Cervantes Hurls No-Hitter To Win Second Half Flag

Gassers-Oilers Start Championship Play Series Tonight

Chico Cervantes, ace pitcher for the Butane Gassers, lowered the boom on the first-half winning Cosden Oilers Monday night to break a tie between the two teams and decide the second half championship in favor of the Gassers, one game up on the Oilers.

Cervantes, 12-year-old playing his last year of Little League, pitched a no-hit, no-run game against the Oilers to give his team a 6-0 victory and the second-half crown. Cervantes struck out 15 of the 19 batters who faced him. It was his fifth win of the second half against no losses.

The white-hot Gasser hurler has turned in something of a spectacular performance all season, but hit a dizzy pace during the second half. In the five games he pitched in the final half, he struck out a total of 71 batters. Meanwhile, he finished in second place in the hitting department with an average of .576, just 10 points under of the batters who faced him. league leader Royal Caswell, Jr. Cervantes hit safely 17 times, scored 16 runs himself and drove in 23 more. He polled six triples and six home runs.

The championship playoff between the Cosden Oilers, winners of the first half of the split season, and the Butane Gassers, second half winners, is scheduled to start tonight (Thursday), with a three-game series charted. The second game in the championship series will be played Monday night and the third, if necessary, will be either Thursday or Friday night of next week.

The champion team will be honored at a barbecue supper to be staged by the Ozona Lions Club, Little League sponsoring organization, sometime next week. The Little League night supper was originally set for next Tuesday night but the date will depend on outcome of the title series.

At this meeting, the champions will be presented with the league trophy which they will hold for one year and individual members of the winning team will be given awards.

The second half schedule ended Monday night with the Butane Gassers on top with 7 wins and 2 losses; the Ozona Oilers in second place with 6 wins and 3 losses; the Spencer - Stevens Mechanics third with 5 wins and 4 losses, and the unlucky Kyle Kleeners ended up with 9 losses and no wins.

Six players ended the season with sparkling batting averages above .400. Caswell, Spencer-Stevens, led with .586; Cervantes had .576; Bobby Sutton of the Oilers, .523; Young of the Kleeners, .500; B. Holden of the Mechanics, .458, and A. Rivera of the Gassers, .411. Caswell kept his team in the running with 17 hits, 17 runs scored and 17 batted in. He polled 5 doubles and 3 homers in the second half.

Sutton, ace Oiler chunker, whiffed 43 batters in second half play and Payne of the Kleeners struck out 41. Bill Meinecke of the Gassers won two games and lost none for a perfect second half pitching record.

No Damage Results in Fire At County Barn

No appreciable damage resulted from a fire in one of the road machines at the county barn here Monday.

Workmen were cleaning and repairing one of the machines when fuel oil became ignited. The fire department made a run to the scene and quickly extinguished the blaze.

Miss Roxie Hill left last week for her home in San Antonio after several weeks visit here with her grandparents, Mr. and Mrs. J. T. Patrick.

MRS. VAN HOOK STUBBS of Wortham, Texas, president of the Texas Federation of Women's Clubs, will visit Ozona on September 9. Members of the three federated clubs of Ozona, the Ozona Woman's Club, the Woman's Forum and the Ozona Literary Club, will be joint hostesses at a tea at the Methodist church to honor the visitor. Members of clubs in surrounding towns will be invited to attend the tea.

State President Of Women's Clubs To Visit In Ozona

Mrs. Stubbs to be Honored At Joint Meet of Clubs Sept. 9

Members of three federated women's clubs in Ozona will be hostesses at an area-wide rally of club women to welcome the state president of the Texas Federation of Women's Clubs, Mrs. Van Hook Stubbs of Wortham, Texas, who will visit Ozona on Tuesday, September 9.

The Ozona Woman's Club the Woman's Forum and the Ozona Literary Club will be joint hostesses at a tea to be held in the fellowship hall of the Methodist Church at 4 p. m. September 9 to honor the visiting state president.

Invitations are to be sent to clubs in the Ozona area who are expected to have representatives here to attend the gathering. Mrs. Stubbs is on a tour of this area making official visits to as many clubs as possible. She is scheduled to visit in San Angelo on September 10.

Mrs. Stubbs was elected Texas Federation president last November for a two-year term. She was former state chairman of Junior Clubs, president of the Third district, TFWC, and for three years served as trustee from the Third District of Permanent Headquarters, TFWC.

Mrs. Stubbs, whose husband is a stockman at Wortham, was a high school English teacher before her marriage. The couple have a 13-year-old son, Eugene.

Mrs. Stubbs has adopted as her administration theme, "The Cornerstone of Democracy," based on the American home, citizenship, education, and legislation, with the center support a code of ethics.

Paul Gibbs Resigns From Draft Board

Paul Gibbs, who has served four years as a member of Local Board No. 110, serving a five-county area and with headquarters in Sonora, has announced his resignation from the board. No successor to represent Crockett county on the five-man board has been announced.

Mr. Gibbs advised that registrants and those who might want information concerning registration or other matters pertaining to the Selective Service law must communicate with the local board headquarters in Sonora.

SON TO HOOVERS

Mr. and Mrs. Armond Hoover, Jr. are the parents of a son, David Bryan, born August 1 in the Ozona Hospital. The baby weighed 6 pounds. Grandparents are Mr. and Mrs. Armond Hoover, Sr., and Mr. and Mrs. H. W. Maddoux, all of Ozona.

Sonora 'Swim Lift,' Recreation Program To Resume Monday

The weekly "Swim Lift" to the Sonora pool, made a part of the summer recreation program in swim-pool-less Ozona this summer, will be resumed next Monday morning, as will the recreation program in the girls' gymnasium in the high school.

The recreation program and weekly "swim lift" were interrupted by vacation time for Director Larry Wilkins and prolonged this week by Coach Wilkins' attendance at the state coaching school in Fort Worth.

The West Texas Utilities Co. will be host to the Ozona swimmers next Monday morning. The school bus loaded with those who want to dip in the Sonora pool, will leave at 8 o'clock Monday morning from the high school. Dr. and Mrs. H. B. Tandy will be hosts to the swimmers week after next Monday, August 18.

Nursery Department Of Baptist Church Expands Facilities

Facilities at the First Baptist Church for children under the age of three are being expanded, Rev. Blake Woolbright, pastor, announced this week. In the past few weeks, three new air conditioners, several new beds and a dozen little chairs have been added to the nursery department. Furthermore, two additional rooms have been made available for the children as crowded conditions demanded, the pastor said.

All parents of little children are invited to bring the children to the nurseries of the First Baptist Church. A place has been made for every age child in the Sunday School and in the Training Union and a supervised nursery is available for your child during the worship services.

Conoco Strike Extends Elkhorn One Mile South

22-A Shannon Flows At Estimated 1,647 Barrels Daily

A one-mile extension to the Elkhorn (Ellenburger) field in Crockett county, Continental Oil Co., No. 22-A Shannon, flowed 480.28 barrels of 40.7 gravity oil in seven hours for a calculated daily flowing potential of 1,647 barrels of oil.

The flow was through a 24-64-inch tubing choke and casing perforations between 7,160-7,200 feet, 7,216-7,238 feet, 7,250-7,280 feet, and 7,292-7,316 feet in the Ellenburger.

The section had been treated with 1,000 gallons of acid, after which it kicked off and logged the above flow.

Gas-oil ratio was 534-1. Gas volume was gauged at the rate of 879,500 cubic feet daily. Tubing pressure was 250 pounds; casing pressure, 50 pounds.

Casing (5½-inch) was cemented at 7,414 feet in dolomite, the total depth.

The above flow may be used as a potential gauge.

Location is 670 feet from the south and 2,069 feet from the east lines of section 21-UV-GC-8&F.

Continental Oil Co., No. 20-A Shannon, Elkhorn field test, recovered 40 feet of mud, no shows, on a one-hour drillstem test between 7,060-7,210 feet in the Ellenburger, and was drilling at 7,262 feet in dolomite. There were no pressures.

Other Elkhorn (Ellenburger) field drilling depths: Conoco No. 23-A Shannon, 4,853 feet in shale and sand; Conoco No. 25-A Shannon, 2,248 feet in lime.

Crockett county wildcat activity: Humble No. 1 Davidson, drilling at 6,490 feet in shale and sand; Conoco No. 1-B Harris, drilling at 2,861 feet in anhydrite and lime; Continental No. 1-C Harris, drilling at 583 feet in sand and shale.

San Antonio Doctor And Family Slightly Hurt In Highway Crash

Dr. and Mrs. E. T. Coates and children of San Antonio, were slightly hurt when their car collided with one driven by Pete Pyburn, mechanic at the Wilson Motor Co., here, at the entrance to the highway roadside park east of Ozona Monday. Mrs. Coates suffered severe facial cuts while other members of the family were only slightly cut and bruised. Mr. Pyburn escaped unhurt.

Mr. Pyburn was road-testing a Buick car belonging to Mrs. H. B. Tandy of Ozona and was attempting to turn into the park to make some adjustment on the motor. The Coates car was travelling in the direction of Ozona and smacked into the side of the Buick. Both cars were badly damaged.

The park entrance, a few hundred feet from the brow of a hill, is considered one of the top hazard spots on highways in this area and reports are that the highway department plans to make some change to eliminate the hazard in the near future. Scotty Houston, local highway maintenance superintendent, said that the matter is under consideration by the district engineers.

160 Enrolled In Vacation School Of Baptist Church

Commencement Set For 8 o'clock Friday Evening

The Vacation Bible School of the First Baptist Church was in full swing at midweek, Rev. Blake Woolbright, pastor and principal of the school, announced.

Saturday morning at 10 o'clock, the preparation day and parade were held. At that time, 85 pupils were enrolled for the week's work. The Ozona fire truck, driven by Fireman Oscar Kost, led the parade of 15 cars and ten decorated bicycles.

On Monday, a record of 136 were in attendance for the first official day of the school. Departments have been set up for every age child from three to seventeen. Thirty faculty members have been faithful in leading and in teaching the children in Bible stories, character stories, handwork, Bible drills and play activities. Tuesday the enrollment was 157, and the latest counting for the Wednesday attendance was 160.

Friday night at 8 o'clock, the annual Bible School commencement will be held for the display to the parents and friends of the things accomplished during these Bible school days. All are invited to attend the commencement services Friday evening, Rev. Woolbright said.

Atlantic Strike West Extension To Elkhorn Field

Ellenburger Producer Flows By Heads; To Continue Testing

Atlantic Refining Co. and Ed Cox and others No. 1-B Shannon Estate, indicated ½-mile west extension to the Elkhorn (Ellenburger) field in Crockett county, has developed a flow of oil from Ellenburger perforations between 7,478-7,493 feet.

After setting 5½-inch casing on bottom at 7,522 feet, the project drilled out to 7,499 feet, perforated casing at the point listed above, swabbed out drilling load in 18 hours, then swabbed 236 barrels of new oil in 11 hours.

The operation then circulated oil, kicked off and flowed one hour and then died. There was no estimate of this flow.

It then swabbed 70 barrels of new oil in four hours. Following this gauge, the well was shut in (Continued on Last Page)

Demo Run-Off Election To Be Held In Crockett

State Committee Says Action Mandatory; Vote at Courthouse

A Democratic run-off election will be held in Crockett county on August 23, along with all other counties of the state, if the state Democratic committee has its way.

A. O. Fields, Crockett county Democratic chairman, this week received notification from the executive committee that the holding of the run-off election is mandatory and that all counties in the state are being notified. The committee will meet next Monday to canvass returns of the first primary and certify the list of candidates to appear on the run-off ballot.

Mr. Fields said that sufficient funds are on hand to hold the run-off in this county. The election will be held in only one box, however, at the courthouse in Ozona, the chairman said.

Actually there will be only one statewide contested election to be decided in the run-off, that for Associate Justice of the Supreme Court, Place 1, although the name of Martin Dies will appear as an uncontested candidate for Congressman-at-Large. Dies failed by a few hundred votes to obtain a clear majority over six opponents in the first primary. The candidate receiving the next largest total and who would have been picked to oppose Dies in the run-off was John Lee Smith of Lubbock. Mr. Smith, however, has withdrawn from the race and will not contest Dies for the nomination. Democratic officials point out, however, that Dies can not be declared the nominee until he actually receives the nomination at the hands of the voters, hence his name on the run-off ballot.

Two candidates will have their names on the ballot in the race for the Supreme Court post, Spurgeon Bell of Houston and Frank P. Culver of Fort Worth.

All county and district races in this area were decided in the first primary.

Students Of High School To Register August 28 and 29

Schools To Open On Tuesday, Sep. 2 For Classes

Pre-opening day registration of Ozona High School students has been set for Thursday and Friday, August 28 and 29, P. O. Hatley, high school principal, announced this week.

Registration hours will be from 8 to 12 a. m. on Thursday, August 28, for Seniors, and Thursday afternoon, from 1 to 4 o'clock, for the Juniors.

Friday, August 29, will be registration day for Sophomores and Freshmen, the principal said. Sophomores will be called to register between the hours of 8 a. m. and 12 noon and Freshmen from 1 to 4 p. m.

By allowing these times for registration by classes, Mr. Hatley pointed out, students may register leisurely and have plenty of time to discuss their courses with faculty advisers and thus work out better schedules for their year's work.

Schools will open officially for classes on Tuesday morning, September 2. Opening exercises will be held at 9 o'clock in the high school auditorium, after which pupils will gather in their home rooms to receive assignments, instructions, books, etc. and in some cases to begin class work.

The pre-school faculty meeting will be held at 9 o'clock Monday morning, September 1.

Augustine-Schweitzer Wedding Vows Are Exchanged In Home Ceremony Here Saturday

Double ring vows read at 4 o'clock Saturday afternoon united in marriage Miss Doris Jane Augustine of Ozona and David George Schweitzer of San Antonio.

Rev. Finis B. Jeffery, guest minister of the Ozona Methodist Church, officiated at the rites in the home of the bride's parents. Background for the ceremony was an improvised altar of palm leaves flanked on each side by seven-branched candelabras and tall baskets of white gladioli.

Miss Judy White, pianist, presented nuptial selections. She also accompanied Misses Jeannene and Darrene Thompson, vocalists.

Parents of the bridal couple are Mr. and Mrs. Walter W. Augustine of Ozona and Mr. and Mrs. Clarence E. Schweitzer of San Antonio.

The bride was given in marriage by her father. She wore a gown of white Chantilly lace over pale blue tulle. The elongated jacket of lace over tulle was fitted and was joined to an off-shoulder yoke of tulle with appliques of lace motifs. The neckline was finished with a high collar of lace. Fitted sleeves terminated in points

over her hands.

The jacket was worn over a strapless dress of blue tulle and taffeta. Layers of tulle were interspersed with panels of lace to form the ballerina length skirt.

She wore a brief veil of imported silk illusion which fell from a brimmed half hat of lace embroidered with pearls and bugle beads. She carried a white Bible topped with a white orchid. Her jewelry was an antique pin belonging to Mrs. Sherman Taylor and a pearl ring belonging to the bride's great grandmother.

Mrs. Jack Brewer, Jr. of Ozona cousin of the bride, was matron of honor. She wore a strapless gown of open blue taffeta. The bodice was topped with short jacket designed with short sleeves and high neckline. The skirt was ballerina length. She wore a half hat of lace with short lace mitts and carried a bouquet of white carnations with garlands of ivy leaves.

Misses Marjorie Adamek of San Antonio, niece of the bridegroom, and Janet North, cousin of the bride, carried white satin streamers to form an aisle. The streamers were attached to wrist corsages of white feathered carnations. Miss Adamek wore an aqua organdy dress trimmed in white and Miss North chose yellow organdy trimmed in white.

Bob and Bill Meinecke, twin cousins of the bride, were candlelighters.

John Wolfe of San Antonio attended the bridegroom as best man.

A reception was held after the ceremony. The table was laid with a white embroidered linen cloth centered with an arrangement of white Ester Reed and Marconi daisies. The three-tiered wedding cake was encircled with a light blue tulle ruffle. It was topped with a miniature bride and groom.

Mrs. E. J. Adamek of San Antonio, sister of the bridegroom, served the cake. Miss Sandra Augustine, cousin of the bride, presided at the punch service. Guests were registered by Miss Jeanette Trotter. Others in the house party were Miss Martha Flowers, Mrs. Richard Flowers, Mrs. Buster Augustine, Mrs. Hilton North, Mrs. Hurst Meinecke, Miss Wayne Augustine and Mrs. Helen Taylor of Houston.

When the couple left for a wedding trip to Arizona, Colorado and Utah, the bride was wearing a beige and brown suit. The fitted jacket topped a semi-flared skirt. Her beige hat featured a brief veil and her shoes and bag were of brown reptile. Her corsage was a white orchid. The couple will live in Port Lavaca, where Mr. Schweitzer is with the Geophysics department of the Humble Oil & Refining Co. He was graduated from Brackenridge High School in San Antonio and received his BS degree in electrical engineering from Texas Technological College, Lubbock.

Mrs. Schweitzer attended the Ozona schools and is a member of Epsilon Sigma Alpha sorority here.

Out-of-town guests at the wedding were Mr. and Mrs. C. E. Schweitzer, Mr. and Mrs. E. J. Adamek and daughter, Marjorie, Mr. and Mrs. T. D. Schweitzer, Mrs. D. E. Schweitzer and John Wolf, all of San Antonio; Miss Wayne Augustine and Mrs. Helen Taylor and Karl Kreamer, all of Houston.

Mr. and Mrs. W. R. Baggett, Mr. and Mrs. R. L. Flowers, and

Mr. and Mrs. Jack Brewer, Jr., entertained with a buffet supper on Friday evening in the Baggett home to honor the wedding party and members of the bride's and groom's families.

Out-of-town guests included Mr. and Mrs. C. E. Schweitzer, Mr. and Mrs. T. D. Schweitzer, Mr. and Mrs. E. J. Adamek and daughter, Marjorie, and John Wolfe, all of San Antonio; Mrs. Helen Taylor, Miss Wayne Augustine and Karl Kreamer, all of Houston.

The bride was honored with a surprise kitchen shower Thursday evening by Mrs. Charles Schneider, Mrs. Chris Perner and Miss Jeanette Trotter. The party was in the Schneider home. Refreshments of sandwiches and cokes were served. Guests included Mrs. James Isbell, Mrs. Blanton Taylor,

Mrs. Frank Burchwell, Mrs. Frank Walters, Mrs. Bill Melton, Mrs. Warren Taliaferro, Mrs. Sarah Gillis, Misses Sandra Augustine, Judy White and Kay Kirby and the honoree.

W. S. C. S. Meeting Held Wed. Morning

Members of the Woman's Society of Christian Service of the Methodist church met Wednesday morning at the church, with Mrs. Paul Perner, president, presiding.

The devotional was led by Mrs. Charles Williams, Sr. Mrs. B. C. Flowers, treasurer of the Advisory Board of the Community Center, gave a financial report for June and July.

Miss Mabel Whited, deaconess

at the Center, asked to help get the September at the Center set up to work with the church to welcome visitors on Sunday morning.

All committee chairmen were urged to hold meetings before the next executive meeting will be held and chairmen are requested to have their reports ready by that time.

Those present were Perner, L. B. Cox, R. Perner, W. D. Cooper, Mrs. Charles Williams, Henderson, M. B. Flowers, Williams, Jr., and Miss

ROAD BOND ELECTION

On the 16 day of July, 1952, the County Court of Crockett County, Texas, convened at the regular court room at the Courthouse, Texas, with members of the court as follows:

County Judge: Charlie Black, Jr.
 Precinct No. 2: Commissioner of James R. Childress
 Precinct No. 3: Commissioner of Charles R. Childress
 Precinct No. 4: Commissioner of James R. Childress
 Precinct No. 5: Commissioner of James R. Childress
 Precinct No. 6: Commissioner of James R. Childress
 Precinct No. 7: Commissioner of James R. Childress
 Precinct No. 8: Commissioner of James R. Childress
 Precinct No. 9: Commissioner of James R. Childress

ROAD BOND

1952, which is not less than thirty days from the date of this Order, at which election, in accordance with said petition, the following proposition shall be submitted to the resident property taxpaying qualified voters of said County for their action thereupon:

PROPOSITION

"Whether or not the bonds of said Crockett County shall be issued in the amount of \$200,000.00, bearing interest at a rate not to exceed 3% per annum, and maturing at such times as may be fixed by said Commissioners' Court, aerally or otherwise, not to exceed 10 years from date, for the purpose of constructing, maintaining, and operating macadamized, gravelled or paved roads and turnpikes, or in aid thereof; and whether or not an ad valorem tax shall be levied and collect on all taxable property in said Crockett County for the current year and annually thereafter while said bonds or any of them are outstanding sufficient to pay the current interest on said bonds and to pay the principal thereof as the same becomes due."

That said election shall be held at the following places in said County and the following named persons are hereby appointed officers for said election:

1. Election Precinct No. 1 at Court House Building, in Ozona, Texas, with Alvin Harrell as Presiding Judge, and W. M. Johnigan, Clerk.
2. Election Precinct No. 2 at Powell Field in Crockett Co., Texas, with Mrs. Bill Roberts as Presiding Judge, and Mrs. W. H. Lewis, Jr., Clerk.
3. Election Precinct No. 3 at Jeff Owens Ranch in Crockett Co., Texas, with Jeff Owens as Presiding Judge, and Mrs. Jeff Owens, Clerk.
4. Election Precinct No. 4 at Blakeney Ranch in Crockett Co., Texas, with Levoyd Parker as Presiding Judge, and Mrs. Levoyd Parker, Clerk.
5. Election Precinct No. 5 at Geo. Thompson Ranch in Crockett Co., Texas, with A. A. Hall as Presiding Judge, and Mrs. A. A. Hall, Clerk.
6. Election Precinct No. 6 at West Texas Utilities Power Plant in Crockett Co., Texas, with C. O. Holt as Presiding Judge, and Charley Young, Clerk.
7. Election Precinct No. 7 at James Childress Ranch in Crockett Co., Texas, with Allen Gann as Presiding Judge, and Mrs. Allen Gann, Clerk.
8. Election Precinct No. 8 at Todd Field in Crockett Co., Texas, with O. Q. Alford as Presiding Judge, and Mrs. O. Q. Alford, Clerk.
9. Election Precinct No. 9 at Midway Lane in Crockett Co., Texas, with Mrs. Oma Odom as Presiding Judge, and Mrs. O. R. Henderson, Clerk.

FOOTPRINTS IN THE STONES OF TIME . . . Dinosaur tracks in prehistoric limestone are carefully removed from the bed of the Paluxy river, Texas. The impressions, made more than 120 million years ago, are those of the gigantic Brontosaurus and the Allosaurus, its enemy. The scientists think the latter was trying to overtake and kill the former. The Brontosaurus ate no meat, living entirely on plant life, while the Allosaurus was a voracious meat eater, possessed of deadly fangs.

The ballots of said election shall have written or printed thereon the following:

"For the issuance of the bonds and the levying of the ad valorem tax in payment thereof"

"Against the issuance of the bonds and the levying of the ad valorem tax in payment thereof"

Each voter shall vote on the proposition hereby submitted by placing an X in the square beside the expression of his choice, or said voter may scratch or mark out one of said expressions, thus leaving the other as indicating his vote.

The manner of holding said election shall be governed, as near as may be, by the General Election Laws of this State, except as modified by the provisions of Chapter 3, Title 22, Vernon's Annotated Revised Civil Statutes of Texas, Revision of 1952, as amended, and none but resident property taxpaying qualified voters of said County and who have duly rendered the same for taxation shall be allowed to vote at said election.

Notice of said election shall be by publication of a copy of this Order in a newspaper published in said County for three successive weeks prior to said election. In addition thereto, a copy of this order shall be posted in four public places in said County, one of which shall be the courthouse door, at least three weeks prior to the date of said election.

The County Clerk is hereby authorized and directed to cause said notice to be published and posted as herein above directed and further orders are reserved until the returns of said election are made by the duly authorized election officials and received by this Court.

The above order being read, it was moved and seconded that same do pass. Thereupon, the question being called for, the following members of the Court voted AYE: Ira M. Carson, Charlie Black, Jr., B. B. Ingham, Jr., James R. Childress; and the following voted NO: None.

Passed, Approved and Adopted this 14 Day of July, 1952.

s Houston S. Smith, County Judge, Crockett County, Texas.
 s Ira M. Carson, Commissioner Precinct No. 1
 s Charlie Black, Jr., Commissioner Precinct No. 2
 s B. B. Ingham, Jr., Commissioner Precinct No. 3
 s James R. Childress, Commissioner Precinct No. 4

Gonzales Foundation Needs Nurses to Meet Record Polio Load

GONZALES. — Reflecting the upsurge in polio incidence in Texas already this year, admissions at Gonzales Warm Springs Foundation for Crippled Children have continued at a record-setting level for the last several weeks. Ten patients entered the rehabilitation hospital on July 7 and nine a week later, the largest patient groups admitted in several years.

All but three of the 19 are post-acute polio victims. The rest are other types of neuromuscular cases.

The Gonzales hospital of physical medicine and rehabilitation is currently operating at the maximum capacity its staff can efficiently handle, with admissions each week dependent on the discharges during the week previous. However, hospital officials point out that admissions might be increased if additional registered nurses and physical therapists could be recruited. The extreme shortage of professional personnel of this type, they indicated, makes recruitment most difficult, a problem which faces nearly every hospital in the country.

News Notes From The County Agent's Office By Pete Jacoby, County Agent

MORE ON MESQUITE CONTROL

Evaluations of mesquite treated in 1950 at 199 locations show that, under favorable conditions, low volatile esters of 2,4,5-T rather consistently gave more effective control than any of the chemicals used. The 2,4,5-T amine generally was only slightly less effective but more erratic than the ester formulations. The amine formulation is considered non-volatile; however, because an emulsifier must be added to the water, difficulties often are encountered in making a stable emulsion with the prevailing hard water of the mesquite area.

Mixtures of 2,4-D and 2,4,5-T low volatile esters in a ratio of 2-to-7 and 1-to-1 generally did not appear as effective over a wide range of conditions as 2,4,5-T. Furthermore, since a greater amount of chemical is required when the mixtures are used, and since 2,4-D is more hazardous to use near where cotton is grown, mixtures of 2,4-D and 2,4,5-T are not recommended for the control of mesquite. Formulations of 2,4-D occasionally have given reasonably effective control of mesquite; however, due to highly erratic and inconsistent results, as well as the greater hazards and larger amounts needed, 2,4-D is not recommended for the control of mesquite.

The amount of chemical applied per acre is based on pounds of active ingredient or acid content of the chemical. The amounts used in ranch tests in 1950 and 1951 ranged from 1/3 to 2 1/2 pounds acid per acre. Almost without exception, 2 1/2 to 3/4 pound acid per acre of a low volatile ester of 2,4,5-T was more effective than 1/2 pound and equally effective as 1 1/2 and 2 1/2 pounds. With the amine salt of 2,4,5-T, 3/4 to 1 pound acid per acre was the optimum rate, while mixtures of 2,4-D and 2,4,5-T ester appeared most effective at 1 pound acid per acre. Rates of 1, 1 1/2 and 2 pounds acid did not increase the effectiveness of 2,4-D. Increasing

the amount of chemicals did not improve the effectiveness of the treatment when seasonal conditions were unfavorable.

The ranch tests included comparisons of water-clear fuel, water and diesel oil-water emulsions at rates of 2.4, 8 and 12 gallons per acre. The emulsions consisted of 12.5, 25 and 50 percent oil. Results indicated that the 25 percent diesel oil-water emulsion was consistently the most effective carrier for the chemicals used.

Water-clear diesel fuel alone as a carrier was almost as effective as the 25 percent emulsion, but was considerably more costly. The use of water alone and 12.5 percent oil-water emulsions gave inconsistent results, while the 50 percent emulsions did not increase the effectiveness for the control of mesquite. At the present time, results indicate that when 2.4, 8 and 12 gallons of carrier were used, a volume of 1 gallon of diesel fuel and chemical and 3 gallons of water per acre gave the most economical and effective control of mesquite.

The time of treatment appears to be the principal factor influencing the effectiveness of growth-regulator chemicals applied to the foliage. The most effective kills were obtained just after the plants reached the first heavy foliage stage of growth in the spring. The optimum time for treatment at Spur has been 70 days after the first leaves appear. Reasonably effective kills were obtained however, during a 50-day period beginning 45 days after the first leaves appear. Treatments during this period also gave the greatest amount of weed control. Earlier or later applications gave either less effective or ineffective control of mesquite.

Rainfall data at points near the ranches were used to obtain information on apparent soil moisture conditions previous to treatment. In general the effectiveness of chemicals was decreased when the soil was extremely dry and severe drought prevailed. On the other hand, when there was enough soil moisture available for mesquite to produce normal growth with good foliage cover, the effectiveness of chemicals was greatly increased. For best results, soil

moisture should be normal or above normal for at least 30 days prior to the treatment of mesquite. Indications of good growing conditions are heavy foliage cover of mesquite, green lush growth of grass and the presence of rapidly-growing annual weeds.

Mesquite treated in the ranch tests varied from small sprouts and seedlings to large trees 18 inches in diameter and as much as 30 feet high. The results obtained from tests in 1950 indicate that small plants and seedlings were destroyed very effectively by chemical treatments. Growth of sprouts 3 to 5 feet tall also was reasonably well controlled when soil moisture and plant growth were favorable. Chemical treatment of small sprouts 1 to 3 feet tall following cabling or brush cutters resulted in good top kills but relatively poor root kills. Apparently there must be a balance of above ground growth with that of the root system for best results.

Medium-size trees with stems 2 to 4 inches in diameter and 10 to 12 feet tall also were effectively controlled by chemical treatments. Large trees with trunks 6 to 18 inches in diameter, for the most part, were killed to ground level but little or no root kill was obtained. In most instances, however, sprout growth from the treated plants was less than 12 inches tall, stunted in appearance and often showed the effects of 2,4,5-T.

In a few instances, regrowth has been rapid, indicating that little or no chemical movement occurred below ground level, even though soil and plant conditions appeared to be reasonably favorable at the time of treatment. In general, small trees and seedlings were relatively easy to control under a rather wide range of moisture and plant conditions, while the larger trees and sprouts were effectively controlled only when soil moisture and plant conditions were optimum.

Throughout all of the test areas, noticeably more effective control of mesquite was obtained on upland sites. On bottomland sites, top kills were highly satisfactory but root kills often were disappointing. Mesquite seems to develop more slowly in the spring on bottomland sites, especially following winters with below-normal temperatures. Mesquite is

deeply rooted and the dormant sprout buds that must be killed or inhibited to prevent regrowth generally are more deeply buried on the bottomlands.

Bottomland treatment should be delayed until all the plants have reached the proper stage of growth. It is also possible that variations in air density, air currents and growth conditions are responsible for the difference in results.

Most range weeds, such as annual broomweed, sunflowers, cocklebur, Russian thistles, croton, purple night shade and ragweeds, were satisfactorily controlled by treatment of mesquite with 2 1/2 pounds of 2,4,5-T per acre when applied by airplane. Almost without exception, grasses on the treated areas were heavily utilized by livestock even though there were large areas of untreated land available for grazing animals. It is thought that the greater amount of sunlight and moisture made available to the grasses following treatment of mesquite is primarily responsible for this grazing preference. Some chemical changes probably occur in the composition of the grasses and treated forage but little information is available on this phase of work at this time.

SAYS AMMO SHORT . . . Rep. Clarence Brown (R. Ohio) says he has received 25 letters from soldiers fighting in Korea complaining that ammunition is being rationed. He read the letters to the house and demanded a probe.

Accurate and Complete RANCH RECORDS Are More Important Today Than Ever

Government regulations and heavy tax programs are destined to be a part of the American way of doing business for a long time. For that reason, it is more important today than ever that every business keep accurate records of its operations.

The ranch business is no exception. With the stiff federal taxes, you will want to take advantage of every saving item in your expense account and at the same time have clear and convincing records available for inspection by tax agents to prove up any item on your income tax return.

Start now to keep a complete record covering all operations in your business with the Stockman's RANCH RECORD BOOK. Your cancelled checks or your present records can be transcribed to this handy record book, together with your income and inventory records and you can have your entire record in a simplified form contained in one volume.

RESOLUTION

...to Article III of the Constitution of the State of Texas by adding a new section thereto to be known as Section 61 to authorize cities, towns and villages of this State to provide insurance for employees; providing for the submission of the proposed Amendment to the qualified electorate; and providing for proclamation and publication by the Governor.

RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS

Article III of the Constitution of the State of Texas adding thereto a section to be known as Section 61 to read as follows:

Legislature shall provide suitable laws for the administration of such insurance in the said municipalities and for payment of the costs, charges, and premiums on policies of insurance and the benefits to be paid thereunder."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electorate of the State at the General Election to be held on the first Tuesday after the first Monday in November, 1952, at which election all ballots shall have printed thereon (or in counties using voting machines shall provide for) the following:

"FOR the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages"; and "AGAINST the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages."

Each voter shall mark out one (1) of said clauses on the ballot, leaving the one (1) expressing his vote on the proposed Amendment; and if it shall appear from the returns of said election that a majority of the votes cast are in favor of said Amendment, the same shall become a part of the Constitution of the State of Texas.

Sec. 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. 17-4c

HOUSE JOINT RESOLUTION NO. 20

proposing an Amendment to Article III of the Constitution of the State of Texas by adding a new section thereto to be known as Section 61 to authorize cities, towns and villages of this State to provide insurance for employees; providing for the submission of the proposed Amendment to the qualified electorate; and providing for proclamation and publication by the Governor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of the State of Texas be amended by adding a new section thereto to be known as Section 61 to read as follows:

"Sec. 61. The Legislature shall have the power to enact laws to enable cities, towns, and villages of this State to provide Workmen's Compensation Insurance, including the right to provide their own insurance risk for all employees; and the Legislature shall provide suitable laws for the administration of such insurance in the said municipalities and for payment of the costs, charges, and premiums on policies of insurance and the benefits to be paid thereunder."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electorate of the State at the General Election to be held on the first Tuesday after the first Monday in November, 1952, at which election all ballots shall have printed thereon (or in counties using voting machines shall provide for) the following:

"FOR the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages"; and "AGAINST the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages."

Each voter shall mark out one (1) of said clauses on the ballot, leaving the one (1) expressing his vote on the proposed Amendment; and if it shall appear from the returns of said election that a majority of the votes cast are in favor of said Amendment, the same shall become a part of the Constitution of the State of Texas.

Sec. 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. 17-4c

321 Years Vacations to Stanolind Employees; Time Worth \$1,500,000

FORT WORTH, Tex. — Vacation time amounting to 16,700 weeks will be enjoyed by employees of Stanolind Oil and Gas Company this year. The total is equivalent to 321 years and is worth approximately \$1,500,000, the company said today.

Some 7,490 employees — more than 93% of all people working for the company — are eligible for vacations under Stanolind's plan. This plan provides for two weeks vacation with pay each year after one year's service with the company, three weeks each year after fifteen years, and four weeks each year after twenty-five years.

In the North Texas-New Mexico Division, which has headquarters in Fort Worth, Texas, 2,388 Stanolind employees will receive vacations this year, according to John R. Evans, division manager. Four weeks vacation will go to 46 employees, three weeks to 366, and two weeks to the remaining 1,976.

WORTH - GALBRAITH LBR. CO.

Here and There

By J. Troy Hickman
(Continued From Page One)

two of a long string which stretch for hundreds of miles southward from the Canadian border along the basins of the Kootens, Snake and Columbia rivers to the middle of Washington state. Everybody seems to be in a hurry. Idaho has spuds, furs, ores, grain, lumber and tourists. The many waters of this Gem State are used extensively for irrigation. From the highway one can see hundreds of large sprinklers spraying the fields of an otherwise arid region, replacing the older type of ditch-irrigation.

Spokane, the industrial hub of this Inland Empire, is a big horn of plenty. Following, as it does, the contours of several ridges and canyons in a country of volcanic outcroppings, this impressive commercial city seems to have a thousand smokestacks and many railroads. It is the trade center for a vast area which includes all southwestern Canada. The Diamond Match Company has a factory here, and we were impressed by the huge stacks of lumber which are evidently destined to be reduced to match sticks.

Someone in Spokane had the kindness to route the heavy east-west through-traffic along two broad one-way streets. The traffic lights on this route are set so that by holding the speedometer steadily on 23 miles per hour a tourist can skim across this city of 161,000 souls without a single stop for lights. Amarillo please take notice.

In the heart of this semi-arid volcanic region, lying between the Rockies and the Cascade Range, is the Grand Coulee Dam and Lake of the Columbia river, its waters backed up clear to the Canadian border and irrigating one million acres of grain, some of which is 600 feet higher than the surface

of the lake. The wedge-shaped slab of concrete resting upon a granite foundation, which is called Grand Coulee Dam, is nearly a mile long, 550 feet thick at the base and took almost eight years to complete at a cost of 120 million dollars. An adjacent mountain, which during the construction period attempted to slide into the excavated dam basin, was held back for three years by being frozen with ice-water circulated deep under the earth in three miles of pipe. Coulee Dam was originally built to impound snow waters for irrigation. But the second World War raised a heavy demand for electrical power at west coast war-industry centers, and the resources of the mighty Columbia and Snake rivers which flow over the dam in a cascade higher than Niagara, were tunneled through holes eighteen feet in diameter, 260 feet below the water surface, and made to turn the largest turbines in the world, 18 of them, each one of which has a rotor 35 feet in diameter. Any one of these generators could light up the city of Chicago, and together they can produce two and a quarter million kilowatts of power. New industries flocked to this new power source and today the dam is selling 13 million dollars worth of power a year and has already paid back more than 87 million dollars of the original cost of the dam.

Water is pumped from the Coulee Lake by means of the largest pumps ever made, four in all, to lands lying much higher than the lake, and any one of the pumps could supply the water needs of Greater New York City. The present one million acres served by these waters is only a small part of the ultimate plan, and three new dams above and below Coulee are being constructed to expand the system. Thus the Inland Empire, already vast, has really just begun. To the south is the rich Yakima Valley, famous for apples. To the west are cities such as Seattle, Portland, and Tacoma, whose industrial needs for power and fresh water can keep pace with all the Columbia system can produce.

for ten hours. Shutin pressure built up to 500 pounds. The well was opened up and it flowed 17½ barrels of new oil in one hour. Tubing pressure was 50-75 pounds. The well was flowing by heads Monday afternoon. Choke sizes were not reported. All testing has been natural.

On a 65-minute drillstem test between 7,425-7,450 feet, the project recovered three stands of oil then unloaded an estimated 820 feet of oil and 50 feet of drilling mud and the 1,000-foot water blanket. Fifty feet of heavily oil and gas-cut mud was recovered below the circulating sub. There was no water.

Earlier, the indicated extension

recovered 20 feet of free oil and 15 feet of oil cut on a one-hour drillstem test between 7,396 - 7,426 feet.

The Ellenburger was topped at 7,395 feet on elevation of 2,709 feet. The top of the Ellenburger in this well is 325 feet low to the same marker in Continental No. 13-A Shannon, ½ mile east.

Location is C NE NE 38-UV-GC & SF.

Ryan, Hays and Burke No. 1 Shannon West Texas Memorial Hospital, Crockett wildcat, was drilling at 7,334 feet.

WHY YOUR TELEPHONE BILLS ARE MAILED ON THE 21ST OF EACH MONTH

Because of the tremendous job of preparing monthly statements to thousands of users in the area, your telephone company has adopted a plan of staggered billing in order to complete the task through the month.

Billing periods are on the first, tenth and first of the month, the 21st date being assigned to the Ozona exchange.

Under this new plan, bills are payable at the office by the 10th of the following month. From the first of the month billings, accounts were due until the 20th.

Accounts not paid by the 10th will show on the succeeding month's bill, even if payment is by mid-month or later.

We urge you to form the habit of paying your phone accounts before the 10th of the month to avoid confusion the following month when you show a balance which you have already paid.

SAN ANGELO TELEPHONE

From where I sit ... by Joe Marsh

Well, What Do You Know?

Do you believe in a bunch of old tales about lightning — about how it's attracted by cats or the warmth of cattle ... how it never strikes in the same place twice ... or how it's liable to turn milk sour? Lots of people often do—but they're wrong.

Dad Hawkins inspired this column today. He's really studied up on lightning since his own barn was struck that time.

"Trouble is, most of us don't know half enough about the subject," Dad says. "And about half of what we do know is false!"

From where I sit, Dad's statement applies to a lot of things besides lightning. Too many people think they know their neighbor's wrong when he votes for his candidate instead of theirs. Some people even resent our right to enjoy a friendly glass of beer if and when we choose. Opinions based on misinformation and prejudice, instead of being "grounded" on true facts can cause more damage than lightning ever did.

Joe Marsh

You Can Whisper — and Be Heard!

We should like to have you come in for a ride in a Golden Anniversary Cadillac. And when you do, we hope you will just sit back and relax ... and listen!

And what will you hear? Well, you'll hear the soft sound of the wind as it slips past the streamlined body ... and, possibly, the quiet ticking of the electric clock.

But aside from these—you'll hear almost nothing. In fact, you'll find you can actually *whisper*—and be heard by your fellow-passengers!

We want you to experience this because *nothing* speaks more eloquently or more convincingly of motor car quality than—*silence!*

It tells you, first of all, that here is automotive engineering at its superlative best. For such silence of

operation can *only* come when every phase of the car's performance is in perfect harmony.

It speaks of *precision*—for only the greatest accuracy in design and construction can result in such remarkable freedom from vibration.

It is a testimonial to fine craftsmanship—to quality materials—and to scientific styling.

And, of course, this marvelous quiet foretells many of the pleasures and satisfactions you would enjoy as the car's owner. It promises rest — and relaxation — and peace of mind ... and a minimum of upkeep expense.

So why not take our suggestion—and come in and drive this beautiful Golden Anniversary creation? Let it tell you its own wonderful story through the things you *cannot hear!*
