ATHENS, Aug. 5. (*P*). — Thirty persons, including five policemen, were reported wounded today as a rebellion broke out in Candia, Crete. Martial law was declared and the government dispatched two destroy-ers and soldiers to restore order. A state of siege was declared late today. The trouble began five days ago as a labor strike, but govern-ment sources said the strike was essentially political.

Midland Men on Fair Exploit Trip

BERLIN, Aug. 5. (#).—Rumblings of what may be a new purge of "state enemies" in the Nazi Reich were sounded Sunday by Paul Joseph Goebbels, minister for propaganda and public enlightenment. As the minister issued his warning, speculation was aroused by announcement of the resignation of former Field Marshal August von Mackensen from honorary member ship in the Steel Helmet organiza-tion, the group of war veterans against whom the government's campaign against "states enemies" has recently been turned. Mackensen, hero of the World War, is 86, and was recently re-ported to have been suffering from a stomach ailment. West Texas Chamber of Com-merce officials are anxious to ascer-tain the number of guests who will attend the meeting, so that the ho-tel may be advised as to the number of plates to prepare for the noon meal. High tribute to the value of newspaper advertising has been paid by the executives of western railroads, at the completion of a \$19,000,000 air conditioning and low fare campaign. "The outstanding success of our effort to win public attention to the many improvements in rail travel is indicative of the general trend towards business recovery," claims Harry G. Taylor, chairman of the Western Association of Railway Executives.

The recent intensive advertising campaign of the combined western railroads and the Pullman Company, in which newspapers were the principal mediums used, is considered a vital factor in the development of the present record shattering traffic over western rail routes,' he adds.

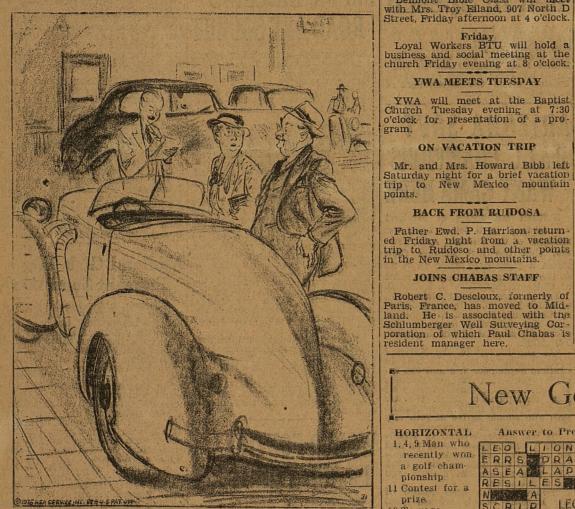

"Not only has the public responded in generous numbers to the new travel comforts introduced by the western railroads, but it also seems that a new and increasing interest is being shown by the average person in the many

Columbines Make Handsome Arran gements Indoors

It has often been suggested that the columbine might be selected as the Ametican flower because it grows in every state as a native. Whether this is strictly true or not, some species or variety of this hand-some hardy perennial is found in all the Northern and Western states, and even extends into Mexico. However, it is also a native of Eu-rope and Asia, which makes it in-appropriate as a strictly national flower.

These long-spurred varieties with their great range of coloring are derived from the blue and white Rocky Mountain columbine, the golden columbine of Galifornia and a long-spurred red and yellow type from Mexico to a great extent. They are very easily raised from seed and are nuch used in color schemes, particularly with irises when the color of the Iris is either matched with the columbines of used in a harmony or pleasing con-trast. The seed is slow to germi-nate but certain. It requires from three weeks to a month to come up. It should be sown about a quarter of an inch deep and the soil should be firmly packed over the seed.
