MC LEAN, GRAY COUNTY, TEXAS 79057, THURSDAY, JUNE 10, 1971

NUMBER 22

State Capital NEWS

By Vern Sanford

Legislature in regular session will submit 14 more proposed constitutional amendments to voters in November, 1972.

Among major ones is HJR 61, which would authorize the 1973 legislature to serve as a constitutional revision convention.

Two other (HJR 58 and HJR 95) would provide for raise in salaries of legislators (to \$8,400), lieutenant governor and state speaker (to \$22,500).

Other amendments on the general election ballot in 1972 will be:

SJR 1 providing four-year terms for governor and other statewide officials now limited to two-year terms.

SJR 7-Permitting local governments on popular vote to exempt \$3,000 of assessed value of resident homesteads of persons 65 or older from all valorem taxes.

HJR 68--Providing for advertising (twice) of proposed constitutional amendments in plain, concise language in all major newspapers in Texas.

HJR 35--Authorizing a tax exemption for disabled veterans and a partial exemption for partially-disabled veterans.

HJR 57--Permitting county commissioners to reduce the county permanent school fund and provide for payment of monies to independent and common school districts on a per-scholarship basis.

SJR 29--Providing that state employees can serve on non-paying school boards and city governing bodies without forfeiting state pay.

SJR 20--Exempting soil and water conservation district directors from dual office-holding prohibitions.

HJR 61--Relating to rates of interest to be borne by bonds.

HJR 41--Requiring that justices of the peace be compensated on salary basis.

HJR 31--Abolishing Lamar county hospital district.

BLESS ROLL DROPS
Number of unemployed in the state decreased 6,000 during April to 181,000 Texas Employment Commission reports.

TEC said the jobless rate is only 3.8% of the total labor force, thus the decline may signal a "possible end to the doldrums of the past year."

Mid-April figure was identical with December, 1970 and considered probably the lowest of the year.

Thirteen labor areas reported improvements. Austin enjoyed the lowest rate of unemployment in the state -- 1.9% labor force.

APPOINTMENTS
State Supreme Court Chief Justice Robert W. Calvert named William Skelton of Lubbock a member of the State Board of Pardons and Paroles. Senate confirmed the appointment.

Charles W. Horan Jr., Fort Worth, is the new chairman of Texas Tourist Development Board, succeeding John R. Mcarty of Dallas. George Dillman of Dallas is vice-chairman.

Appointed branch pilots for Sabine Bar, Pass and Tributaries were Capt. James Williams of Groves and Capt. Daniel Joseph Bromley of Groves. Gov. Preston Smith asked the Senate's approval of the nominations.

LIQUOR TAX PASSED
Tax on liquor-by-the-drink passed in the first days of the special legislative session.

Measure (HB 3) will place a 2% gross receipts levy on sales of service of mixed drinks in bars and private clubs. Cities and counties each will get 1% of the revenue collected within their boundaries.

Bill also boosted the tax on liquor from \$1.68 to \$2 a gallon and upped the wine gallon tax depending on strength of the wine.

Beer tax on July 1 will go up from \$4.30 to \$5 a barrel. This rate supercedes the \$6 a barrel ordered in the regular session omnibus tax bill (HB 9).

About \$28 million in new

revenue for the next two years is expected from the bill.

COURTS SPEAK
Clark's discount house in Abilene cannot legally arrange with an allied concern (Sundaco Inc.) to offer Sunday sales in its store, State Supreme Court ruled.

High Court also reversed and sent back for a new trial a Dallas auto accident case where the jury returned two different verdicts as to which driver failed to yield the right of way.

Court of Criminal Appeals, reversing a Galena Park robbery by assault conviction, held that jurors are not qualified without expert advice to decide whether signature of a defendant is the same as that on criminal records.

A San Antonio man's claim that removal of a bullet from his back was an illegal search because the surgeon turned the slug over to a policeman was overruled by Court of Criminal Appeals.

AG OPINIONS
A called session of the Legislature cannot pass a legislative redistricting bill, Atty. Gen. Crawford Martin said in a recent opinion. Martin held that unfinished Senatorial reapportionment must be accomplished by a five-member committee of state officials.

In other recent opinions, Martin concluded that:

Taxing authority of a junior college district is specified by the Texas Education Code, regardless of whether the board of trustees of the district is also board of trustees of the independent school district. If a separate board of trustees is created for the junior college district, it would have control and management of all district property but only such control over school district property as the district board agrees to.

*Alcoholic Beverage Commission has no authority or jurisdiction to regulate beer sales by vendors who sell from ship's chandlerage under U.S. Customs bond.

*State Treasurer will receive fines collected in district court for violation of the Texas Motor Carrier Act, and neither district attorney nor district clerk may retain a percentage.

*A bill providing for establishment of a schedule of abused drugs by rule of the State Board of Pharmacy and for dispensing of drugs is constitutional.

AIR PERMITS NECESSARY
A new law provides that any company planning to construct or modify a facility which may emit air contaminants must get a construction permit from the Air Control Board.

If a construction permit is granted the facility must also have a permit to operate before going into actual operation.

Air control Board will formulate procedures for implementation of the permit system.

MH-MR GRANTS APPROVED
Board of Mental Health and Mental Retardation approved \$260,795 in supplemental grants for improving MH-MR facilities.

Grants went to Abilene Area MH-MR Board of trustees, \$34,581; Bell County, \$15,000; Dallas County, \$26,593; Lubbock County, \$10,000; Midland, \$13,176; Austin-Travis County, \$43,100; Galveston County, \$12,826; Brownwood County, \$5,000; Nueces County, \$10,000 and Harris County, \$125,000.

SHORT SNORTS
Bureau of Outdoor Recreation has approved a \$296,150 grant for the development of Pedernales Falls State Park in Blanco County.

Alpine Independent School District has been cleared by the Texas Highway Department to acquire highway department property as site for a new high school.

State Industrial Commission officials are in Munich,

Bill Introduced To Exempt Farm Trucks

Panhandle Congressman Bob Price has led a bipartisan group of farm state Representatives in introducing legislation to exempt farm trucks, custom combines, and farm truck drivers from U.S. Department of Transportation traffic regulations.

The Price bill is designed to remove the DOT's present authority to prescribe and regulate farm truck driver age limits, mental, physical and ability test requirements, truck sizes and weight limitations, and farmer record keeping requirements.

Price declared, "The farmers of our nation have enough problems without federal bureaucrats adding to them by enforcing idiotic regulations. Under the new proposals, day time farmers would be forced to become night time book-keepers."

The federal regulations in question would require farmers to develop and maintain extensive records on driver age qualifications, driver traffic records and employment records. Farm truck and custom combine operators would have to be 21 years of age and pass rigorous physical and written tests.

Price attacked the proposed age limit declaring, "If only 21 year olds and older could drive farm equipment then those younger men who, at the federal government's direction drive 50 ton tanks at places like Fort Hood, would by other federal laws, be unable to drive their parent's bob-tail trucks when they are home on leave from the service." "What could be more nonsensical than that?" he added.

In addition to local and state support from farmers and farm groups, Price's efforts are being watched approvingly by national farm organizations including the Farm Bureau, the NFO, the Farmers Union, the National Association of Farm Cooperatives, the National Grange, and the National Association of Wheat Growers.

Parents, friends and neighbors are invited to come with their children this Friday, at 7:30 p.m. for the closing session of Bible school at the First Baptist Church. Department directors will tell the boys and girls have been doing during the week. The youth group will serve refreshments. A time of fellowship will conclude the activities of the evening.

Family Night To Close Baptist V. B. S

Art Courses At LCC Increased

Art has a growing future at Lubbock Christian College with the advent of new courses in the fall semester that will allow elementary and secondary education majors to choose art as their teaching field.

Education majors are encouraged to take advantage of summer school at LCC to gain hours in required courses and take Art 332, "Art Education for Elementary Teachers".

Sometime in the near future, LCC plans to offer art majors in commercial art and studio art.

Anyone interested in taking art the second semester of summer school (July 8 to August 13) or in the fall, contact J. Lee Roberts, acting Chairman of the Lubbock Christian College Art Department.

Shamrock OES To Have Open Installation

Open Installation of Shamrock Chapter #384 Order of the Eastern Star will be held on Saturday, June 12 at 8 p.m.

Worthy Matron - Elect June Stubbfield Close and Worthy Patron - Elect Bryan Close extend a cordial invitation to their friends to attend.

Odd Animal Sighted In San Jacinto Park

What's furry, has a red head is blind and tiptoes? Answer: a squirrel.

Superintendent Jerry McCreless of San Jacinto State Park was startled to see a squirrel crossing a park road on tiptoes and with a red object covering its head.

He caught the little fellow and removed the red paste can which was wedged firmly on its head. The squirrel was glad to be rid of the can, and appeared to be healthy.

With his vision obscured by the can, the squirrel's careful and deliberate gait made him appear to be tiptoeing, McCreless said.

Bobby Petty of Ft. Sill, Oklahoma, called on his grandmother, Mrs. Luther Petty, Sunday afternoon. He returned to Ft. Sill after visiting in Amarillo with Mr. and Mrs. H.M. Billingsley and Mr. and Mrs. Vernon Kennedy.

Visiting with Mr. and Mrs. George Terry this week is their daughter, Ann.

Extension Approved For Grazing & Haying

Our approved date for haying and grazing on set-aside acres has been June 30. This did not assure the producer adequate time in which to grow and harvest a hay crop from the set-aside acres. Since these crops are badly needed in the state, the State Committee has determined that the termination date for seasonal haying and grazing on set-aside acres for Gray county is extended to November 1, 1971.

Producers wishing to graze and those already grazing the set-aside should be sure to file application in the county office. On dryland set-aside acres, no charge will be made to the producer through June 30. It is not known if a charge will be made after that date. On irrigated set-aside, a small charge will be made for grazing and haying. All producers should file application for grazing or haying on dryland and irrigated land.

REPORT CROP ACRES
Information can be sent in for payment when the set-aside acres has been reported and all crops on the farm have been planted and reported. The final date to report cotton and feed grain acres is August 15, but producers may report as soon as the planting has been completed. Payments will be made shortly after July 1 to producers who have reported acres.

Producers below the cap-rock are expected to plant and report cotton until June 10. If it remains dry and this cannot be planted, the report requesting history credit and payment should be filed by June 25. Feed grain planting date is July 1 over all the county and any request for history credit should be filed by July 16. This applies only if the land was prepared for planting cotton and/or feed grain and dry weather prevented the actual planting.

REAP SIGN-UP PERIOD
The next allocation for the REAP program for practices to be carried out during July, August and September will be July 1 through July 9. Applications will be taken during this period and will be acted upon by the county committee at the July meeting.

FINAL DATES TO REMEMBER:
June 4 - To request history credit on cotton farms above Cap-rock.

June 18 - To vote in Wool Referendum.

June 25 - To request history credit on cotton farms below Cap-rock.

June 30 - Maturity date on Grain sorghum loans.

July 1 - To request a New Grower Wheat Allotment.

July 9 - End of regular sign-up period for REAP practices for July-Sept.

July 16 - To file a request for history credit on feed grain.

July 31 - Maturity date on Corn loans.

Aug. 15 - To report final acres of cotton, feed grain and set-aside.

Roderic Fabian, left, McLean High School student, and instructor Carl A. Dwyer were among 550 of the state's top science students and teachers who attended the 11th annual Texas Nuclear Science Symposium at the University of Texas at Austin. The four day event, which began on Monday, June 7th, was a joint presentation of the Texas Atomic Energy Research Foundation, of which Southwestern Public Service Company is a member, and the University of Texas at Austin. Southwestern sponsored a group of 42 students and teachers at the symposium.

Musical Group To Appear Friday At Assembly Of God

The Collegians, a three-man musical and dramatic ensemble will appear at the Assembly of God Church 4th and Main Street, at 7:30 p.m., on Friday, June 11th, Pastor Myers has announced.

The student trio is from Evangel College, Springfield, Mo. Ken Lee, who sings bass and is manager of the group says, "We will be doing different styles of music, gospel, folk, and some classical type music. One song we are doing is from a Gregorian chant, "We Are One in the Spirit."

"We hope to make it as honest and forthright a presentation as we can. We want to make people realize who Christ was, what He really did, and how that relates to them," Lee adds.

The program will include guitar as well as vocal numbers, and interpretive readings. Lee, who has won honors in intercollegiate speech competition, will do most of the interpretive pieces. Speech awards he has won include a superior rating in interpretation at the national biennial tournament sponsored by Pi Kappa Delta, forensic honorary, in Houston, Texas in March of this year.

The readings are by twentieth century authors on religious subjects, such as how Simon Peter and others saw Christ.

The other men in the trio are Mark Alexander, a freshman from Goodrich, Mich.; and Bert Phagan, a senior music education major from Chicago Heights, Ill. All three have been members of the Evangel College concert choir. Phagan is first tenor, and doubles on the piano and guitar. Alexander sings baritone.

Alexander was president of his high school band, and has the lead in two school musicals. He has played trombone in the college band, and is taking private voice lessons.

Phagan is a voice major at Evangel, and is music director of Glad Tidings Assembly of God, Springfield, Mo. "I have a hobby of playing nearly every musical instrument I can find," he says. Instruments he plays include guitar, banjo, mandolin, piano, recorder, trumpet, violin, viola, cello, and string bass.

Lee is from Kansas City, Mo. and is a junior speech education major. Last summer he was a missionary intern in the French West Indies.

Evangel is the national four-year accredited college of arts and sciences of the Assemblies of God. Enrollment is 1120.

NEWS from County Agricultural Agent Texas A. & M. College Extension Service

By FOSTER WHALEY

When drought conditions cut grazing short, hay and a little protein supplement fed in a dry-lot program might offer the stockman an alternative that lets him maintain his livestock and conserve the animals' energy.

Hays can be used as the only feed, but without small amounts of legume hay, a protein supplement should be added to the ration, according to L.A. Maddox Jr., Extension beef cattle specialist.

Ranchers who feed as much as four pounds of alfalfa hay daily per head with sorghums, prairie or Johnsongrass hay may find that they can eliminate the protein supplement, he says. On the average four pounds of alfalfa hay supply as much protein as one pound of cottonseed meal.

Dry cows and cows with calves can be maintained in a dry-lot for several months on an all concentrate ration.

For dry cows to be properly maintained, they should be on a ration of eight to 10 pounds of an all concentrate feed with about seven percent of digestible protein properly fortified with minerals and vitamin A, Maddox adds.

Cows with calves, that are expected to remain reasonably healthy, should be on a daily ration of 14 to 16 pounds of all concentrate feed that contains eight to nine percent digestible protein.

Besides feeding cows in a dry-lot program, calves can be put in a creep feeding program to increase weight and insure better physical condition of the dams at weaning time.

Wheat and milo should be ground for feeding to calves, but shelled corn and oats may be fed unground.

Ground ear corn and home mixtures of ground ear corn (85-90%) and cottonseed meal (10-15%) can also be used.

Most of the feedlots are full of droughted out cattle. The rains over much of the states' drought area have been spotty but came in time to renew hope and prevent mass shipment to markets after the feedlots filled up. Had the drought situation intensified instead of being relaxed by the rains, I think you would have seen a severe price drop in stocker cattle in spite of the big capacity of the feedlots. Our biggest hope now is that the spotted showers continue so we will stagger marketings.

Local Girl Is 'Miss Executive Sweetheart'

Selected as outstanding, Miss Pam Bailey, daughter of Mr. and Mrs. Vester Bailey, was crowned winner of the Mr. Executive Sweetheart contest held in Lubbock Thursday.

This contest was sponsored by NuTav Sigma Society. Pam will graduate from Draughons Business College in July.

PAM BAILEY, MISS EXECUTIVE SWEETHEART.

New Arrivals

Mr. and Mrs. J.H. Goldston of Pampa proudly announce the birth of a son, born June 4, 1971. He weighed 7 pounds and 14 ounces and was named Carl Wayne. He has one brother named John Kevin.

Grandparents are Mr. and Mrs. L.T. Goldston of McLean and Mr. and Mrs. Lee Mays of Lubbock.

A weekly public service feature from the Texas State Department of Health

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

Just last month, on May 14, the world medical community marked the 175th anniversary of the first vaccination against the dread disease smallpox.

Why would this be of interest to the average Texan today? Because one of the true victories for the science of immunology is now apparent.

The re-education of the disease organism that causes smallpox is now almost complete. It is now estimated that only six countries in all the world will continue to report the occurrence of this once dreaded disease by the end of 1971. That cheerful word comes from officials at the Texas State Department of Health.

During the first four months of 1971, less than 14,000 cases of smallpox were reported by 13 countries to the World Health Organization. Over half of these cases were reported by Ethiopia, with the balance spread out over scattered areas of Africa, Asia, South America, and a few cases in Europe.

Health officials now estimate that approximately 25,000 cases will be recorded in 1971. That marks a substantial decrease from the 131,000 cases recorded in 1967, the first year of the world-wide Smallpox Eradication Program.

Still, you continue to ask, how does this affect me? While

smallpox is still considered a problem in some parts of the world, the disease does not at present occur in the United States. The last outbreak in America occurred in 1949 in the lower Rio Grande Valley.

In 1938, the United States recorded nearly 15,000 cases of smallpox. Ten years later, in 1948, less than one per cent of that number of cases was reported. Only 50 cases were diagnosed in the United States. For almost two decades now there have been no smallpox cases reported in this country.

So why should you continue to be concerned over a disease that is now almost eradicated? The answer is quite simple. The only way to afford you and your children 100% protection from smallpox is to completely eradicate it from the face of the earth. This can be accomplished only through strict control efforts, and continued mass vaccinations. Universal vaccination is still the most reliable safeguard in prevention of this disease.

"Accent on Health" is a weekly service of the Public Health Education Division of the Texas State Department of Health.

Mrs. Mozelle McMillan and Marilyn of Lakeview attended graduation exercises in Pampa on May 27, also spent the night with the Earnest Foshee's of McLean.

"LIFT THINE EYES UNTO THESE HILLS AND PRAY!"

"Lift thine eyes unto these hills and pray!"

Food Marketing Tips

The "new crop" season is fast approaching with a whole new range of fresh fruits and vegetables, announces Gwendolyn Clyatt, Extension consumer marketing specialist. Supplies of fresh corn are steadily increasing and the quality is exceptionally good. Squash, new potatoes, yellow onions, cucumbers, radishes,

green onions, broccoli, eggplant, carrots, collards, mustard and turnip greens are all deserving selections.

Cantaloupe is on special in the fruit section of many stores. Strawberry prices are about the same as last week, and watermelon supplies are fairly liberal with reasonable prices. Honeydew melons, oranges, lemons, pineapples and bananas are also good fruit choices

Weeds In Grain Can Be Controlled

Recent rains were a blessing to many parched areas of the High Plains, but this moisture means additional weeds in some grain sorghum. Weeds can be costly as indicated by research conducted by Texas A&M University in which one carelessweed every 128 feet of row cost more than \$4 in a 4,000-pound per acre yield.

Fortunately, scientific research has produced herbicides which producers can use to combat weed problems in grain sorghum, points out Dr. Robert Metzger, area agronomist with the Texas Agricultural Extension Service. Some of the materials that are effective in controlling established weeds are AATREX, Karmex, Banvel and 2,4-D. Selection depends on such factors as the stage of sorghum growth, weed size, soil type, crop rotation, crops in adjacent fields and local herbicide laws.

According to Metzger, there are two key points in getting effective kill of emerging weeds. First, use a proper surfactant or wetting agent with the herbicide at the rate of two pints in 50 gallons of water with each of the chemicals listed above. Secondly, apply the herbicides when weeds are small and growing vigorously.

AA TREX at one pound per acre controls carelessweeds less than one inch tall, says the agronomist. Higher rates (1 1/2 to 3 pounds per acre) of AATREX plus crop oil are required for larger carelessweeds. Weeds more than four inches tall may not be killed if under moisture stress. Some

small watergrass may also be controlled.

Sorghum on silty loam should be at least two inches tall and on fine sandy loam at least six inches tall before applying AATREX. Do not spray the herbicide on loamy sand and herbicidal soil, cautions Metzger, since it leaches and will be absorbed by sorghum roots.

Crop rotations are important when using AATREX. Cotton, soybeans, vegetables and sugar beets may be severely damaged or killed if planted on the same land the following year. Reduce residues by using band treatments over the row rather than total spray coverage.

The cheapest chemical for controlling annual and perennial broadleaf weeds in grain sorghum is 2,4-D. However, Metzger emphasizes that this herbicide should be used with caution since sorghum varieties with wheatland parentage are easily damaged by 2,4-D. Nearby cotton or vegetable crops can also be severely damaged from spray drift.

Treat sorghum after the plants are at least six inches tall but before the boot stage. Weeds of various sizes can be killed but results can be slow. Minimize spray drift by using high gallonage (20 to 40 gallons per acre) and low pressure and spraying when winds are less than 10 miles per hour. Vapor drift can also be reduced by using low volatile formulations such as amines or lithium salt. Ester formulation should not be used.

Do not mix AATREX and 2,4-D since this may cause serious lodging and yield reduction in grain sorghum.

According to Metzger, Banvel also gives effective control of small annual and perennial broadleaf weeds. However, severe lodging and head blasting can occur if the herbicide is applied later than 25 days after planting or after head development has started. Reduce sorghum injury during later applications with an improvised shield to keep the chemical off the plant, especially the whorl portion.

Although Banvel is not as toxic to cotton as 2,4-D, it can cause severe damage to soybeans and vegetables. Follow similar spray precautions with Banvel as with 2,4-D.

Karmex gives excellent control of carelessweeds that emerge after late irrigation in 15-inch or taller grain sorghum. This herbicide produces no soil residue and can also be used in six-inch cotton to control carelessweeds.

Metzger recommends the producers select the best possible herbicide for the job at hand. Read label instructions thoroughly and then follow them closely.

Timely tillage practices are also important in an overall weed control program, adds the agronomist. Use these in conjunction with herbicides to keep fields weed-free.

Visiting in the home of Mr. and Mrs. Jiggs Hinton this past week were Mr. and Mrs. Jack Ward of Foss, Okla., Mr. and Mrs. F.P. Hayes of Pampa, Mr. and Mrs. Claude Hendricks and Bryan of Amarillo, and Mrs. Johnnie Wiseman and Mike of Dumas.

Visiting in the Stanley Ryan home this week are Kevin and Lisa Earles of White Deer.

Roll Top Desks Back In Style

The old-fashioned roll top desk isn't old any more.

Consumers are clamoring to buy modernized versions of roll top desks as new production announcements Jan Slaugh, Extension housing and home furnishings specialist at Texas A&M University.

The "new" roll top desks have nylon tracks for slats to roll on, allowing for more dependable rolling action than the original roll tops. The rolls easily and stays neatly in its track.

Roll tops are scaled for smaller apartments. You can conveniently roll the top over work without putting it away yet still hide the clutter.

Styles and prices of the roll tops range widely. Most are though, are small in scale and are quite dainty, the specialist adds.

Visiting in McLean for most of this summer, is Bryan from Lubbock.

PAINFUL CORNS?

AMAZING LIQUID RELIEVES PAIN AS IT DISSOLVES CORNS AWAY
Now remove corns the fast, easy way with Freezone Liquid Freezone. Relieves pain instantly, works below the skin line to dissolve corns away in just days. Get Freezone... at all drug counters.

WOMEN PAST 21

With Bladder Irritation Suffer Many Troubles
After 21, common kidney or bladder irritations affect twice as many women as men and may make you tense and nervous from too frequent, burning or itching urination both day and night. Secondary, you may lose sleep and suffer from headaches, backache and feel old, tired, depressed. In such irritation, CYSTEX usually brings fast, relaxing comfort by curbing irritating germs in strong, acid urine and by analgesic pain relief. Get CYSTEX at drug stores. See how fast it can help you.

At a Chicago night club where Joe E. Lewis was appearing, a guest at a ringside table offered the comedian a bunch of choice grapes. "No, siree" said Lewis. "You don't catch me taking my wine in pills!"

The hole said to the sock, "I'm coming through." And the sock said to the hole, "I'll be darned if you do."

On a U.S. Naval vessel the officer of the deck asked the starboard lookout what he would do if a man fell overboard. "I would yell, 'Man overboard,'" he replied. The officer then asked what he would do if an officer fell overboard. The lookout was silent for a moment, then asked: "Which one, sir?"

The teacher in an overcrowded classroom started her morning attendance report: "Help! They're all here!"

A woman complained to a friend that the walls of her new apartment were so thin that the neighbors on either side could hear everything she said.

"Oh, I think you could eliminate that trouble," the other replied. "Just hang some tapestries over your walls."

The woman considered the suggestion briefly, then shook her head. "No, that wouldn't do," she replied. "Then we couldn't hear what they say."

Vitamin A Deficiency Usually A Drought Problem

Cattlemen should be keeping a closer eye out for vitamin A deficiencies where drought conditions have reduced the quality of the hay and forage they normally feed their livestock.

Breeding cows that are vitamin A deficient will probably give the stockman his most harmful and most costly problem, according to L. A. Maddox Jr., Extension beef cattle specialist. While breeding cows that are deficient in the vitamin may continue to have estrus periods, fewer cows become pregnant. If the pregnant animal is severely deficient, she may abort the calf or give birth to dead, weak or blind calves.

Cattle can store the vitamin, but calves at birth have practically no body storage of carotene (vitamin A) and they must depend on a supply from the colostrum or milk. Younger animals tend to show signs of vitamin deficiency in less time than older ones, but there are differences among individuals of the same age who receive the same treatment.

Calves weighing between 250-400 pounds may show deficiency symptoms in 40-80 days. Those above 400 pounds show symptoms in 80-140 days and older cattle show signs in 100-150 days, Maddox notes. To have sufficient vitamin A to be able to save their calves, cows must have good green hay, ample silage, vitamin A fortified concentrates or synthetic vitamin A.

Synthetic vitamin A can be mixed with feed, injected intramuscularly and/or administered in controlled drinking water. Maddox reminds stockmen that products containing vitamin A should be stored in cool, dark places because the vitamin loses its potency when exposed to sunlight, air and heat.

Alfalfa and silage are two of the better natural sources of the vitamin. A bright pea green color is usually a good indicator of vitamin potency in hay, but it isn't completely reliable, Maddox says. Hays that contain molds as a result of heating have probably lost some or all of their vitamin A potency. Chemical testing procedures give the most reliable determination of the vitamin.

One symptom of the early stages of vitamin A deficiency is night blindness, but other signs such as watering eyes and some swelling joints are easier to recognize, he says. In the latter stages cattle become less alert and lose their appetites. Other symptoms of prolonged vitamin A deficiencies are nasal discharges, rapid breathing, staggering gait, convulsions, or complete blindness.

Another sign that is characteristic of the vitamin deficiency is sluggishness. A staggering gait has also been noted. If this condition goes unremedied, the cattle will become unmarketable and will eventually die.

W. E. Rainwater of Uvalde is visiting in McLean this week. Mrs. Agnes Passmore of Oklahoma City is visiting with Mrs. Homer Abbott.

STAY AWAKE ITCHING?

Let doctor's formula stop it. Zemo speeds soothing relief to externally caused itching of eczema, minor rashes, skin irritations, non-poisonous insect bites. Desensitizes nerve endings. Kills millions of surface germs, aids healing. "De-itch" skin with Zemo, Liquid or Ointment. Quick relief, or your money back!

Gas and heartburn?

Di-Gel contains a unique anti-gas ingredient, Simethicone. This unique discovery breaks up and removes painful gas-bubbles. Your relief is more complete because Di-Gel takes the acid and the gas out of acid indigestion. Get Di-Gel tablets or liquid today. Product of Plough, Inc.

Helps Shrink Swelling Of Hemorrhoidal Tissues

caused by inflammation Doctors have found a medication that in many cases gives prompt, temporary relief from pain and burning itch in hemorrhoidal tissues. Then it actually helps shrink swelling of these tissues caused by inflammation. The answer is Preparation H. No prescription is needed for Preparation H. Ointment or suppositories.

Good Intentions May Be Poor Fish Management

Texas Parks and Wildlife Department officials ask that fishermen not "stock" public waters with fish they have caught--at least not without checking with local authorities first.

Some well-meaning sportsmen recently decided to stock white bass in the North Concho Reservoir in West Texas, not knowing the lake was the site of a department walleye experiment.

The lake had been experimentally stocked with about 700,000 walleye fry. The white bass in an extremely predatory fish, and the ones dumped into the lake are expected to wreak havoc with the tiny walleyes.

HAVE FUN!

By JEE BRYAN Mother (at dinner) Johnny, I wish you'd stop reaching for things. Haven't you got a tongue? Johnny: Yes, but my arms are much longer.

Bert: Bet you a quarter I've got the hardest name in the world. Al: O.K. What's yours name? Bert: Stone. Al: Pay me. My name's Harder.

Teacher: What three words are used most by students? Student: I don't know. Teacher: Correct.

MR. AND MRS. DAN ESTES

Rhonda Stewart and Dan Estes Exchange Wedding Vows In Bride's Home

Miss Rhonda Stewart and Dan Estes were married Friday, at 6:00 p.m. in an informal double ring ceremony read by the Rev. Z. A. Myers, in the home of the bride.

The bride is the daughter of Mr. and Mrs. Truitt Stewart of McLean. The bridegroom is the son of Mr. and Mrs. Albert Estes also of McLean.

The bride wore a sleeveless white knit dress and carried a bouquet of white carnations with white orchids in the center, trimmed in blue ribbon. The bridal attendants wore blue dresses with white trim.

The bridal party was Misses Letha Estes and Trudy Stewart, sisters of the bride and groom, as bridesmaids, Mrs. Paula Molone of Amarillo, also sister of the bride was Matron of Honor.

Serving as best man, was the twin brother of the groom, Harold Estes. Toni Bohlar and Linda Harkins lit the candles.

Mrs. Barbara Caldwell accompanied Mrs. Suzie Simpson of Amarillo, cousin of the bride, as the sang "The Twelfth of Never". The ceremony was concluded with the singing of "The Lord's Prayer."

A reception followed. The three-tiered wedding cake and punch was served to 24 guests by Suzy Simpson and Kathy Estes.

TRAVEL AND VACATION TIPS

Here's a new wrinkle on how to look great when you get where you're going: Unpack the clothes you expect to wear first and hang them on the shower curtain rod over the bathtub. Then turn on the hot water and let the steam rise. Wrinkles will fall out after a half hour and natural fabrics will dry quickly and smoothly.

For traveling with a freer mind, the small premium for complete insurance on your luggage, clothes and personal possessions is a great investment.

Taking your foreign-made camera overseas with you? Then make sure to register it with customs on the way out, or you might be charged import duties on it when you get back.

Mr. and Mrs. L. H. Earthman have returned home from Lubbock where they visited with their daughter and husband, the C. A. Farleys'. While there, their grandson, wife and daughter Paige flew from Waco to be with them, Paige is three years old and they hadn't seen her, so it was a joyful meeting.

Mr. and Mrs. Earthman are leaving for Florida soon. They will attend the wedding July 4th for their granddaughter Dianne Boyd to Bruce Woodbury and will spend the winter there.

MARY RUTH KESTERSON

Mary Kesterson Announces July Wedding Plans

Mr. and Mrs. A.G. Kesterson of McLean announce the engagement and approaching marriage of their daughter, Mary Ruth Kesterson, to Michael Alan Darsey son of Mr. and Mrs. Leslie R. Darsey of Alanreed.

Mary is a 1971 graduate of McLean High School. Mike is a 1969 graduate of McLean High School and attends Texas Tech University.

A July 30th wedding is planned.

Cook Fish Over The Coals

Summer is here, and with summer comes the time for those backyard and picnic cookouts. In Texas a real favorite for cookouts is barbecue -- but barbecued what? Have you ever considered fish fillets? Small, whole, pan-dressed fish, fillets or steaks from larger fish and shell-fish are all well-suited to outdoor cookery. For success, however, it is necessary to remember two basic features of fish.

Fish cooks quickly, and it won't take as long to cook as other meats. When it becomes overcooked fish is dry and falls apart. It is low in fat which is great for weight watchers, but a bit of precaution is necessary to protect the flavor and texture of the flesh.

Basting with a barbecue sauce which contains some fat or oil will give a marvelous flavor to the fish while keeping the flesh moist and protected from the direct heat.

For that good smoky flavor soak wood chips from oak, hickory or maple for at least one hour in water and put them on the charcoal. As the chips flame up add more wet chips.

The following recipe is suitable for any type of fish fillet. Other free recipes can be obtained by writing to: Outdoor Fish Recipes, Texas Parks and Wildlife Department, Austin, Texas 78701.

- Barbecued Fish Fillets
- 2 pounds fillets
- 1/4 cup chopped onion
- 2 tablespoons chopped green pepper
- 1 clove garlic, finely chopped
- 2 tablespoons melted fat or oil
- 2 can (8 oz.) tomato sauce
- 2 tablespoons lemon juice
- 1 tablespoon Worcestershire sauce
- 1 tablespoon sugar
- 2 teaspoons salt
- 1/4 teaspoon pepper

Cook onion, green pepper, and garlic in fat until tender. Add remaining ingredients and simmer for five minutes, stirring occasionally. Cook. Cut fillets into serving-size portions and place in a single

layer in a shallow baking dish. Pour sauce over fish and let stand for 30 minutes, turning once. Remove fish, reserving sauce for basting. Place fish in well-greased, hinged wire grills. Cook about four in-

ches from moderately hot coals for eight minutes. Baste with sauce. Turn and cook for seven to 10 minutes longer until fish flakes easily when tested with a fork. Serves 12.

Last year, all John Benson saved was \$54.32.

This year, he joined the Payroll Savings Plan.

Poor John. Money just seemed to slip right through his fingers. Every time he planned to stash something away, there wasn't anything left.

Then John decided to join the Payroll Savings Plan where he works. Now, an amount he specifies is automatically set aside from his check before he gets it. And invested in U.S. Savings Bonds.

Because John has become such a systematic saver, he's almost forgotten about it. When he gets around to remembering, he's going to have quite a nest egg laid away.

And now there's a bonus interest rate on all U.S. Savings Bonds--for E Bonds, 5 1/2% when held to maturity of 5 years, 10 months (4% the first year). That extra 1/2%, payable

as a bonus at maturity, applies to all Bonds issued since June 1, 1970... with a comparable improvement for all older Bonds.

If you keep forgetting to save something out of your check, join the Payroll Savings Plan and let somebody else do the remembering for you.

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.

Take stock in America. Now Bonds pay a bonus at maturity.
