

THE ELDORADO SUCCESS

OF AND FOR ELDORADO AND SCHLEICHER COUNTY. ALL THE TIME

VOL. XXXI

Eldorado, Schleicher County, Texas, Friday August, 7, 1931.

No. 32.

Texan Being Pushed For Democratic Presidential Nominee

Melvin Traylor, now of Chicago but who was reared in Texas, is being pushed by his friends at Hillsboro, Texas, as the Democratic nominee for president in 1932. The Hillsboro citizens had a mass meeting last week and are sending out, "Melvin Traylor for President" buttons, and urging the Democrats of the nation to fall in line and make him the nominee. Mr. Traylor was born in Kentucky, came to Hillsboro in his teens, worked in his uncle's Grocery store and studied law at night, was admitted to the bar and served as county Attorney, went into the banking business, studied stock judging and came to Ballinger as banker, went to Ft. Worth and finally after the World War, during which he gained wide recognition in aligning bankers of the West for Government loans, the First Trust and Savings Bank of Chicago made Mr. Traylor its president, and he became at the same time vice president and director of the First National Bank. In 1925 he became president of the latter affiliated bank. The combined assets and resources of the two rate fifth in the United States.

State Health Nurse Begins Work Monday August 10th

Miss Antoinette Alscher will speak at the court house Saturday afternoon at 3:30.

She will also begin the examination of all children at the school building Monday August 10. Dr. G. W. Lewis of San Angelo, eye and nose specialist will be here, for the day, and Dr. Nettie Isaacs Dentist, will also be there. All examination and advice will be free under the state health department, so all parents are requested to bring their children and cooperate with the authorities in this work.

VISITORS ENTERTAINED

Honoring Jean, Judy and John Rae Powell of Fort Worth, who are visiting in the Willoughby home here, Jimmie Sammons entertained at the home of Mr. and Mrs. J. O. Willoughby, this week.

Games were directed by Miss Muffet Baugh. At noon an individual basket luncheon was served. Favors were balloons of various colors.

Those present were the honor guests, Adair Baugh, Anita Runge, Mary Rebecca Muller, Ethel Ann Oglesby, Ford Oglesby, Jr., Madye Joe Bailey, James Robert Bailey, Elnior Worth Lawhon, Billy Oglesby, Bobby Oglesby, Frances Thompson, Luke Thompson, Jr., Mary Hoover, Annibel Davidson, Mary Lee Davidson, Josh Ewing, Bobby Austin of Fort Worth, Muffet Baugh and Jimmie Sammons.

ENTERTAIN WITH BARBECUE

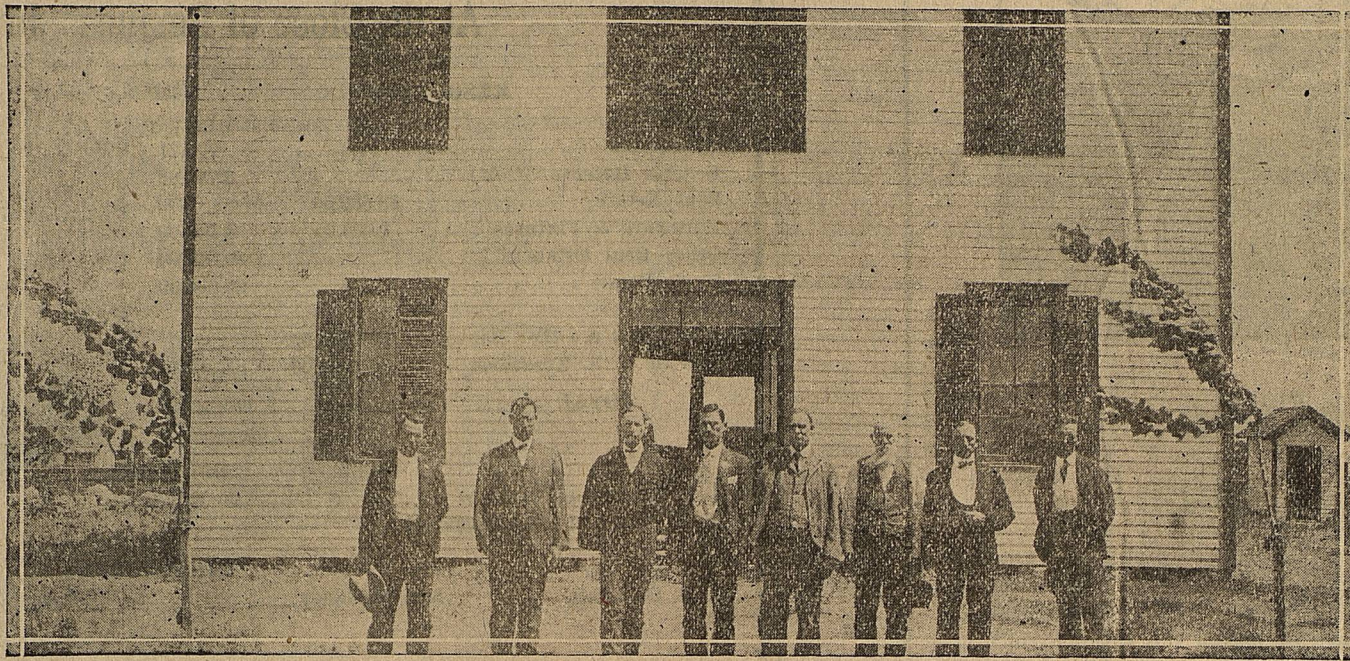

Mr. and Mrs. Will McAngus and Mr. and Mrs. Ross McAngus entertained with a barbecue for the following relatives on August 3. Mr. Dan McAngus and daughters, Alma and Mattie of Hominy, Oklahoma; Maurice and Clifford Bradshaw of Austin; Miss Ruth McAngus of Austin; David McAngus of Austin; Mr. and Mrs. Hugh McAngus, Ell, William and Zadie of Eldorado; Mr. and Mrs. C. B. Suddeth, Eldorado; also Mr. and Mrs. Gene Parker, Irene and Luther, Eldorado; Mr. and Mrs. Charlie Yancy and children, Eldorado; also a guest of Zadie McAngus of Arkansas.

MRS. W. D. GREGORY IS HOSTESS

Mrs. W. D. Gregory entertained the Blue Bonnet Bridge Club, Wednesday of this week, at her home in Glendale. Five tables of club members and guests were present. Mrs. Seth Ramsey was winner of the club prize for the afternoon and Mrs. Lewis Ballew was winner of guest prize.

REX FLOBIST, San Angelo, Mrs. J. D. McWhorter representative, benefit of the Methodist Church.

Mrs. Herman West, of Comanche, was here this week visiting relatives and friends, she had been to Ozona to attend the funeral of her brother-in-law Will Bennett, who died there last Thursday.

The above picture was taken in Eldorado in 1902, 29 years ago, and the building is a picture of the first court house erected in the county. Those in the picture are reading from left to right, J. A. Whitten, then county Judge, who has continued to make Eldorado his home and is now president of the Wool-Growers Central Storage Co. also Chairman of the State Live Stock Sanitary Committee. Next is C. C. Doty, who was the first Tax Assessor of Schleicher County, who is one of the few who has made his continued residence in Schleicher County since 1880, is at present Justice of the peace in Precinct one and enjoys good health and many friends.

Next in the picture is F. C. Bates Jr., who was our first county clerk and now lives on a ranch near Sheffield, leaving this county not for the purpose of finding a better county, but a cheap one in which to raise sheep. Fourth, comes Henry Mills, first Sheriff of our county, now a ranchman of Val Verde County. Fifth comes our old friend P. H. McCormick, for many years county Treasurer; he to his spent some 30 years in our midst, preaching and teaching righteousness, although getting up in age, he and his brother John were able to attend and enjoy the Old Soldiers Reunion at Christoval last week. Sixth comes the Elder F. C. Bates Sr., you can see by

looking at his long white beard that he is a man of considerable age, but Mr. Bates is still among the living, now making his home with his son F. C. Bates Jr. of Sheffield. He is now nearing the 100 mile post and was a dominant factor for the prohibition cause during his entire life time here. Seventh in line is E. B. Cozzens now living near Ft. Worth, he was an attorney and for many years made his home here. Eighth person in the picture, is Joab Campbell, none other than our present county attorney. He was county attorney at that time has served as county Judge during his 30 years stay in our midst and for 8 or 10 years lived on his ranch 16 miles

northeast of Eldorado, and served as commissioner, has been a live wire in our midst and the only man we ever knew who could pay a surety debt with a smile.

There is one feature about the above picture that is seldom seen, considering the age of some of the party, and the long period of time, is they are still living, eight men in the group and from 25 to 71 years old at the time and all yet among the living. This alone speaks out in loud tones, if you desire a long and peaceful life, cast your lot among the citizenship of this county, walk uprightly and your years will be long upon the land, that thou God giveth thee.

Freida Sumner Passes Away

While visiting in the home of her grandparents, Mr. and Mrs. Will Franklin, of Blanket, Freida Sumner daughter of Mr. and Mrs. L. E. Sumner, was stricken from infantile paralysis and died Thursday morning at 7:43 at a hospital in Brownwood. Mr. Sumner, who is County Agent here, had gone to the A. & M. College to attend the short course there, and Mrs. Sumner was visiting her parents at Blanket.

Freida was born in Blanket, April 12, 1926 and has made her home in Eldorado for the most of her life. The sad news of little Freida's death reached Eldorado Thursday, when Mr. Franklin wired Ed Hill, some friends from here attended the funeral and others sent flowers, the Methodist Sunday School of which Freida was a member sent a beautiful wreath.

Mr. and Mrs. Sumner have made many friends among our people who sympathize the best they can, with them in the loss of their precious little girl. She is survived by three sisters Grady, Ruth and Alice, besides her parents. Heaven has been made nearer and dearer by her going.

ON VACATION

Dr. W. B. Gray, the pastor of the Presbyterian Church, and his wife Mrs. Gray are leaving this week for Montreal, N. C. to attend the summer assembly of their denomination.

Some of the noted leaders and speakers of America will direct the Bible Conference which will include the last two weeks in August. Dr. Gray will be back to occupy his pulpit on the first Sunday in September.

We note from the names of prominent people in San Angelo, writing Governor Murray of Oklahoma, congratulations for his courage, that he has the sympathy of some of our best people when such men as M. B. Pulliam, Dr. A. W. Clayton, Dr. H. R. Wardlow, Judge J. W. Hill, J. Waller Johnson and Clint Johnson, speak. It seems like some of the old time westerners still believe in a state having some right to control its internal affairs and that the rights of the people in general should come first.

Sam E. Jones and wife and Sam E. Jr. went to the Pedernales River in Gillespie County this week on a fishing trip.

Mrs. S. L. Stanford is enjoying a visit from his mother Mrs. E. C. Wade of Lampasas this week.

Sam Calhoun was up from Christoval Wednesday visiting and meeting friends.

Hugh Stockton Espy

Hugh Stockton Espy, was born May 11, 1861 and died suddenly August 6, 1931 at his home in Eldorado.

Mr. Espy was married December 22, 1889 to Miss Annie Laura Harrell and to this union was born 5 children of which four are living. He had been a member of the Presbyterian church for 40 years and at all times could be depended on for the support of right against wrong. He lived an upright life and for many years was engaged ranching having moved to this county in 1913 from McCulloch County, and moved to Eldorado in 1918 from the ranch, and has been engaged in the commission business since that time. He is survived by two sisters Mrs. Kate Knight of Lampasas and Mrs. C. A. Yoas of Brady; four children Mrs. A. J. Roach of Hyman, Texas; two sons, Thomas and Howard of Sutton County, and Miss Ruth Espy of Eldorado, also three grand children all of the children being present at the funeral.

The funeral services were conducted by the local Pastor Rev. W. B. Gray, and held in the Presbyterian Church. The floral offering was most beautiful and bespeaks of the nature and character of his life.

The pall bearers were Don McCormick, F. M. Bradley, G. C. Crosby, J. F. Isaacs, O. E. Conner and C. E. Springstun.

Burial in Eldorado Cemetery at 5:30 p. m.

MRS. TRUETT STANFORD OPERATED ON FOR APPENDICITIS

Mrs. Truett Stanford was carried to San Angelo last Tuesday and underwent an operation for appendicitis and word from the hospital says she is doing nicely and will be able to return home in a few days.

Miss Jym and Young Newson are in Eldorado this week visiting their father, Dr. E. B. Newson and friends.

Lyonnelle Ballew, who has been visiting her brother, Monte Ballew, in California, returned to Eldorado last Friday.

Mr. and Mrs. A. J. Roach and family returned the first of this week from a visit to the coast, Houston, Austin and Lampasas. Ambrose reports a fine trip but the people in general talking hard times.

John I. King was in from the ranch Tuesday looking prosperous and feeling fine.

Mr. and Mrs. H. T. Finley and son George Stanley, made a trip to Menard Sunday after Mrs. Lucile Garvin.

Will Bennett Dead

Word was received in Eldorado last Thursday night that William H. Bennett, of Ozona, had died very suddenly that afternoon at his home in Ozona. Mr. Bennett at one time ranched in this county and owned the Eldorado Telephone exchange, and made many warm friends in our midst; was a man of sterling character and leaves a wife and daughter to mourn his sudden demise. Death comes without warning and it behooves each of us to be prepared to meet the occasion. Mr. Bennett was buried in Ozona last Friday, several going over from Eldorado.

CARD OF THANKS

We wish to thank those who were so good to us during this time of sorrow. We sincerely appreciate the floral offering and kind words of sympathy that have been spoken. May God bless you all.

Mr. and Mrs. L. E. Sumner and girls.

"HOPPERS" OUT OF CONTROL

Pests Broaden Range 50 Miles Daily and Despite Poison Drive

WASHINGTON, Aug. 5.—Grasshoppers ravaging the fields of northwest and central states have broadened their range to 50 miles a day by taking to their wings and have left little hope for their control this season.

This information was made public by Dr. W. H. Larrimer, entomologist, on the basis of reports received by the agriculture department yesterday. He said the poisoning campaign in the infested states was being conducted actively and that by continuing it throughout the fall and next spring the damage from almost certain outbreaks next year might be minimized.

Charlie Weatherly and daughter, Doll, were in Eldorado Sunday. Mr. Weatherly returned to Ft. Worth Monday but Doll remained in Eldorado to visit her auntie, Mrs. Bill McCravy.

R. T. Crain, manager of the Eldorado Gin Co., says he has never had the opportunity of ginning a bumper cotton crop, but he sees one just around the corner and hopes to see it mature. After all, said Mr. Crain, the cotton crop is the money crop of the farmer and the country. Mr. Crain is preparing his gins for a heavy run and to accommodate the farmers of the county.

Brewster County is the largest county in Texas with 5,935 square miles, and Rockwall is the smallest with 139 square miles. Rockwall has the largest population.

Schleicher County Stock Feeds, Out Good At Georgetown

Mr. L. E. Sumner, received a letter this week from parties in Williamson County, on the feeding out of 42 yearling heifers raised by Don McCormick and sold at Ft. Worth and about the same number of steer yearlings sold by Cecil Meador. The stock was bought and carried to Georgetown to be fed by feeders. The heifers weighed 525 pounds when bought at Ft. Worth and gained an average of 351 pounds in 135 days, or 2.34 pounds per day. The steer yearlings weighed 578 pounds and gained 2.03 pounds per day and were fed 153 days. The cattle were weighed each time at Ft. Worth. The feeder had cattle from 5 different parts of the state and the Schleicher county cattle made the largest gains.

METEOR SHOWERS FORECAST AFTER MIDNIGHT TUESDAY

PHILADELPHIA, Aug. 5.—Meteor showers running 50 to 100 shooting stars an hour are forecast for next Tuesday night.

They should appear sometime after midnight of August 11-12, high up in the northeastern sky, seeming to shoot from the constellation Persens, from which they drive their name, the Perseids. These meteors have never failed to appear on this once a year during the last century.

"This year," says Dr. Charles P. Olivier of the University of Pennsylvania, "at the maximum of the Perseids the moon will be about new and hence will not interfere as it did last year. All persons who watch the Perseids this year are requested to mail their counts to Dr. Olivier. These should be given by the half hour, and note any specially bright meteors, or those with fiery tails. The direction of flight is wanted and the clearness of the sky. This information from the public is one of the astronomers' methods of learning more about meteors. The reports should be addressed to Dr. Olivier at Flower Observatory, University of Pennsylvania, Philadelphia.

W. E. Eaton, local manager of the Eldorado Water Works, will soon have a new office in Eldorado, built on the East side of square. Jim Patton says Bill is going to need a stenographer. Bill said he thought Bill could do the work.

J. C. Bullion visited in San Angelo and Brownwood this week, and our guess is that he won't pass up Christoval.

Ranchmen's Round-up Experiment Station August 11-12

The Sixth Annual Ranchman's Round-up will be held at the Experiment Station in Sutton County August 11 and 12. The program Committee has arranged a good entertainment for all visitors for the occasion.

General Data About the Ranch Station

The Ranch Station property comprises 3,461 acres, all used for growing feed crops. The grazing land is divided into five main pastures with several additional experimental tracts.

The purpose of the Ranch Station is to study the livestock problems of the ranchmen in relation to efficiency in the operation of range livestock production. Among the important projects of the station are: swellhead of sheep and goats; sore mouth; carrying capacity of the ranges; range vegetation; grazing habits of cattle, sheep, and goats; poisonous plants investigations; shearing sheep once versus twice a year; shrinkage studies of individual fleeces of wool and mohair; goat lice experiments (in cooperation with the U. S. Bureau of Entomology); scab mite studies (in cooperation with the U. S. Bureau of Entomology); stomach worms of sheep and goats; seasonal changes in cattle weights; cost and method of livestock production; and inheritance studies of the improvement of cattle, sheep, and goats.

To reach the Ranch Station: At Sonora take Rocksprings road to sign on Station gate 28 miles; thence through pasture to headquarters 2 miles west. At Rocksprings, take Sonora road to Station gate 33 miles. At Del Rio, take Sonora road about 70 miles to sign at Holman's Ranch, thence to right 6 miles over ranch road to Station.

W. R. Nicks No. 1 To Be Underreamed

J. D. Wesner, W. R. Nicks No. 1 has raised the 8-1-4 inch casing to 4,000 feet preparing to underream the hole from 4,006 feet to 4,065 feet then the casing will be lowered and cemented. The hole has 3,000 feet of fluid in it at present which is mostly water. The underreaming should get underway by today.

The Eastland Oil Co.'s No. 1 Joe Tisdale is drilling below 3,000 feet in lime with a hole full of water.

Oklahoma Governor Shuts Down 3,106 Oil Wells

Governor Murray of Oklahoma, has issued orders that shuts down 3,106 Oil Wells in Oklahoma, and places them under martial law. "I am seeking for power, seeking it to liberate the people," says Governor Murray in depending his action. The Governor has given the big oil syndicates until Saturday night of last week to post oil at \$1.00 per barrel, but the price only reached 50c in Oklahoma, and the order was delayed until Tuesday, in order to rewrite the order. The wells were shut down and the oil ceases to flow only in stripper wells.

GUARANTY FUND RELEASED

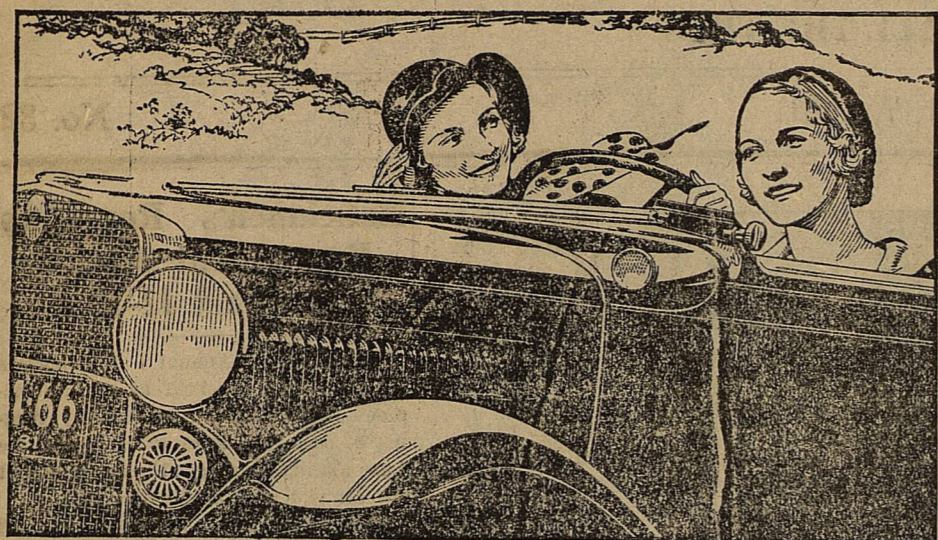

Judge Moore Issues Order to Return \$2,000,000 to Banks

AUSTIN, Aug. 1.—J. D. Moore, district judge here, today entered an order making more than \$2,000,000 available to claimants against the depositors' guaranty fund. This money will be distributed among several thousand individual claimants and more than a thousand Texas banks which had contributed to the fund prior to repeal of the guaranty fund law early in 1927.

Distribution had been delayed more than four years by litigation. James V. Allred, attorney general said the money would be distributed "just as soon as the checks may be drawn and sent out."

"I estimate all of this money will be back in the channels of commerce within from 30 to 60 days from this date," he stated.

Charles A. Lindbergh and wife are off on their trip to China and the old world. They are making the trip by air, and Col. Lindbergh said there would be no hurrying on the trip. Just going to take his time and see the country.

Drivers of sixes never want less

because it takes six cylinders to give the smooth, silent power that makes driving really enjoyable

Drivers of sixes are spoiled for anything less. Drivers of sixes are sold on multiple cylinders. They would no more think of giving up "six" performance than any other real advancement of motoring. For them, the whole cylinder question has been settled.

Slip behind the wheel of a Chevrolet Six, and you'll know why these drivers feel as they do. Step on the starter, let the motor idle—and notice its silence. Throw in the

clutch, shift into "low"—and feel that smoothness. Change into "second," hit a faster and faster clip, slip into "high," sweep along at top speed—then throttle down to barely a crawl. The smoothness and flexibility you always get are six-cylinder smoothness, six-cylinder flexibility. Annoying vibration is gone!

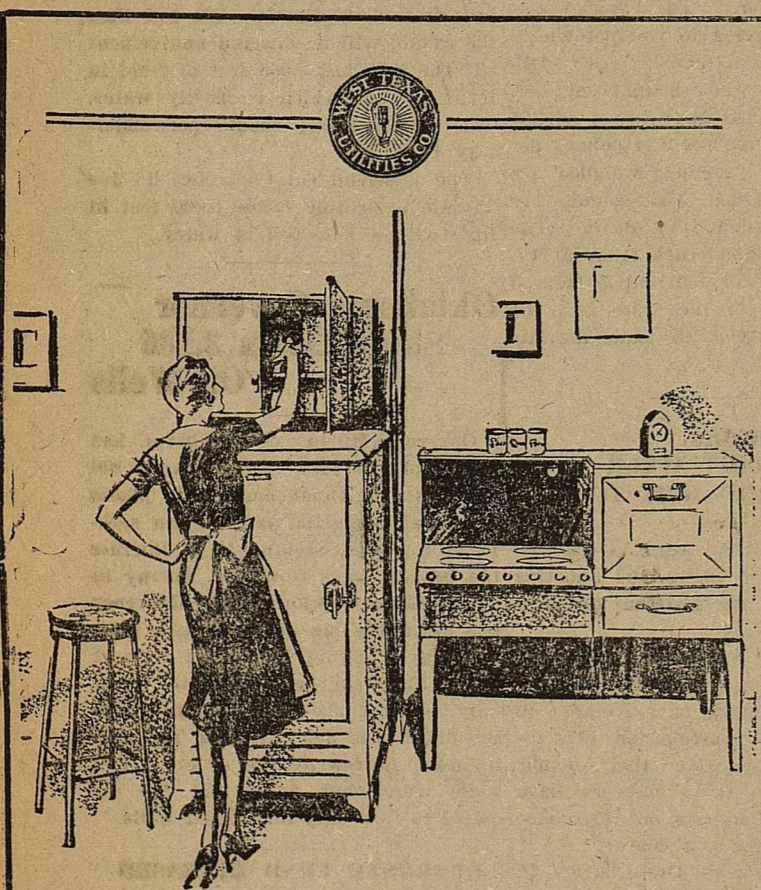

Over two million owners have tested and proved this six-cylinder Chevrolet engine. They have found that it costs less for gas and oil than any other. They have found that it actually reduces upkeep costs, by holding vibration to a minimum. They know a six is better in every way—and they would never be satisfied with less!

Twenty beautiful models, at prices ranging from \$475 to \$675
All prices f. o. b. Flint, Michigan, special equipment extra. Low delivered prices and easy G. M. A. C. terms.

Domestic Efficiency

THANKS largely to the widespread distribution of inexpensive electric power, the days of household drudgery rapidly are disappearing. Modern time, labor and money-saving *Electrical Servants* have taken the place of old-fashioned health-destroying methods, and the every-day life of today's Home-manager has been improved immeasurably.

Electric Ranges, Refrigerators, Washers, Vacuum Sweepers—literally hundreds of efficient *Electrical Servants*—will release you from drudgerous household tasks. You will find more time to devote to your family . . . to keep abreast of world affairs . . . to aid worth-while social movements.

If you are one of the few who have not realized the advantages of these modern and efficient household aids, investigate today. You will find these invaluable servants low in first cost—and they'll work for but a few pennies a day!

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule . . . and adds only a small amount to your total bill?

THE SUCCESS FRIDAY, AUGUST 7, 1931

From Washington comes the information that the United States will begin a program of Navy building that will place the U. S. Navy second to none. This building program is in accordance with the London treaty.

The new cigarette tax will go into effect August 22, and all sold after that date must have a stamp on them. The stamps can be secured at the First National Bank, or by writing the State Treasurer at Austin.

On Tuesday August 4, 1914 the German Army invaded Belgium, this was 17 years ago, and the war debts are still being thrashed out.

After five small children were wounded and one killed while at innocent play in New York, by Gangsters, the officials have declared war on the Gangsters. They were just 24 hours late in their declaration, one dead baby and 4 wounded, is too many wounded babies to allow gangsters to run rampant. Governor Roosevelt could be president if he could clean up New York.

The boys who entered the water-melon patch of Mrs. S. W. Holland, pulled off the melons and stacked them in a pile, was meaner than a pole cat and need be brought to justice.

Harmon Neill, cashier of The First National Bank of Sonora, B. Hamilton, grocer; W. E. James of the Devils River News; John Lowery, Vetran County Clerk; and Bud Smith of Sonora were guests at the Lions Luncheon Wednesday. They extended the local boys an invitation to lunch with them sometime.

Miss Lodice Putman who has been away to summer school is back in Eldorado for the remainder of the summer.

Sunday the Editor, wife and youngest daughter, Beatrice, visited on the Clarence Arrot ranch in Coke county. Clarence is one fellow that at one time lived in the Garden of Eden, Schleicher County and drifted away, but had a nice little ranch in Coke county and extended us a special invitation to come gather some wild plums. We found that the late chilling frosts had left quite a few of the wild delicious fruits of the mountains, and with the assistance of Mr. and Mrs. Arrot we were soon out among the hills gathering plums. Returned home Sunday evening to fall into dream land of the rocks and the mountains and the wild plum bushes.

ON TEXAS FARMS

By W. H. Darrow,
Extension Service Editor

Well fed hens in seven poultry demonstration flocks in Rockwall county produced an average of 18 eggs each in May at a feed cost of 5.45 cents per dozen. They sold at an average of about 14 cents per dozen.

Sultain's Lenden, a registered cow in the demonstration herd of L. D. Singley of Rotan, produced 434 pounds of butterfat last year and made a profit above feed cost of \$96.54. She was worth more than 12 such cows as Little Jersey in the same herd who made \$7.67 above feed cost. Little Jersey has gone to market, the county agent says.

Alternate rows of certified cotton and soy beans are doing remarkably well in a five-acre demonstration by J. C. Fisher of Overland Community in Hopkins county. The 1930 crop was cotton which was followed by a winter cover crop of oats, barley, wheat rye, hairy vetch and Australian winter peas. A good winter pasture was thus obtained and a good green manure crop turned under early this spring.

As much money from one cutting of a five-acre alfalfa patch as from 10 acres of wheat yielding 25 bushels per acre is the record made by Irwin Cole, Gray county farmer. He cut 3 1-2 tons of good quality hay late in May from this demonstration field which is planted on the level with no side moisture running on to the field.

Skim milk and yellow corn changed magically into 2470 pounds of pork in 5 months and 10 days when L. P. Weir fed out a litter of 10 pigs as a demonstration with the county agent on his farm in Miguel community, Frio county. The pigs were a first cross of pure bred Poland Chinas and pure bred Duroc Jerseys.

B. B. Hall, president of the West Texas Lumber Co., was here Tuesday looking after business and shaking hands with friends. While here Mr. Hall closed a deal for the Lark McClarry house occupied by H. Leaman and family. Mr. Hall is a pioneer of Concho county and says that the present depression is the worst he ever passed through. Mr. Hall has a number of yards through this section of Texas and has lots of money out, but is one of the most patient creditors the writer has ever known, and we have known him since we wore knee trousers. Mr. Hall said another bad feature of the times was that the end could not be foretold.

Mr. and Mrs. Leonard Isaacs were in from the ranch Friday visiting friends and shopping.

COOLING EGGS ADDS TO POULTRY PROFITS

Jourdanton—Not satisfied with the way his market eggs were grading out J. R. Clinton, poultry flock demonstrator in Atascosa county, built an old fashioned iceless refrigerator to furnish a cool place to store his eggs while waiting for market. The first shipment gave him over four dozen more "special extra" eggs in each case that was kept in the cooler than in the cases stored in the usual warm place, and a much larger percentage of "number ones". In the last shipment 32 1-2 dozen out of 40 dozen eggs graded "special extra" and seven dozen "number one."

According to T. P. Metcalfe, county agent, the cooler was made from some light 1x2 lumber, with two sheet iron pans to hold water, and cloth obtained from feed sacks. The color temperature within the moistened cloth enclosure comes from the steady evaporation of water from the cloth surfaces. The total cost did not exceed \$2 which was re-paid from the extra premium from the first few cases of eggs.

Mrs. J. W. Lawhon and daughter Elinor Worth, and Mrs. Lawhon, mother of J. W. Lawhon, who is visiting on the ranch this week, were in Eldorado shopping Monday.

Arthur Mund was in from the ranch Saturday looking after business.

ACSEAGE CUT BILL GETS NEW SUPPORT

AUSTIN, Tex., August 4—Declaring he had been against acreage regulation by law but "the time has come for whatever is necessary to meet the situation", C. O. Moser, vice-president of the American Cotton Cooperative Association, pledged his support to pending legislation to reduce cotton acreage.

A surplus of cotton has been accumulated and pyramided, Moser said until it will equal an entire year's production by the end of the coming season, and at the same time, the world has the lowest buying power that any living man has ever known.

"It is not a time for normal measures," he said, "but a time for whatever it takes to meet the situation." He added that it was up to the Texas legislature, representing the greatest cotton state, to "meet the issue squarely." He pledged the cooperative would do everything to get other states to follow Texas leadership.

Alba Pitts, who figured in the jail at San Angelo several weeks ago, and who was recently captured in Mississippi, and has suffered an attack of Typhoid fever was found insane by a jury Tuesday and was carried to San Antonio Wednesday to the asylum.

Mr. and Mrs. B. E. Moore and Mrs. Payne Robinson attended the Funeral service of Freida Sumner at Blanket, Friday.

PAINS QUIT COMING

"When I was a girl, I suf-
fered periodically with ter-
rible pains in my back and
sides. Often I would bend
almost double with the in-
tense pain. This would
last for hours and I could
get no relief.

"I tried almost every-
thing that was recom-
mended to me, but found
nothing that would help
until I began taking
Cardui. My mother
thought it would be
good for me, so she
got a bottle of Cardui
and started me taking
it. I soon improved.
The bad spells quit
coming. I was soon
in normal health."
—Mrs. Jewel Harris,
Winnboro, Texas.

WEST TEXAS PRESS ASSOCIATION MEETS AUGUST 14-15

LUBBOCK, Aug. 5.—Everything is
all set for the West Texas Press Asso-
ciation convention, W. S. "Bill"
Cooper, president of the association
and editor of the Colorado Record an-
nounced here August 1, after a con-
ference with Chas. A. Guy, vice pres-
ident and chairman of the program
committee.

Gene Howe, of Amarillo, champion
finder of lost cats and dogs, and wide-
ly known for his controversies with
such national figures as Mary Garden
and Col. Charles Lindbergh, is on the
program for a talk on "Reader Inter-
est and the Value of Promotional
Features."

Col. Dick McCarty, editor of the
Albany News and recognized as the
official orator of the Texas Press
Association will speak.

Hickman Price, the world's largest
wheat grower, advocate of large scale
farming in West Texas will speak on
the agricultural trend in this country.

Other talks and discussions will be
made and led by E. B. Miller, Plain-
view; Ralph Shuffler, Odessa; Mar-
vin B. Smith, Farmersville; Joe
Kempton, Jr. Dallas, and others.

The Lubbock Avalanche and Journal
and the Lubbock Chamber of
Commerce have planned plenty of en-
tertainment for the convention.

The Lubbock Avalanche and Journal
starts the entertainment program
with a luncheon at the Hilton Hotel
at noon, August, 14. That evening the
Lubbock Chamber of Commerce enter-
tains with a banquet and dance at
Hotel Lubbock.

Garnet Reeves, Publicity Mgr.
Lubbock Chamber of Commerce.

THE REAL POWER TRUST

In a recent article, Matthew S.
Sloan, President of the New York
Edison Company, said that there is
no such thing as a power trust today;
that it is merely a fabrication of po-
liticians seeking an issue. But there
is danger that we will have a real
power trust—a danger coming from a
different direction than most of us
suspect. The real and menacing pow-
er trust can be created by those who
are fighting the imaginary trust of the
present. Government ownership of the
electric industry would mean a power
trust of the most expensive sort—a
gigantic, all-powerful bureaucracy,
reaching into every part of the nation.
Those who remember the govern-
ment "railroad trust" in wartime, will
appreciate the justice of this. No mo-
nopoly can be so complete as a govern-
ment monopoly. No capitalist can be
so powerful as a government official.
No business could cost us so much as
a business run by a bureaucracy which
can call upon the treasury for the
people's money with which to pay its
expenses.

The cry of "power trust" is, for the
most part, nothing more nor less than
camouflage to hide the real issue—
which is, Shall we have individualism
or socialism as the American policy
of the future? That is the question of
the moment—that is the problem
which the people will be called upon
to decide.

Mr. and Mrs. O. F. Priest have
moved from the Cope house in Glen-
dale, to the building just north of J.
F. Isaacs. They have no conscientious
scruples, as they moved on Friday,
and moved a cat and a broom.

Did you ever try to MILK a LAWNMOWER?

--not as foolish as it sounds, for many dairymen quit
feeding concentrates in the summer and expect
their cows to exist on pasture alone. Such cows ex-
pend their energy in GRAZING instead of PRO-
DUCING MILK--and a lawnmower could do that
job better.

You know, of course, that a 1,000 lb.
cow requires about 30 lbs. of solid
food to produce 35 lbs. of milk. But
do you know that if she must obtain
these solids from grass alone, she
must graze over about ONE-

TENTH of an ACRE and eat about 175 lbs. of GRASS?

Your cows are worth more as milk produc-
ers than as lawnmowers. Pasture is fine
and will help reduce your production cost

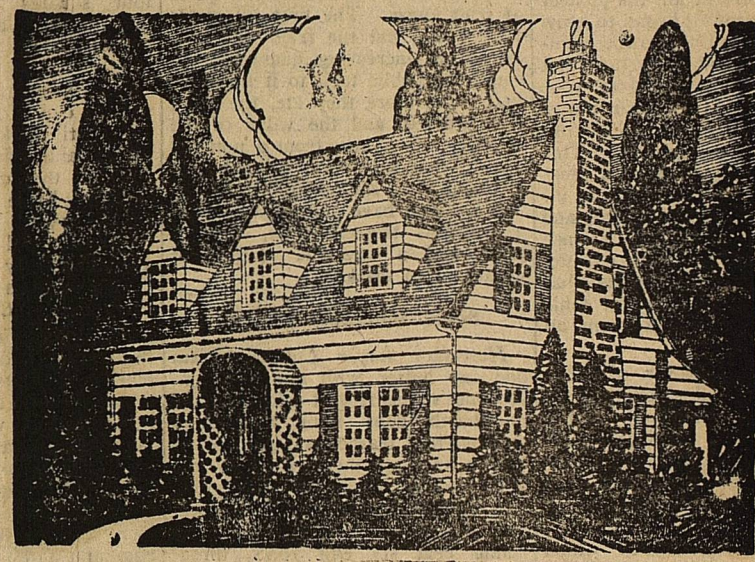

--but ONLY when sup-
plemented by a high quality
concentrate such as RED CHAIN

FAMILY COOKING WITH GAS

At present 14,000,000 families are
cooking with gas in this country be-
sides hundreds of thousands of fam-
ilies which employ it for refrigerating
and central heating. No other fuel
has so many users.

Progress in the gas industry, like
that in the electric industry, is never
still. It is characterized by high stan-
dards of service and low rates. In
both industry—where it is said to

have more than 20,000 uses—and the
home, it is the most efficient of fuels,
combining economy with cleanliness,
smokelessness, ease of use and sub-
jectivity to automatic control.

When, a hundred years from now,
the history of American industry in
the twentieth century is written, gas
will be given a high place in the
account.

TREAT IT GENTLY

Legislators should treat the life in-
surance industry gently in matters of
taxation and legislation. No other

industry does more for the welfare of
the public. Life insurance is the great
protector that guards wives, children
and dependents against want. It is
an investment reflecting the faith of
millions of citizens. And it is, in the
fullest sense of the word, a trust
whose permanence and stability must
always be beyond question.

In many cases, money is loaned on
to the insured when he might
be unable to get aid from any other
source.

The investments of life insurance
companies in industrial securities are
a tremendous contribution to develop-
ment and employment. These vast
sums which are put to work are re-
flected in the life and prosperity of
every citizen—whether or not he is
the possessor of a policy. Life insur-
ance is one of the foundation stones
upon which modern civilization is
being built.

To give the industry the fairest of
legislative and tax treatment is not
only good business—it is vital to the
insurance industry gently in matters of
personal and business life of the
nation.

Hawaii Chose the Most Splendid Fruit

THE first pineapples grown in Hawaii were not the splendid variety of Smooth Cayenne which is the basis of the Hawaiian canning industry today. The Smooth Cayenne is a splendid pineapple, which grows uniform and vigorous, and which, when ripened in the sunshine, has a generous quota of fruit sugar.

Back in 1886, when there was no pineapple industry at all, the pioneer Captain John Kidwell began to grow pineapples to ship fresh to the mainland, but he found that the fruit that grew in Hawaii was of poor quality. So he sent to other places for their best pineapples and discovered the Smooth Cayenne. This variety is the basis of today's pineapple industry which had its inception about thirty years ago, and it has grown so spectacularly since that time that it is now producing pineapples in such quantities that they may be placed on every table at a price which makes them an economical food.

Kidwell's idea, however, of establishing a business of shipping fresh pineapples to the mainland, died a speedy death, since a pineapple to have its full quota of fruit sugar must ripen in the sunshine, and pineapples to be sent to the mainland had to be picked green, and ripened in the dark holds of vessels, which robbed this fruit of much of its distinctive and delicious taste. For pineapple picked green anywhere fails to develop the same sugar content and hence the flavor and

sweetness of pineapple allowed to come to full maturity on the plant.

A Problem Solved

But there was a solution, and it came soon. First one and later several companies took to canning pineapple because that proved to be the only way of getting the sun-ripened fruit to market, filled with healthful vitamins and its full quota of fruit sugar. The first shipments were small, but the fruit was soon canned in increasing quantities because the public took to it from the first. The more they ate, the more they wanted, and the value of the industry has grown from a nominal sum at that time to an annual total of about forty million dollars.

It couldn't have done that without a delicious tropical fruit, sun-ripened, and a scientific method of getting it to market.

Some Pineapple Recipes

Hawaiian Layer Cake: Cream one cup butter with one cup confectioner's sugar, and add two and one-fourth cups flour and three and one-half teaspoons baking powder, sifted together; fold in the stiffly beaten whites of eight eggs and bake in layers in a slow oven, 325°, for 20 to 25 minutes. For the filling beat six egg yolks, three-fourths cup sugar and three-fourths cup butter in top of a double boiler until thick and creamy. Chop three-fourths cup of nuts and add with three-fourths cup of dates and three-

fourths cup drained pineapple, and cook again until thick. Cool and put between layers of cake.

To make the icing, mix together three tablespoons pineapple syrup, two and one-fourth cups confectioner's sugar and two tablespoons butter, and stir smooth. Cover top and sides of cake and decorate as desired with nuts and dates.

Chocolate Pineapple Slices: Melt four squares of chocolate in a peanut boiler, add one-third cup of peanut butter and stir until well blended. Add three-fourths cup of confectioner's sugar and three-fourths cup of evaporated milk and cook until thick. Drain eight slices of Hawaiian pineapple and dip each one in the chocolate until well coated. Place one slice on each small serving plate, sprinkle with chopped salted peanuts, and place a marshmallow in the center.

And here is a good one for a party breakfast.

Pineapple French Toast: Boil the contents of one 8-ounce can pineapple tidbits, one-fourth cup of orange juice and one-fourth cup sugar mixed with two teaspoons flour for several minutes. Beat one egg slightly, and add one-half cup milk and one-eighth teaspoon salt. Cut four thick slices of bread, one-inch squares, dip in the milk and egg, and sauté on both sides in a small amount of butter in a skillet. When well browned, arrange on small serving plates and pour over the pineapple sauce. Serve hot. This will serve four people.

PLANS TO BEAT UNEMPLOYMENT

By ROME C. STEPHENSON
President American Bankers Association

R. C. STEPHENSON

SOME look upon unemployment as a social or political problem. For them the remedy is compulsory accumulation of reserve funds on the insurance principle through contributions from the government, the employers, the employees or all three. That will not meet the present emergency, since these reserve funds have not been built up and it would take years to do so. At best this plan could only become effective at some indefinite time in the future as against the return of another catastrophe of general unemployment. Others look upon unemployment as purely an economic problem, holding that the only fundamental preventive is in business stability. It may well be asked whether either of these cures—namely, the creation of unemployment insurance funds on the one hand or the maintenance of everlasting business stability on the other—do not present in themselves bigger problems than the problems they seek to cure. However I am inclined to the belief that the more practical approach to the solution of such problems and the prevention of such situations as general unemployment presents is along the latter lines of economic foresight rather than along lines of social legislation.

National Foresight

Economic foresight is conceivable not only for the individual but for business as a whole. Millions of individuals and virtually all lines of industry failed to practice it during the last stages of the recent prosperity.

The public welfare of the United States demands that industry as a whole vigorously and sincerely devote itself to the development of plans of economic foresight, aimed to prevent repetitions of the present unemployment situation. The general outlines for such plans are clearly definable. They demand that industry adopt a long range viewpoint and lay out its production and distribution plans with the thought that it is far better to have a long period of good sound business activity than a short period of frantically over-competitive endeavor. This would tend to lessen over-production in various lines, to prevent over-expansion of plant capacity, to avoid over-stimulation of public buying and above all to avoid periods of slumps and stagnation following periods of over-stimulation with their disasters of unemployment.

For business, too, there is a part in such a conception of economic foresight. It should aim to cooperate with industry in its endeavor to avoid reckless over-production, over-stocking and over-selling the public.

In this picture of national economic prudence, banking and finance, too, have their place. Their effort should be to influence the use of credit and other financial facilities into channels of sound public economy consistent with the attitude I have already sketched for industry and trade. All finance, whether current commercial banking or industrial investment banking, should seek by their influence in granting or withholding credit to stimulate and build up a balanced economic situation.

The Individual Must Help

Finally, the individual too has a place in any such plan of a sounder economic future for the United States. It is the duty of the individual to make every effort to take care of himself and provide for himself. Neither government nor industry can do that for him. They can give him the opportunity to succeed but they can't succeed for him. He must out of his own initiative and effort earn and create his own means and defenses against the requirements and contingencies of life.

Individual determination to provide against sickness, accident and death by insurance before indulgences in extra comforts and luxuries are given place in the family budget, and individual responsibility to guard against the contingency of unemployment by means of a sound program of thrift and savings are to my mind the true foundation of economic stability for the United States as a whole.

A limestone spreader, owned by a bank in Illinois is rented out to farmers for ten cents a ton, and also a phosphate spreader at five cents a ton. The "limestone project" was the principal contribution of the bank to banker-farmer work, during 1930, and was carried on in cooperation with the Farm Bureau. A man trained in the testing of soil, as in the making of soil maps was employed by the bank. The unit maps used covered forty acres, on which 23 surface tests were made at mathematical points. At five other points three tests were made—surface, sub-surface, and sub-soil. The completed map showed, by varying shadings of red, the points which needed limestone. Arrangements were also made by the bank to have limestone shipped in car lots for sale to farmers in any quantities needed.

PLENTY OF PARKING SPACE
Fresh Vegetables and Home Killed Meats
A real pleasant place to meet your friends.

Mrs. Will Bennett of Ozona remembered The Success this week with a renewal for which she has our thanks.

Mr. W. A. Bodine returned Monday from a visit to Eldorado. He was accompanied home by his son, Guy Bodine, who visited relatives here for a few days before returning to Eldorado.—Eye Witness.

F. R. Keele and son Freeland, of San Angelo were in Eldorado Wednesday meeting friends and looking after business.

Harry Leaman, of the Leaman's Department Store, left Sunday morning to visit his only aunt in Los Angeles California. He was carried to Big Spring Sunday by his family and there took the air route for Los Angeles. He arrived at his destination Sunday evening.

Hop Cheatham was in from the farm Saturday looking the best he could and feeling well.

Mr. and Mrs. Will Isaacs and son Willie, were visiting and trading in the city Saturday.

Rev. J. C. Young and daughters, Misses Tillie and Mildred, visited Eldorado Sunday, and Bro. Young, who is a former pastor here preached at the Methodist Church Sunday and of course found the Editor off on a wild plum chase, anyway we were not here to hear what he had to say about us.

Rev. Jack Oglesby, was here Sunday guest of his brother and family Sam Oglesby. Mr. Oglesby lives up near Dallas, being in the North Texas Central Conference. He is always a welcome and appreciated visitor to our city.

G. C. Crosby and wife, who ranch in Middle Valley, were in Eldorado Saturday visiting and buying supplies.

When Pat-o Ruiz of Juarez, Mexico, awoke one morning recently, he discovered that the door and the two windows which he had forgotten to lock before he retired, had been stolen from his home.
