

LEAGUE CONDEMNES GERMAN ACTS

RESOLUTION IS VOTED TODAY BY LEAGUE COUNCIL

Treaty Repudiation Formally Given Protest GENEVA, April 17. (AP). The League council today adopted the tri-power resolution condemning Germany for repudiating treaty obligations. Only Denmark abstained from voting.

He's Still Greatest Hero to Her

Sergeant Alvin C. York, World War's most famous hero, is as big a hero as ever to his patriotically named daughter, Betsy Ross, shown above with her noted dad in his most recent picture. Her slightest whim is obeyed by the man who, with the aid of his squad of seven, captured 132 German prisoners in the Argonne on Oct. 8, 1918.

Hamilton Mate Captured at Denton

FULTS WANTED FOR ROBBERY OF BANK IN MISS. Was Planning to Rob Bank at Prosper This Morning DENTON, April 17. (AP). Ralph Fults, running mate of Raymond Hamilton, was trapped by three Denton policemen at Lake Dallas, four miles east of Denton, today, a few hours before he had planned to rob the Prosper bank.

The fugitive overturned a speeding car in a ditch off a "blind" lake into which officers pursued him. He surrendered without resistance. Fults told officers he spent the night in Dallas and left this morning when he intended to rob the bank. Officers saw him on the highway and ran him down. He was wanted for robbery of the Prentiss, Miss., bank last month, along with Raymond Hamilton. He was jailed here.

Fults admitted that he helped Hamilton rob the Prentiss bank of \$1,100 recently. Hamilton, since captured at Fort Worth, awaits electrocution at Huntsville. Fults may be taken to Mississippi for trial in connection with the bank robbery, it was announced.

SCHOOL EXHIBITS FRIDAY OPEN TO PATRONS, PUBLIC

Representative school work taken from the third grade through the seventh will be on display at the Junior high school during the entire day Friday, April 19. The work exhibited will include note books, maps, projects, art, and penmanship. A cross section of an entire year's work will be shown. The public is cordially invited to see this exhibit.

In keeping with the custom established several years ago of having an exhibit each spring, the children of North Elementary School will have on display all day next Friday, April 19, the work they have done throughout the year. The display will consist of the regular art work and art work for special days. There will be work of each child in every subject showing the progress he has made during the year. The public as well as patrons of the school is cordially invited to visit the display.

Patrons and friends who visit the State Elementary school at noon Friday, April 19, will find an interesting and artistic display of the various types of work done by the children throughout the year. Samples of each student's work will be grouped according to grades and will consist of posters and booklets. Crayola colorings, free-hand drawings, and music lessons. A recognition of each student's work will be mounted on wall posters. Individual booklets will contain types of arithmetic, reading, spelling, writing, and music lessons. A recognition of each student's work will be mounted on wall posters. Individual booklets will contain types of arithmetic, reading, spelling, writing, and music lessons.

WOODUL REQUESTS LEGISLATURE TO VOTE TAX BILLS

AUSTIN, Apr. 17. (AP).—Acting Governor Walter Woodul asked the legislature today to suspend the rules and pass emergency tax measures which he said might yield additional revenue of \$17,500,000 annually. Woodul said the bills already were introduced were not controversial and generally designed to tighten loopholes in existing tax statutes.

This Hen Laid The Nickel Egg

A THENS, Tex. (UP)—The goose that laid the golden egg had nothing on the Athen hen that laid the nickel one. When Linton Tucker, a grade school boy, hit into a hard-boiled egg which he had taken to school in his lunch, his teeth clamped down on a nickel.

FUNERAL SERVICES FOR W. N. CONNELL HELD THURSDAY

Funeral services for W. N. Connell, well-known retired cattleman of Midland who died suddenly from a heart attack Tuesday, will be held from the family residence Thursday afternoon at 3 o'clock. The Rev. Winston Borum will officiate at the rites assisted by the Rev. J. E. Pickering.

An only son, William Connell, is expected to arrive Thursday morning from Las Vegas, Nevada. Interment in Fairview cemetery will follow the services at the home. Pall bearers will be: T. O. Middleton, T. S. Patterson, Percy Mims, Pearl Rankin, of Rankin; Terry Elkin, John M. King, Dunn Reiger, Chas. McClintic, F. P. Elkin, W. D. Elkin, J. T. Raesdale, B. N. Whitefield, Dick Houston of Stanton, F. Scarborough, E. P. Cowden, J. A. Haley, John Epley of Stanton, W. F. Epley of Stanton, C. L. Sinclair, and Bob Preston.

CLUB TO PROBE IMPORTS OF COTTON CLOTH

WASHINGTON, Apr. 17. (AP)—The House committee on Ways and Means today was ordered to make an immediate investigation of complaints against importations of foreign cotton cloth. The president acted on a recommendation of the national industrial recovery board which had been studying complaints by the cotton textile industry that Japanese goods were damaging domestic industry.

CATTLE ACTIVITY CONTINUES BRISK

SAN ANGELO, (AP).—Activity in cattle continues brisk in West Texas. A shipment of 500 Texas steers to Kansas pastures for grazing left Carrizo Springs recently. The cattle, the first moved this year, were purchased from Dolph Briscoe of Uvalde by Bill Ferguson of Wellington, Kansas. Other Kansas purchasers are expected to have more than 1,000 head in pastures of that state by summer. Some of the best Kansas grass has been contracted at \$7 a head but the bulk has been going at \$5.50 to \$6.

W. B. Mitchell of Marfa sold a string of cows to be loaded out of Kent soon. He bought ten steers from Elliott Cowden of Midland at \$90 a head. Wiley Wright of Canadian sold 250 coming steer yearlings for spring delivery at 8 cents and 350 coming two-year-old steers at 7 cents a pound for October 1 delivery.

HAND HURT

Red Culp, highway worker, was treated in a Midland hospital for cuts on the hand suffered yesterday. He is reported doing well.

Trades Day Heads Named

Orient's Youthful Rulers Meet

Kang Teh of Manchukuo, the one-time "boy emperor" of China will be the guest of Japan's equally youthful ruler, Hirohito, and the royal pair will exchange the highest awards of their monarchies. Then Kang Teh will return to his empire, prevented by illness from making the trip.

SUBSTITUTE BILL FOR REPEAL GAVE LIQUOR LEGISLATION PECULIAR TURN

AUSTIN, April 17. (AP)—Debate in the Texas House of Representatives on a resolution to submit repeal of state prohibition had an unexpected climax. The House debated for two days over provisions of the submission which with two factions sharply divided over proposals to write a mandatory state option section into the resolution. Leaders of both groups knew the division of opinion was close. They delayed bringing the proposal to a decisive vote and while members delivered their views on the subject they sought to bolster their forces.

Chain of Air Bases on Tiny Isles Aid Pacific Flyers

Man's next great step in conquest of the air will be opening of the Pan American Airways route across the Pacific to China. This story, second in a series of three, tells of the mammoth task undertaken and the progress made. Plans for the model airports have been in the making for two years and 745 pounds of blueprints and combined findings of experts in the assembly of supplies for man and machine have gone into a detailed inventory that makes such speed possible.

"TOOTH STAIN" PROBLEM UNSOLVED AFTER SCIENTIST CONDUCTS SURVEY

AMARILLO, April 17. (AP).—The origin of mottled enamel, which mar's the appearance of the teeth of hundreds of children in parts of Texas and other states, remains unsolved. Extended research has failed to develop means to eradicate the brown stain, which generally is attributed to fluorine in drinking water. Treatment of water supplies has been advocated as one of the most likely solutions.

Coast Guard Ships Land Here Today

Two Coast Guard amphibian ships were among planes landing at the airport today, reports early this afternoon showed. One of the planes was a Curtiss biplane, piloted by Lieut. W. L. Foley. The other was a biplane piloted by Capt. M. J. and was enroute from San Diego, Calif. Capt. J. M. Gillespie, on his way to Dallas from El Paso, landed here. He was flying a P-26 A.

AMERICANS FREE ESPIONAGE CASE

PARIS, Apr. 17. (AP).—After six months in French jails, Mr. and Mrs. Robert Gordon Switz, Americans, were ordered freed today by the court which tried them and 27 others on espionage charges. Most of the others were sentenced to jail. The court recognized the Switzes as being guilty but declared them "exonerated from punishment" as they showed no evidence against the co-defendants.

Students Honor School Employee

The students of John M. Cowden junior high school expressed their appreciation of Herman Philipp by presenting him with a fruit and vegetable shower composed of canned goods and other staple foods. Approximately two hundred cans and jars of fruits and vegetables were given to the beloved janitor of the junior high school who is convalescing after a double mastoid operation. Mr. Philipp is doing nicely but will be unable to resume his work until mid-summer.

EXPRESS ROBBERS SHOT, CAPTURED

BEAUMONT, April 17. (AP).—Two men were shot and seriously wounded today when officers surprised them while opening a safe of the American Express company at Port Arthur, third man escaped. Those captured were Leon Brammer and Ed Sharp, both with criminal records. Sheriff W. W. Richardson and a deputy, who waited at the express office three nights, shot them. There had been four safe robberies in this area in three months and officers had been waiting at likely spots to surprise the robbers.

TRANS-PACIFIC PLANE ON TIME; SETS A RECORD

HONOLULU, Apr. 17. (AP).—The Pan-American clipper plane, carrying America's bid for commercial air supremacy of the Pacific, roared away from its California base Tuesday for Honolulu, 2,400 miles distant. Approximately 7,500 persons cheered as the ship lifted into air. The plane will land at Kaneohe Bay, opposite Honolulu, where a permanent base for the service now is being installed.

Its four motors droning smoothly, the nine-ton ship plowed through the green waters of San Francisco Bay, then lifted into the air at 5:50 p. m. Aboard was a crew of six men, headed by Capt. Edwin C. Musick, as the flying boat headed out over the Golden Gate on the first of a series of flights intended to blaze a trail for California-to-China air mail and passenger service.

The heavy craft took a run of some 1,300 yards, leaving a frothing wake of white, then headed into the air after thirty seconds. The take-off was achieved with perfect smoothness.

ROBYN CLUB MEETING

The Robyn club will meet at the Watson studio Thursday afternoon at 3:30 o'clock. A full attendance is requested.

FLAPPER FANNY SAYS

WAY TO COMBAT CRIME IS BY CENTRAL POWER

A democracy based on a system of local governments as nearly independent as possible is apt to run into a whole chain of headaches when it sets out to combat modern crime.

To fight crime in this day and age you have to have a centralized authority which can strike anywhere in the country without regard to state and city boundaries.

To retain democracy in its traditional form, you want just as little centralization as possible.

In other words, the set-up which preserves freedom the best is the very set-up which is the least efficient at fighting crooks.

We have tried to get around that of late by giving the Bureau of Investigation of the Department of Justice more powers. To an extent, this has worked very well. But it can only be carried so far. The foundation of our police work must be the local systems—the city police force and the county sheriff's organization.

The immediate problem, then, is to find some way of federalizing our anti-crime forces without infringing upon the rights of city and state to govern themselves in the old-time manner.

A bill is now pending in the Ontario legislature which might profitably be studied in detail south of the Canadian border.

This bill would set up a director of special police services for the entire province. He would have power to direct every local constable in Ontario to perform such duties as he might require; he would be, ex-officio, a magistrate, empowered to issue summonses and warrants anywhere in the province.

Nevertheless, each city would retain full control of its own police force. It would select, pay and administer the force just as it does now. The provincial director would not interfere in strictly local affairs. He would act only in those cases where crime spills over from one city to another.

It ought to be possible for some such system to be worked out in the United States as well. The advantages are obvious. There would be enough centralization to make the lot of the criminal infinitely harder, but not enough to reduce the independence of the local units of government.

If we drift too long, leaving all but strictly local affairs up to the Department of Justice, we are apt to wake up some day and find that cities and states have surrendered to the federal government more powers than it is good for them to surrender. It might be wise to look into this Ontario proposal pretty thoroughly.

A WORD FOR THE ARMY

Charles Lathrop Pack, president of the American Tree Association, and life-long worker for forest conservation, is not frightened by charges of militarism arising from the army's supervision of the CCC.

In a letter to Secretary of War Dern, Mr. Pack urges that the corps be continued in army hands. He points out that there are two distinct jobs in connection with the direction of the corps.

One is the management of the men in the camps, performed by army officers; the other is the direction of the men in reforestation and similar projects by trained foresters.

Extensive surveys made by the American Tree Association, he says, have convinced him that the army is doing its share of the job efficiently.

It is probably true that the CCC, under army control, could be perverted into a militaristic outfit. But there is little evidence that anything of the kind has happened.

Mr. Pack knows the details of the case about as well as anyone. His word should carry a good deal of weight.

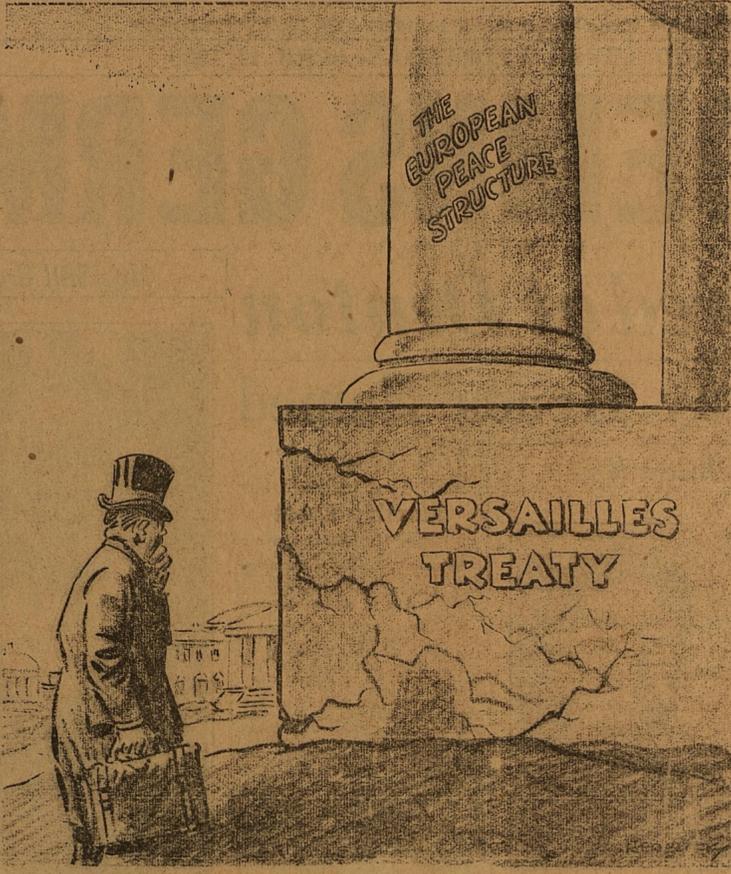

That news item revealing that the last beard has disappeared and that everyone in the Norwegian national assembly now is clean-shaven failed to include the name of the new woman member.

The Foundation Begins to Crack

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything).

relative we have promises to live to be a hundred years old.

We fear a local woman will never go to heaven—she always insists on receiving a formal invitation on perfumed paper.

This was sent in: R. O. Walker has just returned from the Dalhart country where he lived for twenty years and admits he never saw a real sandstorm until Sunday. He said after it had been raging for some three hours, dark as any night, all at once there was a few light streaks shown up and he swears he saw a prairie dog. Two hundred feet in the air, digging him a hole. Walker also says there is so much electricity in the air up there that people tie a wire around their ankles and let it drag the ground for protection.

Everybody is afraid of the devil, yet loves to go to places where he is hanging around. Isn't that odd?

There are so many sinners we wonder why there is only one devil.

An ugly yellow dog's disposition is, as good as a handsome purple dog's. Disposition is nearly as important as appearance, so we will keep our yellow dog.

If a sinner and a saint are chums, one will change. Eventually both will be sinners or both will be saints. There is actually such an influence.

We are unlucky. The only rich

Over 60,000 Farm Families Enter Rural Rehabilitation 1935

AUSTIN.—Between 60,000 and 75,000 farm families on relief will be taken into the rural rehabilitation program during this year. It was estimated by J. E. Stanford, director of rural rehabilitation for the Texas Relief Commission.

"Our chief task now," Stanford said, "is to assemble into our program approximately 50,000 farm families recently turned over to us from general relief rolls. We are working day and night to contact these people, complete the transfer and work out an adequate farming program with them for the year. The task has been made doubly hard by the fact that in most of these cases we must supply some capital goods before farming operations can be started."

Leasing of land for sustenance plots is definitely ended, at least for this crop year, Stanford declared. He estimated 16,000 selected clients will make crops on these leases this year.

"What impresses me most of all about the rural rehabilitation program at this time is the enthusiasm with which these families are undertaking this attempt to come back to an independent status. I am particularly impressed by the number of men who have applied—earnings from part-time labor on their accounts with the rural corporation. They are sincerely desirous of keeping loans for capital goods at a minimum. Our county offices are jammed with rehabilitation clients seeking advice and leadership. With that kind of attitude prevailing, I am confident that proper management will insure the success of the rural program."

Largest Indian at Montreal

MONTREAL, Que., (AP)—Montreal boasts the largest Indian in the world. He is 56 feet high and weighs a ton and a half, a monumental reproduction of a human figure rivaled in size only by the Statue of Liberty in New York harbor. Although actually only a piemy when contrasted with the latter, which towers 111 feet, 6 inches from head to toe, the Montreal Indian nevertheless is attracting thousands of visitors. It took a crew of men six months to construct the Indian for a local commercial firm.

Is Your Car over 70 horsepower?

If it is, you must have motor oil of extra high film strength to get **SAFE LUBRICATION**

YOUR car today has twice the horsepower and speed of the car you drove ten years ago! The average of 22 leading cars in 1934 was 108 horsepower.

Bearing pressures and temperature have increased correspondingly—so greatly that motor parts are now made of new alloy metals of extra strength and durability to stand the load!

To protect such a motor you need an oil with enough extra oiliness and film strength to withstand the extreme pressures and temperature!

Yet motor oils generally have no more oiliness and film strength now than they had ten years ago. New refining methods have recently come into use to make oils free from carbon and sludge. But these refining processes have lowered instead of increased oiliness and film strength—the very qualities on which depends an oil's lubricating value!

There is one exception—Conoco Germ Processed Motor Oil. It, too, is free from carbon and sludge troubles. But, more important, the new Germ Process—adding concentrated oily essence to highly refined oil—puts into this oil 2 to 4 times the film strength of any straight mineral oil, as tests on Timken and other machines have proved! That extra film strength gives safe lubrication under the most extreme pressures!

Germ Processed Oil protects your motor another way. Its penetrative film, the "Hidden Quart," stays up in your motor and cuts down starting wear.

Germ Processed Oil gives longer mileage with greater motor protection, as the Indianapolis Destruction Test proved.

Say "O. K.—Drain"—fill with Conoco Germ Processed Motor Oil and drive with the assurance that your oil meets your motor's needs!

CONTINENTAL OIL COMPANY • Est. 1875

"We stopped at Conoco stations along our way for many helpful free services. You can apply at any Conoco station for the same kind of free plan for your trip."

Society and Clubs

Mrs. Proctor Guest Soloist At Cisco Tea on Friday

Featuring Mrs. Joseph Perkins of Eastland and Mrs. Foy Proctor of Midland, the Twentieth Century club of Cisco observed its annual Texas day program with a seated tea Friday afternoon at 3 o'clock in the reception rooms of the Cisco Library.

The following account of the tea was compiled from the Cisco papers: The guests were greeted at the door by Mrs. William Reagan, who presented them to the following ladies that formed the receiving line: Mrs. E. P. Crawford, president of the club; Mrs. Foy Proctor, guest soloist; Mrs. Rawlins Clark, her accompanist; both of Midland; Mrs. J. T. Anderson, Mrs. C. C. Jones, Mrs. P. P. Shepherd, Mrs. Homer Slicker, all of Cisco; Mrs. M. H. Hagerman of Ranger and Mrs. Meredith of Midland.

Mrs. Crawford, Mrs. Perkins, Mrs. Proctor and Mrs. Clark were presented with beautiful corsages by the club. Mrs. J. B. Cate directed the guests to the tea table where Mrs. J. J. and Mrs. C. H. Fee presided. The table was laid with Normandy over yellow. In the center a bowl of yellow roses was mirrored upon a reflector. Tall yellow tulips and pink carnations were placed about the table. The centerpieces were of silver club colors predominated in the arrangement and in the 1935 year book programs which served as plate favors.

George Fee and Mrs. Charles served the refreshment plate of sandwiches, cakes and sev. For tea 150 guests assembled in the reception rooms which were decorated in a profusion of roses, tulips, carnations and pop plants. Small Texas flags characterized a patriotic note. Mrs. Crawford introduced Mrs. Proctor and Mrs. Perkins.

Mrs. Proctor, an accomplished musician who possesses a beautiful voice and a charming personality, chose for her first number a group of semi-classical Negro songs entitled, "Lil Black Rose," "O' Ark's A-Moverin'," "Ma Little Banjo" and "Ma Lindy Lou." The first two are by David Guion, a Texas composer of Dallas.

Mrs. Perkins appeared next on the program with an address on Texas. She contrasted the spirit of people today with the pioneers of old, emphasizing the fact that the success of the coming Centennial depends upon the cooperative spirit of Texas people. She discussed the geography of the country giving Texas credit for having the greatest variety of climate and scenery of any state in the union.

The program was closed with a group of Indian songs emphasizing that Texas history is entwined with Indian lore and that the name of Texas was taken from the Tejas Indians, whose name means friendly. Mrs. Proctor's rich mezzo-soprano voice was well suited to the numbers she selected and a large amount of her success was emphasized by the talented piano accompaniment of Mrs. Clark. This last group of songs was by Charles Wakefield Cadman: "From the Land of the Sky Blue

Announcements

Thursday
Rotary Annus will hold their monthly luncheon at the Hotel Scharbauer Thursday at noon. Wives of all Rotarians, whether or not members of the Rotary Ann organization, are urged to attend as details of committee work during the Rotary convention will be given.

Thursday
The Country Club bridge will meet at the club house Thursday evening with Mrs. B. H. Blakeney as hostess.

Friday
The Belmont Bible class will meet with Mrs. Roy McKee, 1504 S. Lorraine, Friday afternoon at 3:30 o'clock. The lesson will be the ninth chapter of John.

Saturday
Chaparral troop, Girl Scouts, will meet at the home of Mrs. L. G. Lewis, 714 W. Kansas, Saturday morning at 7:30 o'clock for a breakfast hike.

Mesquite troop will meet at the American Legion hall Saturday afternoon at 2 o'clock.

YWA Holds Mission Study Program

Members of the YWA met for mission study at the Baptist church Tuesday evening.

Mrs. M. R. Hill taught the last two chapters of the book, "People of the Jesus Way," dealing with missionary work among Indians. Six members were present.

The YWA will meet for a social at the home of Mrs. Hill Tuesday evening at 7:30 o'clock.

Water. "The White Dawn is Stealing," "Far off I Hear a Lover's Flute," "The Moon Drops Low." As an encore for the whole group she used a semipopular song, "Since Your Path Crossed Mine" in which she delighted her audience with her versatile voice and her winsome manner.

While in Cisco, Mrs. Proctor and Mrs. Clark were the guests of Mrs. Chas. Brown, sister of Mrs. Susie G. Noble and Miss Elma Graves of Midland.

For Easter Breakfast

A centerpiece of flowers, white china and crystal with simple doilies replacing the cloth help give a springy effect at mealtime. The doilies above are cellophane and can be used repeatedly.

By MARY E. DAGUE
NEA Service Staff Writer

If you don't make an occasion of Easter breakfast, with eggs done a new way, fluffy, sugary Hot Cross buns and flowers from your own garden in the center of the table, then you are missing something.

Besides, of course, you will need your springiest breakfast china, set on a crisply attractive table. For menu, how about this: orange juice, cereal, eggs in a nest, Hot Cross buns and coffee, with milk for the children.

Even the cereal can do its share toward making the meal extra festive. Choose a fine grained cereal such as cream of wheat and after careful cooking, mold it between tablespoons to resemble eggs. Then serve with real cream for a special treat.

I prefer orange juice to any other fruit on account of its rich yellow color which blends so perfectly with my daffodils. Add a sprig of mint for the sake of its soft green and refreshing flavor.

Eggs in a Nest
Toast, on one side only, as many slices of bread as there are persons to serve. Use one egg for each person. Separate whites from yolks. Cut toast to fit individual baking dishes and put toasted side up in bottom of each well buttered dish. Beat whites until stiff and pile on toast, making a hollow in the center. Drop an unbroken yolk in each hollow. Dot with butter, sprinkle with salt and pepper and about 1 teaspoon grated cheese to each egg. Cover and bake in a moderate oven (350 degrees F.) for twenty minutes or until white is firm. Garnish with crisp broiled bacon and serve.

Hot Cross Buns
One and one-half cups milk, 1-3 cup granulated sugar, 4 tablespoons butter, 1 teaspoon salt, 1-2

Mrs. Warren Hostess To Bridgettes at Afternoon Party

Spring colors characterized appointments for the afternoon party with which Mrs. S. M. Warren entertained members of the Bridgettes club at the home of Mrs. Paul O. Moore, 808 W. Kansas, Tuesday afternoon.

Two tables of bridge were played with Mrs. Bill Van Huss winning high score in the games and Mrs. A. E. Horst winning high cut.

At the tea hour a party plate was served to the following: Misses, Harry Priestett, S. O. Cooper, A. P. Baker, Moore, Kinney Reese, E. D. Richardson, Horst, Van Huss and the hostess.

Cantelou-Kelley Wedding Ceremony Read Saturday

Miss Florine Cantelou, daughter of Mrs. Cantelou and Mr. John Kelley, son of Mr. and Mrs. R. P. Kelley of Big Spring were married quietly at the home of the Rev. J. E. Fickling here Saturday night at 10 o'clock.

The bride wore a navy blue triple sheer suit trimmed in light blue, and navy accessories.

Mrs. Kelley is well known in Midland, having lived here for several years and having attended high school here.

Mr. Kelley is a graduate of the Big Spring high school. He is associated with Hokus Pokus grocery company and has lived in Midland about fifteen months.

The couple left immediately after the ceremony for Big Spring, but is now at home on South Dallas street.

Guests at the wedding include the bride's mother, Mrs. Cantelou, Mr. and Mrs. Dorman Gabbert, and Miss Dorothy Holzgraf.

yeast cake, 4 tablespoons luke-warm water, 1 teaspoon cinnamon, 1 egg, 1-2 cup currants, 3 to 3 1-2 cups flour as needed.

Scald milk and add butter, salt and sugar. When luke warm add yeast, cake dissolve in water. Add 2 1-2 cups bread flour mixed and sift with cinnamon. Beat well and add egg well beaten. Mix thoroughly and add currants to a large mixing bowl. Cover with a cloth and let rise in a warm place over night. In the morning pinch off small pieces and shape into tiny balls. With a sharp knife cut two deep gashes, making a cross on top of each. Place in a buttered pan about an inch apart and let rise in a warm place for thirty minutes. Bake in a hot oven (400 degrees F.) for twenty-five minutes.

Brush over with a heavy sugar syrup when taken from the oven and serve at once.

FEMININE FANCIES

BY KATHLEEN EILAND

For goodness' sake what will style makers think of next?

Peruse this clipping from a Paris fashion dispatch:

As for novelties, there is a glass cape and a wooden jacket in the collection! The cape resembles a fine window screen made out of stiff silk threads (which is the malleable glass) and the wooden jacket is a rich brown affair of specially prepared tree bark (we've had pocket-books of it before).

We heard of ladies who are "wooden" and also of those who are "fragile" but we didn't now that such characteristics ever would be expressed in terms of clothes!

We've been admiring the seersucker dresses for some time but we have just seen our first seersucker suit. Skirt and jacket are of this material with a blouse of pique in a dark shade. Goodlooking and practical.

Suits of heavy cotton lace or heavy loose weave cotton fabric are also very pretty. Particularly the one we noticed in a lovely shade of pink the other day.

Don't forget net for your party dresses for the summer.

Considering the career of the dashed Capt. Anthony Eden as a diplomat of peace, we might almost say that instead of Eden being where peace is, peace is where Eden is in the European councils.

Mrs. Speed Favors Edelweiss Club With Easter Party

Mrs. J. M. Speed entertained the Edelweiss club with an Easter party at her home, 301 North F street, Tuesday afternoon.

Roses and tulips were used in floral decorations and a color scheme of yellow and white was carried out in playing appointments and gift wrappings.

Three tables of bridge were played with high score for club members going to Mrs. John Dublin, high score for guests to Mrs. Ralph Bucy, and high cut to Mrs. John Shipley.

Guests for the afternoon were Mrs. M. B. Bucy, Fred Turner, and Hugh Corrigan. Mrs. Roy Parks, a club member, was a tea guest.

At the conclusion of play, a party plate, with favors of Easter chicks, was served to guests and the following club members: Miss Leona McCormick, Mrs. Foy Proctor, Harvey Sloan, Mamie Stokes, Dublin, John Shipley, J. R. Martin, E. Hayden Miles, Tom Nance, and the hostess.

The great emperor penguin grows to a height of more than four feet and weighs as much as a 10-year-old boy.

Junior High PTA To Install New Officers Thursday

Installation of officers for the coming year will be held at the meeting of the Junior High PTA at the school building Thursday afternoon at 3:30 o'clock.

Included on the program will be piano selections by Mr. Wallace Wimberly, a talk by the Rev. J. E. Picketing, and a health talk by Mrs. H. N. Phillips.

A social hour will follow the business session.

All mothers are urged to attend the meeting.

Entre Nous Club Meets at Home of Miss Williams

Bowls of tulips and favors of tiny rabbits lent an Easter air to the party with which Miss Lotta Williams complimented members of the Entre Nous club and guests, at her home, 523 W. Texas, Tuesday evening.

Prizes for high score in the evening's bridge games went to Miss Cordelia Taylor as club member and Miss Fanny Bess Taylor as guest. Miss Juliette Wolcott cut high.

Guests of the club were: Mrs. Harry Tolbert, Misses Fanny Bess Taylor and Vade Crawley.

Following the games, a salad plate was served to guests and the following club members: Mmes. Aldredge Estes, and Charlie Blalock, Misses Theresa Klapproth, Wolcott, Cordelia Taylor, and the hostess.

The Baya weaver-birds, of India, fastens fireflies into their nests.

Point a Minute Team

LAFAYETTE, Ind. (U.P.)—The Purdue University basketball team scored almost a point a minute in winning 17 of its 20 contests during the 1934-35 campaign and gaining a tie for the Big Ten Conference championship with Wisconsin and Illinois. The Boiler-makers scored a total of 770 points during the season, an average of 38½ points per game. Purdue scored 451 points in Big Ten competition.

Fishermen Catch Antique Jug

PROVINCETOWN, Mass. (U.P.)—Fishermen on the boat Richard and Arnold landed an antique jug with the name of J. H. Plummer and the date 1852 on it.

YOUR WIFE WILL KNOW

WHY WE BUY FROM WESTERN ELECTRIC

As the world's best purchasing agent, she applies the same rules of thrifty buying used by the Bell System.

A special study based on 3,000 separate items of telephone equipment and supplies indicates this fact: Western Electric, as supply unit of the Bell System, sells to Bell operating companies for a fourth less, on the average, than the lowest price offered by independent supply firms.

This of course does not mean a saving of a fourth on every item bought from Western Electric. Some supplies... paper, paints, poles, for example... range from 5 to 17 per cent under usual market prices. Others, such as telephones, cables, and switchboards, show similar variations in the amount saved.

But the important point, clearly indicated, is that Western's prices are appreciably lower to us than open market prices.

As one of the 24 associated companies of the Bell System, we buy most of our supplies from Western because we get bargains there, because we get uniform quality and the assurance of exact performance... and because Western Electric parts are so designed that future improvements and developments will fit into and work with equipment already in use.

These factors help us materially in achieving the Bell System policy of good telephone service at fair cost to the user.

SOUTHWESTERN BELL TELEPHONE COMPANY

There is no need for a lot of whangdoodle talk about cigarettes — just plain common-sense

When you stop to think about your cigarette—what it means to you—here's about the way you look at it—

Smoking a cigarette gives a lot of pleasure—it always has.

People have been smoking and enjoying tobacco in some form or another for over 400 years.

Of course you want a cigarette to be made right. And naturally you want it to be mild. Yet you want it to have the right taste—and plenty of it.

In other words—you want it to Satisfy.

Scientific methods and ripe mild tobaccos make Chesterfield a milder and better-tasting cigarette. We believe you will enjoy them.

Rudderless Planes Being Developed

Airplanes without rudders but under better control of the airmen than present types, were visualized today by Eugene L. Vidal, Director of the Bureau of Air Commerce, Department of Commerce, in connection with the Bureau's program for the development of safer, easily operated aircraft for the private owner. Mr. Vidal stated that the controls which appear to make this accomplishment possible were recently developed in the laboratories of the National Advisory Committee for Aeronautics, the Government's independent technical establishment, and that an airplane is now being modified to incorporate these features at the plant of the Kreider-Resler Aircraft Company at Hagerstown, Md., for the Bureau of Air Commerce.

"If the trials prove successful," said Mr. Vidal, "even amateurs should have no great difficulty in landing their planes on a definite spot and turns would be no more complicated than in an automobile."

The airplane being modified for these experiments was originally designed and constructed by Fred Weick of the engineering staff of the N.A.A. The leading edge airfoil which this airplane had originally is being replaced with flaps of a new type and the conventional ailerons on the trailing edge of the wing are being replaced with a combination of slot and aileron in the middle of the wing.

The Weick plane was chosen for these experiments," stated John H. Geisse, Chief of the Development Section of the Bureau of Air Commerce, "because it had unusual features which made it peculiarly adaptable to the tests. First in importance of these features is a landing gear which permits landing at any speed without the application of the brakes and which we believe will permit cross wind landings without the use of the rudder. Second in importance is an arrangement of engine and tail surfaces so that when the airplane is trimmed to fly at a certain speed it will maintain that speed automatically irrespective of any manipulation of the throttle.

"In the conventional airplane there are two maneuvers, each of which requires the coordination of two controls. For turning the airplane in a horizontal plane both rudder and ailerons are used. For turning the airplane in a vertical plane, that is changing from climb to level flight to descent, the throttle and the elevators are used. The former characteristic of airplanes recognized and the desirability of eliminating one of the controls has been fully appreciated. The latter characteristic has not been generally recognized nor has the desirability of eliminating the need of coordination of controls in this maneuver been appreciated.

"With the new type of ailerons it is hoped to achieve just the right relationship between banking and turning with the ailerons, obviating the need of a rudder for normal turns. With the new type of flaps it is expected that there will be no need of using the rudder to shorten the glide of the airplane. The third utility of the rudder, that of correcting for cross-wind landings, should not be needed with the type of landing gear being used, as mentioned previously.

"The new type flaps are similar to other types in that they decrease the landing speed and increase the steepness of the gliding path to permit landing in restricted areas. They differ, however, in that these two functions are separable in the new type of flap and are coincident in other types. Because they are separable the new flap will have two controls, one for the speed function and the other for the air brake function.

"With this flap the speed control will have but two positions, one for all operations near the ground including take offs and landings, and one for cruising and high speed. It can be left in either position if the pilot so desires.

"The air brake control which steepens the flight path at will will be operated by the same lever which operates the throttle. After the throttle is fully closed a further movement of the control will gradually apply the air brake function of the flaps. By combining the two controls on a single lever, this lever will become the complete control of the angle of the flight path with respect to the ground and the elevator will then become a control of velocity only.

"This division of control should, if successful, materially simplify airplane control for the novice and increase the safety. When the elevator is used as a control of the flight path there is the constant danger of reducing the speed of the stalling point with subsequent possible slip or spin. Furthermore, the elevator is a very unsatisfactory control of flight path because it incidentally changes the speed and it also has a complete reversal of effect at one position. Because it changes plus to minus, at the same time it changes the flight path it is practically ineffective in controlling the point of landing after a glide has once been started. If the pilot

BUREAU OF AIR COMMERCE DRAFTING A BROAD PROGRAM OF DEVELOPMENT

WASHINGTON, April 17.—A broad program of development to assist the scheduled air lines of the

United States further to improve the safety and reliability of air transportation, is now being drafted by the Bureau of Air Commerce of the Department of Commerce, Eugene L. Vidal, director of the bureau, announced today.

The program, which includes certain new activities for the bureau, is the outgrowth of a conference of air line operators which met in the Department of Commerce April 8 and approved the offers of assistance advanced by Mr. Vidal on behalf of the Bureau of Air Commerce.

"Outstanding among the problems to be immediately undertaken by the Bureau of Air Commerce in cooperation with the air lines," Mr. Vidal said today, "are matters pertaining to air transport operations at the base of the stratosphere; elimination of ice on aircraft; the installation of a system of radio and lights at airports to provide safe and reliable approaches for landings under conditions of poor visibility; a system of airport and airway traffic control to govern particularly aircraft engaged in instrument flying; and the development of a transport plane carrying less than 10 passengers for use on the smaller routes which feed into the main trunk line

airway system.

"With respect to sub-stratosphere flying on long routes, greater reliability and speed will result if this type of operation can be developed. The technical obstacles to be overcome include supercharging and cooling of engines, and the development of a reliable oxygen system for pilots and later passengers. In pursuing this problem, the Bureau of Air Commerce is fortunate in having the advice and experience of Mr. R. W. Schroeder, chief of the Air Line Inspection Service, who during and after the war, specialized in high altitude test work for the army and at one time held the world's altitude record.

"The elimination of ice formations on aircraft wings and tail surfaces and engines, propellers, and wind shields, and its effect on radio reception, will result in a substantial number of air line flights being successfully accomplished that are not now attempted when icing conditions aloft are forecast.

"In order to insure adequate safeguards for landing of air liners at airports under conditions of low

ceiling and poor visibility, it will be necessary to provide a system of radio and lights at these air line stops. The Bureau of Air Commerce is now planning the establishment of the Army Air Corps blind landing system at air line airports possessing a clear approach and the supplemental installation of a series of lights to guide the airman visually as he lowers to a landing. These facilities the department can establish up to the edge of an airport, but under the law it can install no aids to air navigation on the port itself. However, to complete the system a number of lights almost flush with the ground and along the runway must be installed, but this expense will need to be borne by the airports. The Bureau of Air Commerce now has an installation of lights at Newark (N. J.) airport for experimental purposes only and will install a new set at Washington (D. C.) airport, and pending the outcome of tests no decision will be made as to the program of combined light and radio installation.

"With the increasing amount of

instrument flying by air line pilots and non-scheduled planes both for necessity as well as practice, the Bureau of Air Commerce recognizes the need for rigid traffic control on the airways and also of airports. To this end we are now working on a method of control to surround operators on the airways and at airports with every possible safeguard.

"Realizing the need for smaller, multi-motored transport craft for the lines that feed into the main trunk routes, the Bureau of Air Commerce is prepared to aid in the development of such a craft which will enable operators of shorter lines to purchase this type of equipment without the necessity of sharing in the engineering costs from the very beginning. This can be undertaken through our Development Section which is now engaged in a program of fostering the design and construction of a safer, easier-operated, lower-priced airplane for the private owner. The Bureau could call for bids for a transport plane carrying 6 or 8 passengers, have it construct-

ed for its own use in air line inspection work and thereby pave the way for small operators to purchase similar types without bearing the initiated expense involved.

"In connection with the development of this type of plane, consideration was given at the air transport conference here on April 8 to the need for an aircraft engine of 1,000 horsepower or more and also accommodate the increase in traffic on the trunk lines. Also, a study of developing the transport type craft with improved blind landing characteristics appears timely. However, this development work could not be undertaken without special funds from a source other than the regular departmental appropriations.

"In addition to the foregoing, numerous other problems will be considered in the development program, such as ice formations in carburetors, propeller fatigue, and aircraft engine instruments."

"It pays to be consistent"

AN inconsistent advertiser is one who has good merchandise, and knows it . . . but doesn't know the right channel through which to present it, to build volume sales. In other words—an inconsistent merchant fails to advertise in his home newspaper, and therefore loses the trade of the very neighbors who would be most anxious to patronize him if they knew about his merchandise. But the successful advertiser is always consistent! He makes sure

that he has what the public wants, and he presents it through regular advertising in the newspaper they all read. And when Brother Bobby, Sister Sue, Mother and Dad all see the advertiser's name before them regularly, they become so familiar with him and his goods, that it's second nature for them to patronize him. What do you say, Mr. Advertiser? Will you be an inconsistent watch-them-go-by, or will yours be the door to which all shoppers beat a path to buy . . . buy . . . buy . . . ?

MR. MERCHANT: The Reporter-Telegram will gladly introduce you and your business to our thousands of daily readers.

Investiture Service For Girl Scouts to Be Held Saturday

Investiture service for 13 or more girls of the Mesquite troop of Girl Scouts will be held Saturday afternoon at 2 o'clock in the American Legion hall. It was announced today. The ceremony will include presentation of pins to the girls. Parents of the Girl Scouts and members of the Rotary and club which is sponsoring the troop are invited to attend the service. At the regular meeting of the troop Saturday afternoon, two more girls passed the tenderfoot requirements. They were Rosemary Johnson and Francis Ellen Link. The meeting was held at the North Ward School instead of at the American Legion hall as the county school exhibit was in progress in the veterans' meeting place.

New Romantic Team Scores in 1-New York Night

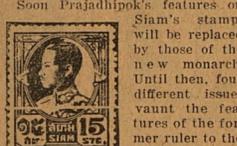

Laid in a large metropolitan hotel, Metro-Goldwyn-Mayer's "One New York Night," which is currently playing at the Ritz Theatre, is replete with thrills and laughs. The story concerns a mysterious murder in a hostelry where several guests from various walks of life become involved in the crime. Franchot Tone, co-featured with Una Merkel, is seen as a cowman from Wyoming who comes to the big city to get married. Miss Merkel, who plays the role of a telephone operator, joins the cowman in an attempt to solve the murder and clear themselves of suspicion. How they eventually apprehend the criminal and find romance together provides many dramatic thrills as well as amusing incidents. Others in the cast include Conrad Nagel, Harvey Stephens,

Stories in STAMPS

The KING WHO QUIT for A RIGHT

POPULAR Prajadhipok I, former King of Siam, is a private citizen in a foreign land because he refused to relinquish an old hereditary right by which the king alone held power of life and death over his subjects. Absolute monarch of Siam for eight years, Prajadhipok submitted to constitutional government in 1932, but when the national assembly sought to amend the king's right to approve sentences of death or life imprisonment, he abdicated. His 11-year-old nephew, Ananda Mahidol, ascends the throne.

Soon Prajadhipok's features on Siam's stamps will be replaced by those of the new monarch. Until then, four different issues vaunt the features of the former ruler to the stamp world.

Time to Stock Cosmetic Cabinet For Beauty's Sake

By ALICIA HART
NEA Service Staff Writer
Spring housecleaning in the name of beauty is a very important pre-Easter task indeed. This is the time when you should use up your odds and ends of cosmetic preparations, make a list of items you'll need, and then, keeping an eye out for sales and special offers, gradually begin to replenish your stock.

Don't buy a lot of unnecessary supplies that you know perfectly well you'll never have time to use. You must have the four essentials, of course, and whatever makeup you generally put on your skin. Aside from these, there's nothing you need, except maybe one or two special creams or lotions to correct an individual defect.

Choose the four essentials carefully. The cleansing cream should be a light-textured variety that will melt the minute it is applied. The skin tonic ought to be mild if you are young, and slightly stronger if you are mature. Keep it in the icebox. Or, if you prefer, put a bit of it in a bowl and set the bowl in cracked ice for a few minutes before you intend to pat it on your skin.

The other cream should be rich and nourishing if you have a dry condition—a vaselinas, rather astringent type if your skin is oily. This applies to the foundation cream or lotion you choose, too. Generally speaking, the vanishing creams are for oily complexions—the lotions for dry and normal ones.

Rouge, powder, lipstick and, if you use it, eye make-up are your next important considerations. Choose them for their quality and suitability to your particular needs.

Secret Service Score High

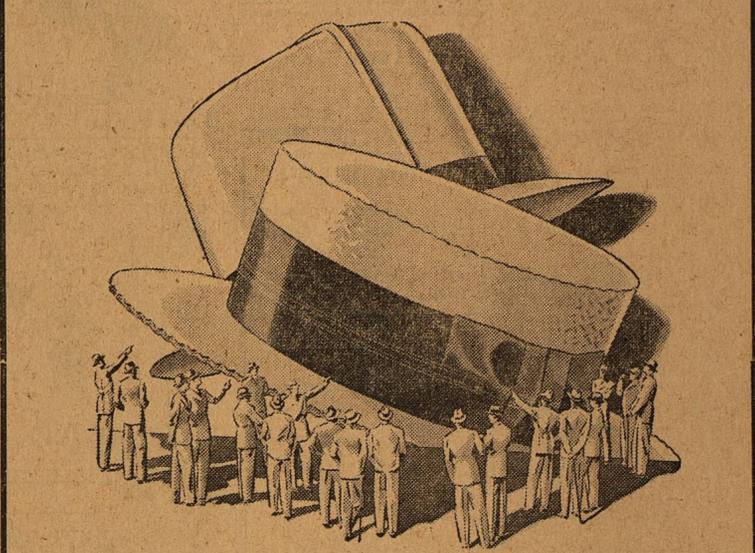

PHILADELPHIA, (UP)—The U. S. Secret Service office here has had a perfect score in counterfeit money cases during the present term of federal court. Out of a total of 17 cases, 14 defendants pleaded guilty and three others were convicted by juries.

A Business Holiday

SALINAS, Cal. (UP)—If mailmen can go for walks on their days off, Frank Diaz, Salinas bartender, decided he could get light on his holiday. Police did not think so, however, and charged him with being intoxicated.

A bee's average load of nectar weighs about half as much as the bee itself.
