Duplicating America's costliest cars, feature after feature, Ford is worth more when you buy it . . . worth more when you sell it!

FEW MINUTES on the telene calling the dealers who sell America's finest cars will reveal there are at least eleven models among four makes with price tags over \$4,000!

Now the interesting thing is that in feature after feature the Ford car duplicates each of these fine cars, and for less than half the fine car price!

Look under the hood of the most expensive cars and what do you find?

4 V-8 Engine!

Well, the Ford car has a V-8, too. In fact, it has had a V-8 since 1932, and since that time Ford has built more V-8's - by millions - than all other manufacturers combined. And there's no other builder in Ford's price range that's seen fit to offer one yet!

But the engine, as fine as it is, is only one of many things that make a fine car fine.

Automatic shifting, for example. All the fine cars offer it in one form or another because it's one of the things that make a fine car fine. But if you've never driven a Ford with Fordomatic you've missed one of the finer things of life. This amazing transmission not only does away with clutching and shifting forever - it gives you exactly the amount of power you want, when you want it

Fine car power steering, too. The big, heavy costly cars offer it for the same reason they offer power brakes. It's a man-sized job for a 120 pound woman to handle a car weighing two tons or more without it-especially when parking. Our "Master-Guide" has two distinct benefits.

First, it gives a hydraulic power assist right down at the wheels and just enough to take out the work. You don't relinquish one particle of control-rather your control is more complete and far easier.

Second, being hydraulic, "Master-Guide" power steering absorbs those fatiguing steering wheel tremors caused by ruts and roads in bad repair. And you don't pay a fine car price for "Master-Guide."

But there is another fine car feature-the Ford ride. Books have been written on the subject of riding quality in an automobile, but the payoff comes on the pavement - or lack of it! Many people associate a comfortable ride with excess weight, but it's not weight alone that makes for comfort. If it were, those big fiveton trucks which you see every day would be the most comfortable vehicles on the road.

Without being technical we can tell you that what's been done with the suspension and springing system gives the Ford a softer ride, a smoother ride than many cars which tip the scales at better than an added half ton

I hat about room? Here's an interesting point. If you've felt that only a costly car offered enough room, you just ought to sit down in a Ford even if you're out-size and six feet four! The so-called big car is bigger on the outside, but unless you buy a limousine with those little jump seats, it's not one passenger bigger inside.

Visibility is another fine car Ford feature. We say Ford cars offer "fullcircle" visibility because they all have huge, curved one-piece windshields and a huge rear window to match. plus side windows that mean every passenger gets room with a view!

How beautiful is a Ford? A great English poet, John Keats, once wrote-"Beauty is Truth, Truth Beauty"well, he could have been writing about our car for its beauty comes from honest, clean lines in every dimension. In fact, we think most people agree-even our competitors

-that the appearance of a Ford Car leaves very little to be desired. It "at home" wherever it goes and it goes everywhere.

But what about Ford quality? Does it too match the fine car? Is the sheet metal of the body panels as thick? Is the finish as good? How about the trim and things like that? Well, as far as we can determine, the sheet metal is identical in thickness in practically all instances. As to finish - we believe Ford's baked on enamel has no equal in any car. Fordupholstery fabrics and trim are less costly, but they're less delicate, too. and if anything, more durable.

How then is it possible to give you this fine car at half the fine car price?

Part of the answer lies in Ford manufacturing skills and knowledge as evidenced by the V-8 engine. Part of it comes from the ever increasing numbers of cars Ford produces and the economies they make possible And, part of it comes from Ford's willingness to give greater values than might be expected in cars selling in Ford's price range. And that's the Ford idea.

Worth more when you buy !! .. Worth more when you sell !!!

RAIN OR SHINE...

We're heading your way with gasoline to power your car, fuel oil for your home and hundreds of other oil products that bring you better living.

In America's highly competitive oil industry every oilman has a special job. Some search for oil, some produce it and some refine it. But before the products of petroleum can bring you comfort and convenience, they must be delivered where and when they are needed - in any weather, in any emergency. That job is done by oil transport companies like ours.

Here's our pledge that our drivers and our trucks will keep rolling-bringing oil progress to this community.
