## RORRAL TALK

By Joe Cowan  
Ct. Co. Agricultural Agent

is the second in the series of individual comment on Rorral Talk. I should like to see the second in the series, which will be a more interesting article. Also, we can have different and varied information.

## Balanced Stock Mineral Feeding Program:

As the mineral content of the grass varies from time to time, it is very necessary to keep a good balanced mineral supplement available for the livestock. Minerals are available for horse, beef, sheep, and goats. Some sections of Texas livestock need very little mineral in the other parts of the country they may need quite a bit. In cases where the mineral is put out and the livestock do not need it at that time, it is in other cases where the mineral is licked as much as 1-3 per head per day for a period of 10 days to two weeks. The cattle were suffering from a mineral deficiency. As the cattle overcome their deficiency they will cut down to a 2 oz. per head per day. This is the correct amount they need for livestock to have as much as to the amount of mineral they consume, the mineral should be mixed with salt.

There are times when livestock lick salt and no mineral. If you mix them you force the livestock to take mineral. In a case where the mineral is wasted and you are not getting any benefit from it, you may work just where the cattle want and not salt.

Mineral and salt in separate buckets in the same box. The salt should be protected so as not to be lost from rain.

Minerals that are needed: Calcium, phosphorus, traces of copper, iron, and manganese. A deficiency of manganese causes the livestock to become irregular breeders.

Often ask "Do you think the stock need mineral?" No, look at a herd and say they do or not. The best time to place it is when they are properly, if they take it, if they leave it they do not.

## Crockett 4H To Attend Round-Up

Day Short Course Given Club Of State

Crockett County 4-H Club has been selected to represent the county at the State 4H Round-Up to be held at College Station Thursday and Friday, August 4 and 5. It was announced by Joe Cowan, Crockett County agricultural agent.

From this county who will be attending the two-day round-up are: Chas. E. Davidson, County Agent; Buddy Phillips, Lin Bernard Lemmons, and others. The round-up will be attended by club boys and girls from all over the state. It will be a short course for the boys with some of the college boys will be in charge of the program. The boys will be accompanied by Chas. E. Davidson, County Agent, and the local 4H Club Council. County Agent will be at College Station for a short course for agents August 2 and 3 and will represent the Round-Up.

ALE—Baldwin piano. Adwell at the Ranch. 7c

## 200 Feet of Oil In Byrd-Frost Tippett Test

### 10 Million Feet Gas Reported In New Crockett Well

Attention to Crockett County's rapidly expanding oil development was centered Tuesday on Byrd and Frost and Dallas and others, No. 1 J. B. Mayberry estate - J. Homer Tippett as the result of the showing of an estimated five to 10 million cubic feet of gas daily and the recovery of 200 feet of oil and 100 feet of gas-cut drilling mud.

Recovery was on a 30-minute drillstem test late Monday from 6,295 to 6,345 feet in lime of undetermined age. Gas came to the surface in 10 minutes. Detailed reports did not bear out some early estimates that the volume was as high as 50 million cubic feet daily.

When all the drillpipe except 315 feet had been pulled No. 1 Mayberry-Tippett unloaded some fluid. This amount was included in the final recovery figures of 200 feet of oil and 100 feet of gas-cut drilling mud. Preparations were being made Tuesday to make a second drillstem test to 6,345 feet.

The wildcat in the panhandle of northwestern Crockett, was reported in one quarter to have been drilling in the Wolfcamp, basal Permian, when it entered white cherty lime at 6,293 feet, believed by some possibly the Devonian.

Location is 660 feet from the northeast and southeast lines of section 39-31-H&TC, 1 7-8 miles northeast of the Pecos River, which forms the southwestern boundary of section 39. It is six miles southwest of the Crockett field on University lands on the line of Crockett and Upton Counties and six miles northwest of the Yates field in Pecos County.

Eleven miles southeast of McCamey, No. 1 Mayberry-Tippett is slightly more than seven miles northwest of the nearest Ordovician test, Gulf No. 1 White & Baker in Pecos County, which found the Ellenburger barren. It is on a farm-out from Shell by Byrd and Frost and to Gulf. Both Shell and Gulf are understood to have worked the area intensively with core drill and other subsurface geology.

The late J. B. Mayberry retained the minerals under sections 39 and 41 when he sold the surface to J. H. Tippett of San Angelo. Standard of Texas has east and west offsets to the wildcat.

## Second Duster Is Drilled In Search For Water Supply

Second attempt to augment Ozona's water supply by adding another well failed this week when the drill bit of Hugh Gray's drilling rig bored into blue mud at 449 feet on water works hill without encountering water in sufficient quantity to be of benefit.

A dry hole—producing a small quantity of water, but dry so far as needs of the water works is concerned—was drilled recently on the first selected location just west of the swimming pool and a short distance northwest of the two present wells.

Members of the water board selected a second location on a line with the two present good wells and the old producing wells lower down on the hill which formerly furnished water to Ozona under the old pumping system. Board members and other were confident of success in this attempt, with the new location approximately on the line of producing wells.

But confidence was shattered this week and members of the board are now pondering the weighty question of where to make another attempt. Pumping equipment, including pipe, stages and 75-horsepower motor are ready for installation all that's lacking is a hole to a sufficient volume of water in which to install them.

## Western Hospitality Dead In Ozona? Conoco Crew Chief Seeks Quarters Here For 9-Family Crew

The Stockman is in receipt of a letter this week from a crew chief for the Continental Oil Co. who seeks housing in Ozona for members of his nine-family crew so that they may make this headquarters while working in the area.

The letter, reproduced below, reveals a rather startling accusation against the hospitality of Ozona people—the source of which is not revealed, except "what so many people told me down there,"—the accusation—"that Ozona does not welcome working strangers."

The letter was written by Mr. William A. Petersen of the Continental Oil Co. from Waurika Okla. A reply has gone forward from this editor, assuring Mr. Petersen that the big majority of Ozona people welcome visitors and new residents, oil people and working people, business people, or retired capitalists alike. There may be some who do not, but it is our belief that most Ozonans do, and we'll stick by that until it is proved otherwise.

Mr. Petersen's letter, his appeal for housing help, and that shocking accusation, follows:

"Before I knew definitely that we would be coming to Crockett Co. to work I made a hurried survey of your end of the country a few weeks ago to size up the possibilities for housing my crew of nine families. As was to be expected the situation is tight according to everyone I talked to. I wasn't able to spend much time in Ozona and am not satisfied entirely with my findings there as to their completeness. I would greatly appreciate a note from you with a critical analysis of the potentialities in Ozona. All but two of the families require furnished quarters preferably with kitchen and bath privileges; six of the families have from one baby to four small children.

"I find it hard to believe what so many people told me down there, that Ozona does not welcome working strangers; I believe that there is a good heart in every town, and know that most are more than happy to welcome the business which comes with an influx of new people. An unfavorable report from you as to possible availability of apartments, houses for rent, or other suitable quarters will be enough to dissuade me from trying to locate there at all, as my preliminary decision was not too bright an outlook. So if you will, please give me an honest appraisal of the situation. I'll appreciate it very much.

"Crew and equipment will be arriving Friday and Saturday of this week, and I will be at the Big Lake Motel temporarily. If you can take the time to drop me a note there so that I can get it on arrival it will help me a great deal in making my plans."

## Western Crockett Field Designated Clara Couch Wolfcamp

The western Crockett County oil producing area opened by Cities Service, Plymouth and Humble No. 1-B J.W. Owens has been designated the Clara Couch Wolfcamp field by the Railroad Commission at the request of the operators.

The commission denied the request for an exception to the rule that makes the maximum gas-oil ratio 2,000-1. The well rated 765,000 cubic feet of gas daily in flowing 124.18 barrels of oil through a 3-4-inch tubing choke in 7 1/2 hours on July 26 giving it an excessive gas-oil ratio. This resulted in the daily allowable being reduced from 120 to 39 barrels Aug. 1.

No. 1-B Owens was completed June 24 with a daily flowing potential of 597 barrels of 37.5 gravity oil through a half inch tubing choke and casing perforations at 5,670-75 feet. Gas-oil ratio was 1,970-1. Location is the C SE NE 7-GG C NW NW 6-GG-H&OB.

## Humble Mitcham Well Completed In Ellenburger

### Opens New Field In NE Crockett; Sinclair Drill 3 Outposts

Humble Monday released the rotary rig and prepared to complete No. 1 Mrs. Grady Mitcham, opener of northeastern Crockett County's second Ellenburger field recently, without acidizing lightly, as had been planned Saturday.

Sinclair Prairie and Atlantic No. 2-66 University, first of three outposts to the companies' No. 1-66 University, discoverer of the first of the two Ellenburger fields, the Midway Lane, had spudded 20 feet and was drilling ahead.

Humble No. 1 Mitcham flowed naturally 210 barrels of oil to storage in 22 hours over the week end, an average of 9.55 barrels hourly. The gauge was through a three-quarter inch choke. On another test of one hour through a quarter inch choke the well flowed 11.25 barrels of 41 gravity oil, cut only 29-100 of one per cent, with no water.

Gas-oil ratio on the one-hour gauge was 1,255-1. Flowing casing pressure was 785 pounds, flowing tubing pressure 180 pounds. Production was through perforations at 8,092-8,105 and at 8,122-22 feet in 5 1/2-inch casing cemented on bottom at 8,165 feet.

No. 1 Mitcham is 810 from the north, 660 feet from the east line of section 12-AB-D&SE, 14 miles northeast of Ozona. It is 12 miles east and 1 3/4 miles south of the opener of the Midway Lane field. Humble had not announced any new locations in the area.

Sinclair Prairie and Atlantic No. 3-66 University was rigging rotary. It is 660 from the south, 3,300 feet from the east line of the north half of section 30-46-U, 1,320 feet west of the Midway Lane discovery. Thompson-Carr, Inc., has the contracts on both No. 3-66 University and No. 2-66 University, which had spudded. No. 2-66 is in the C SW NE 30-46-U, 1,271 feet north of the pool opener.

Materials were being moved in for No. 4-66 University C SE NW 30-46-U, 1,320 feet east of No. 1-66 University. S. E. Moran has the drilling contract. The three tests are scheduled to drill 7,700 feet if necessary to explore the Ellenburger.

No. 1-66 University was finished with a natural daily flowing potential of 1,310.80 barrels of 40 gravity oil and gas-oil ratio of 2,650-1 through a half inch choke on 2-inch tubing and 270 perforations at 7,530-75 feet in 7-inch casing cemented at 7,666 feet, 14 feet off bottom.

Byrd and Frost and others' No. 1 Mayberry-Tippett, slated 9,000-foot wildcat in the panhandle of northwestern Crockett County, was drilling at 6,263 feet in lime, shale and chert. It is 660 feet out of the east corner of section 30-31-H&TC.

## Ozonans Attend Cunningham Reunion Near Comanche

Mr. and Mrs. Earl Cunningham and daughters, Earlene and Leona Ruth, Mr. and Mrs. Lee Roy Story and daughter, Charlotte Jo, Mr. and Mrs. Lonnie Smith and Bruce Mayfield were among Ozonans attending the Cunningham family reunion August 9 and 10 held near Comanche, at the Cunningham reunion park.

The family has met at the same place 47 years, starting with the first reunion in 1900. The reunions were held on August 15 and 16 for 46 years, this year being reset to begin on Saturday night before the second Sunday in August each year.

A total of 221 members of the family and connections and 51 visitors attended this year's reunion. The family connection now totals 682. There were 15 births, 11 marriages and 8 deaths in the family during the past year, it was reported at the family council meeting preceding the reunion.

## Ken Regan, Candidate Has Seen Ups and Downs In Oil Business

It was a tough setback for Ken Regan when, fresh out of World War I with a few savings, he watched his first oil well go dry. Hard times followed, but the enthusiastic apostle of West Texas development never gave up. Today at 54, Regan has made a moderate success as a farmer, rancher and small independent oil operator. He is currently in the Congressional race as the Permian Basin's first hope for a seat in Congress.

That first dry hole wasn't the only disappointment of its kind to hit Regan during his 27 years in West Texas. He calculates the in Reeves County alone he has participated directly or indirectly in drilling of 24 dry holes. But he's not the only loser in Reeves County. Oil never has been struck there in producing quantities.

"Somebody'll do it one of these days," he says. "With oil all around there's bound to be oil in Reeves County as well as western Ward County." And he cites the history of oil in Florida, where geologists rejected the land as non-productive two years before oil was struck in rich quantities.

Along with several others Regan invested in a piece of Loving County land. Oil gushed up and the famous Wheat Pool was born. Regan's was only a part of the venture, but it meant money in the pocket for the young operator.

Regan has not grown stuffy through the years as the breaks came his way. He has not forgotten his modest start as a teacher's son back in Mount Morris, Ill. He still uses the expression, "Tiptoin' for chile," meaning the hard business of scratching for a living.

Oil, however, is only one of the development programs he's interested in. He helped organize the (Continued On Last Page)

## Ozona Winds Up Eldorado Win In 9th Inning Comedy

### Locals Win 14-7 After Donating 5 Runs In Final Cloning

Ozona's baseball crew found easy pickings in Eldorado Sunday afternoon and came the last half of the ninth inning with the Ozonans leading 14 to 2.

After two were out in the final frame, the Ozona players were unwilling to let the ball game be over and so they indulged in a bit of clowning that resulted in five runs for the Eldorado crew.

All told, the Ozona team used six pitchers. Frank James started on the mound for the locals but yielded to Stuart in the third with the bases filled on two walks and a hit batter. Stuart retired the opposition after one runner had scored on a roller to first, and two were left on the sacks.

But Stuart was pitching only while Maxwell warmed up and Maxwell went in the fourth. An error and a hit in the fifth accounted for the other score the Eldoradoans scored before the ninth.

After Maxwell two were out in the ninth, Sheffield doffed his mask and shin guards and went in to pitch for that last out, Maxwell going to left field. Then came a general shuffle of positions, Lefty Shelton, who had gone into the game for Vic Montgomery in left shifting to shortstop, Sikes going to third, Beecher Montgomery to first, Tom Ed Montgomery on second, etc. After Eldorado batters had streamed to bases via walks, hits and errors, and Beecher Montgomery had tried his hand at chunking, Shelton was called in to shut off the ball game. But the first man to face Shelton rapped out a single to score two more. The batter rolled one to the pitcher and the comedy inning was ended.

The locals will play at home next Sunday afternoon, entertaining Robert Lee of the Concho Basin in League. The game will be called at 3 o'clock.

## Vet Vocational School To Open Here Sept. 9th

### Regional Supervisor Explains Plan To 50 Veterans

Approximately fifty veterans having expressed an interest in enrolling, organization of a veterans' vocational education school in Ozona is in prospect as the result of a visit here this week by C. L. Bodden, regional supervisor, Veterans Education, of the State Board For Vocational Education, and V. E. Moore, teacher trainer Veterans Education, A & I College, Kingsville, Texas.

Mr. Bodden explained the vocational education plan for veterans in a talk to the Rotary Club Tuesday noon and later in the afternoon met with a group of interested veterans at the courthouse. The Rotary Club agreed to sponsor the school as a civic group and its administration will be under the direction of the school board.

The veterans schools offer instruction in agricultural courses, industry and trades, business administration and other fields. It is expected that agricultural courses, livestock production in particular, will attract many local veterans and courses in industry and trades may also be popular.

Classes are expected to begin here on September 9. Mr. Bodden said, Veterans who qualify for the training and who meet certain standards of progress are entitled to subsistence pay in the amount of \$65 a month for veterans without dependents and \$90 a month for veterans with dependents.

All veterans in Crockett county who are interested in this program are urged to visit the office of County Agricultural Agent Joe Cowan where application blanks will be available for those who wish to enroll.

## Man Sought By Officers On 2 Forgery Counts

### Checks Totalling Near \$500 Cashed With Ozonans' Sigs

A man who uses the name of Wm. S. Campbell, and driving a white pick-up truck is being sought by officers in this area on two charges of forgery and possibly others not yet reported, according to Sheriff Bruce Harp.

A check for \$245.50, made out to Wm. S. Campbell and bearing the forged signature of Massie West, Ozona ranchman, was cashed by the man at Sewell's station east of Ozona, the Crockett sheriff said. The forger misspelled Mr. West's first name in signing the check.

Another check for an amount near that of the first was reportedly cashed by the Charles Motor Co. in San Angelo for the same man. The forged signature on that check was that of V. I. Pierce, another Crockett County ranchman. Both checks were marked for "Termite Control Work."

Information gathered by the local sheriff's office on the forger's operations indicate that the man is wanted on forgery charges in Amarillo, Navasota and Alice, Texas, and that he has been operating the same white truck, with two separate sets of license plates, at least since last February.

B. B. Ingham has bought the livestock and leased land held by his brother, Dudley Ingham, on the ranch of Mrs. B. B. Ingham, their mother, on the Pecos river in Crockett and Terrell counties. Dudley will stock a part of the old Bud Holmes ranch south of Sheffield and is building a home in Sheffield.

Miss Barbara White has as her guest this week her roommate at SMU, Miss Betty Hockaday of Houston.

THURSDAY, AUGUST 14, 1947

Virgin wool is wool that has never been processed in any way before being completely manufactured into the finished product.

Ninety-five pounds of ground wheat or 89 pounds of un-ground wheat is equal to about 100 pounds of No. 2 shelled corn in a hog ration. Wheat is lacking in Vitamins A and D, however, which can be made up with alfalfa meal or hay, or green grazing.

**Miss Muggs Davidson Becomes Bride of Howard Presley McClanahan In Ceremony Here**

Before an altar banked with fern and white gladiolas and marconi daisies, Miss Muggs Davidson, daughter of Mr. and Mrs. Chas. E. Davidson, Jr., of Ozona became the bride of Howard Presley McClanahan, Jr. of Big Lake in a ceremony performed at 10 o'clock Wednesday morning at the First Baptist Church in Ozona.

The double ring ceremony was performed by the Rev. J. E. L. Harrison, minister of the Church of Christ in Ozona. Wrought iron candelabra which formed an arch in front of the flower and greenery banked altar held white tapers. The bride was given in marriage by her father.

Miss Tibba McMullan of Big Lake furnished the pre-nuptial music at the piano and accompanied Mrs. Kenneth Corder of White Deer who sang "O Promise Me," "Because" and "The Lord's Prayer." Miss McMullan played the traditional wedding marches and played softly during the ceremony.

Mrs. Davidson attended her daughter as matron of honor. Bridesmaids were Baby Hokit, Benny Gail Phillips, Doris Bean of San Angelo and Mrs. Raford Bolin of Sherman a sister of the groom.

Frank McMullan, Jr., of Big Lake acted as best man. Groomsmen were Charlie Boy Davidson, brother of the bride, Max Schne-

mann, Jr., Robert McClanahan of Mount Pleasant, brother of the groom, and C. S. Warren of Big Lake.

The bride wore a chapel dress of white satin with train, long pointed sleeves, drop shoulders with a net yoke inset and buttoned down the back. She wore a Juliet cap with short veil of illusion. Her only ornament was a strand of pearls. Her bouquet was of white gladiolias and stephanotis, centered by a white orchid and tied with white satin ribbon and net falls. For "something old" she wore a platinum diamond bracelet belonging to Mrs. Sherman Taylor and for something "blue" her mother's star sapphire ring.

The matron of honor and bridesmaids wore green faille dresses and carried colonial bouquets of white gladiolias with satin ribbons.

A reception was held at the home of the bride's parents following the ceremony. Mrs. Sherman Taylor greeted the guests at the door. Assisting the bridal pair in receiving were the bride's parents, Mr. and Mrs. Chas. E. Davidson, Sr., Mrs. Frances McClanahan of Mount Pleasant, the groom's mother, and his aunts, Mrs. Hershel McClanahan of Dallas and Mrs. B. A. Hardaway of College Station.

A four-tiered wedding cake centered the table. White gladiolias and marconi daisies were used in table and house decorations.

Mrs. Frank McMullan of Big Lake and Mrs. Mark Garver of Houston served. Others in the house party were Mrs. Kenneth Corder of White Deer, Tibba McMullan of Big Lake, Baby Hokit, Benny Gail Phillips, Mrs. Joe T. Davidson, Doris Bean of San Angelo, Mrs. Raford Bolin of Sherman, Mrs. Jack Morris of Temple, Mrs. Bill A. Friend of Big Lake, Mrs. Ashby McMullan, and Mrs. W. E. Friend, Jr.

Out-of-town guests here for the wedding besides those mentioned include Mr. and Mrs. George Bean, Louise and Joe Bean, Dorothy Gandy and Brownie Johnson, all

of San Angelo, Mrs. Buddy Moore of Coleman, Betty Hockady of Houston, Polly Drisdale of Del Rio, Gene Skaggs of Panhandle, Kenneth Corder of White Deer, Mr. and Mrs. Sam Fowler of Idalou, and Lois Dolan, Johnny and June McMullan, Mr. and Mrs. Floyd McMullan, Frank McMullan and Dixie McMullan and Mr. and Mrs. Bill A. Friend all of Big Lake and Jack Morris of Temple.

The couple left during the reception for a wedding trip after which they will be at home in Big Lake.

The bride is a graduate of Ozona High School and attended Southern Methodist University in Dallas. The groom is a son of Mrs. Frances McClanahan of Mount Pleasant. He is a graduate of Mount Pleasant High School and served three years in the Marine Corps, two years overseas duty during the war. He is at present employed in Big Lake.

**National Guard Nears 100,000 Men**

Completely demobilized when its troops were separated from the Army following World War II, the National Guard of the several States reached a strength of nearly 100,000 men in the first year of its reorganization.

"According to telegraphic reports from the Adjutants General of the several States, there were 96,815 men enlisted or commissioned in the National Guard on July 1, 1947, the end of the fiscal year," Major General Butler B. Miltonberger, Chief of the National Guard Bureau, announced.

"This is nearly twice the strength attained by the National Guard in the same period following World War I, and is a fast step toward our ultimate goal of 682,000 men for the M-Day Force planned by the War Department," he stated.

Leading all the rest is Oklahoma, the first State to have all of its ground units federally recognized. There are 5,821 Sooner Guardsmen.

The first State to have all its ground and air units recognized, Wyoming, despite its small population, has a strength of 625 in its National Guard. Subsequent to

this achievement, Wyoming accepted the 151st Tank Battalion as an additional allotment.

### New Chevrolet Pick-up Introduced

radically different in design and appearance, the new "advance-design" line of Chevrolet trucks and commercial cars, recently introduced, features numerous improvements and improvements for the comfort and convenience of the driver. Shown above is a light delivery pick-up model with a gross vehicle weight of 4,600 pounds and a payload capacity of 1,200 pounds. The unit has a 116-inch wheelbase. All pick-up bodies of the "advance-design" line of trucks have a usable width of 50 inches for their full length.

#### COURSE OF SOCIALISM

ld be manifestly unjust at the labor government England's great economic Those problems were the result of the drains in British resources and however, it is undoubtedly the labor government's of socialization and re- of the country's por- machine is delaying British and sapping the national

the facilities of a swollen super-government are used to keep the people in line. The individual is lost in the red-tape of a government which has its fingers in every phase of human activity. There is little chance for individual progress, and the rewards for work and ambition are severely limited.

The labor government came to power by promising that socialism would cure England's economic ills. But it has failed in every particular. Socialization of the coal mines has not increased output nor bettered the lot of the miners. Socialization of finance has not strengthened England's world credit position. The threatened socialization of all British railroads and

electric utilities is expected to cause more financial troubles—and to further bureaucratize the country. And the government's projected agricultural "reform" bill has raised a storm of protest on grounds that it would permit expropriation of property and a policy of dictation toward farm owners and workers.

Socialism always takes the same course. It exalts the office-holder and crushes the rest of the people. Worst of all when thoroughly entrenched, it becomes extremely sensitive to criticism

and in one way or another stifles opposition. By its very principles, it is the enemy of social freedom even as it is the enemy of economic freedom. The object lesson which a socialized Europe is giving us now should make every American determined to resist its further inroads here.

#### Miss Elsie Hummel To Teach Piano Here In 47-48 School Year

Miss Elsie Hummel of Ranger, Texas, will teach private piano lessons in Ozona during the 1947-48 school year. Miss Hummel was in Ozona last week contacting various parents and prospective students and on the basis of interest indicated, announced that she would be here in September to organize her classes.

Because of her endorsement by a number of parents, Miss Hummel has been assigned the studio in the grade building for her classes. C. S. Denham, superintendent of schools, announced this week.

Miss Hummel is a graduate of Ranger High School and of John Tarleton College. She entered the American Conservatory of Music in Chicago in September, 1944, and received her Bachelor of Music degree from that institution in June, 1947. She took off only three weeks from her studies in that time.

#### Brown Rigs Up For 2,500-Foot Wildcat On A. C. Hoover Ranch

C. W. Brown of McCamey was rigging up cable tools Saturday for No. 1-C A. C. Hoover scheduled 2,500-foot, cable tool wildcat in western Crockett County 2½ miles northeast of the Clara Couch (Grayburg-San Andres) field.

The operation is 1,550 from the north 330 feet from the east line of section 2-1-GC&SF on the west

side of the Hoover pool where two wells developed production from slightly below 1,400 feet in the Queen sand.

Gulf was rigging up for No. 2-S University, proposed 1,700-foot, cable tool test in the Lancaster Hill (Grayburg) pool in central west Crockett. The test will be 330 feet out of the southwest corner of section 15-29-U, less than a quarter mile west of Gulf No. 1-R University, a core hole that opened the pool.

**THE LOW DOWN FROM HICKORY GROVE**

Today I will maybe step on some toes, but my heart is in the right place, and no offense is meant. But anybody taking my remarks to heart, maybe after all it will be good for him. There is nothing up my sleeve—I am just trying to stir up the natives. I am not running for any kind of job, like "uplift director" or "playground supervisor" or any other nice or easy or soft but not very necessary kind of payroll attachment. Stop beatin' around the bush says Henry. Okay, I says, the lecture then, will be on "Suckers, and why not to be same."

Some of our biggest suckers are amongst our best people. Take folks who thought they would have everything they would need, and for evermore, or life, if they could have just "4 freedoms"—their toes are maybe being stepped on. But who is happy—and free from fretfulness. Henry, I says, name me a couple—or even one, I says. He couldn't.

And now comes flood control—but hidden in its skirts is a powderhouse full of nice Govt. jobs.

To run an electric generator, you gotta have high pressure from a dam chuck full of water, but if the dam is full and turning out kilowatts, and you have a nice rain upstream nothing is going to stop the excess water. Plain everyday horse-sense—no PhD needed to figure it.

Being a sucker with your vote makes a nice paying job—but for the other guy.

**SWING OF THE SOUTHWEST MARKETS**

(USDA) — Many farm products gained ground on southwest markets last week, and others held their own fairly well, according to the Production and Marketing Administration, U. S. Department of Agriculture.

New crop corn started moving from South Texas farms last week, and white corn prices declined several cents per bushel. Yellow corn advanced, however; as dry weather in the corn belt threatened damage to the crop. Oats, barley, and grain sorghums strengthened some, too. Decreased marketings of winter wheat sold firm and Midwest and Great Plains

growers had about completed the record harvest.

Most feeds held about steady to firm but gray shorts and bran dropped \$3.50 to \$5 per ton. Dry weather improved hay demand, and prices advanced \$1.50 to \$2.00 per ton. South Texas rains helped growing peanuts, but North Texas and southern Oklahoma became very dry. Wool saw active trading in advance of the reinstated government purchase program which begins August 15 under the new wool act.

Sheep prices remained largely steady for the week, and most spring lambs went a little higher. Medium to good spring lambs brought mostly \$18 to \$21 at San Antonio, and closed at \$19 to \$22 at Fort Worth. Closing bulk of good and choice grades sold at \$22 to \$22.50 at Oklahoma City, and around \$24 at Denver.

Many cattle classes brought lower prices last week. Most stocker and feeder types, as well as slaughter cows, calves, weaners, and bulls dropped from 50 cents to \$1.50. Steers and yearlings weakened at some markets. Common and medium cows brought \$11.50 to \$14.50 at Houston and Fort Worth, and \$12 to \$15 at San Antonio and Wichita. Medium and good kinds moved at \$13 to \$15.50 at Oklahoma City, while common to good kinds sold at \$15 to \$19 at Denver.

**WHIP OF PROGRESS**

Most of us think that the "boomtown" days of the oil industry ended many years ago, and that the industry can now take it easy and supply the public's needs with its present facilities.

The truth is that oil is engaged in a tremendous and dramatic race to bring output up to the enormous civilian demand that came after the war.

The geologists and wild-catters are searching for new oil reserves in every corner of this country—and in a long list of foreign countries as well. As rapidly as the necessary materials can be bought, they are sinking new wells and enlarging their refineries. The laboratory technicians are seeking new methods of getting more oil

products out of each barrel of crude, and for producing oil from sources which so far have been untouched. Never in history was so much oil needed as now—and never in history was so much knowledge, money and sheer drive given to producing it.

Competition within the industry is extremely keen, both in obtaining supplies of crude and in seeking public favor with ready-to-use oil products. That in itself is the best guarantee that the demand will be as low as current costs allow. Oil isn't standing still. The whip of progress is keeping it on the run.

**Medica! Exams For School Children Urged Before Schools Open**

AUSTIN, — School days will soon be here again. Thousands of Texas boys and girls and teachers will be returning to the schools. Each child entering school should be as free as possible of any physical defects which can be corrected. The earlier these are corrected the better chance the child has for academic progress and for good social and emotional development says Dr. Geo. W. Cox, State Health Officer.

August is the time for a complete medical and dental check-up. Eyes, ears, nose, throat, and teeth should be carefully examined by the family doctor and dentist, and all remediable defects corrected.

**Portable**

If such defects are neglected, they may result in serious damage to growth and development.

Dental corrections often take time, but a person is repaid many times over for good dental care. Healthy teeth lend attractiveness to the personal appearance, enable thorough chewing of food, and promote general good health.

In schoolrooms, children expose each other to many communicable diseases, especially the common cold and diseases such as measles, scarlet fever, whooping cough, and diphtheria. Protect the child from diphtheria and whooping cough, as well as smallpox, by safe and dependable immunization.

Parents, see that your child has

complete protective treatment against preventable diseases. Clean healthy throat and nose; the best possible vision and hearing; adequate diet, sleep and exercise; to build up resistance against disease. It will pay good dividends and your child will be happy at School.

Mr. and Mrs. Nelson Booth Sweetwater were her last mother, Mrs. B. H. Ingram. Mrs. Booth have just returned from a trip to Montana where they looked at ranch property with a view to buying a ranch that state.

**NOW AT LESS THAN PREWAR PRICES**

WHEN

### Ratifies Contracts for Offices

### County To Ask Bids Heating Equipment For Offices

Members of the Crockett County Commissioners Court meeting this afternoon ratified lease contracts with two physicians and dental office quarters now being located on the second floor of the new county building.

Four named committees to bid on heating equipment, a butane gas system, for to be installed at once, discussed progress of the work under way toward finishing the floor of the three-story building.

H. B. Tandy and Royce W. and Dr. H. A. Gustavus, accepted the invitation of county to occupy the three offices on the second floor to pay a monthly rental for the space. Work has under way some time on interior partitions, completing the wiring on the floor covering the interior walls. Revenue from the floor will be used for the county's expenses in completing the finishing work on the second floor. The building was originally designed as a hospital and clinic in two upper floors, the ground floor to be used as county offices, second floor, or doctor offices. Clinic floor, is being completed in line with the general plan for building.

### Soap Box Derby To Be Run In Akron Aug. 17

AKRON, O. — The tenth anniversary of the All-American Soap Box Derby, with 135 boys between 11 and 15 years of age from all parts of the United States, Alaska and Canada competing for top national and international honors in this unique juvenile racing classic, will be run here at Derby Downs Sunday, August 17.

More than 100,000 spectators are expected to witness the downhill race, with approximately 75 heats in an elimination contest to decide the national Soap Box Derby championship. First prize is a four-year college scholarship, awarded by Chevrolet Motor Div., national co-sponsor with leading American newspapers. In honor of the anniversary, grandstand seating capacity has been increased and a number of new features have been introduced for the entertainment of champions and guests during the weekend.

Jimmy Stewart, motion picture and stage star, and James H. Doolittle, famed aviator who led the first bombing raid over Tokyo, will be honor guests at the event. A totem pole, the gift of Alaskan sponsors of the Derby, is to be dedicated by the mayor of Juneau, Alaska, on the eve of the Derby.

### Simplified Driving Aid For Disabled Shown By War Vet

Detroit. — Disabled persons of many types, who have in the past given up the privilege of driving a car will be encouraged to re-apply for drivers licenses when they learn of demonstrations being made by James W. Redding, World

War II veteran who lost both legs in the Ardennes Campaign.

Redding is making a nationwide tour of hospitals, driving and demonstrating the newest Plymouth sedan equipped with a set of simplified driving controls developed by Chrysler Corporation engineers. Redding has been licensed in several of the most exacting states and drives with perfect control and skill.

The sets of controls, supplied as packaged accessories for any model Plymouth from 1941 on, compensate for disabilities caused by injury or disease where loss or loss of use of limbs has resulted. Due to shortages of materials in the immediate post-war period, disabled veterans were given high priority in filling orders for the control sets. Today the sets are available to all who need them.

Controls are supplied in five different sets graduated to compensate for various disabilities. This process of "tailoring" to the degree of disability enables the purchaser to select the set needed from charts compiled by medical, safety and engineering experts. Prices range from seventy-five cents to \$1.80, depending upon the set required.

### I-DEAL BRIDGE CLUB

Mrs. W. V. Guidro entertained the I-Deal Bridge Club at her home Monday afternoon. High score prize went to Mrs. Sam Patterson, second high to Mrs. D. L. Scott and bingo to Mrs. Vernon Ratliff.

Members present included Mrs. Roland Allard, Mrs. Boyd Baker, Mrs. Marvin Barnes, Mrs. H. N. Brown, Mrs. W. R. Clegg, Mrs. L. D. Kirby, Mrs. John Marshall, Mrs. Vernon Ratliff, Mrs. D. L. Scott and Mrs. J. H. Tabor. Guests were Mrs. Reese Ray of Liberty, Texas, and Mrs. Sam Patterson. A salad course was served.

Mrs. W. R. Clegg will be hostess at the next meeting of the club on August 25.

### Goodyear Introduces Super Cushion Tire

Akron, Ohio — A development believed as far-reaching in the science of tire design as was the adaption of pneumatic tires to farm tractor wheels was revealed today with announcement by P. W. Litchfield, Goodyear Tire & Rubber Company chairman of the board, of a new line of Goodyear passenger car tires known as the Super Cushion.

Acclaiming the tire the greatest advancement in tire construction in 25 years, Mr. Litchfield stated that it represents great improvement in riding comfort and ease of car handling, as he compared the Super Cushion's shock-absorbing qualities to those achieved by use of pneumatic tires on tractors. At the same time, he pointed out how the factors of better rides fatigue reduction and less mechanical wear of vehicles gained in the latter instance have been incorporated in this new triumph in passenger car tires.

In presenting the Super Cushion Mr. Litchfield described it as a bigger softer tire, requiring approximately 14 per cent or four pounds (depending upon tire size) less air pressure than the conventional automobile casing, while also containing much greater flex-

ibility. These characteristics enable it to absorb more successfully the impact of all bumps and to spread this shock over a greater

tire area, thereby reducing vibration and the accompanying fatigue of driving strain.

The Super Cushion has a one-half greater cross section in smaller sizes and three-quarters inch more in the larger tire sizes, it was disclosed.

## Why not save up for some "sunny days" too?

Most folks think of savings as something you set aside for rainy day emergencies.

But there are plenty of "sunny day" occasions to save for too!

For instance, that new home you want to own some day... that trip abroad you plan to take... that college education you want to give your youngsters—"sunny day" savings will help get you all these.

But how soon can you pile up those "sunny

day" dollars? Lots sooner than you think—if you save by buying U. S. Bonds! In fact, as little as \$3.75 invested in U. S. Bonds every week will return you as much as \$2,163.45 in only ten years' time.

You can buy these Bonds either through the Payroll Savings Plan at your place of business—or if you're not eligible for the Payroll Plan, but have a checking account, through the new Bond-A-Month Plan at your local bank.

So start saving for your "sunny days" today!

Save the easy, automatic way—with U.S. Savings Bonds

### KEN REGAN

(Continued from Page One)  
 the Canteloupe Association in Pecos, Reeves and Presidio Counties and assisted in marketing the first cars of Pecos canteloupes in New York City back in 1931.

He knows problems of irrigation. When Red Bluff farmers needed storage for water supply, they sent him to Washington to help get action on the Red Bluff Dam. With aid from those who had spent lifetimes working for the project, Regan got the job done, and the dam was built at a cost far below the original Washington estimate.

Civic affairs finally absorbed Regan's attention when friends, aware of his ability to produce results, elected him first as a city alderman and then mayor of Pecos. He returned from one out-of-town trip to find he had been

lected president of the Pecos Chamber of Commerce.

When West Texas landowners became aroused over a Supreme Court decision affecting mineral classified lands, he and the boys with their boots on went to Austin and presented their problem to the Legislature. Regan by force of leadership became their spokesman. The legislative relief was granted. And when 1933 rolled around, ranchers threw in their support to send Regan to the Senate in Austin for a four-year term.

Out of 700 bills passed by the legislature in 1933, 70 were introduced by Regan, and two years later the big amiable Irishman was unanimously elected president of the body. It was the first time this honor had gone to a freshman member of the Senate.

During this term in the Senate he played an important part in the adjustment of inequalities for land left vacant by oldtime sur-

vivors who ran lines by using a wagon with a ray tied to it. He was instrumental in having the state refund cotton farmers for money paid out on the rate of \$2 a bale for protection against the pink boll worm.

He deserted politics in 1936 to earn some "ham and eggs" money and then came the war. Through coverage, he volunteered and served in Army Air Forces Intelligence.

About himself Regan says, "I am not filthy rich or nearly so, but I have been fortunate in my 27 years of business activity in acquiring sufficient property and income to enable me to serve this District impartially, energetically and without obligation to any individual person, firm, corporation here than that to citizens of this District who through their votes my bring about my election."

"The folks of West Texas have been good to me. They received me as a youth and they have honored me as I grew older. Win, lose or draw in this Congressional race, I'll be available whenever I can be of use to West Texas."

Dairy cows do best when given a six weeks to two months rest between lactation periods.

### Army Gets Fresh Vegetables By Use of Hydroponic Gardening

WASHINGTON, D. C. — Fresh vegetables for use with Army rations in overseas installations where they cannot be otherwise supplied, are being produced successfully and in large quantities by the employment of hydroponic gardening.

This process, also known as nutrient culture, water culture, and chemi-culture, consists of beds of gravel, stones, cinders, or other inert materials in which vegetables are grown by supplying them with water and the nutrient chemicals necessary for their growth. This supply of fresh vegetables in this manner is contributory to high morale among the troops.

Sheep raising was one of the earliest of man's land occupations. There is evidence that prehistoric man knew how to weave garments from sheep's wool.

Rev. and Mrs. S. H. Maples of Gilmer were guests of Mr. and Mrs. Walter Dunlap on the ranch the past week.

### U. S. Uses German Youth Hospital For Research Work

WASHINGTON, D. C. — One of Hitler's "Youth Through Joy" hospitals which was probably the finest establishment of its kind in the world has been taken over as an American Army research center for the study of infectious hepatitis. It is located at Bayreuth in Bavaria.

The causative organism and method of transmission of hep-

atitis, of jaundice, which first attracted wide attention during the war, thus far have defied detection. It is a malady characterized by fever, nausea and abdominal disturbances, usually accompanied by the yellow color associated with jaundice.

Caleb Sparks has been elected by the school board as president of the school bus from the Field to Ozona.
