of the General Electric Company, favoring cooperation of employers and workers in administering and contributing to old age, accident and job insurance.

Mr. Swope said: "Unless industry finds a way, the government may feel itself compelled by public opinion to endeavor to solve the problem. If it is done by the states, then the costs will be distributed through taxation and there will be no economic restraints either on the collection of the funds or their distribution."

"The question becomes largely the responsibility of management, but even in this case the cooperation of the employe should be enlisted so that his interest may be aroused and he may be fully cognizant of the significance of the solution of this problem."

Thus does the electric industry again show leadership in working out a program on a comprehensive basis to meet changing requirements of industry and workers.

Five outstanding leaders have been appointed on the employment stabilization committee: C. E. Groesbeck, President of the Electric Bond and Share Company, New York; Martin J. Insull, President of the Middle West Utilities Company, Chicago; John B. Miller, Southern California Edison Company, Los Angeles; Frank L. Dame, North American Company, New York; and Chas. L. Edgar, Chairman of the Edison Electric Illuminating Company of Boston.

CRITICAL TIMES PROVE VALUE OF COOPERATION

What cooperatives can do for the farmer is well exemplified by the Dairyman's League Cooperative Association, a pioneer in the far eastern field.

All activities of the Association, according to F. H. Sexauer, its president, center on the one idea of equitable returns to its members, and assured and protected markets. As a result, the volume of milk sold and hauled by the association during 1930—in spite of depression and decreased consumption—was well in excess of the previous year. The Association's membership increased by several thousand, bringing the total to nearly 50,000. At the end of ten years of operation the Association has 239 plants, handling a vast volume of dairy products.

The dairy industry, Mr. Sexauer said, must look forward to lower price for its products for several years in the future. To meet this situation there must be greater producing economy and cooperation between three groups—the cooperative, the independent dairyman and the distributor. They must work together, unselfishly, for the benefit of the industry as a whole if success is to be achieved.

The banker, the minister, the teacher, the merchant—everyone with an interest in American prosperity—must be affected, for good or ill, by conditions within the dairy industry. What one cooperative has done and is doing, other cooperatives in other localities can do. Only through cooperation can a stable market and a fair price be assured. The Dairyman's League, and similar enterprises, have pointed the way that leads toward sound agricultural development.

HOOVER PRAISED FOR OFFER TO RELIEVE WORLD

LONDON, July 3.—The United States is the greatest nation on earth in the eyes of Prime Minister Ramsay MacDonald.

The Hoover moratorium offer, he believes, is an "action of great wisdom, of great courage and of deep insight."

America and Great Britain are matching strides in the "great moral causes" of humanity in his opinion. He spoke at the Independence Day dinner of the American Society of London last night.

The Boston tea party, he said, was a historical incident, that "means you are able to lift up your heads to the world, that you have been able to build up by patient labor, by courage and by self-respect the greatest nation that now exists on the face of this earth."

"I am perfectly certain that to whatever political party you may belong you will excuse me if I say that the recent action of your president to alleviate and soothe the wounds and unhappiness of Europe is an action of great wisdom, of great courage and of deep insight."

Mr. and Mrs. W. M. Davis, accompanied by Mrs. Davis' father, W. H. Parker and the Parker twins visited friends and relatives in San Antonio last week, returning by way of Del Rio and Villa Acuna.

At The Change

A Critical Time In Every Woman's Life.

"During a critical time in my life I took Cardui for several months. I had hot flashes. I would suddenly get dizzy and seem blind. I would get faint and have no strength.

My nerves were on edge. I would not sleep at night.

"Cardui did wonders for me. I recommend it to all women who are passing through the critical period of change. I have found it a fine medicine."—Mrs. Estelle Murphy, Poplar Bluff, Mo.

Cardui is a purely vegetable medicine and contains no dangerous drugs.
