

COLOR SYMPHONIES

Autumn brings a downpour of leaves in mad, wild colors and fall fashions seem to imitate them with scarfs. Haven't you ever noticed how much fall scarfs are like fall leaves? They're both brightly colored and fluttering with every little puff of wind. Whether this similarity is intentional or not, fall scarfs are a great boon to all smart women. They add that last perfect touch to so many outfits—from corduroy to velvet—for high school sophomores right up through college girls, career women and Mrs. Homemaker.

There are oodles of bewitching tricks you can do to scarfs with different scarfs like tying a bow under your collar so that the back sits up empress fashion. Or swirl one end around your neck and sweep the other over to your shoulder with a striking pin. Or wear it ascot style in elegant simplicity. Actually, I shouldn't say "or" because you ought to use all these ideas and have as many variations as possible with each suit.

Of course, your scarf collection shouldn't be confined to suits exclusively. That would be cheating yourself. Be like the magician who can make a scarf do just about anything from uncovering white rabbits to making eggs disappear. You don't need to do that but you can tie one

of those little silk or nylon squares around your felt hat, right over the hat band. It's a swish twist for last season's chapeau!

And that's not all. Tie a scarf around your waist the next time you're wearing a skirt and blouse. You'll find it dresses up an otherwise ordinary outfit. Another bit of waistline drama is to knot a scarf on your belt as in the picture. It's chic and graceful—on separates as well as tailored dresses. The very latest is tiny scarfs worn around the neck, dangling rings, coins or other pieces of costume jewelry. In the same vein, you'll see them tied around the most fashionable wrists as bracelets.

Unfortunately, scarfs lose their vibrant colors quickly after two or three washings and since they are a "pick-me-up" accessory, something to accent and dramatize your costume, they must be bright to be effective. Your best bet is re-dyeing. With a little box of dye your blues can be electrifying, your oranges fiery and your greens like brilliant emeralds. Dye them in the wash bowl, and use all purpose dye which "takes" on all fabrics for many scarfs are blended fabrics (nylon and silk or rayon and nylon). It's easy as rinsing out stockings and you'll look your "scarfiest" best.

Vandals Ruin Highway Signs

The dictionary lists one definition of a vandal as "a wanton or ignorant destroyer or defacer of any building, monument, etc. which should be preserved."

This definition—"wanton or ignorant destroyer or defacer of any building, monument, etc. which should be preserved"—well describes a group who are operating on our highways today, the vandals of traffic safety. These vandals of traffic safety are those thoughtless, wanton destroyers of monuments to traffic safety—highway signs.

You, the traveling public, the taxpayer, are paying for these acts of destruction; acts of destruction through use of signs for target practice, acts of destruction through defacement of signs with paint and crayons, acts of destruction through knocking signs down, acts of destruction through bending signs double so their message cannot be read, and acts of destruction through carving of signs with a pocket knife.

And what is the price you pay for these acts of destruction? Each year the Highway Department alone spends an estimated \$20,000 to \$25,000 in measured dollars and cents in repairing and replacing some 7,800 signs damaged or destroyed through acts of vandalism—enough to build four miles of farm-to-market roads and get some farmer out of the mud. And the measured dollars and cents are not the only price you pay. No one will ever know just how many people have paid with their lives; how many people are crippled for life; and how many thousands of dollars in property have been destroyed all because a Curve sign with a Safe Speed sign mounted below it has been destroyed by vandalism. Should we continue paying the price for this thoughtless destruction?

If you know one who has been guilty of destroying or defacing traffic signs, remember he is not only violating a law for which he may be punished, but you or your loved ones may be the next victims of his acts of destruction. Be a good sport, help get him to promote traffic safety, and do your part to make highway traffic signs "Signs of Life" as they are intended to be by helping to stamp out vandalism.

Mrs. E. F. Burton from Maud, Okla., spent the week-end in McLean with her husband and friends.

Mr. and Mrs. Bryan McPherson are visiting in Hedley.

Top headliners for Ice Cycles of 1951, which holds its world premiere Oct. 7-22 at Dallas Ice Arena during the State Fair of Texas, include beautiful Margaret Field and Jamie Lawrence. The 1951 show now is in rehearsal in London where the 1950 exhibition is completing a record three-month engagement.

Radiation Instruments Made Available by State if Needed

At least four different types of radioactive detection instruments and computers are available for measuring radiation particles if and when an atomic bomb is ever exploded over a Texas community.

This encouraging bit of information was revealed by the state's chief health official, Dr. Geo. W. Cox. He is state director of health and emergency medical services, part of the Texas civil defense setup.

Radiation is one of three prin-

cipal harmful effects of atomic explosions. Others are blast damage and burns. Using RADIAC instruments, it is possible to know what areas are safe from the tasteless, odorless, colorless radioactive particles.

All RADIAC instruments are designed for use by radiation monitoring squads. Squad members might be soldiers, or they could be civilians trained by the State Health Department's radiological division. In either case

they would be trained for immediate action in atomic disasters. "Planning emergency medical and health services in an atomic disaster has been one big mess of confusion," Dr. Cox admitted. "But we're beginning to see light now. Our radiology division is going to go right to work, now that we have it set up."

Radiac instruments got this official explanation:

Film badges can be pinned onto the lapel, strapped onto the wrist, worn in a ring, etc. They consist of a piece of photographic film, and are used to show the amount of radiation to which the monitor has been exposed. Radiation particles affect the film like light. Dozens of "tracks" are visible when the film comes in contact with heavy concentrations of radiation.

Film badges are a permanent record of the exposure to which the monitors have been subjected. Dr. Cox says they show whether or not the wearer has received the "maximum allowable lifetime dosage."

Pocket dosimeters, like the film badges are for the protection of the monitors. They look like fountain pens, and gauge on-the-spot amounts of radiation.

Geiger counters and ionization chambers actually count the number of radiation particles—gamma rays and alpha and beta particles present in an area. So sensitive is the Geiger counter that if it could be wired to a fly his footsteps could be heard distinctly.

COTTON QUIZ

HOW DOES COTTON HELP THE LAUNDRY MAKE CLOTHES FRESH AND CLEAN?

NEARLY 125,000 BALES OF COTTON ARE NEEDED EACH YEAR TO MAKE VARIOUS TYPES OF LAUNDRY EQUIPMENT.

Estle Mathis of Amarillo visited Mrs. H. J. Pettit Sunday. Mrs. Pettit returned with him for a visit.

Mr. and Mrs. Clifford Allison spent Sunday in Pampa.

Mrs. M. N. Chapman of Millard visited friends and relatives in McLean Wednesday.

NEWS FROM KELLERVILLE

Mrs. O. T. Owen returned to her home at Crossroads, N. M., after spending some time in the home of her son, Edwin Owen. Mrs. Edwin Owen has been on the sick list, but is now improving.

Mr. and Mrs. J. N. Clark and children of DeLeon visited in the Edwin Owen home over the week-end.

Mr. and Mrs. Jack Boyd spent last Tuesday with Mr. and Mrs. M. E. Brown at Albreed.

Mr. and Mrs. Jack Boyd and Mr. and Mrs. L. A. Richardson made a trip to Sheppard Field Air Base at Wichita Falls Saturday to get their sons, Pvt. Charles Boyd and Pvt. Don Richardson, for the week-end. The boys returned to the base Sunday night.

Mr. and Mrs. Bob Tyre and daughter and Mrs. Anna Hutchins

of Pampa spent Sunday in the Jack Boyd home.

Mrs. Ray Gossett, Mrs. Forrest Switzer, and Mrs. Clarence Drum attended a P-T. A. school of instruction at Wellington September 22. The school was conducted by Mrs. Bustin of Austin, second vice president.

Mr. and Mrs. O. W. Love and children of Pampa visited the E. B. Dorsey family last week.

Miss Juanez Greene of Sayre, Okla., spent four days last week with her cousin, Mrs. Jack Harris.

Mr. and Mrs. E. B. Dorsey and children visited relatives at Glen Rose and Bowie while on vacation.

Mr. and Mrs. H. T. Miller are spending a three-weeks vacation visiting friends and relatives in Louisiana and Mississippi.

Mrs. E. F. Burton from Maud, Okla., spent the week-end in McLean with her husband and friends.

Mr. and Mrs. Bryan McPherson are visiting in Hedley.

A Two-Day Kitchen Miracle!

There's hardly elbow room in this tiny kitchen, very little work surface area and even less storage space. Note how the corner next to the refrigerator is wasted. To see how this homemaker's problem was solved by Youngstown Kitchen Planning Service look at the picture below.

What a change! And the miracle was accomplished in only two days with prefabricated steel kitchen units. Especially interesting is the corner cabinet which uses space formerly wasted. Inside the cabinet are three circular shelves, each 22" in diameter, that rotate with a flick of the finger. The only structural change in the room is the inexpensive wallboard soffit above the wall cabinets. Now the homemaker has convenience galore, with plenty of storage room and counter work surface.

WHAT'S COOKIN'

In Gray County H. D. Work
By Mary Anne Duke,
County Home Demonstration Agent

Wins Gold Star Award

Margaret Baggerman, daughter of Mr. and Mrs. John Baggerman of the Grandview community, will receive the 1950 Gold Star pin. This award is made annually by the Texas A. and M. College Extension Service to the most outstanding 4-H Club girl in each county.

Margaret was a member of the Pampa Junior High 4-H Club during the 1949-50 school year. She is now in Pampa Senior High.

Beginning her 4-H Club work in 1945 at the age of nine, Margaret's record show that she baked muffins, cookies, pies, and cakes for her family during the year. In fact, she won a blue ribbon on a cake at the Gray County Home Demonstration Club and 4-H Club exhibit that fall.

Her other projects that first year included a poultry project. She took care of 36 chickens. She helped clean house and wash dishes. In Margaret's record for 1945 she says, "Papa gave me \$40 for my work."

County camp at Lake McClellan was a highlight for Margaret's first year in 4-H Club.

In 1946 Margaret continued to bake cookies, cakes and pies, and also learned to make candy. She also assisted with the canning of meat, fruits and vegetables. According to the record, Margaret gathered 19 gallons of strawberries during the month of May, from which strawberry preserves were made.

Margaret also learned to sew in 1946. She made one apron, one gown, one dress, and a pair of pajamas for herself. The apron

attended a three-day county camp and all other club meetings during the year.

In 1948 Margaret's 4-H record was as follows: She baked 57 pies, 10 cakes, 23 dozen cookies, 26 dozen muffins, 3 dozen biscuits, and made fudge and divinity candy for the large family of which she is a member. Margaret won blue ribbons at the fair on her fudge, and on the divinity. She placed second on cookies and cake. Her canning record is as follows: 55 quarts plums and plum juice, 45 quarts beans, 15 quarts black-eyed peas, 33 quarts peach pickles, 24 quarts peach preserves, 95 quarts peaches, 55 quarts corn, 14 quarts grape juice, 22 quarts grapes, 36 gallons strawberries, and 8 gallons gooseberries.

Her sewing record for 1948 is as follows: made one dress for herself, one luncheon set, one shoe bag, two laundry bags, and a pair of pillow protectors.

Margaret was chosen to attend district camp at Lake Marvin.

By 1949 Margaret was attending Pampa Junior High School. This meant catching the bus early in the morning and getting home later in the afternoon. She managed well and was able to do the following things: baked 27 dozen cookies, 6 pies, and 20 dozen muffins for her family. For the home freezer she helped put up 93 quarts corn, 25 quarts beans, 20 quarts peaches and 15 quarts pears. She helped dress chickens for the locker and for sale.

In Margaret's own words, she says, "I help with the family washing and housework and do all of my own ironing."

Margaret attended county camp at Lake McClellan.

In 1949 Margaret made two dresses for herself. She modeled a pink chambray in the county clothing review and won a five-day trip to the annual 4-H Round-up at A. and M. College.

In 1950 Margaret's 4-H Club record is as follows: baked 73 dozen cookies, 6 cakes, 9 dozen muffins, 4 dozen rolls, 12 dozen biscuits, 7 puddings, and made cornbread twice. Helped put the following food in the home freezer: 59 packages chili, 23 quarts beans, and 36 quarts peas. She helped can 69 quarts green beans, 6 quarts blackeye peas, and made 30 quarts pear preserves and 12 quarts plum jelly.

Margaret made four dresses and four skirts for herself. She modeled a "best dress" with accessories in the county clothing review. Again she won the honor of a five-day, all expense paid train trip to the A. and M. College 4-H Round-up. According to Margaret, "T'was a wonderful trip."

Some of the intangibles Margaret has picked up along the way include leadership, ability, poise, charm, and the ability to get along with people.

Margaret may continue as a 4-H Club girl for six more years—until her 21st birthday. Her greatest challenge in club work is what she will do in those six years.

Before Winter Comes

Shore is a purty day—
More like Spring than Fall.
You know, if I wasn't a' comfortable
I'd swear I heard Mamie call.

Oh-oh, there she goes again.
Durndest thing I ever saw.
Ever time when I jis' git settled—
What's that? What say, Maw?

Bring the heater up from the barn?
On a day like this?
Why, it's jis' late September.
And anyway I don't want to miss—

Same thing ever blamed year
No matter which way you turn,
"Heatin' stoves" and "Chop some wood"
Is all you ever hear.

Well, I reckon I better git started
'Fore Mamie comes to boll
Then this evening I'll run over to Dysart's
An' let em change my oil.

'Cause it might be gittin' t'be
Winter at that, an'—
ALL RIGHT, MAMIE, I'M
COMIN', DAD BLAME IT.

For All-Around Winter Preparation,

EVERYBODY'S FIGHT

WE HAVE SAID it before in these columns—there is something immoral in mustering of young men on a war basis while labor, capital, industry, and civilians are left free to enjoy inflationary fruits of a wartime economy. Today nobody is at war in Korea but the GI. The United States will not be at war until it grids on a national basis for war. Such preparation must necessarily include some type of price control to throw back inflationary trends already in progress. Controls have not been instituted because the public, rather than "going to war," prefers high profits and plenty of consumer goods with a minimum of trouble.

Wages should be frozen at present levels. Taxes should be increased sharply and quickly. Excess profits taxes should be upped. Credit buying should be made difficult. Hoarding of inventory stock should be eliminated. Government hoarding of farm products under our price support system should be ended by withdrawing price support levels. Government spending for non-defense purposes should be halted.

When such a program is enacted this nation will be at war, and it will be everybody's war, and it will be won. But as long as cowardice in the face of November elections is more important than dead GIs and "business as usual," it will mean little high profits for business and hardships for consumers.

We've been told that war is everybody's business. Is there a brash enough man among us to say the present war demands sacrifice from anyone except 20-year-olds and the housewife who does shopping for her family?—Ralls Banner.

CITATION BY PUBLICATION

THE STATE OF TEXAS
TO: Mary Vinson, GREETING:
You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock a. m. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 4th day of November, A. D., 1950, at or before 10 o'clock a. m., before the Honorable District Court of Gray County, at the Court House in Pampa, Texas.

Said plaintiff's petition was filed on the 23 day of September, 1950.
The file number of said suit being No. 9839.

The names of the parties in said suit are: Robert W. Vinson as Plaintiff, and Mary Vinson as Defendant.

The nature of said suit being substantially as follows, to wit:
Suit for divorce on grounds of cruelty, rendering further living together as insupportable; no children or property involved, as is more fully shown by Plaintiff's

original petition on file in this suit.

Issued this the 23 day of September, 1950.
Given under my hand and seal of said Court, at office in Pampa, Texas, this 23 day of September, A. D., 1950.

DEE PATTERSON, Clerk, 31st District Court, Gray County, Texas
By LOUISE KYLE, Deputy.

"SMALL BUSINESS"

By C. WILSON HARDER

North and South, Republican and Democrat, have been successful in getting passed in the Senate what is known as the Wherry amendment. That, as part of the Defense Production Act, should result in a fair distribution of available civilian goods.

And as Senators Wherry (R., Neb.) and Sparkman (D., Ala.) pushed for passage, they were supported by organized independent business . . . inspired silently by the reproachful ghosts of 325,000 small businesses that needlessly perished in World War II.

This new bill will require that small independent businesses distributing civilian goods be given a fair share of the available supply, based on a representative period before June 24, 1950.

If the House passes this measure, it will correct one of the glaring oversights of the past when monopoly owned or controlled outlets received the available supplies, and independent business was left on a limb.

This one victory has far-reaching reverberations. Prior to this, the talk was entirely of voluntary allocations, tied in with suspension of anti-trust laws. In other words, Congressmen were told "the situation can be handled by gentlemen's agreements."

But Senators privately say they are becoming wary of these "gentlemen's agreements" . . . would like to be sure of what "gentlemen" are involved in such agreements. Many feel that they, like little Red Riding Hood, found out just in the nick of time that grandma was a wolf.

Congressmen, eyeing November elections, are aghast at some press releases sent out by government-hired press agents.

©National Federation of Independent Business

They shudder and hope much will never be published in newspapers read by tax-conscious constituents.

For example, the current release from the Office of Information, Economic Cooperation Administration, commonly known as the Marshall Plan, tells how American tax dollars are being used to modernize hotels in Europe, including such nations as Portugal, Ireland, Luxembourg, Sweden, Turkey, etc.

With brash pride ECA Release No. 1660 tells how Marshall Plan dollars have installed more bathrooms, changed rooms from double beds to twin beds, air-conditioned ballrooms, made other changes in these hotels. Thus American dollars voted to stop starvation are used to create luxury abroad.

As everyone knows, a lot of improvements are needed in American hotels.

But after taxes American hotels don't have the funds. And while Europe's hotels get free American dollars, American owners often can't get low cost loans.

Things like this are worrying Congressmen.

They feel this type of information, if read by tax-ridden voters, will be reflected in November voting. There may be some grounds for their fears.

Many Washingtonians are quoting Nicolai Lenin, founder of the Soviet Union.

He wrote: "Germany will arm itself out of existence." (Has happened, they say.) "Britain will expand itself out of existence." (Has happened, they say.) "America will spend itself out of existence." (Is it happening, they ask.)

©National Federation of Independent Business

LES

TALK

BY LESTER

It isn't often that T. A. Landers, publisher of this newspaper for some 25 years, drops in for a visit. But last Friday morning, he was in for a short visit and chat.

Mr. Landers, you know, is now living out on his farm northeast of town, the place which was long noted for the fact that it had numerous trees, but only one of each kind. I forgot to ask him about the trees this time.

But he did tell of the tough luck he has had with his stock on the farm. Not long ago, he bought several day-old calves, the kind you used to get for a dollar or so each. Only this time he paid \$20 per each for the calves. He put them in a pen and went in the house to eat lunch. When he came back out, one of the calves was lying in the stock tank, drowned and very muchly dead.

Then he had three milk cows, and one became ill. The cow was a good cow, and Mr. Landers had been selling a dollar's worth of cream per day from her production. But she got sick, and he called in a vet. For \$17 worth of treatment, the cow got nothing, and two days later she died.

We talked about other things, too. Mr. Landers' daughter Fern, whom many of you know well, has completed her work at Texas Tech and has received her master's degree. This summer she did work on her doctor's degree at Boulder, Colo. Now she has a position as a professor at Tech, and among other things teaches physiology.

Mr. Landers' grandson, Jack Grigsby, has received a scholarship of some kind or other, and is attending Tech also. He is working on his master's degree there.

We also spent some time talking "shop," but it dealt mainly with machinery, etc., and you probably wouldn't be interested, so I won't go into it.

IF YOU'RE INTERESTED IN SAVING

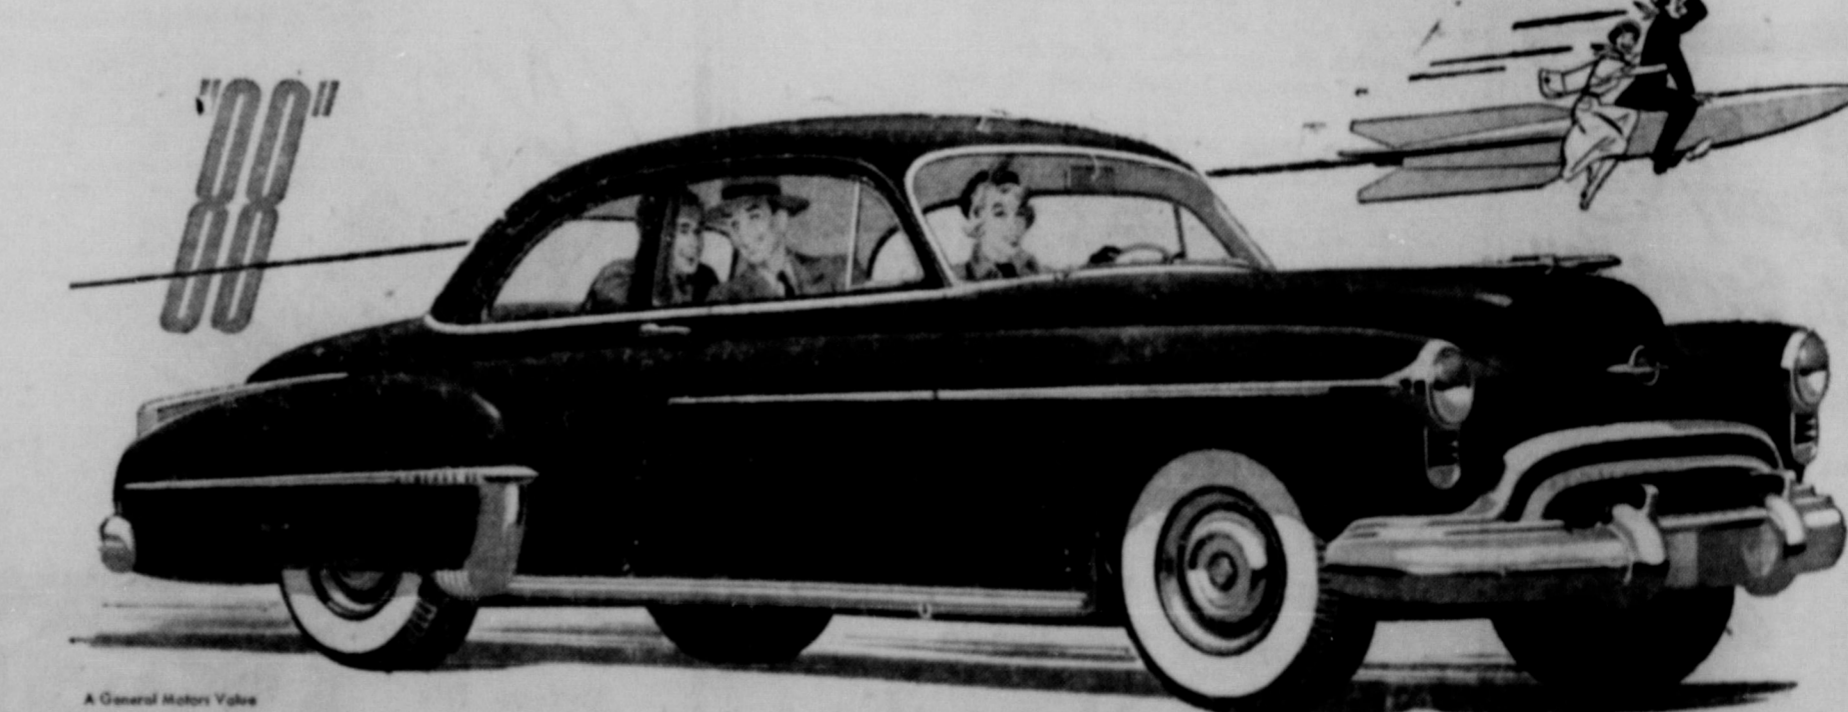

LEAVE IT TO YOUR ALL-ELECTRIC KITCHEN!

Time, energy and budgets are three mighty important considerations for the modern homemaker! Is it any wonder that more and more women prefer kitchens all-electric. For electricity is a miracle worker . . . especially in the kitchen. All the right appliances in correct labor-saving arrangements add up to more time for yourself, and your family. Less work, easier work . . . with results more satisfying. Besides saving precious time and energy, low cost, dependable electric service does its work at a very modest wage. The services of your range, refrigerator, dishwasher . . . and the many other components of your all electric kitchen costs but a few cents a day!

Fire in 1910 Destroys Three Buildings

40 Years Ago— IT HAPPENED HERE

Taken from the Files of The McLean News, October, 1910

Destructive Fire Sunday Night
The most disastrous fire that ever visited this little city occurred about one o'clock Monday morning, entirely destroying the two concrete buildings owned by J. A. Grundy and D. Bassel and the frame building owned by J. T. Foster, consuming also the six stocks of goods therein. The total estimated loss was \$23,000, and the insurance \$11,600. Detailed loss as follows:

J. A. Grundy, building and stock valued at \$6,000, insurance \$3,500.
M. D. Bentley, stock valued at \$1,600, insurance \$800.
Mrs. Lillie R. Bumpus, stock valued at \$500, no insurance.
W. E. McElmoyl, stock valued at \$9,000, insurance \$6,000.
D. Bassel, stock valued at \$3,000 and building valued at \$1,600, insurance \$1,600.
Stock of harness, valued at \$600, no insurance.
J. T. Foster, building valued at \$900, insurance \$600.

The origin of the fire is absolutely unknown at this time, although several theories are afloat. Early arrivals at the scene were confident that the fire started in the southeast corner of the block, being the back part of the Bassel grocery.
Quite a crowd of citizens gathered, but there was absolutely no way to fight the blaze nor to empty any of the stores as the entire building was filled with smoke. Other buildings in the vicinity were saved by the application of water and wet blankets, and the school furniture was removed from the Foster building, but the crowd had only to stand by and watch the hungry flames eat their way through three buildings and six stocks of goods. There was a box of clothing, valued at \$600, sitting in front of the McElmoyl store, but no effort was made to save it, everyone thinking it was only an empty box.

Some of those interested in the loss believe that the fire was of incendiary origin. It is their opinion that someone robbed the store and then fired it in order to hide their work. Others believe the fire was set through some accident, either a rat and a match or else someone in the store Sunday afternoon inadvertently dropped a spark from a cigar or pipe, which landed in a floor pile or something of the sort and smoldered until late in

HAIL NEW CURE

A medical research team made up of physicians from the District of Columbia Health Department and the Federal Security Agency have reported a new 1-day cure for gonorrhoea. The physicians found that two one-half gram doses of Terramycin taken at 6-hour intervals were sufficient to produce a one hundred per cent cure of the disease.
Terramycin is a new earth-mold drug discovered after screening 100,000 samples of soil from all over the world. The mold which produces Terramycin is recovered from a fermentation process (shown above). Public health and medical authorities believe that with the discovery of the effectiveness of antibiotics against syphilis and gonorrhoea it is now medically possible to eradicate venereal disease in the United States within a single year's time.

The latter theory is probably the safest, as a close examination of the back door locks revealed the fact that they were locked when the house was burned, as were also the front doors.
So far we have no definite statement as to the plans of the people who were burned out but it is the sincere hope of all that they re-enter business as soon as they can get their insurance adjustments made.

Notice
All my customers who are behind with me will please settle up, as you know that I now need the money. You will find my books in the care of Mr. Rice at the Cicero Smith Lumber yard, and I will be found there most of the time for the present. I have some wholesale obligations which I must meet, and I feel sure you will be kind enough to make settlement at once.
M. D. Bentley.

CARD OF THANKS
I wish to thank all our friends and associates of McLean for all the cards and flowers I've received during my stay in the hospital. They shall always be remembered.
Mrs. J. P. Bowling.

SALE OF SCHOOL PROPERTY
By order of the Board of the McLean Independent School District.

The McLean Independent School District Board will sell by sealed bid to the highest bidder the teacherage building, of the former Back Common School District, said building to be removed from school premises by the successful bidder within 60 days from the date the award is made. The building is a 24' x 20' frame structure with four rooms and bath. All bids must reach the board not later than September 29th, 1950, with check covering 10 per cent of bid. The board reserves the right to reject any and all bids.

When you're young you do a lot of wishful thinking. As you grow older you do a lot of thoughtful wishing.

A noted Canadian entomologist was delivering a lecture on the danger of rat infestation. The sixth grade listened with apparent attention and after the lecture one of them wrote the lecturer a note of thanks. It concluded by saying:

"We didn't even know what a rat looked like until you came."

Women who really know to raise children are too busy to tell.

We'll remind you again that cold, wintry weather is on its way, and now is the time to change that transmission and differential oil to winter weight. It's better for your car, and easier on your pocketbook.

Texans Welcome In Economy Drive

By MRS. CHARLEY WARD
State Vice-Chairman
Texas Economy Commission

(Editor's Note: This is the third in a series of articles on the Texas Economy Commission.)

The Texas state government needs to be reorganized to bring spending of tax money down to the level of essential public service.

The government needs to be reorganized so that this service can be rendered effectively and economically.

You learned these two basic facts in earlier articles in this series.

You also learned that the Economy Commission plans to enlist the advice, criticism, and labor of every thinking Texan in its work. The reason is simple: Without public understanding of the need for reform in our government, there can be no reform. Only with an informed public behind it will the Legislature take practical action.

HERE IS HOW the Texas Economy Commission is bringing thinking citizens into the picture:

The original 600 members of the TEC were appointed by Governor Allan Shivers to sponsor a program of intricate research into every phase of the government of Texas. These 600 citizens are headed by a board of directors, one from each of the 31 State Senatorial Districts, and nine at large.

The top officers of the TEC are John Redditt, of Lubbock, chairman; the writer, Mrs. Charley Ward, of Louise, vice-chairman; John Ben Shepperd, of Gladewater, secretary, and E. P. Cravens, of Austin, treasurer.

EACH DIRECTOR of a State Senatorial District sees to it that every county in that district organizes a county branch of the TEC. The county branch consists of all the Governor-appointed TEC members residing in the county, plus all the contributors of from one dollar up to \$100, plus any other interested citizen, whether or not they contribute. The contributors and interested citizens are associate members in the commission.

The county branch elects a permanent county chairman and committee on speakers, publicity, finance, and study clubs.

The speakers' committee furnishes speakers on the work of the Economy Commission to any civic group that requests a speaker. The Austin office of the TEC supplies factual material for these speakers.

THE PUBLICITY committee keeps the county informed on activities of the speakers, and on activities of the other groups of the county branch.

The finance committee raises the county's share in a state-wide quota of \$75,000 to finance the TEC researches into the state government.

The study clubs committee conducts periodic informal sessions on why efficient, economical reorganization of the state government is necessary, and on how the TEC is going about its task.

The permanent county chairman takes part in the work of as many of these committees as he has time for. And he is the general administrative head of the county branch.

This may sound far more complicated than it really is. There are a great many Texans who do not have to be "sold" on the need for good government, efficient government, economical government. In some cases, there will be little work for one county committee, but a great deal for another. In these cases, members of the study clubs committee, for example, can help the finance group, or any other committee needing help.

EACH COUNTY has its own peculiar local situation, its own special problems to meet, and its own special approach to make.

The primary goals before every member of every branch are: "Economy, efficiency, better public service."

The next article in this series will include comments by editors of Texas newspapers and quotes from outstanding citizens on the work of the Texas Economy Commission.

Marshee Windom, Bobby Kramer, and Cliff Callahan were week-end visitors from West Texas State College. Mrs. E. J. Windom and Mrs. Leo Gibson brought them home and C. P. Callahan took them back to Canyon.

Mr. and Mrs. Burl Pueti and son have moved to Pampa, where they will make their home.

Johnny Vineyard and Gene Henley have been transferred to Tuskegee, Ala., for a 19-weeks instruction course.

Guests in the H. E. Barrett home are Mr. and Mrs. J. B. France of Webb City, Mo., Mr. and Mrs. K. O. France of Tarkio, Mo., and Mr. and Mrs. C. L. France of Kansas City, Mo.

Cover Crops, Rain Prevent Wind Erosion

Timely rains coupled with extensive cover crop planting have changed a serious wind erosion threat into a favorable situation in most of the Plains areas of Texas and Oklahoma.

The changed outlook was noted in field report to Louis P. Merrill, regional director of the Soil Conservation Service for Arkansas, Louisiana, Oklahoma, and Texas.

"We're still not completely out of danger," Merrill said. "A great deal depends on how the residues of the crops are used and the land is handled. Sorghum stalks left standing and not overgrazed will protect the soil against the wind. If plowing is necessary, sub-tillage is best because it leaves crop residues on top and does not make the surface of the soil loose and easy to blow.

"June and July rains brought up a thick growth of weeds. They supply an abundance of residue that will protect the land if kept on the surface or worked into the top two or three inches of soil.

"Other helpful practices are to plant a cover crop as soon as possible on cotton land when rainfall permits—rye on the loose, sandy soils, and wheat on tighter soils. Rains in late summer usually bring up a good growth of field grasses and weeds that, if left on the surface, furnish protection. Cover crops can also be used on sorghum land to assist the stalks in controlling wind erosion.

"Vetch, Austrian winterpeas, sweetclover, and alfalfa are good cover crops on irrigated land. Improved irrigated pastures, or alfalfa, if rotated with crops, will not only protect the surface while on the soil, but increase the resistance to erosion for a time afterwards.

"Of course fall rains are needed to get the new wheat crops up to a good stand. But all in all the situation has changed from very critical to favorable. In some localities there is enough moisture in the soil to get wheat up even if it doesn't rain any more. The wheat will provide a cover to protect the soil against fall, winter, and spring winds.

Another favorable trend Merrill mentioned has been the seeding of grass on blow land formerly in cultivation. In most localities the grass, planted last spring, is up to a good stand.

"The speed with which farmers acted to meet the wind erosion emergency that existed last spring proves again that landowners can fulfill their responsibility as custodians of the land," Merrill emphasized. "Despite months of drought and the prospect of a long dry spell, they arranged to plant grain sorghums and sudan grass, knowing that if no rain came their labor and expense would be lost.

"They also knew, however, that if they didn't have some cover on the ground, blowing next season would be the most serious since the grave wind erosion days of the 1930's. If they planted sorghums and rain did come in time, the situation would be saved. That's what has happened. The farmers in soil conservation districts of the Texas and Oklahoma Plains planted 7,611,000 acres to sorghums and sudans, 2,239,000 acres more than last year's total."

Week-end guests in the home of Howard Williams were Mr. and Mrs. Ted Williams and family of Palestine, Mr. and Mrs. Grover Lamb and Mrs. W. N. Pharis of Lela.

Highlights To Dramatize Your Home

Let framed pictures be your spokesman in setting the "locale" for your interior decorating scene. Here the French Provincial double chest is appealingly enhanced by these attractive prints arranged to really start tongues wagging about your ingenious "flair" for styling. Against a pine green wall, these pictures, matted with a red background and in frames of natural wood coloring, will create that intangible stamp of taste "unquaffable."

With October—National Picture Month—looming over the horizon, you won't want to miss this opportunity for purchasing really beautiful pictures for your home.

Lotsa People WANT TO DRIVE

Stood around a driver's license examining station recently awaiting your turn for the tests which will determine whether or not you will be issued a license?

Colonel Homer Garrison Jr., director of the Texas Department of Public Safety, says that if you are one of the 52,000-plus persons who make application each month for a new Texas drivers license you probably have been subjected to a considerable wait—sometimes of several hours duration, or, at best, being obliged to wait a number of days for an appointment. Now, with the exercise of a little simple arithmetic he tells you why the delay and just what the men in his driver's license division are doing to alleviate the situation.

At Garrison's direction A. F. Temple, chief of the Safety Department's driver's license division, has released the following comparative figures on the activities of that division's personnel during the eight-month period from November, 1949, through June of this year as compared with the same period of 1941-42:

Texas' population according to the 1940 census report was 6,414,824. From November, 1941, to July, 1942, the Texas Department of Public Safety had employed 93 driver's license examiners who administered 276,008 tests during the eight months. In the same period, the headquarters staff of the license division issued 962,340 licenses to Texas drivers. This latter included both renewals and new licenses issued on the basis of the examiners' tests.

Ten years later, in 1950, the population figures had risen by more than a million and a quarter to a total of 7,677,060, while the ranks of the DL examining personnel had been increased by seven for a total of an even 100 men. These 100 examiners, however, during the past eight months conducted 418,566 tests, or an increase of 142,558 over the 1941-42 figures. In other words, an employee increase of 7% per cent accounted for a 51% per cent increase in testing activities. This was possible because of improvements and reforms in examining techniques and procedures. Also, during the past eight-month period the license headquarters issued a total of 1,240,619 licenses, both new and renewal. At the present time, due to the recently adopted mechanical methods of issuance, the division is turning out in excess of 10,000 driver's licenses each day.

Chicago	16.85	20.35

GREYHOUND DRUG
Phone 69 McLean, Texas
GREYHOUND

Currently, according to Temple's figures, there are about 3,000,000 licensed motor vehicle drivers in Texas. This is an increase from 1 1/2 million in the short space of four years—since 1946.

The number of driver's license examiners in Texas is based strictly upon the Legislative appropriation which is made for the division and none can be added without act of the Legislature.

Both Garrison and Temple are quick to admit that they are aware of the inconvenience and delay which is incurred in the proper administration of our driver's license law but they point out that each of the men in the driver's license division is conducting an average of more than 500 examinations each month. This, they say, is at least 150 more per man than can reasonably be expected and they indicate that the strain of maintaining such a count for the large turnover in examining personnel—a little more than 12 per cent since last November.

Remember these figures the next time you're inclined to gripe about waiting for that driver's license test!

Mrs. George Orrick made a business trip to Amarillo Monday.

Ray Middaugh spent the week-end visiting with his parents Berger.

Mr. and Mrs. Raymond Wilbur of Anna, Ill., visited Sunday at Mr. and Mrs. Jesse Coleman's family.

Mr. and Mrs. J. L. Hess of San Paris have returned from trip to Anna, Ill., where they attended Mr. Hess' sister's funeral.

Shirley Brumley and Jack Brock from Clarendon were guests at the H. W. Brooks home last week-end. Mr. and Mrs. Brooks took them back to Clarendon Sunday.

Looks like a big car

Feels like a big car

(IN EVERYTHING BUT COST)

DYSART MOTOR CO.

Don't Be Satisfied With Symptomatic Relief!

HADACOL NOW MAKES IT POSSIBLE TO RELIEVE THE CAUSE OF YOUR SICKNESS

Neuritis Pains, Stomach Disturbances, Indigestion, Gas, Constipation, Certain Nervous Disorders and a General Run-down Condition When due to lack of Vitamins B₁, B₂, Iron and Niacin in your system!

Read How These Folks Benefited Who Had Such Deficiencies

Mr. Anthamatten, 4731 South 32nd West Ave., Tulsa 7, Oklahoma, suffered from stomach distress for quite some time. He had spent much money trying everything possible for relief and was in bad health when he started taking HADACOL. He says, "After taking three bottles of the \$3.50 size, I've gained 27 pounds and now eat anything I desire and positively have no trouble." (HADACOL gives such wonderful results because it actually relieves the REAL CAUSE of stomach distress [gas pains, heartburn, indigestion after eating] due to such deficiencies. And continued use of this great HADACOL helps prevent such distress from returning.)

Mrs. Mabel Kitchen, 1650 Amsterdam, Cincinnati, Ohio, "Before I started taking HADACOL I had aches and pains of neuritis in my shoulders, my back and arms. I could hardly move without having those terrible pains. Then I heard about HADACOL. After the second bottle the pains and aches were about gone. I'm now starting my fourth bottle and am on top of the world. I eat well and, best of all, the aches and pains are completely gone." (Mrs. Kitchen is a very smart woman because she relieves the REAL CAUSE of her neuritis pains due to such deficiencies. HADACOL often brings a wonderful improvement within a few days' time.)

Mrs. J. Scieszinski, 514 Kruger, Ottumwa, Iowa, writes: "My daughter, Marilyn Sue, is 5 years old and for some time lacked pep, had a poor appetite, was generally run-down. Since giving her HADACOL, we have noticed wonderful results... she has a much better appetite, eats everything on the table and doesn't seem tired like she used to. Incidentally, she likes to take HADACOL, too." (HADACOL is a great "builder-upper" for sick, nervous, puny kids whose systems lack precious Vitamins B₁, B₂, Iron and Niacin. A big improvement in their well-being is often noticed within a few days' time after taking the great new HADACOL.)

Mr. Henry Angel, RD No. 1, Springfield, Ohio, "I used to suffer great pain from neuritis aches in all parts of my body, especially in my legs, arms and shoulders. I never got any real relief until I tried HADACOL. After taking several bottles, my pain is all gone. And I'm working every day." (Now there's a smart man! Mr. Angel took HADACOL and relieved the pain cause of his neuritis due to such deficiencies. HADACOL is helping thousands upon thousands of grateful men and women troubled this way. Why don't you give HADACOL a chance to help you? Start taking it today!)

Vitamins B₁, B₂, Iron and Niacin but also helpful amounts of precious Calcium, Phosphorus and Manganese—vital elements every human being must have to maintain good health. You owe it to yourself to give HADACOL a fair trial. Many doctors recommend this great new HADACOL. It's sold on a strict money-back guarantee. Trial size, \$1.25. Large family or hospital size, \$3.50.

"SMALL BUSINESS"

By C. WILSON HARDER

Despite reports circulated by budget bureaucrats, the nation's small independent businessmen are almost equally divided on government control of prices and wages, rationing.

A nationwide poll just completed by the National Federation of Independent Business on this issue, and others, reveals 44% for; 36% against; 6% undecided.

These thousands and thousands of businessmen are directing to Congressmen, are causing many a salon who voted these powers to the President embarrassment.

The rapid, severe price jumps have hurt small businessmen even more than consumers.

But apparently there is a reluctance to jump from the frying pan into the fire.

It is felt if government had shown competence in dealing with defense, taxation, other grave matters, there would be grave confidence in government intervention in the domestic economy.

Now, there seems to be one big question.

"What has the greater destructive power—the present inflationary trend which may be stopped by American common sense—or bureaucratic meddling which once started may never make sense, or never be stopped?" This attitude of small businessmen might be the most significant vote of no confidence yet registered.

On the same ballot independent businessmen voted almost unanimously for a law that will require co-operatives to pay a fair share of taxes.

National Federation of Independent Business

The vote was 98% for; 1% against; 1% undecided. Businessmen have the support of the Treasury Department, anxious to plug loopholes which have been permitting a billion dollars of tax income to escape yearly.

This issue will take the spotlight in Congress soon. And as usual, the lobbyists opposing any action will shed copious tears over the "unwarranted attack on the farmer."

Actually, bona-fide farm co-operatives would be affected but little. Farmers themselves will be shocked at the coming disclosures which will show that the present regulations have been the highroad by which many big companies have escaped taxes.

Congressman Huber of Ohio created some discomfort the other day for Stuart Symington, chairman of the National Security Resources Board. Symington has just appointed a 12 member mobilization committee that will function when, and if, price controls, rationing is started.

The Congressman pointed out that labor, agriculture, industry and the public are represented on the board. But the distributive industry, employing 12.5 million, second only to manufacturing, is not represented. And the distributive industry will have to post prices, collect ration coupons, do most of the work.

But this obvious deficiency was apparently ignored.

As one newspaperman remarked, "The trouble with Congressman Huber's comment is that it makes common sense, and in Washington, the keynote is billions for theories, but not one cent for practical experience."

SOCIETY

Shower Is Given At Baptist Church For Mrs. J. Haynes

Mrs. Vernon Wood, Mrs. C. B. Lee Jr., and Mrs. John Cornett honored Mrs. Johnny Haynes with a pink and blue shower in the parlor of the First Baptist Church on September 15.

An ice-blue satin cloth covered the table, with Miss Darlene Shaddid pouring coffee from a sterling silver service. Pink and blue cake was served on milk-white dishes by Mrs. James R. Smith.

Miss LaWanda Shaddid played soft music during the first part of the afternoon. Mrs. Sam Haynes presided at the guest register. Mrs. Frank Rodgers gave a reading, after which a game was played and gifts were opened by the honoree.

Those attending were Mesdames James R. Smith, R. T. Dickinson, Dania Kunkel, Billie Haynes, George Colebank, Callie Haynes, Duell Wells, W. E. Bogan, Frank Rodgers, Bob Barnette, T. N. Holloway, John Haynes, J. S. Morse, Amos Thacker, Ruel Smith, and Misses LaWanda and Darlene Shaddid, and the hostesses, Mrs. Wood, Mrs. Lee, and Mrs. Cornett.

Those sending gifts were Mesdames Earl Stubblefield, C. W. Bogan, Custer Lowery, Corinne Trimble, John Cooper, Ralph Caldwell, Kathleen Dysart, H. W. Finley, W. E. Ballard, Jim Back, Frank Wilson, Laverne Carter, S. J. Dyer, C. P. Callahan, Darwood Riddle, Sidney Kunkel, Gene Woodrome, Homer Abbott, Frank Reeves, R. L. Appling, Boyd Reeves, Bill Webb, Sue Cubine, Don Alexander, Bill Ferguson, Roger Powers, Vester Dowell, Vera Thomas, Felton Webb, Velma Betchan, Misses LaVetta Gunn and Christa Carol Rodgers; and Billy Rodgers and Carey Don Smith.

Mrs. Weldon Bryan of Tulare, Calif., is visiting in the home of her sister, Mrs. C. R. Guyton, this week.

Guests in the H. L. Chase home Sunday were Mr. and Mrs. U. O. Jett of Shamrock

to visit in the home of their daughter, Mrs. Ted Longino.

Mrs. C. L. Pudry and daughter of Amarillo spent the week-end here visiting friends and relatives.

Mr. and Mrs. Joe Graham and son spent Sunday with Mr. and Mrs. V. L. Graham and family of Clarendon.

Sgt. Evelyn Baprows of Amarillo visited with friends and relatives in McLean over the week-end.

Guests in the H. L. Chase home Sunday were Mr. and Mrs. U. O. Jett of Shamrock

Nora Isabel Petty, Bishop C. Bristow Are Wed in Abilene

Mr. and Mrs. Luther Petty are announcing the marriage of their daughter, Nora Isabel of Abilene, to Bishop C. Bristow of Abilene, son of the late Mr. and Mrs. G. W. Bristow of Anson, on Wednesday night, September 20, in Chapel Memories in Abilene.

The bride, accompanied by her maid-of-honor, Miss Dorothy Taylor of Abilene, marched up the aisle to meet the groom and the best man, Latis Crowe of Abilene. Before a decorated altar. The double-ring ceremony was performed by Rev. Sammy Farris, a ministerial student at Hardin-Simmons University, before a crowd of friends. No relatives were present.

The bride was dressed in a beige gabardine suit with brown blouse and brown accessories, and the maid-of-honor wore a suit.

Mrs. Bristow was reared in McLean and graduated with the 1943 class from McLean High School. She attended Hardin-Simmons University and is now employed as chief cashier of Montgomery Ward at Abilene.

Mr. Bristow is a graduate of Anson High School and served four years in the army during World War II, three years being spent overseas in Africa and Italy. He is an employee of the Texas Pacific railway in Abilene.

After a short wedding trip to visit relatives at Canyon, Amarillo, and McLean, they returned to Abilene and will be at home at 863 Hickory.

Guests Honored At Reception by Pioneer Study Club

Members of the Pioneer Study Club were hostesses Thursday afternoon for a reception in the J. L. Hess home, honoring guests.

Mrs. Jim Back, president, welcomed the guests. Mrs. C. R. Griffith had charge of the entertainment. Prizes were won by Mrs. Logan Cummings and Mrs. Jesse Coleman. The musical portion of the program was presented by Mrs. Bob Thomas.

Hostesses for the meeting were Mrs. Jesse Coleman and Mrs. Amos Page.

The entertaining rooms were beautifully decorated with seasonal flowers. The lace-covered table was appointed with a crystal punch bowl and a beautiful arrangement

of bronze and gold dahlias featuring green candles. Mrs. Back ladled the punch.

Those attending were Mesdames J. W. Mencham, Hickman Brown, O. F. Chapman, Tommie Daniels, Don Leach, Jimmie Saunders, Richard Back, Haydn Bodenhamer, Charles Weaver, Myrie Norman, John Blevis, Al Duncan, Jimmie Shelton.

Mesdames Amos Thacker, Lucille Parker, Paul Kennedy, J. B. Hembree, Royce Pope, W. E. Bogan, J. D. Coleman, Bill Day, Forrest Hupp, Tommy Hulsey, Tom Smallwood, C. J. Magee, Miro Pakan, Earl Stubblefield, B. L. Webb, Helen McWilliams, and Misses Gussie Bledsoe and Leona Forbes.

Ladies Auxiliary Meeting Is Held In Church Parlor

The Ladies Auxiliary of the First Presbyterian Church met Tuesday in the church parlor.

The meeting opened with the theme song and the Lord's Prayer in unison.

Mrs. C. E. Cortis was leader of the following missionary program on India: devotional and prayer. Mrs. Cortis; hymn, "When I Survey the Wondrous Cross"; missionary names and prayer. Mrs.

Arthur Erwin; "India," Mrs. F. H. Bourland; "Hospital and Medical Work in India," Mrs. H. E. Franks; Mrs. Mattie Graham gave an article on social education and action, and led the closing prayer.

Mrs. Graham and Mrs. Franks served lovely refreshments to Mesdames J. B. Hembree, John B. Rice, Arthur Erwin, K. E. Winton, F. E. Hambright, T. E. Crisp, F. H. Bourland, Haskell Smith, C. O. Goodman, Mittie Paschal, George MacDonald, and C. E. Cortis.

The Ladies Auxiliary held their second annual silver tea, flower and antique show Tuesday of last week.

All flowers were locally grown and some very lovely arrangements were on display.

Some very unique antiques were on exhibit and the tea table was lovely with a dahlia arrangement.

About 150 guests attended.

Mrs. Jack Craig and Mrs. Stevens Stubbs visited J. F. Messer at Hereford last week.

Army Increases Reserve Call

With the Department of the Army more than doubling the number of Organized Reserve officers previously called for on August 10, the Fourth Army has increased its previous quotas to the five military districts. Previously the Fourth Army sent out a call for 182 captains and 612 lieutenants for the 16 arms and services.

Doctor Predicts More VD Cases Near Military Sites

Veneral infections, notably syphilis and gonorrhea, will probably increase sharply in cities and towns near military centers in the near future, State Health Officer Geo. W. Cox has predicted. He urged all cities, especially those in which greater numbers of military personnel were expected, to intensify their efforts to control veneral diseases.

Mrs. C. O. Goodman and Mrs. F. E. Hambright

attended an officers' meeting of Presbyterian in Amarillo Wednesday of last week.

HAVE A BETTER KITCHEN "Manual dishwashing has just about disappeared from my kitchen," wrote a woman recently in answer to a survey among a group of electric dishwasher users. "With exception of those few pans or skillets that have to be scoured, I put everything into the dishwasher, even baby bottles." This same homemaker, who said her dishwasher saves her at least 45 minutes a day in the kitchen, revealed the routine she has developed in using the machine. "First," she relates, "as soon as I'm through with a dish or pan during preparation for a meal I put it in the dishwasher. Then, when I have the meal on the table I place all the rest of the cooking utensils in the machine, turn it on and enjoy the meal with my family. "By the time we're through all the pots and pans are washed and dry, ready to be stored. At the table I scrape all the left overs into a single dish and get rid of them through my food waste disposer. Dishes are brought directly from the table to the dishwasher, which easily holds all the dishes used by my family of four. "Because my dishwasher does the job in less than 10 minutes, I quite often put all the dishes away before I leave the kitchen. Sometimes, when there are other things to be done, I leave them in the machine until later. "All who answered the survey questionnaire were unanimous in declaring that the dishwasher gave them extra time for leisure or to do other household tasks. Height of the Rock of Gibraltar is almost 1,500 feet.
