## SPORTS OPEN TRAINING FOR LEAGUE MELEE

Officially Entered  
In Permian Basin  
Circuit

### HARRIS MANAGER

Of '35 Team Back  
Uniform; Con Cox  
On Team Roll

Ozonia's Giants hoisted their flag in competition for the Permian Basin baseball league championship on Friday, March 25, 1936. The team, managed by Slim Harris, is the first to enter the league since the end of the 1935 season. The team is composed of the following players: Con Cox, pitcher; George Russell, president; and the rest of the team.

The decision to enter the Giants in league combat was reached by the fans after a conference Friday afternoon. Official entry of the Ozonia club had been withheld pending a decision among fans of the ability of entering the league. Wink had been admitted to membership. The distance between Ozonia and Wink and the facility of transportation were factors that held up the local decision. However, the final decision was to enter the league on an equal footing and contest the entry on its distant diamond as scheduled.

Slim Harris, ex-big league hurler and veteran of the second strategy, who piloted the team to a second-half championship last year and went into the off with Texon a favorite to win, has been signed again to manage the Giants through the season. Harris was sought by three other teams in the Permian league, but chose to come to Ozonia for another season with the Giants.

**Begin Practice**  
Practice began on the local diamond late last week. Tex Stuart, pitcher; Butch Lenz, third baseman; Carl Dorley, first baseman; Heatherly, second baseman; Weaver, center fielder; and manager Harris are the veterans of last year's squad who are already back in harness for the coming season. Conley Cox, Ozonia lead held down the second-base with Iranan with considerable success last season, will wear the uniform for the home town outfit this year. Cox will be stationed at short stop, according to present plans.

Pitchers are being contacted and wide, as are outfielders to fill in the gaps. Sergeant Al Crostite, who stood the Permian Basin sluggers on their ear last season, will be available for mound duty for the Giants this season. An exhibition game will be matched as soon as possible to give the players a work-out and fans a chance to see the 1936 edition in action.

The official league schedule is slated to open April 11. The schedule is in the making now and is expected to be announced in the next few days.

## Wayside Parks Add To Beauty Of Hiway Travel Thru County

An attractive wayside park has recently been completed on the highway east of Ozonia on land donated for the purpose by Mr. and Mrs. W. E. Friend, Jr. The park was built by the maintenance division of the Highway Department, the Ozonia Woman's Club assisting in planning and securing the site.

The club is making efforts to have another park built on the Barnhart road north of town, and to be given by Floyd Henderson.

Boy Scouts are sponsoring presentation of Joe E. Brown in "Bright Lights" at the Paramount Theatre Friday and Saturday of this week.

## Record Crowds At Annual Stockman Cooking School

Unusual Interest Displayed  
In Two-Day  
Kitchen Course

Unusual interest was displayed by Ozonia women in the Ozonia Stockman's second annual free cooking school presented in the Hotel Ozonia ballroom Thursday and Friday of last week. A large attendance was registered on each of the two days.

Mrs. Johnetta Howard, noted southern home economist, presented the demonstrations, lectures and recipes of the modern cook and home manager. Many valuable hints on kitchen efficiency, new methods in food preparation and new recipes of tasty dishes were offered by the lecturer in her two-day school.

Co-operating with The Stockman in presenting this feature for the benefit of Ozonia housewives were the West Texas Utilities Co., who prepared a modern electric kitchen, the Jacques Manufacturing Co., manufacturers of K.C. Baking Powder, Mrs. Tucker's Shortening, J. H. Williams & Sons, distributors of Gold Chain flour, Joe Oberkamp and Ozonia Hardware Co., distributors of Viko Aluminum, Ozonia Meat Market, Flowers Grocery, Mike Couch, Ozonia Laundry, and Ozonia Bakery.

In addition to these, prizes were offered in the daily drawings by Ozonia Drug Store, Smith Drug Store, C. G. Morrison Co., Lemmons Dry Goods Co., West Texas Lumber Co., and the participating merchants and manufacturers.

The Baptist Missionary Society drew the \$5 cash prize offered by The Stockman to the church organization having the largest attendance during the two-day school. Miss Ada Moss and sixteen girls from her home economics class attended the second day session of the school.

To all those merchants and food manufacturers who assisted in making the cooking school possible and to all others who assisted in making it a success, The Stockman offers its thanks.

Clyde Leath is reported ill this week.

## 89 Years Old

Mrs. Sarah Jane Byrd, widow of B. F. Byrd, pioneer resident and one of the organizers of Crockett County, celebrated her 89th birthday on January 19. Mrs. Byrd now makes her home with a daughter, Mrs. Lula Karnes, in Sonora. She is the mother of Mrs. Frank Friend of San Angelo, former Ozonia resident. She has two other daughters besides Mrs. Karnes and Mrs. Friend—Mrs. Mattie Jackson of Van Horn and Mrs. Josephine Bellows of San Antonio.

Mr. and Mrs. Byrd came to Crockett County in the early 90's, ranching about 30 miles south of Ozonia. Mr. Byrd was one of the first commissioners of this county. He died in 1928.

To Meet Crockett  
County Part

Red Cross chapters throughout the United States are being assessed for the relief of those in the disaster area of the New England states. The Crockett County chapter's quota was fixed at \$25. A little more than \$20 had been raised this morning. The contribution is to be forwarded tomorrow and those who wish to make a donation are urged to do so today.

## Water Heater Short Circuit At Hotel Is Cause Of Fire Call

A short circuited wire in an automatic, oil burning water heater in the basement of the Hotel Ozonia caused a run of the fire truck to the building last Friday afternoon.

Fire chief Joe North and his crew turned water from the emergency tank carried on the truck and cooled off the smoking fixture after the electricity had been shut off. No damage was done by the fire and the water heating equipment is being placed in first class condition by the hotel management.

Butane gas, to be used in science laboratories and in other department where needed, has been installed by the schools here. Joe Oberkamp, local dealer, installed the tank during the past week.

## Science Prof Gloats Over High Percentage Of His Tadpole Crop

If your lamb crop percentage is not high enough to permit you to brag when you come to town, try tadpoles.

"These 100 percent lamb crops are nothing," says Guinn Carruthers, science instructor in the High School. "Look at ours. The Dionnes are pikers. Why, there's a good 14,000 percent there if there's a pair of twins in the bunch."

And what he was pointing to was a small aquarium containing myriads of tiny tadpoles hatched in the glass container from a mass of eggs imported from a surface tank. That's production, opines the science prof.

## Mrs. Vic Pierce Is Hostess To Woman's Club Meet Tuesday

## Only Four Days Left For Auto Registrations

Collector Urges Motorists  
To Hurry To  
Avoid Rush

Only four more days remain in which to secure driver's licenses and auto registration before the time limit expires, attaches of Sheriff W. S. Willis' office remind Crockett County motorists.

Registrations and issuance of the driver's licenses still proceed at a snail's pace in the collector's office, it is reported, and several hundred are still to be issued in the short time remaining. Motorists are urged to attend this matter as soon as possible in order to avoid a last minute rush and possible inconvenience as well as penalties.

JUST AS WE THOUGHT

Texas Weekly: Certain Texas newspaper men, ever alert to see a story in the least suggestion of friction among political leaders, have been trying pretty hard recently to stir up a row over the plans for the coming State and National conventions of the Democratic party.

But the governor himself put an end to such a speculation when he told newspaper men that he was not concerned about the matter. "These little honors are not anything to fight about," he said.

That is just about what we would expect Jimmie Allred to say. None of the talk about his being slighted came from him and we were sure that he had no intention of fighting for "honors" at the hands of the party.

Detroit Free Press: Buying daughter a swell trousseau is not much of a compliment. It suggests that the groom won't be able to buy her any clothes for the next three years.

Providing Safety On Highways One Of Biggest Problems Of Road Engineers

Anticipated Increase In Motor Transportation Calls For Study

HOUSTON, March 24—Speeded up motor transportation, plus the tremendous increase in traffic on our roadways, imposes upon our highway engineers vitally serious problems, according to Col. Ike Ashburn, Executive Manager of the Texas Good Roads Association.

"Even though we are scarcely more than 50% complete in our state highway program, we find ourselves confronted with a problem of reconstruction and readjustment of our highway planning to meet the demands of safety in highway traffic," says Col. Ashburn.

Autos To Increase "Today there are 26,000,000 automobiles registered in the United States. Predictions are that by 1960 this number will have in-

creased to 31,000,000 passenger cars and 6,000,000 motor trucks.

"In Texas our registration is well in excess of 1,250,000, with greatly stimulated sales in the future anticipated by automobile dealers. Moreover, whether it be the inherent restlessness of our people or not, we are taking increasingly to the highways for both long and short trips. Here is a picture that augurs for an increase in traffic disasters unless something is done to make our roads more fool-proof.

"The Texas Highway Department already has gone far in two or three directions to act in the interest of safety. Wayside parks are attractive, but serve as a further purpose of clearing the roads of those who are weary from travel, and who seek a few moments relaxation or a bite to eat.

Safety Idea Gains "New highways include turn-arounds where the motorist may swing on widened and walled shoulders in safety to reverse his direction. The highways of Texas are well-marked and the signs 'Soft shoulders,' 'Slippery when wet,' 'Do not park on highways,' 'Do not pass cars on hill,' 'Curves,' 'Dips,' etc., all carry a warning to the motorist.

"Fifty per cent of the fatal accidents are to pedestrians on our through highways, footpaths or sidewalks which are actually to be used by the pedestrian must be made an integral part of the highway design.

"Elimination of curves, guarantee of proper sight distance, clear vision of intersecting roads, elimination of slippery surfaces, widening, multiple lanes, with safety devices for the dividing line in the middle of our highways, all must come.

"But they cost money. That is just one other reason why motorists' fees, a special obligation levied for special purposes, must be preserved for expenditure upon the highways. Constantly changing requirements for performance by highways means constant improvement in existing thoroughfares and new and expensive departures in highway design. The gasoline tax is a road toll, a tax by the mile paid by the motorist. Let us preserve it for roads."

JOHNSON ASTONISHED

From Paris Morning News—Adam Johnson, relief director for Texas, was astonished recently when he was informed of an order by Crockett County commissioners, pertaining to certain relief matters. This order set out that it was the duty of the several county governments to so manage their local affairs that just as soon as possible the county can notify the Federal relief agency that Federal help is no longer needed.

That was naturally a surprise to the director, who has been receiving continued calls for help and more help from all over the state. He said it was the first expression he had heard from any authoritative body anywhere, proposing to do the very necessary thing that will have to be done by not only Texas but all the states and their subdivisions in the near future.

The order was entered when Crockett County joined with two

adjoining counties in employing a welfare agent, which was a requirement previous to distribution of Federal surplus commodities, such as foods canned in government canneries and clothing made in sewing rooms supported by the government. The commissioners included in their order that they were convinced the Federal relief was instituted as a temporary expedient to help municipalities provide for their poor during the terrible depression.

Crockett County commissioners appear to have reached the belief that the state funds will be exhausted April first and that there is no justice in expecting the Federal government to continue indefinitely the dole system that has been carried to an extreme. They are wise men.

Doug Kirby was in Fort Worth on business the first part of the week.

Mrs. Hilton North is suffering from an attack of the mumps.

Judge and Mrs. Charles E. Davidson and Houston Smith are in Post, Texas, this week attending court.

### Hogs Tamed For 'Watchdogs' Strike With Viciousness Of Tigers

PORT WORTH, Texas—Javelina, speedy members of the hog family that for centuries have been bred for sport and thrills, have become into their own not as sub-stitutes for the lance of a mounted man but as "watchdogs."

Ranchers in the Brasada, a wild country between the Nueces and the Rio Grande, have found a use for these vicious sab-bered wild hogs that roam the area.

They make the best watch dogs in the world," says M. B. ... who recently brought sev-eral loads of hogs into the Ft. ... market.

... says the javelinas are as popularly supposed, vicious hogs whom they know, but on the contrary, are as gentle as kit-ten to their masters.

Catch them while they are pigs and keep them around the ranch and they will become as at-tached to any family as a watch-dog," he explains. "Trouble is ... are too good as watch dogs. They are faithful to their masters and will charge a stranger with-out warning and without provoca-tion. Those grinding teeth and two sharp tusks are mighty dangerous."

According to this Southwest Texas rancher, some of his neigh-bors who have raised the javelina as a watch dog now are getting their action.

"Ranch people in our section have a hospitable lot, we like to have company and we welcome strangers. It just don't make sense to invite a stranger to come in when one of those hogs is charg-

ing him like a bolt of lightning."

The javelina does not sound a warning when it charges. There is no grunt or bark to warn the un-initiated stranger. A sudden rush, accompanied by the fearful grind-ing of teeth, and before a man can sidestep or jump to safety, his leg is ripped from ankle to knee by the needle-like tusks.

Even the heaviest boots are not proof against the knifelike up-ward thrust of the javelina's sharp tusks.

### Health Dept. Urges Breeding Places Of Pests Be Destroyed

AUSTIN, Texas, March 25—In connection with the Clean Up Week to be held, beginning March 29, Dr. John W. Brown, State Health Officer, urges citizens of the State to give special attention toward destroying the breeding places of flies and mosquitoes.

With the usual accumulation of winter's debris, the necessity of its prompt removal from the health standpoint is apparent. Conditions that foster fly-breeding are definitely menacing to the welfare of all citizens, and particularly children.

Flies thrive in dirt. There is nothing they like better. They breed in yards, on plots of ground, and on farms where decaying ve-getable and animal matter and other fly-attracting substances have been permitted to pile up.

To prevent epidemics later in the season, it is essential that conditions that represent breed-ing places for flies and mosqui-toes be removed immediately.

All cesspools should be cleaned and limed and out-houses should be made fly-proof. It is not only good housekeeping but the best kind of common sense health pro-tection to remove all waste ma-terial in or around the yards of homes.

Health Week merely starts the campaign; the success of Clean Up measures rests entirely on the shoulders of the people of the State.

### ESTABLISHES BRANCH DEALER

Lee McCue, local plumber, has added Electrolux refrigerators and Rancho Gas to business, hav-ing secured the dealership for these lines through Joe Ober-kampf of Ozona, who will supply Mr. McCue and finance these two lines.

Mr. McCue has had consider-able experience in refrigeration and installation of gas. He stated that "this is the best thing that has ever been available to the ranchers, and provides a way of modernizing their ranch homes. Installation and maintenance costs so little in comparison to the conveniences and comforts, I feel sure that it is only the question of a short time until every ranch home will be equipped with this gas. With it they can have perfect refrigeration, cooking, heating, hot water and lighting. It is a work-saver, convenient and clean."

### The Woman Pays

The wife of an Arab went to her father with the complaint that her husband had boxed her ears. The wise old sheik reflected for a few moments, then did to her as her husband had done. Air Crash And  
Lava Bombing**

HONOLULU—To the army board of inquiry the mid-air collision of two bombing planes over Luke Field which plunged six men to a fiery death in January, may have been due to "extenuating circumstances," but old Hawaiians shake their heads and woe the men were victims of the wrath of Madame Pele, Polynesian goddess of fire.

The old woman of myth who so jealously guards Hawaii's volcanoes blasted those planes from the skies to revenge man's violation of her will in bombing Mauna Loa's lava flow the month before, natives assert.

Three of the fliers killed in the worst disaster of island army aviation participated in the bombardment which is credited with halting the boiling river of lava before it reached the water supply

of the city of Hilo. A fourth Lt. Charles Fisher, was one of the two men who escaped in the Luke Field crash.

Hawaiians when they learned man-made measures were to be taken in an effort to divert the crawling lava shook their heads, astonished and horrified that anyone would dare challenge their sacred Pele.

Island folk, who assembled in little clusters as close as they dared to the lava to chant and pray, warned that bombing was an ill omen.

When the great crash came, it only confirmed their superstitions. E. P. Lowe, executive secretary of the Hawaiian Jubilee Commission and recognized authority on Hawaiian lore and legend, said Hawaiians had their own explanation of the cessation of Mauna Loa activity.

"They will tell you that Madame Pele was possibly on her way to the ocean for a meal of fish," Low said. "Reaching the grasslands, she obtained other food and decided to call off the trip. That's what Hawaiians believe."

Skeptical though they profess to be, haoles (white folk) have due respect for the baffling superstitions of old Hawaii.

When the Pan-American Airways started to erect its Honolulu radio base at Mokapu Point, workmen discovered the site was an ancient Hawaiian burial ground. The base was moved to a less desirable point in deference to the tradition that bones of the dead must not be disturbed.

Disregarding superstition, a

Honolulu newspaper seven years ago erected a new plant over a Hawaiian grave yard. Shortly thereafter an executive and two employees of the paper died. Hawaiians blamed the spirits of the dead, angered at being aroused from slumbers.

Two Irishmen roomed in an eight-story apartment, on the top floor, and could not sleep on Sunday morning as the sun would shine in the windows and wake them up. They bought some black paint and painted the windows, and lay down to sleep. When they woke up they realized they would be late for work, as it was 7:15. They rushed to their jobs, and the foreman looked at them in bewilderment. Pat says:  
"Faith, and what's the matter, boss? We're only twenty minutes late."

[ QUESTIONS THAT ARE ASKED ABOUT BANKING ]

*"What obligations do I have to my Bank?"*

Your bank assumes important obligations when it accepts your money for deposit. In return it asks from you:

- Your confidence—for without the confidence of depositors no bank can operate successfully.
- Your support of its policy of making only sound loans of your money and that of other depositors.
- Your understanding and endorsement of the fundamental banking principle that in order to give you and the community a sound, well managed bank it must avoid operating losses in conducting its accounts. It does this through moderate service charges where circumstances require.

A bank is primarily a community enterprise. While good management and good service are essential it cannot operate successfully without the confidence and aid of its depositors.
