VOLUME 73

McLEAN, GRAY COUNTY, TEXAS THURSDAY, JULY 14, 1977

NUMBER 28

## Revival Service To Be Held At Local Church

The Carter Family, featuring Jimmy & Brenda, with Todd & Tim will be in revival services July 20-31 at Assembly of God Church at 4th and Main Street.

This family is blessed with an exciting ministry in song and the preaching of God's Word that will excite you as you listen.

Jimmy was called of God at the age of 16 yrs. to preach the Gospel and has been traveling preaching and singing since that time. Having traveled extensively this family has heard the heart throb of America.

You are urged to attend these services nightly at 7:30 p.m. and let them share this exciting message with you.

## Weight Machine Film To Be Shown

The Tiger Booster Club will be showing this film to all persons interested.

The film will be shown at the High School auditorium, Friday, July 15 at 8:00 p.m. The three new coaches will be on hand to get acquainted with the people of the community. They are encouraging all the boys and girls and their parents to see this film.

Talk before hiring--that sister, yard man, household help. Clarify duties, hours and pay, advises Claudia Kerbel, consumer information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

## Alvis H. Moreman Buried At Alanreed

Funeral services were held at 3 p.m. Friday in the Alanreed Baptist Church for Alvis Herd Moreman, 78 of Alanreed. Officiating was Rev. M. B. Smith of Pampa. Burial was in the Alanreed Cemetery by Lamb Funeral Home.

Mr. Moreman was born in Memphis and was a longtime resident of Alanreed. He owned the M&M Grocery Store in Alanreed from 1931 to 1960 and was a 50 year member of the Masonic Lodge.

He is survived by a brother-in-law, Ralph Palmer of Pampa; three sister-in-laws, Mrs. Blance Grice of San Antonio, Mrs. Lucille Moremar of Oklahoma City and Mrs. Carolyn Moreman of Dallas; and several nieces and nephews.

## Baptist Youth Camp July 25-29

Youth camp will be held on July 25-29, according to Joe Holt, youth director at the First Baptist Church. Pan Fork Camp is located between Shamrock and Wellington. All youth are urged to attend if possible.

Anyone interested in starting a fast pitch soft ball team is asked to contact Carey Don Smith or Thacker Haynes.

**YANKEE INGENUITY:** The first patent granted an American invention was for a scythe-grinding machine in Massachusetts in 1645.

CHEERLEADERS PICTURED: Front-Leisa Gabel, Rozanna Eck; Back-Robbie Turpen, Diane McAnear, Tonue Hathaway, Ann Skipper, and Jamie Trew.

## Area Cheerleaders Attend NCA Camp

Pictured are the cheerleaders from McLean school. The cheerleaders just completed a weeks National Cheerleaders Association camp on the Panhandle State University campus. Forty-nine high schools with fifty-one squads from five different states attended the camp under the direction of 14 NCA instructors.

Instruction in mass cheers, Pom Pon, tumbling, and the organization of pep rallies. Lecture sessions were held each afternoon on leadership, pride, school spirit, crowd psychology and good public relations with students, faculty, administration and fans.

Cheerleaders pictured are: (Front) Leisa Gabel, Rozanna Eck, (Back) Robbie Turpen, Dian McAnear, Tonue Hathaway, Ann Skipper, and Jamie Trew.

## Eva Lena Baird Dies In Ft. Worth

Funeral services for Mrs. Eva Lena Baird, 90, of Clarendon, who died in Fort Worth, were held at Citizens Cemetery with Rev. Paul Hancock officiating. Burial was by Robertson Funeral directors.

Mrs. Baird, born in Seymour, married Robert E. "Bob" Baird in 1907 in Motley County. She had lived in Donley county over 50 years and was a member of Church of Christ.

Survivors are a son, E. O. "Mike" of Fort Worth; three sisters, Mrs. Erma Piercy of Houston, Mrs. Marie Lyles of Lubbock and Mrs. Maude Nall of McLean; two grandchildren and five great-grandchildren.

## County Restores Vote Precincts

Election Precinct 4 has been restored to Alanreed and precinct 6 to the Laketon area through official action yesterday of the Gray County commissioners.

The resolution to restore the election precincts was passed on second reading in a special session of the commissioners court.

The two boxes were consolidated with Lefors and McLean three years ago when a state law was passed that required over 100 voters to constitute a precinct.

Judge Don Hinton said a recent law changed the requirement to 50 voters for each of the precincts. "This new law enabled us to reestablish the two voting precincts here."

## AC Advance Fall Registration Continues

Advance registration for the 1977 fall semester at Amarillo College is currently in progress and will continue through August 12.

Currently enrolled day and evening students wishing to advance register for fall may report to their academic advisors for academic advising and scheduling of classes.

New students should report to the registrar's office in the Administration Building for admission clearance, assignment of academic adviser and orientation appointment. Then they may report to the academic adviser for academic advising and scheduling of classes.

This advance registration is open to all students, including new students who wish to reserve their classes before regular registration.

Tuition and fees may be paid by advanced registered students until August 17 in the business office located in the Administration Building. If payment has not been made by that time, students will have to report to regular registration, said Fred Balderston, registrar.

Students unable to take advantage of advance registration will be able to enroll August 22 through 25 during regular registration.

## John H. Gudgel Funeral Services Held Tuesday

Funeral services for John Henry Gudgel, 74, who died Sunday, were held at 3 p.m. Tuesday at the First Baptist Church with Rev. Buel Wells, pastor, and Rev. Mike Sullivan pastor of Miami, First Baptist Church, officiating. Burial was in Hillcrest Cemetery by Lamb Funeral Home.

Mr. Gudgel was a native of Hollis, Okla. He moved in 1937 from Pampa to McLean. He married Buna Mullins in 1929 at Sayre, Okla. He was a retired farmer and a member of First Baptist Church.

He is survived by his widow; six daughters, Mrs. Betty Campbell, Mrs. Dorothy Steele, Mrs. Shirley Morris and Mrs. Mary Basham, all of McLean, Mrs. Marlene Hamby of Miami and Mrs. Arlene Back of St. net; three brothers, George, Charlie and Kenneth all of Bonham; 24 grandchildren and nine great-grandchildren.

## Lodge To Have Installation

The McLean Lodge # 8889 will hold an open lodge meeting for installation of officers on July 14 at 7:30 p.m.

The public is invited to attend. Refreshments will be served.

## Bids open for phase of Interstate

Bids for the construction of the second phase of an Interstate 40 highway project in Donley and Gray counties will be received July 26 and 27 by the State Department of Highways and Transportation in Austin.

The 9.7-mile project extends from one mile west of Alanreed to a point east of Jericho.

The first phase, involving dirt work for the westbound lanes and installation of ramps and a rest area, has been completed. The second phase will include paving the westbound lanes and the rest area on the north side of the highway.

The third phase will include reconstruction of eastbound lanes and pavement of a rest area on the south side of the highway.

A separate contract will be required to build restroom and picnic facilities for the rest areas.

Engineer in charge of the work is Thomas R. Kelsey of Pampa. Supervisor is Amarillo District Engineer A.L. McKee. The project is funded by the 1977-1980 Interstate Construction and Right-of-Way Program.

## TIPS ON BEATING VACATION INFLATION

Planning can help you to cut your travel expenses by as much as 10 to 25 percent.

The typical vacation budget breaks down this way: car care, 30 percent; lodging, 19 percent; food, 23 percent; miscellaneous expenditures, 18 percent; and entertainment--the whole point of the trip--only 10 percent.

Whether you are taking a three-day holiday weekend trip or a two-week fling, Judi Hampton, consumer affairs director has this advice:

### TIP 1: CAR CARE

Get your car tuned up at least a week before the trip. It will save you gasoline and money. According to Ms. Hampton, misfiring spark plugs, faulty carburetor chokes and clogged air filters could lower gas consumption several miles per gallon. Have a complete lubrication and an overall checkup. This means looking at the battery, oil filter, cooling system, tires, lights, brakes, windshield wipers, fan belt, ignition system, springs, shock absorbers, and wheel alignment.

A car tuned to perfection can provide 25% better gas mileage.

A car tuned to perfection can provide 25 percent better gas mileage and prevent breakdowns. Also, know your travel route to avoid wasting gasoline.

### TIP 2: LODGING

Make overnight reservations in advance to avoid

disappointment. Ask about prices. Summer travel keeps hotels, motels and inns booked, especially the least expensive rooms. Guest houses and tourists' homes are usually less expensive than hotels and motels. Tipping runs higher in hotels

than motels.

There are a number of ways to cut down on room expenses. Use a roll-away bed instead of renting an extra room. Take along snacks and nibbles to avoid room service and coffee shop bills. If you're a big family, consider a room with an efficiency kitchenette.

You can always inspect your hotel and motel room before renting it. Confirm reservations. Your room is generally held until 4:00 p.m. If it is held for late arrival, generally you pay for the room unless cancelled before 4:00 p.m.

### TIP 3: FOOD

Good food ranges from elaborate souffles to hot dogs from street vendors. If you're in a hurry, excellent food is served in many cafeterias--and there's no tipping.

Reduce breakfast expense and ease the morning rush by taking along a plug-in coffeemaker kit with its own cups and a jar of instant coffee. Pick up fruit or canned juice and pack-

### Vacation Tips

(Continued from Page 1)

aged rolls or doughnuts the night before.

Picnicking will substantially cut food costs. Many states have roadside stops or rest areas, most with tables, many with shade and fire-place. Your picnic kit is straight from your own kitchen—knives, forks and spoons, bottle opener, paper cups, plates, towels; if you plan to barbecue, take a frying pan, safety matches, and a thermos bottle.

Many restaurants offer "take-out" service if you don't want to prepare the picnic. The money you save by breakfast on-the-run and picnic lunches can pay for one night's lavish meal.

#### TIP 4: MISCELLANEOUS

Here's the big area for economizing. Part of the secret is in packing. List the things you'll need, to

avoid buying what you already have at home.

A few musts: snacks, blankets, insect repellent, pre-moistened towelettes or damp washcloth, a good first-aid kit, emergency car kit, family prescriptions.

Where are you going? What will you be doing? A sports vacation calls for bathing suits, sunglasses, fins, snorkel, bathing cap and suntan lotion. The list is endless but so is the expense of buying any of these items en route. Take favorite sports equipment like golf clubs, tennis rackets, fishing rods and inflatable water rafts to avoid renting them.

Film bought at a discount store at home is cheaper than that bought at a major tourist attraction.

Take magazines, books, paper and pencil, small sewing kit. For the kids—comic books, paper dolls, coloring books, bat and ball, a magnetic checker set.

Did you tighten your Christmas card and gift-giving list last year? Why not cut down on postcards and "little gifties" for everybody back home?

#### TIP 5: ENTERTAINMENT

From the money you saved in the other categories, you can splurge on a few fancy restaurants, deluxe hotels, renting a sailboat for the day or buying a wonderful memento of the trip.

Better yet, start saving for your next vacation!

Sweatercoats for the fall 1977 wear deep arm-holes, large collars and long sleeves in angora, mohair, shetland and other wool blends, says clothing specialist Marlene Odle-Kemp with the Texas Agricultural Extension Service, The Texas A&M University System.

### Wheat is Minor Cost In Price of Bread

Did you know that, according to the U.S. Department of Agriculture—

• A bushel of wheat provides the flour for about 70 one-pound loaves of white bread?

• A \$1 per bushel increase in the farm price of wheat means the net cost of the wheat ingredients in a one-pound loaf

of white bread will increase value of the wheat in a one-pound loaf of white bread re-

resented about 15 per cent of the retail cost of bread?

## News From ALAN REED

Visiting the Bill Crisp Sunday were their daughter, Mrs. David Frizel and children. Mr. and Mrs. Harrison Worsham visited in Clarendon last week with her parents, the Frank Crisp. They also met Mrs. Worsham's cousin and her husband from California there. Visiting here this past week with the Bert McKees and others were Mr. and Mrs. Jasper Elms of Lubbock, Mrs. Willie Guill, Lawrence Phillips, George Elms, Annie Brown, Bro. and Mrs. M. B. Smith, Bro. Mitch Phillips of Pampa, Mr. and Mrs. Hershel Palmer of Sanford, Mrs. Blanche Grice of San Antonio, Mr. and Mrs. Billy McKee and

girls of Groom, Mr. and Mrs. Ralph Palmer and children of Pampa.

Visiting the J. A. Hills Saturday were Mr. and Mrs. Sonny Morris of Pampa. Also spending this week at the Hills is Ty Hill of Lubbock.

Visiting Polly Harrison is her daughter Faye and children of El Paso. Mrs. Harrison and her daughter plan a tour of New Mexico this week.

Mr. and Mrs. Everett Hall of Amarillo visited friends here Friday.

Visiting the Danny Lees during the weekend were her sister and family of Amarillo and her parents from McLean.

Visiting the Skeet Lowerys here this week is Mrs. Lowery's mother to help with the new baby girl.

## Agricultural Protective Act Provides for Recovery Fund

AUSTIN--The Texas Agricultural Protective Act and the Citrus Bonding and Licensing Law were strengthened recently when Governor Dolph Briscoe signed House Bill 1745 into law.

"This law will give added protection to the state's fruit and vegetable producers," Agriculture Commissioner Reagan V. Brown commented, "providing an industry-wide fund for producers losing money in a marketing transaction."

Producers can file a claim against the fund, the Produce Recovery Fund, to be administered by a board headed by the Agriculture

Commissioner and three other members. Included will be a producer, a licensed commission merchant and a member of the general public.

Monies for the fund will be supplied by a fee paid by commission merchants at the time of licensing. If a claim is paid against a merchant, he must repay the fund or lose his state license for a four-year period, Brown explained.

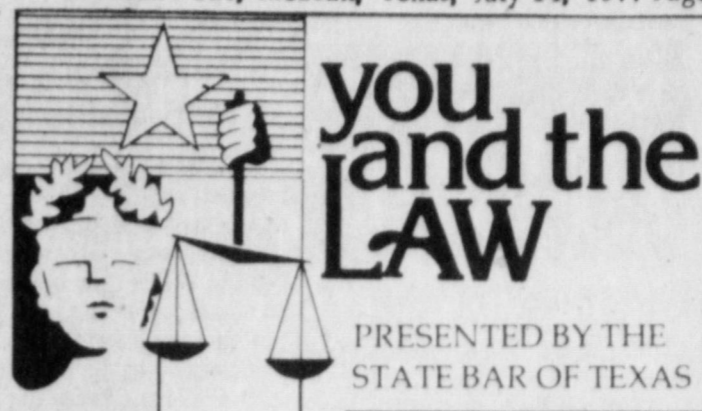

"The fund will replace an efficient bonding procedure," Brown said, "which created problems for everyone involved."

"This bill will provide the necessary protection for farmers and is a commendable effort by the produce industry at self-regulation," he said.

Brown also warned producers to be sure they were dealing with a licensed dealer and added that claims could not be filed against a dealer registered as operating on a "cash only" basis.

The new regulations will go into effect September 1.

Columbus died at Valladolid, Spain 1506.

PRESENTED BY THE STATE BAR OF TEXAS

**Q:** I'm having a hard time finding a job, and I'm afraid I won't be able to make my next rent payment. Can my landlord lock me out of my apartment if I fail to pay my rent?

**A:** You cannot be locked out of your apartment for failure to pay rent. However, the landlord may change the door lock when your rent is overdue. If he changes the lock, he must leave a notice on the door telling where the key can be picked up at all hours, regardless of whether the overdue rent has been paid.

**Q:** In my divorce proceedings two years ago, my wife and I agreed to use the same lawyer. He agreed to a fee in writing. But, at the trial, he told the judge that he needed twice as much. The judge awarded him half of what he wanted, but it was still more than the written agreement. I paid up, but I still wonder if I have any recourse.

**A:** Fee misunderstandings are the most recurring problem in the lawyer-client relationship. A lawyer and a client should always settle this at the beginning. In your case, if you feel that you have been wronged, you perhaps can find relief through a civil suit. Also, if you believe there was professional misconduct, you can write the General Counsel's Office at the State Bar of Texas. The grievance process, however, has only the limited power of disciplining lawyers—it does not have the power to get your money back.

**Q:** What is the law re-

garding a dog that barks day and night? We live in a mobile home park, and our next door neighbor has a St. Bernard capable of barking four hours non-stop. We've called the police on several occasions, and the people put the dog in a shed. That doesn't help—he just sticks his head out and keeps barking!

**A:** There is a remedy if you can prove that the barking constitutes a nuisance which would offend the sensibilities of an ordinary person or deprives you of the right of quiet enjoyment of your property. You'll have to bring a suit against the owner of the dog for abatement of nuisance and a suit against your landlord for damages caused by breach of the implied covenant of quiet enjoyment.

**Q:** My son was arrested while he was involved with some other boys and their case is going to come up in juvenile court. We believe he got in trouble because of the influence of these other boys. Can we keep him from running around with them?

**A:** If a juvenile court declares your son to be either a delinquent or a child in need of supervision, the judge could order the other boys to appear in juvenile court to be questioned about why they shouldn't be prohibited from seeing your son. The judge then could issue an order prohibiting these boys from associating with your son.

## AC To Offer Tennis Classes For Children

Two tennis classes for children will be offered July 18 as a part of the Community Service program at Annillo College.

"The classes will teach children the basics of tennis," said Charlie Gaither, supervisor of Community Service at AC.

The first class will be offered to children ages 6 through 10 from 10 to 11:30 a.m. The second class will be offered from 11:30 a.m. to 1 p.m. for children ages 11 through 16.

The classes will meet Monday through Friday in Room 124 of Badger Gym on the Washington Street campus. Red Myers, director of campus athletics, will instruct the two-week courses.

For more information call Gaither or the register's office at AC.

The duration record for walking on hands is 871 miles by Johann Huslinger, who, in 55 daily 10-hour stints averaged 1.58 m.p.h. from Vienna to Paris in 1900!

## AGAPE LOVE

One cannot go far in the study of Christianity until he comes to the command of Jesus to love his enemy (Matt. 5: 44). To many this is an impossibility. One reason for the difficulty is that our English word "love" has been made to do services for several Greek words. The word Jesus uses here is agape, the highest type of love. It is a love of the will, an attitude that recognizes the worth of its object, that wishes only good. It does not indicate an approval of all that is done by the one loved; it does not indicate admiration for the practices of the one loved; it may not "like" the disposition of the one loved.

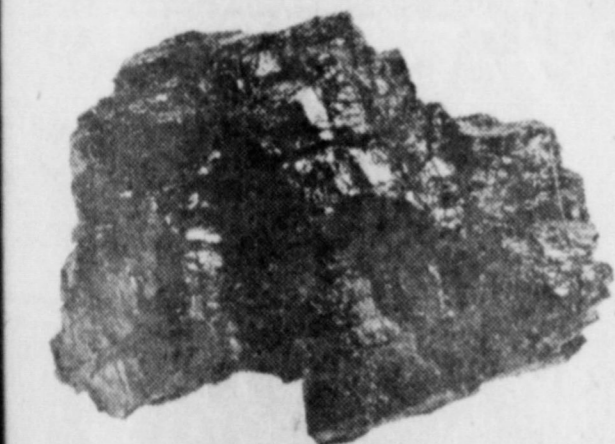

The agape type of love is the kind God has for the sinful world (John 3:16). God does not wish to clasp the sinner in his embrace and endorse his sins. But his heart goes out to him, wishes to help him, seeks his recovery. He recognizes the soul of every man to be of inestimable worth. He does not approve of the sinner but he loves him.

This agape type of love is what we are to have for all men. In this way we can love those whom we have not seen. Some have wondered how they can love the heathen in distant lands. You recognize their humanity, the dignity of their person, their worth in God's sight; you long for their good.

Now it can be seen how we can love an enemy. We do not have to admire him; we do not like his ways; we do not enjoy his company. But we recognize his worth; we respect him as a man made in God's image; we desire for him only the good; we wish him no harm whatever; our prayers are for him; we are willing to help. But if we wish him any hurt or if we rejoice at his misfortune, then the agape love is not present.

### Fine Print

"The large print giveth, and the small print taketh away." That old joke about insurance policies has often had a good deal of truth in it. Many a crucial clause has been tucked away in typographical obscurity.

But in recent years, the size (sometimes even the color) of the print in insurance policies has been widely regulated by statute.

For example, a common requirement in the field of health insurance is that the exceptions must be printed at least as plainly as the benefits. Take this case:

A man disabled by rheumatism tried to collect on an insurance policy that promised, in large lettering, to pay benefits for six months. But down in the fine print, the policy cut the payments to only one month for certain diseases — including rheumatism.

Was the man bound by the one-month limitation? A court decided that he was not. Because of the substandard size of the print, said the court, that part of the policy simply had no legal effect.

Even if the print is large enough, it will ordinarily not carry as much weight as language that is typewritten or handwritten into the policy.

Another case involved a life insurance policy in which the words "Double Indemnity For Fatal Accidents" had been inserted by typewriter.

Later, double indemnity was held to be payable, even though there was conflicting language in the printed portion of the policy. The court said that words specially inserted were more likely to be correct than words buried in a standard form.

Of course, anything that clarifies an insurance policy also puts a greater responsibility upon you as the policyholder. The clearer the policy, the less grounds you have for arguing that you did not understand what kind of protection you were getting.

Accordingly, it makes good sense to examine a policy at the time you buy it, rather than waiting until you have suffered a loss. Not even large print, not even a special notation, can tell you anything unless you read it.

A public service feature of the American Bar Association and the State Bar of Texas. Written by Will Bernard.

Note to the college graduate: The world is all wet; don't burn up all your energy trying to set it on fire.

## Hill Reunion Held In McLean

The Hill Reunion was held July 3rd and 4th at the McLean Country Club with over 100 relatives and friends signing the register from seven states.

The program for Sunday was opened at 11 o'clock with a silent prayer for all the deceased relatives since the last reunion of 1975. Honored people for the 1977 reunion were: Mr. J.M. (Short) Hill, McLean; Mr. J. A. (Dick) Hill, Alanreed; Mrs. Tommie Palmer, Borger; and Enloe and Nola Crisp of McLean. Mrs. Ruby Myrtle Hill, would have been among those honored, but she was unable to attend due to ill health.

Many beautiful songs were sung by: Ella Mae Massey, Roy Dee Hill, and Sindy and Leslie Wallace. Frank Todd played "Airport March" on the trumpet. Many pictures were taken and a lot of visiting was done by everyone present. Lunch was catered and it was thoroughly enjoyed by all.

Program of July 4th was opened at 11 o'clock with a prayer by Rhone Hill. Minutes of the last reunion was read by Sec. Shirley Todd. They were approved. Announcements were made by president Walter Lee Hill. The time for the 1979 reunion was left open, to be decided on later, either the weekend before July 4th of the weekend after July 4th.

Officers elected for 1979 are as follows: President - Walter Lee (Blackie) Hill, Vice President - Mildred L. Hill, Sec. - Tres - Shirley Todd, Assistant-Sec. - Pansy Bryant. Entertainment and Food Committees are to be appointed later.

Songs were sung by: Roy Dee Hill, Eugene and Brenda Galley, Sharla Todd and Frank Todd. Much visiting, joke telling, picture-taking, swimming, and eating was enjoyed by each one present.

Those present were: from Oklahoma: Decima Brown and Larry and Carol Williams; from Virginia: Walter Lee and Rose Hill; from California: Neil and Phyllis Hill; Roy Dee Hill, Rhone and Jody Hill, Rex and Debbie Williams, Neil Williams, Kevin William; from Alabama: H. Odol and Christine Hill; from Arkansas: Buddie and Mildred Hill; James and Pamela Young, Dale and Angela; from Florida: James and Gloria Glenn and Lori; from McLean: Mrs. Shirley Todd, Terry Frank and Sharla, Bobby Jack and Ella Mae Massey, James and Pansy Bryant, April and Skyla, J.M. and Fleta Hill, Enloe and Nola Crisp, Wildy Griffin, Eugene and Brenda Galley, and Jake Bible.

**Fishing Report For Area Lakes**

This is the fishing report for June 20 through July 5th compiled by the Canyon Fisheries Lab, Texas Parks and Wildlife Department.

**Lake Greenbelt**--Water temperature is not 76 and the lake is down 8 inches from the last reporting period. Fishing is very good for channel catfish along the rip rap of the dam. Fishing is best at night. Catfish to 10 pounds have been caught. Largemouth bass fishing is fair for fish up to 6 pounds. Lots of bullheads and sunfish are being caught, however, fishing for crappie and walleye is slow.

**Lake Meredith**--Walleye fishing is still good off the rocky points. Fish to 7 1/2 pounds are being caught. Nightcrawlers are the best bait. Fishing for channel catfish and flathead catfish is good. Numerous fish in the 3 to 10 pound class have been caught. Fishing for all other species is slow. The water temperature is 72° at 5 feet and the lake level is not 84 feet.

**Lake Baylor**--Fishing is good overall at the lake. Good numbers of channel catfish are being caught at night. Bass fishing is a little slower than earlier in the year but numerous bass in the 3 1/2-4 pound size have been caught and several "lunkers" to 6 pounds plus two bass which weighed 8 1/2 pounds. A few sunfish and crappie are being caught.

**Lake McClellan**--Channel catfishing is good near the dam during the day using nightcrawlers. Most are in the 3 1/2 to 4 pounds class though fish to 8 1/2 pounds have been caught. Fishing for bullheads is excellent. A few crappie are being caught and bass fishing is poor. The water temperature is 76° and the lake is still full and fairly turbid.

**Lake Marvin**--Fishing has been pretty good for channel

catfish to 6 pounds with several smaller fish being caught. Sunfishing is good but the fish have moved to deeper water and the fishing is somewhat harder. A few bass in the 1 1/2-2 pound sizes are being caught.

**Copper Breaks State Park Lake**--Very little fishing pressure has occurred at the lake recently. Fishing for channel catfish and bullheads is fair at the baited area near the bridge. Some bass from 1 1/2-2 pounds have been caught. Bankfishing for sunfish is fair.

**Lake Rita Blanca**--The lake up 2 additional feet and fishing has remained very good for bass and channel catfish. Some of the catches include: Steve Ros of Amarillo-3 1/2 pound channel catfish, Jerry Curtis of Amarillo-27 bullheads, Richard Lindsey of Dalhart-20 bullhead Mitchell Vinson of Dalhart-a 5 pound catfish, Sid Wallace of Dalhart-a 3 1/2 pound catfish, Jackie Gray of Dalhart-a 6 pound channel catfish, and Travis Home of Dalhart-a 6 pound channel cat and a 3 1/2 and 4 pounder plus a 3 1/2 pound bass. Most of the bass have been 3 pounds or better.

**Lake Mackenzie**--Fishing for channel catfish is good for fish in the 2 1/2 to 4 pound range. One flathead was caught which weighed 6 pounds. Fishing for bass, crappie and walleye is slow. The lake is 85 feet deep and still fairly turbid.

"I suppose after you get out of the service you'll be waiting for me to die so you can spit on my grave," barked the old sergeant. "Oh, no," replied the draftee. "After I get out of this uniform I won't want to stand in line again!"

## SICK PLANT CLINIC

A sick plant Clinic will be held Monday, July 18 in the Pioneer Natural Gas Building Flame Room, 220 North Ballard, Pampa, Texas. The clinic will be from 10:30 a.m. to 12:00 p.m. and from 1:30 to 3:30 p.m.

The clinic is a come and go affair for anyone with problems or questions about problem, sickly plants. Farmers homeowners and anyone with problems relating to diseases, insects, soil fertility and general landscape plants are invited to bring your plant specimen.

This clinic is sponsored by the Gray County Horticultural Program Building Committee in cooperation with the Gray County Extension Office.

There will be four Area Extension Specialist present to help in identifying your problem and making recommendations for control or prevention. The Specialists scheduled include: Dr. Bob Berry, Pathologist; Dr. Carl Patrick, Entomologist; Jim Valentine, Soil Chemist; and Everett Anne, Landscape Horticulturist.

## CATTLE PRICE FORECASTS

The Western Livestock Round-up and Extension-sponsored, livestock marketing information project, states that substantial price increases in slaughter cattle are unlikely. They state that choice slaughter steer prices are expected to average from the high \$30's to the low \$40's for the remainder of the year.

Changes in feeder cattle prices will be subject to slaughter cattle prices, but expected low grain prices may keep prices of lighter yearlings above heavier feeder and slaughter cattle prices. However, abundant grain supplies and excess feedlot capacity will support demand for feedlot replacement cattle over the long run.

**PLANTS NEED WATER**  
 The hot, dry summer weather has certainly increased the water requirements of most plants. We usually get a lot of calls about dried, brown leaves about this time of the year. Many times this condition is caused by a lack of enough water in the root zone of the soil.

Deep soaking by letting the water run slowly on the surface helps plants have enough water for these hot, dry, windy days. Also a mulch over exposed bare ground helps conserve the soil moisture. Newly planted trees are especially in need of extra water and attention during this time. Make sure the water runs long enough to get down to the root zone of the tree or shrub. Shallow, frequent waterings may keep the surface fairly wet and still leave the subsoil area dry.

Also watering by use of sprinkler can cause leaf spot-

U. S. DEPARTMENT OF AGRICULTURE SOIL CONSERVATION SERVICE

ing, burn and invite diseases to start. Another disadvantage of sprinkling is that a lot of the water is lost to evaporation.

## SUNFLOWER TOUR

A sunflower tour will be held Monday, July 18th beginning at 9:30 a.m. at the Southwestern Great Plains Research Center at Bushland. The tour should be concluded by noon.

## Gray County Farm News

Be sure to report your planted grain sorghum, corn and cotton by August 1. If you did not report your wheat earlier, you need to report it too. If none was planted, please make a zero acreage report for 1977 crops.

This is necessary for use in future programs. If cotton is not reported by August 1 the yield will be used as zero this year without adjustment.

The beginning loan rate for 1977 wheat stored in Gray County is \$2.25 per bushel. A premium is added for protein of 11 percent or more. Reduction is made for less than number 1 wheat.

In order to obtain a wheat loan, you need to bring your warehouse receipt to the county office. The receipt must show that storage has been paid through the 11th month after the warehouse receipt is issued.

Producers are reminded to file application for low yield payment within 15 days after harvest is completed on that farm if you think your farm may be eligible for disaster payment. You will also need to report the acres harvested and the production from those acres.

If you have fields that you will not harvest, they need to be appraised before you plow the field.

Some funds are available now under the ACP program.

This is for practices that you are ready to carry out now and can complete in this calendar year. Request must be filed before the practice is begun.

We did not have enough funds to cover all the requests under this program. We hope to cover more of them on funds cancelled by approved producers. If you received approval and have decided not to carry out the practice, please be sure to let us know immediately so someone else can use the funds.

## Speech, hearing

AUSTIN, Texas (Spl.) — Speech and hearing disorders are the most frequent handicapping conditions among children, says a University of Texas audiology specialist who advises early treatment for such disorders.

Dr. Frederick Martin says hearing loss has to be looked upon as a language disorder because it affects the development of normal speech and language patterns.

Speech patterns of a child with impaired hearing are developed late and poorly, he says. Children often are diagnosed as being emotionally disturbed or mentally retarded when actually they have language disorders that stem from hearing loss, he adds.

## Some Summer Health Hazards

Winter is commonly the time for colds and flu and sneezes. But there are some diseases and accidents that do their worst in hot weather.

Some of these are obvious. Sun strokes and heat strokes are more likely to occur in July and August than in January. Too much exposure and too much exercise in the hot sun may produce sun stroke. Prolonged excessive heat, either in or out of doors, can cause heat stroke. In either case it is important to keep the victim cool and call a physician at once.

Sunburn has hospitalized many a vacationer. Everyone should know, says the American Medical Association, that gradual exposure to the sun, beginning with a few minutes a day, is the recommended course. But many of us forget to watch the clock and to take precautions against sunburn in the excitement of the first day at camp or at the seashore.

The bacteria that cause diarrhea and stomach upsets multiply much faster in lukewarm foods and it's important to keep cold foods in refrigeration and to keep hot foods hot.

Swimming is fine exercise and also is good for cooling off on a hot day. Those with sinus or ear trouble should be careful about swimming. Swimmers should make certain that the water is safe from pollution. A clear mountain stream may look attractive. It also may be loaded with germs. And there still are cases of typhoid and dysentery from drinking untreated water. Campers can disinfect water by boiling or by commercial disinfectant tablets.

If there are horses or cows around, there is likely to be tetanus. Tetanus (lockjaw) is very serious. It can be prevented by injection of tetanus toxoid. If your family hasn't had tetanus boosters recently, get your shots before going to the country.

Flies, roaches, mosquitoes and ticks are troublesome in the hot months. Insecticides and screens usually can keep them under control. In tick country it is important to make a close examination after disrobing and remove all ticks.

In 1973 U. S. farm production expenses rose sharply to over \$64 billion—up nearly a third from 1972, said Agriculture Commissioner.

## LBJ project

AUSTIN, Texas (Spl.) — The Lyndon B. Johnson School of Public Affairs at The University of Texas has begun a project to prepare an administrative history of the Johnson Presidency, the first comprehensive administrative history of a 20th Century President.

Directing the project will be Prof. Emmette S. Redford,

who says too little attention has been given to program implementation and to the President's management of business of government.

The first book in the administrative history will be with the staffing of the Johnson Administration. Other volumes will range from White House operations to personnel policies.

Witness my hand this 6th day of July, 1977. Mrs. Stella Lee City Secretary 27-2c

## Use Care In Releasing Fish

When returning a hooked fish to the water the watchword should be handle with care.

The fish is a delicate creature and few can survive improper handling by anglers who mean well and release undersized or unneeded fish.

Proper way to handle fish which do not have sharp teeth is to grasp the lower jaw between thumb and forefinger. This technique can be used on largemouth bass, crappie, catfish and saltwater redfish.

Don't lift the fish out of the water, if possible. Hold the lower jaw and leave the fish in the water to support its body and internal organs. Remove the hook and release the fish.

Toothed fish such as walleye, saltwater speckled trout and many other marine fish, call for a different technique to avoid lacerated thumbs. To release the fish grasp them across the gill covers with a wet hand while removing the hook. This should be done while the fish is partially submerged.

A wet hand will prevent loss of the protective layer of slime which covers the fish's body and guards against disease and infections.

A few fish such as snook have sharp edges on the gill plate covers which can slice a thumb like a razor blade. They must be handled carefully by grasping the head.

Grabbing a fish around the middle and then squeezing is certain death for it. This bruises the body, mashes internal organs and probably breaks a few ribs.

And in the process some of the slime is removed. Tests at the Texas Parks and Wildlife Department have shown that fish treated in such a manner take as long as 22 days to die from the infection they receive.

### Soviet oil, gas

AUSTIN, Texas (Spl.) — While many eyes are on the oil of the Middle East, the eyes of two Texas scholars are on the oil and natural gas potential of the Soviet Union.

An economist, Edward Hewett, and a geographer, George Hoffman, of The University of Texas have begun a research project to assess the role of the Soviet Union in the future of world oil and gas markets.

Dr. Hewett will develop an econometric model to predict Soviet exports in oil and gas in the next decade. Dr. Hoffman will explore the impact of Soviet exports on Western Europe and the probable competition from future North Sea exports.

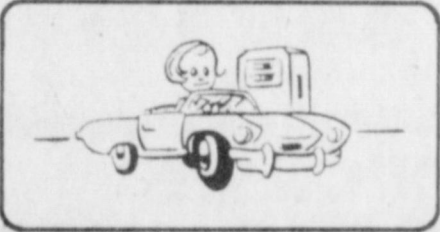

# Be your own Meter Maid

You can add up your groceries while you're buying . . .

You can add up your gasoline while you're buying . . .

## But

can you add up your electricity while you're buying?

## Yes you can... Here's How!

Learn to read your electric meter. It will let you determine how many kilowatt hours you use in a given period of time . . . an hour, a day, a month or a year. That's how electricity is measured — by kilowatt hours used.

Your residential electric meter will have either 5 or 4 dials

Electric meters are easily read from right to left as you look at the meter. If the pointer on a dial is between two numbers, write down the smaller number. When the pointer is directly on a number such as one (1) (see center dial above) then read it as 1 if the pointer on the next dial immediately to the right has passed zero (0). However, if it is zero (0) if the pointer on that dial to the right has not reached zero.

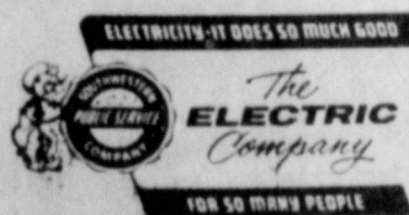

The dials above read (from left to right): 9-3-1-1-5. If, however, the pointer on the second dial from the right was between 9 and zero then the center dial would read as a zero.

Now let's read the same meter 24 hours later

The later reading is 9-3-1-3-8. Subtracting the first reading, 93115, from the new reading of 93138 — the difference is 23. Thus you would have used 23 kilowatt hours in the 24 hour period.

Now you can become a METER MAID and watch your meter like a miser if you choose. WE HAVE A BOOKLET CALLED "MANAGING YOUR ELECTRIC BILL" plus other WISE USE TIPS booklets that help you from wasting electricity and so help lower your cost. Any of these booklets are free for the asking at the Public Service office . . . come by and see us.

Clip this message — Save for reference.
