### County Agricultural Agent Texas A. e. M. College Extension Service By FOSTER WHALEY Beef Cattle people of Gray

County owe a big vote of thanks to people like W. W. Boyd, Charlie Webb and Raymond Maddox, (near Pampa).

Who does the Gounty Agent usually call on when help is needed to get a job done like recertifying our county as a modified certified Brucellosis free County. We turn to the same aggressive and good natured people we turned to when other si jobs needed to be done. Even though all beef cattle producers show the same benefits of having a county on an approved status is sometime much easier to ask George to have his cattle tested than for that person to have his tested. Suppose everyone had this attitude in the county what would be the result. It wouldn't be long until everyone would be willing to test in order to obtain the approved status. The national livestock Sanatary Association has been urging the U.S.D.A. to slap a guarantine on all counties that do not have modified status as of January 1, 1968. If this is accepted and there can be little doubt that by January 1, 1969 the hammer will fall on all counties that are not modified certified by this date.

We appreciate Slick Boyd and Charlie Webb for their active part in getting the required herds. We hope you did not refuse your herd to be tested if you were calloffice which is located at North grown here in our state of Tex- cuses for the people that do sub- War II veteran. as down around and in the Rio mit to having their herds tested. ## **Cut Calory Intake** To Trim Waistline

Counting calories is a favorite pastime among those of us who want to lose weight.

The term "calory" is used as a unit in expressing the energyproducing value of food. When we say that a tablespoon of honey contains about 100 calories, it means that the honey, when utilized by the tissues of the body, will release that amount of energy to be expended in bodily activity.

The usual weight-reduction goal of one or two pounds' loss per week is achieved by a daily intake of 500 to 1,000 calories less than the intake needed to maintain the weight at which reducing was begun.

The American Medical Association's home health book, Today's Health Guide points out that 1,000 calories represent the smallest practical intake that can provide the recommended daily allowances of essential minerals and vitamins through usual food sources. For children, the minimum figure on which to lose weight is close to 1,600 calories, with 1,300 often recommended to ensure a margin of safety.

But all of us are different, and caloric needs are an individual affair. They should be worked out in consultation with your physician. He can help you arrive at a reasonable figure, permitting you to lose weight steadily and gradually, and at the same time maintain good health and not go

tionably have helped many persons to lose weight. Although some of these preparations combine the merits of economy, acceptability and nutritional balance, they lend themselves to short-term, intensive

weight loss. This only postpones the day of reckoning when the dieter must return to usual food-

Calory charts will help guide you in determining what you can eat, and in what quantity, to main-tain your desired daily intake. Some diet specialists now recommend five or six small meals a day, rather than two or three large ones. Others favor periods of complete fasting at the onset of the diet for an excessively overweight

Whatever program your physician prescribes for you, there is one important thing to remember -calories do count. To lose weight, we must expend more energy than

### How to save money like clockwork

even if you're short on willpower ]

Hanging on to some of your earnings can be as easy as winding your watch. Just tell your em ployer you want to join the Pay-roll Savings Plan. Then sit back and forget about it. Every payday, he'll set aside a few

dollars from your paycheck (you say how many), and put the towards the purchase of a U.S. Savings Bond.

Pretty soon you'll have some big dough stashed away. No strain. able as Big Ben. Millions of your fellow Americans save billions of dollars this

way, so you know it works. What's more, you help your country as you get richer, which should give you a nice red, white, and blue feeling. Take a minute and talk to your

employer this payday. See if it isn't time well spent.
TIMELY NEW BONUS: Now, when you join the Payroll Sav-ings Plan (or the Bond-a-Month Plan) you are eligible to purchase the new type U.S. Savings Notes - Freedom Shares - that pay 4.74% when held to maturity of just 41/2 years, and are redeem able after one year. Freedom Shares are available on a one-forone basis with Series E Bonds

You can get an Impala V8 Sport Coupe, 4-Door Sedan or an Impala Station Wagon specially equipped with popular equipment at sale savings.

For a limited time only, your Chevrolet dealer is offering four popular Impala V8 models specially equipped at a savings. Additional savings are available on three popular packages of equipment.

Every Impala V8 sale car has for added beauty and protection:

# Walk Extra Mile To Lose Weight

the next year?

One way you can do it is to walk an extra mile every day. The American Medical Association's home health book, Today's Health Guide, reports that a walk of just an extra mile per day for \$6 days is a "simple, pleasant device for shedding an extra pound of fat." In a year this would mount up to about ten pounds. The extra mile means ust that-a mile of walking in addition to the customary walking you now do each day.

Once regarded as a major factor in losing weight, physical acimportance. It was realized that considerable effort was required to shed even one pound of extra tissue. Would-be reducers found comfort in some expert opinion that calories expended through exercise would be immediately replaced, due to an automatic increase in appetite.

Fortunately for fitness as well as for fatness, exercise has been as for fatness, exercise has been restored to grace and enjoys respectability. Exercise helps expend calories; within the usual range of activity, it need not stimulate appetite excessively. The energy output required to offset a pound of fat is approximately 3,500 calories, but the weight need not be lost all at once.

Instead of the exhausting, often impossible, 36-mile hike

often impossible, 36-mile hike within a span of hours, a walk of just one extra mile a day for 36 days will get rid of that extra

pound. Weight gain usually is rel-atively slow, and the extra mile will-for most of us-help keep our weight down to a reasonable

Exercise also furthers physi-

for emotional tensions, pro self-confidence, wholesome activity, and good sportsmanship. It enhances the sense of general well-being that enables us to con-front and master a reducing regi-

To be effective for both weight reduction and for general physical conditioning, exercise must be a regular part of your way of life, and not something that is overdone spasmodically.

So, if you want to lose ten pounds in the next year, just arrange to walk that extra mile today.

6-68

Although parents can claim of age and who are bona fide claim themselves on their own students during the year, 3% of return. the taxpayer assistance calls during the past year in Northern blem. The answer is simple: a wad of his own gum?

Yes, Dad, Congress gave yo a double exemption. You can claim your child (provided you furnish principal support) gardless of how much he or children who are over 19 years she made, and the students must

#### **Texas Travel Handbook Released**

An expanded edition of the popular Texas Travel Handbook has been released by the Texas Highway Department. First issued last year as an

aid to pleasure travel in Texas, the enlarged second edition now lists nearly 400 cities and towns and includes more than 2,500 in dividual items of interest. The 208-page handbook also contains 112 photographs which provide travelers with prviews of such attractions as the aerial tramway in El Paso, and Presidio La Bahia near Goliad.

Handbook subjects are as var ied as the state itself, raging from the melancholy Empty Saddle Monument in Dalhart to the humorous Popeye stature in

With the Texas Travel Handbook as a guide, travelers may discover dinosaur tracks, Indian pictographs and buried cities. They will learn the locations of little-known ghost towns, and follow specific directions to the most popular attractions of modern Texas cities.

Special sections are devoted to recreational facilities in Texas national and state forests, and in more than 55 state parks. Summaries of Texas hunting and fishing regulations are provided, as well as informaion on ivsiting Mexico.

Like all Highway Department travel literature, the handbook is free. Since its initial publication last year, the guide has become a major item among more than four million pieces of travel material distributed annually by

the Texas Highway Department. The guide is available to threequarters of a million visitors who stop at Highway Department Tourist Bureaus each year, and individual request from the Texas Highway Department, Travel and Information Division, P. O. Box 5064, Austin, Texas 78703.

### **Texas Hunting** Season Still Open

Although closed on many species of game in Texas the hunting season is by no means over, will gradually increase my hours says Pierce Uzzell, wildlife coordinator for the Texas Parks and Wildlife Department. Many counties in Texas have

open season on quail until Jan. 31, and cottontails, which seem to be in abundant supply this year, may be hunted year round. Also, many south and west Texas counties have no closed season on javelina or collared pec-

cary, according to Uzzell. Many counties in part of the State's best squirrel country have no closed season, and a few have

no bag limit. Uzzell says predator or varnint hunting is high on the popularity list of hunters who still crop in many sections, the low Despite the fair to good quail cropi n many sections, the low

number of hunters is surprising, says Uzzell, but hunting may accelerate after the hunters are rested up from deer and turkey The Department strongly urges hunters to check the 1967-68

Texas Hunting Guide to see what game is still legal in their area. Mr. and Mrs. Robert McCabe

have just returned to their home in Dallas after spending two weeks with their parents, Mr. and Mrs. N. D. McCabe and Mr. and Mrs. Lee Ray Steel.

## CARD OF THANKS

We cannot find words to express our appreciation for all the kindness extended to us during the recent months. We are especially gratefully for everything you did to make the time happier for Paul, while he was in the hospital and at home. We thank you for every prayer offered for us and for the visits, gifts, cards and flowers which he received

We want to especially thank Dr. Fabian and the staff at the hospital for the love and care they gave him while he was

To everyone who helped at the time of his death, we want to express our thanks. To those who helped with the service, to the women who prepared and served the food, to all who gave the beautiful flowers and other gifts and memorials we extend grateful appreciation. May God bless and keep you every one. Frances Kennedy

day party for one of his playmates. what's good for them. Even grown "I don' wanna go!" he said, people have been known to eat jerking himself away from the as they please, rather than as they maternal hands trying to adjust should. his shirttail.

"It'll be fun, darling," mother replied with patient insincerity "You'll see. . . There'll be good things to eat, too."

"Will they be good for me?"
"Of course, dear."
"I don' wanna go . . . it'll b

Foods Can Be Nutritious

It didn't turn out to be carrots after all, because the hostess had learned how to make children like party food and still not stuff themselves with too much sweet stuff or refreshments that contribute little to nutrition except calories and spoil the appetite for a good dinner in the bargain.

The kids had a ball with hot the kids had a ball with hot dogs or individual pizzas. They had a choice of strawberry, chocolate or plain milk shakes, plus nibbles from a lazy susan with salted nuts, raisins, several kinds of cookies, chunks of cheddar cheese on colored toothpicks and cheese on colored toothpicks, and shiny red apples.

If they didn't eat a lot of din-

This may never have happened, been and made allowances. Chilbut even so, it is a good story, and right in character:

of truly nutritious foods in a fes-A mother was preparing her sulky little boy to attend a birth-bothered with too much talk about

Sweets Belong At Party There is no need to eliminate sweets entirely from a special occasion. Popcorn confections with molasses and nuts are popular, and are quite in order if not overdone. Advantage can be taken of the natural sweets in bananas and other fruits. Dates and prunes can be stuffed with cream cheese. Peanut butter and cream cheese stuffing can turn a celery stalk stuffing can turn a celery stalk into a tempting bite. Honey added to peanut butter makes a fine sandwich, so does jelly or jam.

#### Ice Cream, Too

No party is really a PARTY without ice cream. In many fla-vors, with various toppings, and for really fancy parties like Valenfourth of July, ice cream in appropriate molds is the touch that makes the party perfect. A bit of cake on the side adds the nutritional value of eggs and milk as well as the sweet touch.

Of course, not all of these belong to one party but who's going

ner that night, it made no differ-ence provided the parents in-to stop with one? Use new ideas quired what the party snacks had the next time, and have fun!

#### CARD OF THANKS

I wish to express my sincere thanks for all the expressions of kindnesss shown to me and my family while I was in the hospital and at home recuperating from illness. Thank you for the flowers, visits and prayers. I have began Clinic work and until I am back full time by the end of February. In Christian

THE CHURCH FOR ALL ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go read your Bible daily.

She's a lucky little girl. Though she's only five years old, she knows how to pray. It is perfectly natural for her to kneel by her mother's side at bedtime and "talk to God."

She has a head start over children who have never experienced this kind of communion. For there are many youngsters throughout our land who have never learned to pray, simply because no one has ever taught them. For that matter, she's ahead of a good many grown-ups, too!

No one, of course, is ever too old to learn how to pray. But those who learn young are fortunate, for constant prayer builds a faith that will sustain them all their lives. Give your child the gift of prayer by taking him to church, by enrolling him in church school, and by listening to his prayers at home, each and every night.

Ever read abstracts for information and entertainment? If not it might prove a good hobby. A few days ago we missed our favorite TV program because we were so intrigued by our findings in an abstract

Survey 22, Block R, consisting of 640 acres in Gray County on waters of Long Dry Creek. about 17 % miles from the center of the county...beginning with a pile of buffalo bones on sand hills, the northwest corner of survey 65, thence west across Long Dry 1900 varas, a china stake on a flat prairie, thence north 1900 varas to a stake, the southwest corner of survey 30, then east 1900 varas to a stone mound in shinnery of sand hills, thence south 1900 to the beginning.

Recognize the above as a appear of your home town? That is how Governor John Ireland of Texas pictured it on March 17, 1884, when he issued a land grant of this section to Alfred Rowe.

Survey 23, Block R, the section west of McLean, was granted to Rowe the same year and was described as being 20 varas east of the Rath Trail. Interested in Rath Trail? Evan Sitter is and has done considerable research and travel of this early route of buffalo hunters. Its Southern terminal was in our home county of Stonewall, near the Double Mountains. Ever been there Kid McCoy?

Another person who has developed an interest in abstract reading is Bert Darsey. She sat up until the wee hours of the morning studying the intriguing history as recorded in the abstracts of the Darsey Ranch.

By the way, if Leslie looks a little blue around the gills these days, it's because he's eating crow. It all started when Bert said that General George B. Mc-Clellan, for whom McClellan Creek was named, was a son-in law of Marcy, who explored and left his imprint in many places in Texas.

Leslie doubted the statement and promised to eat crow for a week if she could prove it. I understand their son Mike was the referee. It took a letter from Dr. Rupert N. Richardson, President Emeritus of Hardin-Sim-

"Come as you are" and enjoy the convenience of eating in privacy of your own car.

Mrs. Nida Rippy Green began a personal diary in 1898 and has written in it continually (with the exception of a six-months period) since that date. What a valuable item that would be in a local museum! And speaking of museums, why not the entire city get behind the idea as suggested by Jewel Cousins and establish one? We know of a building that would certainly reflect the early history of Mc-Lean that might be bought for a nominal fee. We can also locate a hand loom still workable to start the historical collection to be housed there. Are you inter-

Miss Nida's hobby is making wedding presents. Speaking of weddings, Miss Nida and Alonzo Green, and Nannie Stockton and Clarence Traweek were married in one single ceremony (another 1911 at the McLean Methodist

date" industries As a fourth "point" in start-

ing an industrial development program, the I. D. Committee should assign a group reponsible for evaluating existing and potential industrial sites and buildings and working with the Industrial Foundation which was discussed in Point III. Probably the individual or group assigned to this task will be well versed in real estate. Your Committee's allies, the public utility companies and railroads should be of assistance here, too.

It is essential to have a complete inventory of the sites and age. Should I call the VA and buildings in your community. This inventory can be greatly assisted by the use of the "Site Data" form and the "Existing Building Data" forms available upon request from the Texas Industrial Commission.

Whenver possible, a map should be made showing the location of available sites, and photographs should be made of property should be clearly mark- ing school. ed as "indutrial property" by a

In evaluating industrial sites, there are at least ten important factors to consider:

Availability, 2. Suitability, 3. Price, 4. Uilities, 5. Water, 6. drainage, and 10. Development

cured by the Committee so that of financing such purchases were outlined as Point III. The first order of business in securing a potential industrial site or building is to obtain a firm price from the owner. This may take some persuasion by the Committee, but it is a step which costs them nothing and yet affords an essential piece of intelligence. Naturally, the Committee must be very careful not

the market. Once a firm price has been obtained, it may be necessary to take an option on the property. Probably this would be taken by the Industrial Foundation. In this way, the property can be same procedure may be followed held by the Foundation and used as a lure for the prospective new or expanding industry for the duration of the option. If the
