QUESTIONS THAT ARE ASKED ABOUT BANKING

### Who decides whether a Bank loan shall be granted?"

I Nmost banks there is a loan committee which passes on loan applications. This committee is made up of bank officers specializing in loaning work. In many instances this committee includes some of the bank directors. Loans up to a certain amount are usually passed on by a single officer of the bank in the loaning department. In a broad sense most decisions on loans are guided by banking laws and regula-tions, and by recognized principles of sound bank management. Generally speaking, char-acter, credit standing and collateral are the three most important factors to be considered in making decisions on loan applications.

This bank welcomes the opportunity to make useful loans, under sound banking requirements, which will help the borrower and the community, and safeguard the deposits entrusted to its care.

The Crane series may conceivably have another result, the withdrawal of Ozona from Permian Basin League play unless the league agrees to pay for outof-town umpires for both balls and strikes and bases. The league hind the plate, but the "home team" furnishes the base umpire.
