McLEAN, GRAY COUNTY, TEXAS, FRIDAY, MAY 24, 1918

NUMBER 21

## Your Red Cross Fighting Dollars

Your Army and Navy fights to "Make the World Safe for Democracy."

Your Red Cross fights to make it fit for Democracy.

Fights for your soldiers—yours and your allies—in trenches, canteen and hospital.

Fights for the little children, to save them for the nations' upbuildings of tomorrow.

Fights for the swarms of homeless, dazed refugees and "repatriates" thrown out from the war's black whirlpool.

One hundred million dollars to "carry on!"

No power of taxation, no interest rate to urge these dollars.

Each one a volunteer, sent willingly, and by the heart alone.

The noblest fund of all the billions of this war's vast budgets—because the freest given.

What share is yours? What sacrifice to mobilize those Fighting Red Cross Dollars?

## The American National Bank

### Rev. Carpenter Makes War Speech

Those who were fortunate enough to get into the Baptist church last Sunday evening to hear him are loud in their praises of the speech by Rev. J. E. Carpenter, pastor of the Polk Street M. E. church, Amarillo.

Rev. Carpenter is one of the best orators in the Panhandle, and on this occasion exhibited a rare talent for cracking jokes and driving nails. Before one could get through laughing at a joke or funny story, he would drive home a point in his argument with a force few men are capable of.

The first thing he attempted—and he did it too—was to prove to any who might not think so that it is not always wrong for a nation to go to war, their possible misinterpretations of the scripture to the contrary notwithstanding.

Then he proceeded to pay his respects to the kaiser and his gang of cutthroats, which he did in grand style, winding with an appeal for subscriptions to the Red Cross Second War Fund. Something over \$800 was subscribed.

Jack and Sam Anthony came down from Amarillo this week for a visit with friends.

### Cavalrymen Leave and Come Back Again

The men of Captain Byrd's cavalry troop received orders Sunday to be in Claude by four o'clock p. m. Tuesday. At ten o'clock Tuesday morning they assembled on the street, told their parents, wives and sweethearts good-bye, and started for Claude in automobiles.

They had been told that they would go direct from Claude to Austin, where they would be federalized, but after arriving in Claude they learned that they could not be federalized until after the first of June. The men were mustered in, then returned to their homes, subject to twenty-four hours notice.

There will be a meeting of the Senior War Savings Society at the Odd Fellows hall Monday night. All members and those who wish to become such are urged to be present. C. S. Rice, president.

Chas. Cook and little daughter of Pampa, were in the city Sunday and Monday, visiting C. C. Cook and family.

Howard Wingo and two children went to Plainview Wednesday for a few days visit.

**TALC Jonteel 25c**

A WOMAN has to breathe the fragrance of Jonteel, the New Odor of twenty-six flowers, only once to know it is a perfume that is rare and expensive.

You expect its price to be forbiddingly high. But you are astonished and delighted to find that Talc Jonteel sells at a price no higher than that of ordinary powders. Try it today.

Face Powder Jonteel 50c

## Your Check Stands Guard

against loss, and oftentimes the useless spending of your money. A check on this bank will many times prove of much more than mere convenience. It will save you from possible loss. Ask us to illustrate how.

GUARANTY FUND BANK

## THE CITIZENS STATE BANK

T. J. Coffey, Mrs. Sallie Coffey, Mrs. Yarbrough of Erick, Okla., and Miss Kate Wilson went to Hereford Thursday.

M. M. Newman and Miss Bertie Fulbright left Thursday for Clarksville, where they will visit relatives.

C. B. Hedrick, president of the Bank of Alanreed, was in the city Wednesday, and while here was a pleasant caller at the sanctuary of the Moral Weekly, and left with us a nice order for printing, which causes the editor to once more have visions of beefsteak, 'lasses pie, and other delicacies ordinarily enjoyed only by the rich and near rich. We started to say in the outset that Mr. Hedrick was the best looking man in Alanreed, but we remembered that the honors lay between him and Slade Ball, who intends to be the Sheriff of Gray county. All of which reminds us that Slade was seen on the streets of the metropolis Tuesday, interviewing the voters and repairing and building political fences.

Sam Hodges and family, accompanied by Gaylord Jones, went to Wheeler Tuesday on a combined visit and fishing trip.

### Presbyterian Church

Don't forget our services Sunday. Sunday School at 10 a. m. and preaching both morning and evening. As next Thursday is Memorial day and president Wilson has called upon the American people to make it a day of fasting and prayer. Our services Sunday morning will be preparatory to that day. The subject will be repentance. You are cordially invited to come and worship with us.

Pastor.

Harrel Kennedy who is at the Naval training station at San Francisco, Cal., came to his home at Alanreed the first of the week for a visit with home folks and friends.

W. D. Sims received a postal card Tuesday stating that his son, Leslie, who is in Uncle Sam's service, had landed safely in Europe.

S. L. Ball of Alanreed was in town several days this week.

Thos. O. Kirby of Jericho was in the city Tuesday.

## Groceries to Feed You

This is the logical place for you to buy your Groceries—all your Groceries.

We carry everything that even the most fastidious taste could desire.

There is quality in every article we sell, and this is known to every customer who buys from us.

Have you noticed that once a person starts to buy here, he invariably continues to buy from us?

"There's a reason," and they know it too.

When you buy here you will know also.

Mr. Earp Is Our Ice Man

**Haynes-Mertel Grocery Company**

## NOTICE

### To the Subscribers of Safety Aeroplane Manufacturing Company Stock

All those wishing to get a prospectus of the company can apply at D. N. Massay's real estate office for same. Sales of stock will be stopped as soon as we reach the sale of \$15,000! Those wishing to pay up their subscriptions had better do so at once, as our stock is selling rapidly, and the quota will be sold in a short time.

D. N. MASSAY, Sales Agent.  
A. J. PONCELET, President.

## Popular the Nation Over

In Curlee Clothes you are offered styles, tailoring and values that meet with approval from coast to coast.

Men who want wearable all-round satisfaction-giving clothing at popular prices, are those who buy Curlee Clothes.

We feel confident if you'd try one of our new Curlee Spring Suits, you'd find them to measure up to your requirements in every sense of the word.

**T. J. Coffey**

# We Do Not Know What War Means

War Correspondent Declares  
Even Neutral Countries Feel  
It More Than We.

## MUST MAKE EVERY SACRIFICE

To Win This War the American People  
Must Awaken to Full Realization  
of All It Means and All  
It Demands.

Chicago.—"We do not know that we are at war. Five thousand miles away our troops are moving into battle. In a million American homes, the casualty lists are watched with anxious eyes. Tears and anguish and heartbreaks are the price we must pay to write a headline of Victory," declared Oswald F. Schuette, for three years war correspondent of the Chicago News with the armies of the Central powers, in an address before the Press club of Chicago.

"A year ago we unfurled the battle flags of the republic. We pledged ourselves to the greatest sacrifice this greatest of world wars might demand. The American people are ready to make that sacrifice. But so far we do not know over here what war really is. I have come out of three years in that inferno. All Europe is aflame. It knows it is in the war. Even neutral countries such as Switzerland feel it a hundredfold more than we. There economy and conservation is no longer a master of preachment, of voluntary sacrifice. It is a matter of enforced necessity, of grim compulsion. They are not saving food to feed someone else. They are saving because they have too little themselves. And in the warring countries, there is war in every breath. War is a tragic reality for them. They do not need flags in the streets to remind them of the war—and you see few flags over there. War portions out their meager rations. War is their cook. War allots the comforts of their daily life, and the proportions are small. Luxuries are gone. War stalks through their streets with the soldiers in uniform. War's shadow is behind the mothers who pray in the churches that their boys may be saved.

"We hardly know these things. We

### GOVERNOR A KNITTER

The chief executive of Arizona, Gov. George W. P. Hunt, knits for the soldiers of his state during his leisure time. The governor is very proficient with the needles and already has turned over several sweaters and other comforts for the use of the state's drafted men. Recently, while en route to Washington for a conference with President Wilson, he knitted a six-foot scarf for a boy in khaki.

### MARINES FORM THEIR FAMOUS SLOGAN

This remarkable photograph shows the words of their winning slogan formed by 804 marines in training for the battlefields. It took just seven minutes from the time the word of command was uttered until every man was in his place, forming the slogan "First to Fight" in living letters.

starving. She has been mighty hungry for three years. But Germany knows that she is in the war.

**One Egg in Three Weeks.**  
"Shortly after the break of diplomatic relations a year ago, when I was still in Berlin for the Daily News, an American colleague, the Berlin representative of the Associated Press, contracted pneumonia. It was a critical case. The physicians said they could cure the pneumonia. But they said the patient would never recover. The Berlin food rations, they said, would not permit that. Patients such as he, they say, invariably died. That was the penalty of war. For it takes eggs and butter and milk and other unknown luxuries to bring a man back from the grave. At that time, the Berlin egg ration was about one every three weeks. Every three weeks, by the calendar, a coupon on the egg card would be validated to entitle the holder to purchase one egg from the grocer with whom his name had been registered. Often the groceries did not have eggs enough to fill even this scanty order. But we sent out an appeal to every available American to help. We mobilized every egg in the American colony in Berlin. We gathered all the butter we could find. We asked no questions when there seemed some doubt as to the strictness with which the "one egg every three weeks" regulation had been obeyed. But this patient had three delicious omelettes a day for three weeks. No one else in all the Central powers, not the kaiser nor Hindenburg, had reveled in any such luxury of eggs in three years of war. But it saved his life. It was the mobilization of the eggs, not the physicians, that did it."

## Woman Wins Rank of Chief Yeoman

Attains Highest Grade in Navy  
Open to One of Her  
Sex.

### HAS DONE EFFICIENT WORK

Had an Important Part in Building Up  
Armed Guards' Organization—  
Now Keeps Records of  
This Service.

Washington.—The encounters of American merchant vessels with German submarines constitute one of the most thrilling chapters of the war. When the president ordered our merchantmen armed for protection against undersea attack the navy was called upon to furnish hundreds of guns and thousands of trained gunners to man them. To perform this task a new branch of the service was organized—the "armed guards." Even before this country declared war they were on active duty, and the first man of the navy to lose his life in service against the enemy was a member of the armed guards, John I. Eopolucci, lost in the sinking of the Aztec April 1, 1917.

One of the most efficient aids of Commander Farley in building up the armed guards organization was a young woman, Miss Helen E. Brooks, now confidential secretary to Lieutenant Commander Hall, who succeeded Commander Farley.

**Shares in Big Events.**  
Miss Brooks has had a share in many of the most interesting incidents of the war. It was to her desk that the news came of the sinking of the Aztec and the Vacuum. She received the account of the sinking of the first German submarine by the Silver Shell; of the long battle of the Moren, which fought an enemy U-boat until almost the entire ship was in flames; of the four-hour fight of the J. L. Luckenbach which, though hit many times, refused to surrender. She made out the lists of the first men taken prisoner by Germany, members of the armed guard of the ill-fated Campana. She has transcribed many letters of commendation of men for heroic deeds, and many messages transmitting to relatives the sad news that a son, husband or brother has been killed or wounded.

The names, ratings and addresses of next of kin of all the members of the armed guards are kept on cards, in a separate envelope for each vessel. The records of all those who lose their lives in the service of their country are kept in a special division. These constitute the navy's "roll of honor." Those who have been com-

mended for heroic deeds also have a special place—and there are hundreds of them already, though we have been at war less than a year. The department seeks to secure and keep on file photographs of all the men of the navy killed in service against the enemy, and those specially commended. Miss Brooks has had a hand in building up these measures to perpetuate the memory of the navy's heroes and preserve interesting and authentic material for history.

**Won Rapid Promotion.**  
Enlisting in the naval reserve in April, 1917, as a yeoman, third class, Miss Brooks has already risen to the highest rank open to women in the navy, that of chief yeoman. As secretary to Lieutenant Commander Hall she superintends the work of two yeoman stenographers and a mail clerk.

Chief Yeoman Brooks.

all three of them men. Like all the other women yeomen, she is regularly enlisted in the navy—enlisted for the term of the war. At first they were commonly termed "yeowomen" and "yeomanettes," but these nicknames are frowned upon by naval officials, whose attitude has been well expressed by Rear Admiral McGowan, paymaster general of the navy: "They must not be called 'yeowomen' or 'yeomanettes.' These women are as much a part of the navy as the men who have enlisted. They do the same work and receive the same pay as men of the same rating. They are yeomen, and have done yeoman service in the immensely increased work imposed upon the navy by the war."

### IGNORES DAYLIGHT SAVING

Maine Miller Probably Only Man in  
Country Not Affected by  
Change.

Kennebunkport, Me.—James D. Perkins, proprietor of a tidewater mill, is probably the only man in this country whose hours of labor were not affected by the new daylight saving plan.

The mill, located on the Mousan river, is operated by the tide. When it is full, Mr. Perkins closes gates and confines the water to a reservoir. As the tide ebbs he opens the gates to allow the water to escape into a sluiceway.

As the tide is about an hour later each day, Mr. Perkins cares nothing for clocks or the sun, or any other daylight saving plans. He is following the tide schedule, as he has for many years.

A Wisconsin inventor has patented skis with pivoted footpieces that send a wearer along over snow or ice as he presses his toes down against the runners.

## GETTING READY TO "SLIP A PILL TO KAISER BILL"

These four nephews of Uncle Sam loading their gun—work are aboard one of the new American torpedo-boat destroyers that are being built in large numbers and put into immediate service in the war zones.

## GERMAN ALBATROSS AIRPLANES READY FOR A FLIGHT

This photograph was found on a German aviator who was made prisoner. It shows a group of German Albatross monoplanes ready for a flight over the Italian lines.

### COSTUME FOR YEOWOMEN

Here is the official yeowomen's costume of the United States navy, worn by Mrs. Ethel E. Alicoate of Washington, a yeoman of the third class. It is of blue serge with the regulation navy buttons, and white cotton gloves are a part of the uniform. The coat may be removed indoors, revealing a shirtwaist. On the band is the inscription "Naval Reserve Force."

### Phonographic Memory.

Persons who buy phonograph records probably have noticed that most of the dealers possess the faculty of remembering the numbers and do not have to refer to the catalogues when a record is asked for by the title and not by the number. It's all a matter of practice, according to a Chamber street dealer, who said:

"It's all in a day's work. You see, remembering the numbers of records is just about the same as remembering telephone numbers. Some are good at it and some are bad, but the average dealer in records usually has the numbers of the records at his finger tips."

### Getting at the Cause.

"Doctor, my son is getting to be a confirmed night owl. He's all for a night life. He didn't use to be this way."

"Has he had a recent shock?"  
"Not that I know of. What are you driving at?"  
"I thought maybe somebody had seen his daylight out of him."

## ACTUAL SURRENDER OF JERUSALEM

This photograph is unique and historic for it is the only one showing the actual surrender of Jerusalem. It depicts the mayor of Jerusalem (with walking cane and cigarette) and the white flag party meeting the first British outpost, and illustrates a historical change of world-wide interest.

## ON GUARD IN THE AMERICAN TRENCHES

American troops in the first-line trenches in the Lorraine sector keeping a sharp lookout for any signs of suspicious movements of the enemy.

THIS WOMAN SAVED FROM AN OPERATION

By taking Lydia E. Pinkham's Vegetable Compound, One of Thousands of Such Cases.

Black River Falls, Wis.—"As Lydia E. Pinkham's Vegetable Compound saved me from an operation, I cannot say enough in praise of it. I suffered from organic troubles and my side hurt me so I could hardly be up from my bed, and I was unable to do my housework. I had the best doctors in Eau Claire and they wanted me to have an operation, but Lydia E. Pinkham's Vegetable Compound cured me so I did not need the operation, and I am telling all my friends about it."—Mrs. A. W. BINGER, Black River Falls, Wis.

It is just such experiences as that of Mrs. Binger that has made this famous root and herb remedy a household word from ocean to ocean. Any woman who suffers from inflammation, ulceration, displacements, backache, nervousness, irregularities or "the blues" should not rest until she has given it a trial, and for special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass.

Kill All Flies! THEY SPREAD DISEASE

Flies anywhere, Dalsey Fly Killer attracts and kills all flies. Next, clean, ornamental, convenient and cheap. Kills all species of flies, including house flies, stable flies, and mosquitoes. Dalsey Fly Killer is sold by dealers, or sent direct to you. Write for booklet and name of dealer. Dalsey Fly Killer, 180 DE KALE AVE., BROOKLYN, N. Y.

Boys and Girls Clear Your Skin With Cuticura Soap 25c. Ointment 25 and 50c.

PARKER'S HAIR BALMS A soothing preparation of sweet oils to soothe and soothe. For restoring color and beauty to gray or faded hair. 50c and \$1.00 at drug stores.

NURSES DOING NOBLE WORK

Bright Spot in Savagery of War Today is the Effort Toward Relief of Suffering.

What a flood of light Sir Evelyn Wood throws on pre-Nightingale days in his story of being savagely beaten on the face during Crimean days, while lying in hospital with both hip bones through the skin. Sarah Gamp found her way to the Crimean front in spite of the Lady of the Lamp, and into Sir Evelyn's dormitory. She was the "highest yet" before Florence Nightingale took matters in hand. Lady Palmerston thought the Sarah Gamps good, and if they did drink—well, so did the ladies' nurses, "and nothing could be better for them poor people." War is more terrible now than in Sir Evelyn's day, but mercy and science march hand in hand to the relief of suffering, and he may well be an optimist. The Crimen established the British as leaders of the world in medicine, surgery, nursing and hygiene. Out of this, modern agony new ameliorative triumphs emerge. And splendid girls of gentle blood who toll unnoted day in military hospitals or nobly stand and wait throughout the livelong night, ministering to the comfort of traveling soldiers and sailors, will have as fine lessons to teach as their sisters behind the firing line.

Riddles. Miss Mary Garden, the singer, commiserated at a New York reception with a movie star, whose betrothed had had the bad taste to abandon her for another. "My dear child, I can't understand it," said Miss Garden. "You're the prettiest girl in the profession. To leave you for that scarecrow! Ah, well—" And Miss Garden smiled and sighed. "Ah, well," she said, "men are riddles. They keep us guessing, and yet we'll never give them up."

If a man has a stiff income he can afford to have a stiff upper lip and a stiff backbone.

This world would be a gloomy old place for cats if women could purr.

NO WASTE IN A PACKAGE OF POST TOASTIES says Bobby. Corn Food Good To The Last Flake

Technique of Bomb Dropping

Chance of Hitting Intended Target from Airplane Is Small

GERMAN air raids have caused Londoners to build concrete bombproof shelters. When warning of an air raid is received, Mrs. Londoner calls the children together, whistles for the dog, and, taking the phonograph under her arm, marshals the family into the bombproof shelter, writes A. M. Jungmann, associate editor of Popular Science Monthly, writing Sun. Air raids have brought about a condition which mankind has not known since those prehistoric days when animals rushed madly into caves to protect themselves from terrible flying monsters. The pterodactyl, for instance, must have looked to its victims very much as a bombing Boche looks to an Englishman of today. Notwithstanding its repulsive appearance, however, the pterodactyl was a mild creature in comparison to a modern airplane carrying upward of a dozen death-dealing bombs. Among the many horrible implements of destruction which this war has developed the bomb is conspicuous. Whether used on land or in the water, its capacity for destruction is enormous in comparison with its size. The chief handicap in its use by aviators is the difficulty of making it hit the target.

The increased accuracy which has been developed by bomb droppers has been offset by the fact that antiaircraft guns constantly force the raiders to ascend to greater heights. The higher an aviator flies the greater are the possibilities of error in his calculations for hitting his target. The principal reason why it is far more difficult to score a hit with a bomb thrown from an airplane than with a gun on the earth is that a bomb thrown from a time in the direction of the flying machine. This means that the bomb reaches his target. Although practice helps greatly in determining the exact moment at which to let go, aviators do not have to depend solely upon themselves in the matter. Special sighting arrangements have been devised which are of great assistance in making a hit.

The moment a bomb is dropped from a moving airplane it comes under the influence of both the forward movement of the airplane and gravitation. The result is that it follows a curved path from the machine to the earth. The higher the machine is flying and the faster it is going the greater is the distance in front of the target at which the bomb must be released. If a bomb is dropped only one-half a second before it should have been released it will not strike within many yards of the target. It is far more difficult to select a target and drop bombs on it from an airplane than it is from a dirigible.

In dropping bombs an aviator must take into account not only gravitation, and his own velocity, but also the winds. The wind conditions between the airplane and the earth may vary greatly. This would greatly influence the trajectory or curve of the path of the falling bomb. A decided difference is

made in this curve if the bomb is thrown with or against the wind and if the bomb encounters a side wind, which would throw it out of its course. In order to determine just when to release a bomb an aviator must know at what height he is flying. For this purpose he consults a barometer. But in order that the knowledge which the barometer gives him may be of material benefit in bomb throwing, the aviator must also know at exactly what elevation above sea level his target is. Therefore aviators have to study maps of the country which they intend bombing before starting out on a raid.

Next the aviator must know at what speed he is traveling. This he can determine by ascertaining the time required to cover a certain definite distance. He can calculate this distance by consulting his map. Naturally he must make this calculation while in the immediate vicinity of his target. For example, if he notes that the distance between two given points is 1,000 meters and he covers that distance in 25 seconds, he will know that he is traveling at the rate of 40 meters per second.

The observation instruments with which bombing airplanes are equipped enable the aviators to fix their targets by studying a series of angles. The instrument is set for a definite angle and the time is noted at which the target comes into view under that angle. The aviator then sets the instrument for another angle, which is less than the first, and again notes the time at which the target appears. He observes the number of seconds required for the machine to travel through these two angles and thereby arrives at the velocity of the machine over that distance.

The observation instrument is a simple frame, the sides of which form a quadrant. A pivot is attached to the underside of the frame which enables it to be set up on a vertical tube or other opening on the airplane. A clock is attached to the rear wall of the frame, while the front has another pivot which turns the telescope. The center of the pivot is the center of the angular arch from which the line of sight of the telescope is read.

The bombs dropped from airplanes resemble torpedoes in their shape and construction. Probably this is the reason why they are frequently mislabeled aerial torpedoes. Most of them are equipped with a sort of windmill which is rotated by the rush of the bomb through the air and which sensitizes the percussion fuse while the bomb is falling.

They are built after the manner of a torpedo, with a streamline form to offer a very small head resistance to the wind. This streamline form, with the reduced head resistance, causes the bomb to sail through the air in the same direction as the airplane. In order to be certain to hit their target, and when it begins its descent. In order to be certain to hit their target, the aviators of today do not content themselves with releasing one target, but instead, release a whole flock. If a number of bombs are dropped bomb, at once, the chances of hitting the target are said to be 12 50-pound bombs.

The Gotha airplane's bomb-carrying capacity is that machine is, it is bombs and two 100-pound bombs. But formidable as that machine is, it is eclipsed by the English Handley-Page, which carries eight 250-pound bombs, eclipsed by the English Handley-Page, which carries eight 250-pound bombs, the totalling in weight 2,000 pounds, which is really 2 1/2 times the capacity of the Gotha.

The powerful explosive used in these bombs is generally TNT. Any man of ordinary strength can easily carry enough of this powder to blow up one of our largest ships. It is said that 80 pounds of TNT could easily destroy any ship afloat. At the moment of explosion four cubic feet of TNT will generate 40,000 cubic feet of gas. This is the reason why depth bombs employing TNT are so dangerous to submarines.

For example, if a depth bomb is detonated near a ship or a submarine, it will destroy the vessel because water is incompressible. The gases must escape somewhere. If the bomb is exploded at sufficient depth the shock is transmitted in all directions. Naturally, if a ship is near the gases will blow transmitted in all directions. Naturally, if a ship is near the gases will blow transmitted in all directions.

If, however, the bomb is exploded near the surface of the water, the gases will escape along the line of least resistance, which will be toward the surface. They will fling up great masses of water in the air. Bombs which are designed to explode at a given depth may be added upon to destroy an

ship which is in their vicinity. It is not necessary for a depth bomb to touch a submarine or a ship in order to destroy it. Joseph A. Steinmetz, president of the Aero Club of Pennsylvania, has invented a depth bomb which is particularly designed to be used against the U-boats. He has planned to use a number of high-speed flying boats which can serve either as aircraft or as boats on the surface of the water. One of these boats would be used as a sort of scout to discover lurking submarines.

At the moment of discovery the seaplane would notify its sister craft. Some of these would endeavor to pass over the submarine while floating on the water in their capacity as boats. The seaplane on the water line would trail a depth bomb. Its sister ship in the air would signal to it the movements of the submarine, thereby enabling it to follow the undersen craft. In order to keep the bomb from coming to the surface of the water while it was being towed, an inclined plate would be secured to the cable to which the bomb was attached. The bomb itself is provided with contacts which would cause it to explode the moment it touched any object.

It is said that the average depth bomb contains 250 to 350 pounds of TNT. When a destroyer sights a submarine it makes a dash for it at full speed. When it has come within a certain distance of the submarine it drops a depth bomb overboard. The bomb is so constructed that it will be detonated at any desired depth. As it is not necessary for the bomb to hit the submarine in order to destroy it, the time does not have to be as accurate as in the case of a bomb dropped by an aircraft.

Some depth bombs are so constructed that they may be detonated by the pressure of the water. As everybody knows, the pressure of the water increases with every foot one goes beneath the surface. In order to set a bomb of this type it is only necessary to determine at what depth it shall be exploded. Then a spring is adjusted and the bomb sinks until the water pressure releases the spring mechanism and causes the detonation. It is something like setting an alarm clock, only instead of setting the mechanism to go off at a certain time it is set to go off at a given number of feet beneath the surface of the water.

Another depth bomb is exploded by complicated clockwork, which is put in operation the moment the bomb strikes the water. As the clockwork is designed to run for several seconds before the bomb is exploded, the bomb is supposed to reach the desired depth before the detonation takes place. Because water is incompressible, a depth bomb will do far more damage if it is exploded 100 feet beneath the surface than it would if it were exploded only ten or fifteen feet below the surface.

Another type of underwater depth bomb is intended to be used from airplanes. It is dropped from the airplane on a cable. A parachute aids it to fall straight and keeps the cable from becoming entangled. The length of the cable determines the depth at which the bomb shall explode. The explosive in this bomb is carried in a long cylinder which has a detonator and an electric battery at one end.

Bombs which explode in the water are capable of doing far greater harm than those which explode on the land. It has been noted that the bombs dropped by the Germans in England frequently dig a hole in the ground five or six feet in depth, but fall to do any great amount of damage when they explode. While their radius of destruction is so limited, the force of the explosion will shatter window panes for a half mile around. Yet if a bomb of this

same type should fall in the middle of a road which ran between stone walls, it would not tear down the wall on either side of the road.

Perhaps if the bombs could be so made that they would explode above the surface of the ground the effect of the explosion would not be lost on the walls of the crater as it is now. With all their frightfulness, the Germans have not been very successful in making bombs which do a great deal of harm. Casualties resulting from a bomb raid are frequently caused by shrapnel used against the enemy aircraft. That is one of the reasons why civilians are always ordered indoors and off the streets during a bomb raid. The anti-aircraft guns puffing away at the enemy are very dangerous to any persons who are in the open during the bombardment.

With Queue Custom Passe, Shanghai Doctor Predicts Chinese May Raise Beards

Most of us have wondered why the Chinaman, in distinction from other men, does not grow a beard. Of course, some members of the race who belongs to the male persuasion are exceptions to the rule. But the great majority of Chinamen have no hair upon the face. Dr. A. M. Dunlap of Shanghai, who has given considerable time to the subject, holds that the old Chinese custom of wearing queues consumed all of the energy provided by nature for the raising of hair. And now that the queue is out of fashion, Doctor Dunlap thinks that beards may begin to grow. Writing in an American medical journal of recent date, he tells some very interesting things about the Chinese barber, the styles in hair, etc.

"The nationwide cutting off of that Manchu invention—the queue has created a new class of modern barbers. I do not mean to say that the barber of old China has passed, with his practices, which remind us of these Occidental barbers in ancient time. Even in an enlightened city as Shanghai they are constantly to be seen on the street corners.

"Today these old men can be seen with their washstands, basins and a single towel, which does for everybody, on the shady side of the street in summer and on the sunny side in winter."

Might Try It. "I liked your speech, mister," declared the rural attorney who was visiting the city. "What kind of a lawyer are you?" "I'm a patent lawyer."

"Tell me, you advanced some good ideas. Have you got a patent on that kind of talk?"

Plan Appropriate Marking of Spot Where Washington Crossed Delaware River

The project for marking the spot where Washington crossed the Delaware as reached by stage in both Pennsylvania and New Jersey. It first gained real shape seven or eight years ago, when the Washington's Crossing Park commission of New Jersey prepared a plan for a grandiose memorial. Land was to be acquired on each side of the river, laid off into fine parks, and a splendid memorial bridge built. The commission actually spent some \$20,000 in buying 100 acres on the New Jersey shore. To this powers the state department of conservation have now succeeded, and they propose a more modest memorial. The 100 acres should be sold, the house of the Ferryman McConkey, who supplied the patriot army with boats, should be bought and restored, and the entrance from the river to the old Pennington road should be marked with an arch. This will cost nothing like the \$250,000 original outlay, and \$10,000 annual maintenance required for the original plan. Meanwhile a commission has been appointed to canvass the possibility of acquiring land at Taylorville, Pa., to be developed as a park to mark the starting point of Washington's raid.—New York Evening Post.

Self-Appreciation. "I tell you, young man, we need brains in this business." "I know you do, sir; that is why I am offering you my services."

Quite Naturally. "Do you think the financiers in the case will float this loan all right?" "Sure. It's coming along swimmingly."

Do Your Cows Fail to Clean! This is a serious condition and requires prompt attention. Dr. David Roberts' Cow Cleaner Price gives quick relief. Keep it on hand and prevent the ruin of your cow. Read the Practical Home Veterinarian. Send for free booklet on Abortion in Cows. If no dealer in your town, write Dr. David Roberts' Vet. Co., 100 Grand Avenue, Washka, Wis.

WINTERSMITH'S CHILL TONIC Sold for 50 Years. FOR MALARIA, CHILLS AND FEVER. Also a Fine General Strengthening Tonic. At All Drug Stores.

Excelsior CLEANING WORKS 420 NORTH BROADWAY OKLAHOMA CITY W. N. U., Oklahoma City, No. 18-1918.

Perhaps Well He Hadn't Known. An Irish cab driver, grumbling at the shilling gratuity at his journey's end, said in a sly undertone: "Faith, it's not putting me off with this you'd be if you knew all."

The traveler's curiosity was excited. "What do you mean?" "Another shilling was tendered." "And now," said the gentleman, "what do you mean by saying 'if you knew all'?" "That I drove your honor the last three miles without a linchpin!"

OUR BOYS "OVER THERE" ENJOY TOASTED CIGARETTES.

Through the patriotism of the citizens of this country thousands of smoke kits are being distributed to American soldiers in France. Authorities agree that men in the trenches need cigarettes almost as much as food and munitions.

Doctors, nurses, and commanding officers all join in the demand which has awakened in this country a great movement to keep our boys supplied with smokes.

Millions of the famous LUCKY STRIKE Cigarettes are "going over" all the time. There's something about the idea of the toasted cigarette that appeals to the men who spend their time in cold, wet trenches and billets.

Then, too, the real Kentucky Burley tobacco of the LUCKY STRIKE cigarette gives them the solid satisfaction of a pipe, with a lot less trouble. Adv.

The Logic of It. "Give the prize-fighter the logical position at the head of the page." "Why is it the logical position?" "Because it is an upper cut."

Speaking of home rule, what's the matter with the first baby?

When Your Eyes Need Care Try Murine Eye Remedy. No Smarting—Just Eye Comfort. Murine Eye Remedy Co., Chicago.

Will Practice in All Courts

Rooms 1 and 2  
First National Bank Building

PAMPA, TEXAS

**Red Cross Quota Exceeded**

Postmaster Faulkner, who has charge of the Red Cross Second War Fund Campaign, tells us that McLean trade territory went over the quota Monday, and is still goin' strong.

The little ol' \$2,381.50 that was expected of us isn't enough for a lot of live ones, such as live in these parts, and chances are good for the quota to be doubled.

Liberal donations have come in from the Heald and Slavonia communities. The women of these settlements deserve special mention for the work they have been doing.

Mrs. S. B. Fast left Sunday for Broadview, Mont., for a visit with her daughter, Mrs. W. L. Quest.

Luther Harlan of Heald was in town Tuesday.

**Announcements**

The following announcements are subject to the Democratic Primary, July 27, 1918:

For Representative, 124th District:  
C. W. TURMAN  
J. B. HILL

For County Judge:  
T. M. WOLFE  
J. W. TURNER

For County and District Clerk:  
W. R. PATTERSON

For Sheriff and Tax Collector:  
W. S. COPELAND  
S. L. BALL  
W. A. CLARK

For Tax Assessor:  
A. H. DOUCETTE  
T. H. PHILPOTT  
J. H. SAUNDERS  
J. B. PASCHALL  
MISS RUBY COOK

For County Treasurer:  
HENRY THUT

For Public Weigher, Prec. No. 5:  
A. W. WILLARD  
JESSE KINARD

For County Commissioner, Prec. 4:  
B. F. NEWTON

**Gives Newspapers Credit for Success of Liberty Loan**

J. W. Hoopes, deputy governor of the Dallas Federal Reserve Bank, has sent out a circular letter to the press, complimenting them for the efficient work done in promoting the sale of Liberty Bonds. Mr. Hoopes says:

"The greatest compliment I can pay the Press of the Eleventh Federal Reserve District is to point to the constantly growing totals of The Third Liberty Loan Subscription List.

"The work you have done so generously and so freely is its own reward.

"Allow me, however, to say what a pleasure it has been to me, and to our Publicity Manager to have such a splendid spirit of mutual helpfulness displayed by the press."

Judge Baker of Canadian, who was for sixteen years judge of 31st District of Texas, and for 35 years one of the leading citizens of the Canadian country, died at his home in Canadian Tuesday, May 21st at 12:25 p. m.

Miss Mabel Watkins, who has been in school at Canyon, came home Wednesday.

M. T. Powell and wife of Ramsdell were in the city shopping Wednesday.

Rev. John F. Reagan and wife are visiting in Elk City, Okla., this week.

Mrs. Scott Bush of Nocomo, is visiting Mr. and Mrs. George Bourland.

Ralph Tipton is at home on a furlough from Camp Donphan, Okla.

T. M. Wolfe went to Pampa Sunday.

**The U. S. Fuel Administrator**

Is Earnestly Striving to Protect You From Suffering Next Winter

We are acting as HIS AGENTS in urging you to buy now.

The mines can supply now all the private consumer will buy and take home at this time. We can get it for you now.

**WE CAN NOT GET IT FOR YOU NEXT WINTER**

Then there are the problems of car shortage, transportation, teams and labor for local delivery, etc., that will become more serious month after month. They are beyond our best efforts to control.

HELP YOUR GOVERNMENT—HELP YOURSELF—BY HEEDING THIS APPEAL.

Phone us and get your name on our list.

**Cicero-Smith Lumber Company**

PHONE 3

**Your Patriotic Duty Is to EAT MORE SPUDS!**

Appeals have gone out from the Food Administration, urging the people to eat more potatoes, as there is a large surplus which will spoil if not used up.

Eat more potatoes. You will then eat less of other foods not so plentiful. Help win the war with your teeth!

We have the potatoes—lots of 'em—and at the present price there is no cheaper food.

We also suggest eating dried fruits while they are in stock.

If you are in need of fruit juars, tops and rubbers, we have them—NEW RUBBERS.

Another shipment of Pure Honey just received. This is likely the last of the honey.

**BUNDY & BIGGERS**

**FOR FENCING**

We have all the materials you will need, in the best grades we can get.

Hog and chicken wire—all sizes.

Barb wire, both galvanized and black.

Posts—bois'd arc and cedar. Lengths 6 to 12 feet.

Ask to see our Can't Sag and Iowa Steel Gates.

**To the Lady Voters of Gray County**

The Attorney General having ruled that it will be unnecessary for ladies to register outside of cities of 10,000 inhabitants in order to vote in the coming primary. It, of course, results that in this county we will have no official list of lady voters. I therefore take this method of soliciting your support in my candidacy for re-election to the office of Sheriff and Tax Collector.

Hoping that my past record is such as to merit your vote and influence, and promising if elected to discharge the duties of the office to the best of my ability, I am, Yours very truly, W. S. Copeland.

**Citizens Notice; Important**

Many milk cows have tuberculosis. (consumption). The germ is transmitted from cow to man through milk and milk products. Most people use milk or milk products in some form because of its great nutritive value.

Dr. G. H. Allen, for five years and nine months an employee of the United States Government, as a veterinary inspector, recently resigned that position to enter private practice and is now located at Amarillo, Texas, connected with the Panhandle Veterinary Hospital, this city.

Dr. Allen while in the Government service observed the very fattest cattle on post mortem examination showed tubercular lesions, and emphatically states that it is impossible to correctly diagnose this dreaded disease in the live animal without the tuberculin test, and since the health of your children and your children's children depend greatly upon the knowledge you possess in modern science, it behooves every parent to rise up as a unit to combat against this dreaded disease, the great white plague, as thousands of children die each year of tuberculosis (consumption).

Dr. Allen will be in McLean from May 30th to June 1st, inclusive, and you should make it your imperative duty to consult with the Doctor concerning the testing of your cow, as he will be prepared to make the test this trip. This is an opportunity you should carefully consider, and as a parent and a citizen you should make this your paramount thought while Dr. Allen is with you. We will test your cow, furnish the tuberculin, a metal ear tag for identification, and issue you a health certificate for each cow for the small sum of One Dollar and Twenty-five Cents per head. Is it not worth that to have the satisfaction of knowing that your cow is free from this dreaded disease? If you say your cow is all right without first having her tested, you display gross ignorance when you say it.

Talk to your neighbor about this. Get your physician's opinion, and if he is an up-to-the-minute physician, he will advise that you have your cows tested.

Remember the date. May 30 to June 1, inclusive. Ask your druggist or banker where the Doctor can be found. Panhandle Veterinary Hospital, 205 Fillmore St., Amarillo, Texas. Phone 440 day or night.

"A great net of mercy drawn through  
an ocean of unspeakable pain"

## "I'm afraid that's all I can spare"

You're a regular, red-blooded, true-blue American. You love your country. You love that flapping, snapping old flag. Your heart thumps hard when the troops tramp by. You're *loyal*---100%!

You intend to---you *want* to---help win the war in a hurry.

"Sacrifice? Sure," you've been thinking. "Just you wait till they really need it." And you've honestly thought you *meant* that too.

But---look yourself in the *eye*, now, and search up and down inside of your heart---*did* you mean it? *Did* you really mean "sacrifice"?

Listen: You feel poor. This third Liberty Loan, the high prices, the Income Tax---you've *done* your bit. You feel that you've given all you can spare.

*What?* Then what *did* you mean? What's that you said about loving your country? What did you think the word "sacrifice" means?

Surely you didn't mean, did you, to give only what you can *spare*?

What about our boys who are giving their lives in the trenches? Are *they* giving only what they can "spare"?

How about those mothers and little "kiddies" in the shell-wrecked towns of that war-swept hell:---hungry---ragged---sobbing---alone? Giving up their homes, their husbands, their fathers.

While *we*---over here with our fun and our comforts---we hold up our heads and feel *patriotic* because we have given---*what?* Some loose bills off the top of our roll. "*We've* given all we can spare!"

Come, come! Let's quit fooling ourselves. Let us learn what "sacrifice" *means*. Let us give *more* than we can spare---let us "give till the heart says stop."

### Every cent of every dollar received for the Red Cross War Fund goes for War Relief.

The American Red Cross is the largest and most efficient organization for the relief of suffering that the World has ever seen.

It is made up almost entirely of volunteer workers, the higher executives being without exception men accustomed to large affairs, who are in almost all cases giving their services without pay.

It is supported entirely by its membership fees and by voluntary contributions.

It is today bringing relief to suffering humanity, both military and civil, in every War torn allied country.

It plans tomorrow to help in the work of restoration throughout the world.

It feeds and clothes entire populations in times of great calamity.

It is there to help your soldier boy in his time of need.

With its thousands of workers, its tremendous stores and smooth running transportation facilities, it is serving as America's advance guard---and thus helping to win the war.

Congress authorizes it.

President Wilson heads it.

The War Department audits its accounts.

Your Army, your Navy and your Allies enthusiastically endorse it.

Twenty-two million Americans have joined it.

### LOOK AT CHILD'S TONGUE IF SICK, CROSS, FEVERISH

HURRY, MOTHER! REMOVE POISONS FROM LITTLE STOMACH, LIVER, BOWELS.

GIVE CALIFORNIA SYRUP OF FIGS AT ONCE IF BILIOUS OR CONSTIPATED.

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once.

When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sour, breath bad; has stomach-ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless "fruit laxative;" they love its delicious taste, and it always makes them feel splendid.

Ask your druggist for a bottle of "California Syrup of Figs," which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeits sold here. To be sure you get the genuine, ask to see that it is made by the "California Fig Syrup Company." Refuse any other kind with contempt.—Adv.

**Identified.**

"Joe" Jefferson once presented a check at a Detroit bank, only to be told by the cashier that he'd have to be identified.

With a twinkle in his eye the great actor quoted from the play with which his name will always be associated:

"If my leedle dog Schneider was only here, he'd know me."

"Enough!" exclaimed the cashier as he immediately cashed the check.

### YOUR DUTY TO BE ATTRACTIVE

Have Pretty Dark Hair.

"La Creole" Hair Dressing is the original hair color restorer, and not a dye. Applying it to your hair and scalp revives the color glands of nature. It is the only hair color restorer that will gradually darken all your gray or faded hair in this way. No matter how gray, prematurely gray, faded or lusterless your hair might be, "La Creole" Hair Dressing will make it beautifully dark, soft and lustrous. Easily applied by simply combing or brushing through the hair. Don't be misled into buying some cheap preparation.

**USE**

"LA CREOLE" HAIR DRESSING For gray or faded hair. Sold and guaranteed by all good drug stores everywhere, or sent direct for \$1.20 by Van Vleet-Mansfield Drug Co., Memphis, Tenn.—(Adv.)

**Its Advantages.**

"Fishing is a poor man's sport as much as it is a rich man's."  
"That's true. A fisherman's success does not depend so much on his assets as on his liabilities."

**\$100 Reward, \$100**

Catarrah is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. \$100 for any case of Catarrah that HALL'S CATARRH MEDICINE fails to cure. Druggists 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

**Natural Result.**

"Was this breach of promise case thoroughly sifted?"  
"Yes, and they found only the ashes of his love."

**Soothe Baby Rashes**

That itch and burn with hot baths of Cuticura Soap followed by gentle anointments of Cuticura Ointment. Nothing better. For free samples address, "Cuticura, Dept. X, Boston." Sold by druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

**Rubbing It In.**

Cadger—"Sir, do you mean to insult me?"  
Badger—"Certainly not. I didn't think you could be insulted."

**Adruco Liquid**

Screw Worm Killer kills the worm and heals the wound.—Adv.

It's easier to tell a child what he must not do than to show him what he should do.

## What Well Dressed Women Will Wear

ON BEING CORRECTLY SUITED.

The vagaries of spring suits are many—as suits go. Heretofore it has been left to afternoon and other dresses to give us unlimited variety to choose from while the tailored suit appeared true to form, in a few very well defined styles. This season the tailored suit is indulging many fancies of its own. There are suits with very short coats, suits with Eton jackets, many suits with waistcoats and a good many eccentricities in coats. Skirts are nearly always plain, but a few exceptions to this rule appear in skirts to be worn with coats that are high at the back—an echo of the bustle dress of last winter.

With this variety in styles to choose from, it becomes easy to be correctly and becomingly suited. The waistcoat, which is the most interesting feature in the new suit styles, is made in as many ways as suits themselves and is becoming to almost everybody, but if it proves unbecoming or unpractical we can center attention on other new features in the styles, as the uneven length of coats at the bottom and the abundance of braid trimming.

Two very conservative suits shown in the picture will appeal to the woman whose taste cannot be diverted from plain and practical ideas in tailored clothes. At the right there is blue serge—which we have always with us, whatever else may come and go—trimmed with silk braid and buttons. The coat is longer in the front

Other features of the new styles, that can be gathered from any representative showing, reveal that high shoes continue to be very high as compared to high shoes of a few seasons ago. The fact that skirts have been lengthened a little has made no difference. The very high shoe is more trim than the moderately high shoe and more practical. The uppers in these shoes are of cloth just as often as of kid. As fine kid is not the sort of leather that is needed in the army there is no reason why the very high shoe should not be worn with a clear conscience. But cloth tops are just as attractive and just as desirable as the kid and maybe a little easier to keep clean.

Oxfords and slippers will divide honors with high shoes for street and sports wear this summer. In all of them toes are somewhat pointed but not to the length of discomfort. Considerable decoration in perforations appears on all styles of shoes as may be gathered from the group pictured here which includes a high walking shoe, oxfords and a dress slipper. The high shoes are in black kid with common-sense Cuban heel. Wherever a seam is required for joining the different parts of the shoe, there perforations occur. And the toes have a small pattern that is purely decorative.

The oxfords are in tan leather, finished in much the same way as the

SUMMER STYLES IN SHOES.

and sides than at the back, being cut with a point in front and at each side in deference to present-day style. The suit at the left has only one feature that distinguishes it as distinctly of this season, and that is the manner in which it is left open at the front to the waistline. It is of beige gaberdine and has a military suggestion in its pockets with flap and belt fastened with a small buckle. It will be noticed that collars on the new suits are usually high in the back and this one follows this rule. Below there is a small sketch of a jersey suit with a real waistcoat—which leads to the confession that there is much camouflage in this matter of waistcoats—they are usually merely front and nothing more.

Just a glance over the displays of footwear for summer brings home the fact that women have taken more than kindly to colored shoes. In fact it appears that color in footwear promises to become a permanent thing, as in gloves—and that the same colors are to be used. Many shades of tan and gray, often in combination with white, russet and white shoes, if counted would sum up as many pairs as there are in black shoes.

high boots and the slippers are in black and gray—very smart for wear with afternoon frocks and light summer dresses.

*Julia Bottinelli*

**New Linens.**

The new linens for household use show a great deal more lace trimming than has been the fashion in some time, and the favored lace seems to be fllet. Handsome towels of linen damask have strips of fllet above the hem and above the fllet a delicate hand embroidered pattern. Tea cloths show a fllet edge with a line of hemstitching an inch above, and a fllet square in one corner with hand embroidered trailing about it. An interesting card table cover is of white linen with a fllet border and fllet squares at each corner showing the card symbols—heart, diamond, club and spade—each worked delicately into the fllet mesh. Lovely dresser sets have fllet trimming in butterfly patterns, and to match these there are guest towels, towels trimmed with the butterfly

## Helping the Meat and Milk Supply

(Special Information Service, United States Department of Agriculture.)

### HOW YOUR MILK GETS TO TOWN

The Bottle You Take Off Your Back Porch May Have Traveled 200 Miles in Some of These Carriers.

### MILK'S JOURNEY: COW TO KITCHEN

Many Farmers Working Hard to Give People Clean Food at Earliest Moment.

#### DIFFICULT STEPS IN SYSTEM

Product Must Be Carefully Cooled to Keep It and Then Hauled Over Bad Roads to Railroads—Different in Small Towns.

In the handling of foodstuffs the American people constantly demand increased service. Package goods deliveries and special deliveries, buying in small quantities and so on, all require additional labor by some one. The milk consumer now is accustomed to find a bottle of clean, cold milk on the doorstep in the morning. If the milkman is late or does not come at all, vigorous complaint is voiced. Such a complaint is likely to be based on a lack of understanding of the many difficult steps involved in the modern system of distributing milk.

**Up Before Daybreak.**

Way off in the country somewhere, perhaps as far as 200 miles, some farmer must rise before daybreak to feed and milk his cows. The milk must be carefully cooled to keep it sweet, and must then be hauled for several miles over sometimes almost impassable roads to the railroad.

**Long Haul to City.**

Then begins the long haul to the city where the milk is carried on big trucks to the dealer's plant. There it is carefully pasteurized, bottled and placed in the refrigerator. The next morning about one or two o'clock the bottled milk is loaded on the delivery wagon and the driver starts on his way, carrying from 800 to 400 quarts, all of which must be delivered before breakfast time. Of course in small towns this system is simpler, as the farmer often delivers the milk directly to the consumer, but even then there are so many difficulties that the milkman may be excused if he is a little late now and then.

**Reduce Fly Injury to Stock.**

Here are some of the preventive measures advocated by the United States department of agriculture to decrease the losses of animals due to the larvae of flies: Burning or deep burying of carcasses of animals, the arranging of breeding operations so that young stock will be born in late fall, winter or early spring, the carrying on in winter and early spring months of branding, dehorning and other operations resulting in wounds, taking precautions to prevent injury to live stock from pens and fences or while on range or in pasture, the destruction of ticks and the poisoning and trapping of flies. Farmers' Bulletin 857 describes the damage these flies do and methods of controlling them. Burning or burying carcasses is very important. It is pointed out, since it is on this material that maggots, infesting wounds, are chiefly dependent for propagation. If all decaying animal matter could be destroyed, the troublesome blow flies—the insect bringing about maggot infestation—would be practically exterminated.

**Help Save Game Birds.**

The last day of the open season for hunting migratory game birds under the federal regulations was January 31 and it is now unlawful to capture or kill migratory game birds anywhere in the United States. The department of agriculture makes this announcement in response to numerous requests for information concerning the federal protective law. State game commissioners and sportsmen in nearly every state report that more wild fowl were killed during the open season just passed than in any season for

many years. The increase in the number of birds is attributed to the abolition of spring shooting under the operation of the federal regulations. The law already has been very beneficial to sportsmen and as a food protective measure, and under the continuance of existing protection there is every reason to hope for an ever-increasing supply of wild fowl which will greatly improve shooting conditions in the years to come.

The department appeals to the patriotism and true sportsmanship of all persons to co-operate with it in the enforcement of the federal law. It is gratifying to know, says a recent statement from the department, that the majority of sportsmen have observed the regulations, and this fact has contributed largely to the successful results accomplished. The department has planned to increase its force of wardens who will be active during the spring migration in securing evidence upon which to base prosecutions against those who may violate the law.

**Capital in Dairy Farming.**

Very few people realize the amount of money invested in the dairy farms of the country. The department of agriculture reports that on January 1, 1918, there were 23,384,000 milk cows on farms in the United States, and these cows were valued at \$1,643,630,000. Add to this figure the value of lands, buildings and machinery used in dairy farming, and the aggregate is stupendous.

The investment in individual dairy farms varies considerably, being influenced by land values, the number and kind of buildings, and the quality of the cattle kept. A modern dairy of 50 cows, capable of producing a daily average of 500 quarts of milk, would require an investment in equipment of approximately \$13,300. This would be divided as follows:

50 cows at \$100	\$5,000
2 pure-bred bulls	1,000
Barn for cattle and feed	5,000
2 concrete silos, capacity 150 tons each	500
Dairy house and equipment	800
Ice house, capacity 150 tons	800
Barn equipment	400
<b>Total</b>	<b>\$13,300</b>

Added to this would be the value of horses and farm barn, dwelling house, harnesses, farm machinery, etc.

The value of the land itself is the biggest single item. It has not been included in this estimate because of its variability. If land worth \$50 an acre is used, the land investment would be close to \$15,000. If \$200 land is bought, its cost would approximate \$30,000.

**Exercise Prevents Pig Thumps.**

When the pigs are from four or five to ten days old, be on the lookout for thumps. The best-looking fat little pig is the one to go first every time. An almost certain indication is a little roll of fat around the neck. While there is no known cure for thumps, the trouble is quite easily prevented. Plenty of exercise for the pigs is the answer. In cold, stormy weather out-of-door exercise is impossible, but if a central farrowing house with an alleyway is used, get the little fat fellows into the alley and put in about ten or fifteen minutes three or four times a day chasing them with a buggy whip, until they are pretty well tired out. If this is impossible, try putting one or two of the little pigs at a time in a large barrel or hoghead, placed by the farrowing pen. The pigs will hear the old sow making a fuss and in running around the barrel hunting for a corner to climb out, generally will take the exercise necessary to ward off thumps. A considerable part of the battle is won if the litter gets past the first ten days or so with a good start.

**Quality of Butter.**

Uniformity in quality is the secret of success in holding customers for the product of the private dairy.

**Value of Heifers.**

A heifer is valuable in proportion to the smallness of the feed required by her to make a pound of butter.

### CHANGE FOR THE BETTER

And Pains in Sides Relieved by Use of Cardui, the Woman's Tonic, Says Texas Lady.

Kemp, Texas.—Mrs. Minnie Chubb this town writes "I suffered with pains in my sides . . . and couldn't stand my feet, at times. Couldn't do any work, only what had to be done. I had a physician and he gave me medicine, tho' it didn't do me any good and he advised an operation. I had read in the Ladies' Birthday Almanac of Cardui, so I decided to try it. I had taken one bottle, I felt like to change for better. I took 9 or 10 bottles and have been well ever since."

I recommend Cardui to all suffering women. When my husband died, Dr. —, our family physician, I was taking Cardui, he said it was a good tonic for me. I will never cease praising it. It built up my system and strengthened me more than anything I ever done."

Cardui is a purely vegetable medicine, composed of ingredients which have been recognized by medical writers for many years, as of value in the treatment of ailments peculiar to women, and thousands of voluminous letters similar to the above are received every year, from women who credit Cardui, who have actually proved this to be true.

If you are weak and run-down by womanly troubles, try Cardui, the woman's tonic. All druggists—Adv.

**Taken on Trust.**

"Our product is thoroughly tested before leaving the factory. No man can sell stuff today that has not been tested."

"We manage to sell our product without testing it."  
"That's odd. What do you sell?"  
"Dynamite."—Brooklyn Citizen.

### PROVEN SWAMP-ROOT AIDS WEAK KIDNEYS

The symptoms of kidney and bladder troubles are often very distressing and leave the system in a run-down condition. The kidneys seem to suffer most, as in most every victim complaints of lame back and urinary troubles which should not be neglected, as these danger signals often lead to more dangerous kidney troubles. Dr. Kilmer's Swamp-Root, which many people say, soon heals and strengthens the kidneys, is a splendid kidney and bladder medicine, and has an herbal compound, has a gentle cleansing effect on the kidneys, which is most immediately noticed in most cases by those who use it.

A trial will convince anyone who is in need of it. Better get a bottle from your nearest drug store, and start treatment at once.

However, if you wish first to test the great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure to mention this paper.—Adv.

**A Warlike Aim.**

"So you're saving up to buy an airplane? You're quite an ambitious little boy."  
"Yes, sir. I want to fly over Jimmy Mack's yard and drop bricks on him."  
—The Airman.

### FRECKLES

Now is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of being ashamed of your freckles, as Othine—double strength—is guaranteed to remove these annoying spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it at night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one application is needed to completely clear the skin and give a beautiful clear complexion.

Be sure to ask for the double strength Othine as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

**Economies.**

"Your speeches are getting shorter and shorter."  
"Of course they are," assented Senator Sorghum. "There are more ways of saving daylight than turning the clock back."

**Important to Mothers**

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

**Soft Soap Defined.**

"Pop, why do people call jolly soft soap?"  
"Because there is so much love about it, son."—San Francisco Chronicle.

**Adruco Barbed Wire**

Liniment heals without a scar.—Adv.

**He Knew Human Nature.**

Hobo—Lady, would you swap something to eat for dis pile and cake I got at de next house?

A Valuable Iron Tonic for the Blood. GROVE'S Tonic for the Blood. It enriches the blood, it arouses the liver, corrects the stomach and builds up the whole system. A General Strengthening Tonic for Adults and Children.

He who pokes his nose into every thing will occasionally poke it between a thumb and a forefinger.

### Ugh! Calomel Sickens; Salivates! Please Try Dodson's Liver Tone

I am sincere! My medicine does not upset liver and bowels so you lose a day's work.

You're bilious! Your liver is sluggish. You feel lazy, dizzy and all worked out. Your head is dull, your tongue coated; breath bad; stomach and bowels constipated. But take salivating calomel. It makes sick; you may lose a day's work. Calomel is mercury or quicksilver, which causes necrosis of the bones, and crashes into sour bile like a sledge hammer breaking it up. That's when you feel that awful nausea and cramp-

ful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular. You will feel like working; you'll be cheerful; full of vigor and ambition.

If you want to enjoy the nicest, gentlest liver and bowel cleansing you've ever experienced just take a spoonful of harmless Dodson's Liver Tone today. Your druggist or dealer sells a bottle of Dodson's Liver Tone for a few cents under my personal money-back guarantee that each spoon-

ful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is entirely vegetable, therefore harmless and can not salivate. Give it to your children. Millions of people are using Dodson's Liver Tone instead of dangerous calomel now. Your druggist will tell you that the sale of calomel is almost stopped entirely here.—Adv.

### STRANGLES

Or Distemper in stallions, brood mares, colts and all others is most destructive. The germ causing the disease must be removed from the body of the animal. To prevent the trouble the same must be done.

**SPOHN'S COMPOUND** Will do both—cure the sick and prevent those "exposed" from having the disease. 50 cents and \$1 a bottle; \$3 and \$10 the dozen. All druggists, harness houses, or manufacturers. **SPOHN MEDICAL CO., Manufacturers, Goshen, Ind., U.S.A.**

# Eczema

## MONEY BACK

# HUNT'S Salve

## WHAT CONSTIPATION MEANS

It means a miserable condition of ill health that leads to all sorts of special ailments such as headache, backache, dyspepsia, indigestion, pains of various kinds, piles and numerous other disorders—CONSTIPATION is a crime against nature, and no human being can be well for any length of time while constipated. **DR. TUTT'S LIVER PILLS** is the remedy and has been used successfully all over this country for 72 years. Get a box and see how it feels to have your liver and bowels resume their health-giving natural functions. For sale at all druggists and dealers everywhere.

## Dr. Tutt's Liver Pills

**A Little Advertising.**  
"Boy, page Mr. Glimmering. Here's quarter."  
"Yes, sir. Thank you, sir."  
"But remember, I'm Mr. Glimmering."  
"I get you. Twice around the lobby and then you hail me."

**A New Service Flag.**  
One of our jockies, Maurice Clement, the quartermaster on the U. S. S. Texas, thinks that the conventional service flag which is now flying from innumerable windows all over the country, has one defect. It does not tell what branch of the service each man has entered.

## GIRLS! MAKE UP A LEMON LOTION

**MON JUICE WHITENS SKIN AND REMOVES TAN, FRECKLES, SALLOWNESS.**

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quart pint of the best freckle and blemish lotion, and complexion whiter, very small cost.

Now Quartermaster Clement is extremely proud of being in the navy, so, when he came to make a service flag for his own home, he framed the central white space with a piece of white-line tied in attractive knots. At the top and bottom of the panel he made a double Carrick bend; at each side, at equal intervals, a figure eight knot, and then a square knot, thus making a balanced design.

This flag is not only very attractive, but it leaves absolutely no doubt as to what branch of the service is symbolized.—Popular Science Monthly.

**Advance Information.**  
"Bobbie, did you know I was going to marry your sister?"  
"Why, yes; before you did."—Life.

**Natural Affinity.**  
"Why is that young donkey hanging around that widow?" "I guess it is because she's a grass widow."

Probably some folks lie to you because they think too much of you to tell you the truth.

## FOOTBALL IN FRANCE KEEPS LIBERTY LADS FIT TO BUCK THE GERMAN LINE

Our troops have made baseball well known to the people of France by their constant playing of the game. Now they are doing the same service for the American style of football. Weather conditions have less influence on football than on baseball, so the liberty lads have found greater opportunity for it. Army commanders, too, advocate the game, for it hardens the men and makes them fit to buck the German line.

This photograph shows a mixed group of soldiers and interested French folk living near the American camp watching the soldiers play. The quarterback is calling off the signals as the teams face each other braced for the impact of rushing bodies.

### HIS GREATEST GAME

Just before Ray Chapman came to Cleveland from Toledo in 1912, he had a day that he never will forget. Toledo was playing Minneapolis. Rube Waddell started for the Millers, but Constock finished. All Ray did was to make three singles, a double and a home run in five times up, drive in a bunch of runs, score four himself, steal home once and have a perfect day in the field with nine assists.

### PETER-THE-GREAT ENJOYS FULLY EQUIPPED BUNGALOW

Elite horse racing circles have been invaded by the bungalow craze and "Peter-the-Great," the famous 2:07 1/4 sire, has a bungalow home to himself on the estate of Stoughton A. Fletcher, the Indianapolis millionaire horseman. The bungalow cost \$1,500 and is fully equipped with electric lights, hot and cold water, large electric fan for the summer time and even a porch and flower boxes. In the photograph "Peter-the-Great" is "airing" by the side of his bungalow home. Mr. Fletcher purchased "Peter-the-Great" just a year ago from W. E. D. Stokes, the New York turfman, for \$50,000.

### STOP FREAK BALL PITCHING

Elimination Ought to Result in More Batting, Making Games Enjoyable to Fans.

The elimination of all freak pitching from the American association this coming season ought to result in more batting and consequently in more enjoyable games for the spectators.

The layman naturally thinks that it will be pretty hard work to regulate this matter of freak pitching, but those who have studied the problem say that it is comparatively easy, so that part need not concern us at all, says Milwaukee Sentinel. Where there is a rule they say it can be enforced. Drastic measures may be necessary, but that does not concern the patron.

The probabilities are that the average baseball follower would really like to see more hitting, and if the rule works out to this end it will be an accepted one.

### UNCLE SAM'S ALL-STAR TEAM

Most Excellent Machine Could Be Put Together With Many Players in Navy and Army.

If Uncle Sam wanted to put a team in the National or American League races he could get up a star team with the many players who have entered the military and naval service in the last few months. He could choose as his pitchers, Pfeffer, Sherrod Smith and Cadore, of the Robins; Shore, of the Red Sox; Rixey, of the Phillies, and Goodwin, of the Cardinals. Hank Gowdy, of the Braves, would make a very acceptable United States catcher, while Gainer, of the Red Sox, could play first; Barry, of Athletics, third; and Maranville, of the Braves, short-stop. Lewis and Shorten, of the Red Sox, would find a place in the outfield, as would Jacobson, of the Browns. Some team, you will admit.

### HAS PENNANT-WINNING TEAM

Manager Miller Huggins of New York Yankees, Believes He Will Win Championship.

Miller James Huggins, the new leader of the New York Americans, is thirty-eight years old, and one of the smallest men in baseball, standing 5 feet 4 inches. Huggins played in St. Paul, 1900 to 1903; Cincinnati, 1904 to 1909, and St. Louis Nationals, 1910 to 1917, inclusive. Huggins was appointed manager of the Yankees last winter, succeeding "Wild Bill" Donovan, who has replaced Jimmy Burke as coach for the Detroit Tigers. With Derrill Pratt at second base, Huggins believes he has a pennant-winning team in New York. St. Louis fans are particularly interested in Huggins. He finished third twice with the St. Louis Cardinals, staging a wonderful pennant drive with the local club in 1914.

## BASEBALL STORIES

The Little Rock club has sold Outfielder Howard Baker to San Antonio of the Texas league.

The Peoria club announces the sale of Pitcher Guy Hoffman to Houston of the Texas league.

Memphis has a new catcher, Leo Flaherty by name, who hails from the Virginia Military institute.

The Sacramento club plans to use Brick Eldred, secured from the Chicago White Sox, in the outfield.

The Atlanta club announces that it has taken on two players who were with Mobile last year in Catcher Dave Griffith and Infield Ward McDowell.

Faster baseball is assured for minor league fans this year because of the numerous players out of work. Likewise it means cheaper salaries.

Catcher Larry Pratt of Peoria has followed Bill Jackson to Omaha and will do backstopping for Pa Rourke's team.

The veteran Sam Frock, who had been pitching up in the New York state league, has gone South again this time as a member of the Nashville team.

Otis Crandall, veteran pitcher, after declaring almost up to the last week of training that he was done with baseball, finally drifted into the Los Angeles camp.

The Detroit Club has nine new pitchers and only one of the lot is a left-hander. He is Doty Blades, who was last season with Sherman in the Western association.

President Duncan of the Oklahoma City club of the suspended Western association is quoted as saying that he expects to see Oklahoma City in the Western league by July 4.

The Oakland club has lost a promising pitcher because of the injury to Lockhardt, the Indian. He broke a ligament in his pitching wing and will be out of the game indefinitely.

According to Newark report Infielder Jack Lewis has been sold the Indianapolis club. According to Steubenville report, that being "his" habitat, he has quit baseball merry.

Big pleasant evening. Mrs. Frank Faulkner year Tuesday for Virginia, where she visits her father.

At Times. Mrs. Riley—What a blessing children are. They didn't draft Mike because he had six.

## High Cattle Prices Accompany High Beef Prices

If consumers are to pay less for beef, live-stock raisers naturally will receive less for cattle.

If farmers are paid more for live stock, consumers will necessarily pay more for meat.

Swift & Company pays for cattle approximately 90 per cent of the price received for beef and by-products. The remaining 10 per cent pays for dressing, freight to market, operation of distributing houses, and in most cases, delivery to the retailer. Net profits also have to come out of this 10 per cent.

This margin cannot be squeezed arbitrarily without danger of crippling the only effective means of performing the complex service of converting cattle into meat and distributing this meat to the fighting forces and to consumers.

Swift & Company's net profit on beef during 1917 was only 1/4 of a cent per pound. On all products, it was a little less than four cents on each dollar of sales. Complete elimination of these profits would not affect appreciably retail prices of meat, or farm prices of live stock.

Swift & Company will be glad to co-operate in devising methods that will improve conditions in the meat and live stock industry.

1918 Year Book of interesting and instructive facts sent on request. Address Swift & Company, Union Stock Yards, Chicago, Illinois

**Must Have License to Buy or Sell Explosives**

The fourth called session of the legislature passed a law which makes it incumbent upon every state, county and municipal peace officer in Texas to enforce the Federal Explosives Act, which went into effect last November.

The Federal Explosives Act prohibits the manufacture, sale, purchase and possession of all explosives and their ingredients, in time of war, without a license. This compels practically every drug store to have a license permitting them to have in possession and sell explosive ingredients. These ingredients are: Bichromates, chlorates, chromates, nitrates, nitric acid, perchlorates, perborates, permanganates, peroxides and phosphorus, in their various forms. Those desiring other information may procure same by seeing Jas. F. Heasley, who is the explosives licensing officer for Gray county.

Misses Mary Henry, Jessie Alexander and Rena Moody, and Messrs. Emmet Thompson, Bryant Henry and Dewitt Burk went to Claude Tuesday, coming back by Clarendon where Miss Jessie took the train for Hedley for a short visit with home folks.

**\$25.00 REWARD**  
I will pay a twenty-five dollar reward for the arrest and conviction of any party guilty of tying down any telephone wire or in any other manner tampering with the lines. The state law on the subject is as follows:  
Penal code, Art. 784: If any person shall intentionally break, cut, pull or tear down, misplace, or in any other manner injure any telegraph or telephone wire, post, machinery or other necessary appurtenance to any telegraph or telephone line, or in any way willfully obstruct or interfere with the transmission of any messages along such telegraph or telephone line, he shall be punished by confinement in the penitentiary not less than two nor more than five years, or by fine not less than one hundred nor more than two thousand dollars.
