## **NEW FACE, SAME SPORTING HEART**

We might as well tell you straight off: Corvair's the car for the driving enthusiast. Think that lets you out? Maybe. Maybe not.

Until you've driven one, you really can't say for sure, because Corvair's kind of driving is like no other in the land. The air-cooled rear engine sees to that. You swing around curves flat as you please. You whip through the sticky spots other cars should keep out of in the first place. (Especially this year, now that you can get Positraction as an extra-cost option.) You stop smoothly, levelly with Corvair's beautifully balanced, bigger brakes. Corvair's found other new ways to please you this year. A forced-air heater and

defroster are standard equipment on all coupes, sedans and both Monza and 700 Station Wagons. So are dual sunshades and front-door armrests and some other goodies. You'll note some new styling, inside and

out. Nice. And safety-belt installation is easier, too, and cheaper. So you can see we haven't really done much to Corvair this year. Why on earth should we? If this car, just as she is, can't make a driving enthusiast out of you, better take a cab.

A New World of Worth

And here's America's only thoroughbred sports car, the '62 CORVETTE. We warn you: you drive a Corvette after your first sampling of a Corvair, you may well end up a two-car man. And who could blame you?
