WITH FEW EXCEPTIONS, everyone within the executive and legislative branches of the government believes that taxes on both most to cure the situation is a individuals and businesses must be cut. The sole difference of good rain. opinion is over the question of when and how.

The Administration has taken the position that, desirable and good to think that the head of essential as tax reduction is, it must wait until the budget is all our government will make a brought under control and is in or near a balance. Until relatively special trip to the drouth section, recently, it seemed that in all probability this position would prevail. That is not the case now. By virtue of this chairmanship, Mr. Reed is one of the most powerful men in the government when it comes to tax policy. The committee must originate all changes and renewals of our tax laws, and the chairman's authority is enormous.

Matters came to a head over the so-called excess-profits tax. This tax is about as unpopular as they come. President Eisenhower has denounced it. So has Senator Taft. So have practically all other authorities in and out of government. Almost all agree that the tax is a killer of initiative and enterprise, and that it is especially evil in that it is most burdensome to the smaller corporations and is an implacable obstacle to normal growth. On the other side, and still dealing with politics, there are leading Republicans, Representative Reed among them, who are convinced that if taxes are not cut all along the line, even before anything resembling a balanced budget is in sight, the GOP will take a bad beating in the off-year elections.

What is not a speculation is that President Eisenhower's present tax program, for all My wife has, for the past two of his vast standing and the affection and respect in which he is years, attended a homecoming of held by millions, is a far cry from a popular one.
