40,099 Checks Are Mailed to Needy Aged In The State

Business Figures Show Midland Now Better Than Ever

Continued gains for June during the first half of 1936 made the first-half business period the best that Midland has ever enjoyed—even better than the pre-depression prosperity of '29-'30.

Postal receipts, maintaining an even keel at the highest peak ever registered before, showed a gain of more than \$2,000 over the same period of last year. The total for the first half period was an even \$23,000.

Other Applicants Will Receive Their Assistance Grants Later

AUSTIN July 4.—To 40,099 needy old people have gone old age assistance checks ranging from \$9 to \$30 each. Frank Kainer, 103, and his wife, Anna, 95, Fayette county residents for 66 years, received the first two checks from the hands of Governor James V. Alfred, Monday, June 29. The two checks were for \$25 each. Other applicants for assistance, besides the 40,000, will receive their checks as their cases are investigated and approved.

Enough of the individual investigations required under provisions of this statute to enable payments to 40,000 of the estimated 65,000 who may be eligible to receive aid. The Old Age Assistance Law specifies that an investigator shall call upon each applicant and then make a report back to the District Supervisor as to the eligibility of the old person for a pension and the amount to be granted. Investigations of the remainder of the 190,000 applicants are expected to be completed during July and the early part of August.

Carpenter and the Commissioners worked steadily, conferring with Washington frequently to ascertain if their organization, as it was built step by step, was in line with the requirements of the Social Security Board. This Board required that the Texas set-up be approved before Federal funds were forthcoming to match State money.

Another problem faced by Carpenter was the attitude held by old people who had been given too high aspirations by the Townsend Plan movement. Contrary to the wording of the Texas Old Age Assistance Amendment and to the wording of the Texas law, a number of old people in Texas believed that everyone regardless of wealth and condition should be given a pension if they were 60 years of age. The Texas law, in accordance with the State Amend-

ASKS RENEWAL OF JEFFERSON IDEAS

MONTICELLO, July 4 (AP)—Standing at the portico of Thomas Jefferson's home, President Roosevelt called on the nation Saturday to renew Jefferson's battle for "true freedom."

He praised Jefferson as a "great gentleman and commoner" who was not satisfied with things as they were but concentrated on things as they ought to be.

Passages of the speech were reminiscent of the recent acceptance speech in which he argued that the modern task was to win freedom from "economic royalists" of big business.

Picture Shows, Swimming Pool, Cloverdale Accomodate "Stragglers" in City Fourth

Picture shows, swimming pool and Cloverdale park entertained the "stragglers" who remained at Midland Saturday, hundreds of citizens having divided their numbers on week end trips, taking advantage of the double holiday to attend celebrations or make excursions to various points.

leisurely crowd of holiday "loafers", had little of the bustle common on them on Saturdays or even week days.

Path old age assistance applications follow: One—the main filing room, 2—the addressograph room, 3—the reviewer's room, 4—investigating applications for assistance as rapidly as we can. We have kept expenses as low as humanly possible and still set up the necessary machinery to get the job done. The end is in sight.

ALLRED DEFENDS RECORD BEFORE CROWD AT BRADY

BRADY, July 4 (P)—Governor James V. Alfred told an Independence crowd here Saturday that those seeking to change the old pension law must depend upon the legislature to make it and "not men who are making so many reckless promises."

LA. SENATE IS FOR SALES TAX ON GAS

BATON ROUGE, July 4 (P)—The senate Saturday gave approval to the administration bill levying a one per cent tax on sales of natural gas to raise funds for social security. The bill needs only Governor Leche's signature for complete enactment.

Paisano Camp Dates Announced

Announcements have been received here of the annual Paisano Baptist encampment, to be held July 31 to August 9, at Paisano, between Alpine and Maria in the Davis mountains. The Rev. L. R. Millican of El Paso is president.

McDonald Opens Campaign With Talk at Houston

HOUSTON, July 4—The state public school fund has lost nearly \$500,000 already and is still losing \$250,000 annually on Sabine river bed oil leases yet the state land commissioner will not exercise the power which he possesses to stop this vast loss, declared W. H. (Bill) McDonald of Eastland county, candidate for state land commissioner, here Saturday in the formal opening speech of his race.

ment and the Social Security Law set the limit at 65 years an made the provision that aid should go only to those in need.

under the terms of this Act; provided that in no case shall such aid or assistance be in an amount which, when added to the income of the applicant from all other sources, including income from property and from the State and Federal Governments, shall exceed a total of Thirty Dollars (\$30) per month; provided that the assistance granted herein shall be granted in such amounts as will provide a reasonable subsistence in keeping with the accustomed standard of living of the applicant.

ASK PROCEDURE CHANGE IN COURT

DALLAS, July 4 (P)—A proposal for Texas supreme court power to make rules and outline procedure for state courts in conduct of civil litigation was under consideration here Saturday by a joint committee of the Texas judicial council and the Texas bar association.

FEARS FELT FOR SAFETY OF GROUP IN FLOODED AREA

MEXICANS STAYING ON FEDERAL FARM IN DANGER

TALMADGE TO RUN FOR THE SENATE

ATLANTA, July 4 (P)—Governor Eugene Talmadge qualified Saturday as a candidate for United States senator opposing Richard B. Russell, jr., Charles D. Redwine, Fayetteville, president of the state senate, qualified for governor of Georgia as a Talmadge candidate.

Arrests of 10 End Sweepstakes Sales

NEW YORK, July 4 (P)—With the arrest of ten persons police and postal inspectors contended Saturday that they had struck a crushing blow at the largest distribution center in this country of Irish sweepstakes tickets.

Early Services At Church Announced

Beginning Sunday the First Christian church will hold evening worship at 8:00 o'clock instead of 8:00 o'clock, until September. Many people have found this the most convenient hour of worship during the summer months, the pastor said, and thus the church is changing the hour to meet their needs.

FLAPPER FANNY SAYS:

'Herky' Newest Comic in Sunday Color Supplement

Readers of The Reporter-Telegram's colored comics, especially the youngsters, will find a change next Sunday when the half page "Salesman Sam" comic is replaced by "Herky."

Even in the new agreement, however, the land commissioner has the power to take steps to reinstate the original royalty at any time—yet he does nothing, and neither has my opponent, the present chief clerk who, at times, has been the acting commissioner and could have stopped this."

FIRE CHIEF LENTEN CENSOR

LARKSPUR, Cal. (U.P.)—The fire chief of this town does not favor actual nudity but does advocate safety. For the International Night Ball he ruled that too much inflammable grass skirts and silks of the participating girls increased the fire hazard and insisted that unless the amount of clothing was reduced the pageant could not be held. It was held.

A purr is the only pleasant catty remark.

Where the Farmer is Looking for Help Right Now

BEHIND THE SCENES - IN - WASHINGTON By RODNEY DUTCHER Reporter-Telegram Washington Correspondent

WASHINGTON, July 4—Both major political parties are pledged to big soil conservation programs. So there will be such a program in any event.

What remains is for someone to come along with a scheme which won't have the somewhat startling result of subsidizing farmers who have misused their land while penalizing those who have used wise methods of soil conservation.

There has been some subdued grumbling about this, but it appears that the farmers who have depleted their soil values are so much more numerous than the others that the protest won't be very serious.

Here is the way it works out under the Soil Conservation and Domestic Allotment Act:

The farmer who takes out 15 per cent of his acreage which last season was devoted to soil depleting crops and puts that acreage into soil-conserving crops is paid an average of \$10 an acre.

You can take for an example two farmers, each owning 100 acres of land. One of them has always put his entire acreage into a soil depleting crop, refusing to build up land for the future and contributing annually to a big wheat surplus, in order to sell all the wheat he could.

The other has used his imagination for the future and kept 50 per cent of his land in conserving crops, such as alfalfa, willing to sacrifice some present income to help the fight against soil erosion on his own and other fields.

Maybe This Is Fair, but— The anti-social farmer, who has kept his income up at the expense of general welfare is now to be rewarded, while the socially minded farmer who sacrificed immediate income is to get very lean pickings. The former gets \$10 an acre on 15 of his acres, or \$150. The latter gets \$10 an acre on 15 per cent of his soil depleting acreage—7 1/2 acres—or \$75.

Both farmers also get a dollar an acre (theoretical general average) for all land in soil conserving crops, meaning \$15 for the farmer who has refused previously to farm scientifically and \$75.50 for the other man. That's a total of \$165 in benefits for the first man and \$132.50 for the second.

But the big difference is that, if the second man is to participate in the program and get any money, he can raise and sell only half as much wheat as the other fellow. The anti-social farmer profits most, first by his past performance, second in amount of subsidy received, and finally because he is permitted to grow twice the crop of his neighbor.

'Tisn't Justice? They Want The farmer who believed the eloquence of the conservation in past years now is left holding the bag. But, as one AAA official remarked in conference: "We are after results and not justice."

Proposals that subsidy payments be made to farmers who already have certain percentages of acreage in conserving crops have made no headway.

AAA answers to the following statement of the case are not un-

watches with interest, there is the best work of many young writers." "Don't Ever Leave Me," by Katharine Brush: "The story of a puzzled young mother and a wayward and tempestuous son. It is the story of a town, also—or rather, of a small city, with its country club members and its mill-town folk. It is a book with many incidental characters sharply drawn, with the observation of current follies and conversation which Miss Brush has made peculiarly her own and with a dramatic story which is at the same time poignant and uncomplaining."

"Son of Marietta," by Fabricius: "The first half of this romantic novel is Marietta's life, from the time she is deserted by her actress mother in Todd, an Italian cathedral town, until she returns, after running away from her workman husband, with Benedetto. The rest of the story is Benedetto's. In Benedetto, the son of Marietta, John Fabricius has created a great romantic figure, one who does not fit into any mold already used."

"Clue of the poor Man's Shilling," by Knight: "Here is another excellent Cape Cod mystery, by an author who has established herself as a writer of fine novels of character as well as intelligent and emotionally powerful mystery stories of the highest order."

"Father Struck It Rich," by Mrs. Evelyn Walsh McLean: "A naive, fast-moving account of a life spent in spending the fortune which the author's father made in Colorado gold mines. It is filled with gossip about well-known people, particularly those in Washington during the Harding administration." (A. L. A. Booklist).

Soviet Boosts Its Helium Gas Output

MOSCOW, (U.P.)—Prof. P. L. Kapitza, Soviet citizen who developed a new method of producing helium during 14 years at Cambridge University, England, is preparing to extend his experiments in a laboratory of the Soviet Academy of Science, with almost unlimited backing from the government.

Visiting Russia a year ago, Kapitza remained in the Soviet Union under promise that his work would receive full support, and his Cambridge laboratory be moved to Russia. Some of his most valuable assistants were employed to assist him and he was honored as a Soviet scientist.

He is head of the Institute of Physical Problems construction of which has been completed by the Academy and in the buildings of which his Cambridge equipment has been installed.

Spark Like Cannon Shot Electrical equipment of the laboratory includes a special electrical generator producing 20,000 amperes.

New Books on the Rent Shelf "Solomon, my son" by Erskine: "Solomon, in the early years of his reign, as presented in this novel, was not so wise as his reputation made him out to be. In fact, much of the credit for his rise to fame and power goes to the four women in the story—his mother, Bathsheba, his wife Magasa, the queen of Sheba, and his first love, Abishag. In building the temple Solomon encountered many economic problems in which he satirizes accordingly. The story seems to have even less relation to history than the author's former novels but it provides the same kind of light and witty entertainment."

"O. Henry memorial award prize stories of 1935." "This is the seventeenth year that the O. Henry memorial anthology has offered readers the best current examples of stories published in American magazines. In addition to the well-known authors for whose stories one

to where the stranger is afraid to offer attentions to the girl—take for instance the girl hitch-hiker.

When the engine of an automobile stops running, man feels like swearing. When the engine of an airplane stops, man feels like praying. From the religious standpoint airplanes are more effective than automobiles.

The Scriptural admonition to turn the other cheek when smitten on the one does not work so well when a drunk motorist bumps you on one side of your car. To turn the other becomes expensive.

Nice quiet day here Saturday, eh what?

icefield was created, a special freezing apparatus would be placed upon it to work on "free power" obtained through the difference of temperatures between the surface and the depth of the sea.

Thus, according to the plan, ice would be accumulated until a sufficient area was available for the construction of buildings, hangars, after a layer of earth had been laid on top and vegetation imported from the mainland.

Another writer envisages the construction of huge ice dams across rivers.

Whether Kapitza's methods are capable of such results, he will have great possibilities for experiment in his institute on the Lenin Hills near Moscow, where 1,200 acres of land have been devoted to projected buildings of the Soviet Academy of Science.

In 1750, Massachusetts passed laws prohibiting theatrical entertainment of any description. Nine years later it imposed a fine of 500 pounds for violation of the laws.

T. J. INMAN Optometrist Glasses Fitted Correctly A full line of frames and mountings. Broken lenses quickly and accurately replaced. Broken Frames Repaired 104 NORTH MAIN ST.

All fathers and mothers want their children to succeed and as long as they can, mothers and fathers the country ever sacrifice and plan to give their boys and girls every advantage, every opportunity, for they want them to have a start which they too often were denied.

"We want to send Jim to college if we can afford it," they say. "We plan to give Mary special training in music if we have the money when she has finished high school."

But why should an IF threaten these dreams? A PRAETORIAN EDUCATIONAL POLICY can erase that IF and permit mothers and fathers to say positively: "MY CHILDREN ARE GOING TO COLLEGE." The Praetorians' plans offer a systematic way of saving. A little put away each month makes the education SURE. Investigate the Praetorians' Educational policies for children.

THE STORY OF Grace MOORE The King Steps Out with FRANCHOT TONE

What Has Happened
At the instigation of his mother the stern Dowager Empress, Emperor Francis Joseph of Austria, commands Princess Helena daughter of the Duke and Duchess of Bavaria, to come to the summer palace at Heilbrunn immediately so that their betrothal can be announced on his birthday three days hence. The match was arranged by Duchess Louise, Helena's mother, and her sister, Sofia, the Emperor's mother. Duke Max is a peace-loving, ineffectual man, but Cissy — Princess Elizabeth, his favorite daughter, is angered because her sister who is in love with Count Palfi, the 26-year-old Emperor's adjutant, must marry the ruler. Cissy persuades the fearful Duke to accompany her incognito to the palace town and see what they can do about preventing the betrothal. While Max is drinking beer at the inn, Cissy, in the guise of a dressmaker, attempts to see Helena at the palace and runs into the Emperor, who takes a fancy to her. During their interview, Cissy is astonished to hear her father, the Duke, announced.

NOW GO ON WITH THE STORY CHAPTER THREE

At the young Emperor's suggestion, Cissy slipped into the next room; from there she listened to the conversation between Francis and her father, who had not seen each other since the Emperor was a baby and the Duke dangled him on his knee. The Duke hemmed and hawed a great deal. It seemed to the amused Cissy that he was just about to tell the Emperor that he came there to ask him not to marry Helena, when the approach of the Dowager Empress Sofia, Duchess Louise and Princess Helena caused him to hide. The Duke ducked into the room Cissy was in, a moment after Cissy had darted behind a screen.

When the coast was clear again — when the women had gone and the Duke had left without making his point — the Emperor looked for Cissy and found her at the piano, singing.

"Oh, you here?" said the pseudo-dressmaker archly. "I thought Your Majesty had forgotten about me."

"Not for a second," Francis assured her. "Even though I was meeting my future wife for the first time."

"I suppose she is very beautiful," said Cissy innocently.

"She's in the garden now, waiting for me to join her."

"Oh, then, I'd better not deliver the dress now."

"I think," said the Emperor, "that it ought to be brought again tonight."

Cissy shook her head. "Oh, no. I would never go out at night — alone."

"Perhaps I could come around and pick it up," suggested Francis eagerly. "Where do you live?"

"I live at the Golden Ox," said Cissy. She looked at him demurely.

"But the village is celebrating your birthday tonight — and besides, your mother may order you to bed."

Francis caught the inference. "You mean, if I should go out I might trip on my mother's apron strings, is that it?" asked the Emperor.

The door swung open and Palfi appeared.

"Your Imperial Majesty!" exclaimed the adjutant, excitedly. "Your mother is terribly impatient! She is waiting in the garden!"

Cissy curtsied and said softly to the young Emperor: "Yes — that's it." Then she quickly went out, pressing a warning finger to her lips as she passed Palfi.

That evening, after the Dowager Empress had seen him securely tucked in bed, Emperor Francis Joseph, disguised as a second lieutenant, slipped out of the palace grounds. At the Golden Ox Inn, he called up at Cissy's window, and the princess, still dressed as a commoner, ran down to meet him. The Emperor was on his own for the first time in his life.

The whole town was turned out for the giant carnival in honor of the Emperor's birthday, and Francis and Cissy, like any gay young officer and his lady friend, lost themselves in the happy crowd along the midway. At least they thought they lost themselves; secret service men from the palace, commissioned to guard the ruler's life, with their own if need be, trailed him closely.

Statues and pictures of the young Emperor, inscribed with "Happy Birthday," met their gaze at every turn. The entire carnival was filled with portraits of Francis, in oils, water colors, pencil, charcoal. The disguised Emperor looked ruefully at some of the likenesses, and wondered aloud whether they were really faithful reproductions. But Cissy laughingly told him that he was much better looking.

The holiday crowd pushed and jammed irreverently against the man whose birthday they were celebrating, but Francis was enjoying it immensely. With the lovely Cissy hanging on his arm, he didn't care much, at that moment, what happened to the Empire and his dignity.

They continued to weave gaily through the crowd. The Emperor felt exhilarated.

"Cissy, I feel I never want to be with anyone else!"

"But tomorrow Her Imperial Highness will command you to forget your feelings," Cissy taunted.

"I guess she will," he muttered.

"And the Emperor, like a good

Fifteen-Minute Facial Removes Day's Worries

BY ALICIA HART
NEA Service Staff Writer

racial pick-me-ups and other quick methods of making the business girl look like a new, rested person in less time than it takes to tell it are a personal boon. Ways and means to change easily from a tired-looking career woman to a glamor girl of which he will be proud are important bits of knowledge to one who works.

A bath, preferably a leisurely one in a tub of perfumed water, is the first step, of course. Clean your face and throat thoroughly. Then cover them with a rich cream or a good mask before you step into the tub. The cream will be absorbed or the mask will have a chance to dry while you are scrubbing back, shoulders and legs and freshening up your fingernails.

Since time is at a premium, business women generally find commercially prepared masks handier than homemade types. One especially good mask, made by a reputable company and designed to do its freshening-up work in fifteen minutes, looks and smells like fresh strawberries in whipped cream. You simply wash with soap and water, smooth on a mask, take your bath or lie down for a quarter of an hour, then remove it. If you have a dry complexion, use cream after the final rinsing. Your skin will look fresh and rested and ready to receive evening makeup.

The company that makes the strawberry mask also features special suntan makeup for the girl who likes her skin to be a deep copper shade during the summer months. There is a carmelian cream rouge which is heat-resistant; a reddish-brown lipstick to match; also a harmonizing dry rouge to put on during the evening when you have not time to apply the cream again, or for a quick touch-up after tennis. The finishing lotion is a new suntan shade which accents the natural, darkened tone of the skin.

Unique Gift Given To Local Museum

The capitol of Texas was opened for use in 1888. It has lately become necessary to replace the tile floor which was laid when the building was erected. Mr. Charley Lockhart, state treasurer, has given one of these tiles to the local museum. The letter which accompanied this prized gift follows:

Treasury Department
State of Texas
Austin

"Mrs. Ola Dublin Haynes
"Tax Collector's Office
"Midland, Texas

"Dear Mrs. Haynes:

"I am pleased to comply with your request and am sending you by parcel post a plaque of tile that has been removed from the first floor of the capitol building, which I think will be an appropriate deposit for your museum, and I congratulate you on your foresight in seeking such an emblem as a souvenir from your state capitol building.

"Yours very truly,
E. B. BARNES,
"Acting State Treasurer"

You also want the greater comfort and greater road stability of Chevrolet's Improved Gliding Knee-Action Ride*. Millions of Knee-Action users will tell you that this is the world's safest, smoothest ride. And, of course, it's exclusive to Chevrolet in the low-price range.
- GENUINE FISHER NO DRAFT VENTILATION**
You'll get a lot of comfort out of this feature, too. It gives each passenger individually controlled ventilation... "scoops in" refreshing breezes on hot days... eliminates drafts in cold weather... prevents clouding of the windshield. It's available only in this one low-priced car.
- HIGH-COMPRESSION VALVE-IN-HEAD ENGINE**
And for all-round performance with economy, there is nothing like Chevrolet's High-Compression Valve-in-Head Engine. It's the same type of engine that is used in record-holding airplanes, power boats and racing cars; it will save you money mile after mile; and it, too, is exclusive to Chevrolet in the low-price range.
- SHOCKPROOF STEERING***
Also an outstanding advantage—also exclusive to this one low-priced car—is Shockproof Steering*. It eliminates steering wheel vibration—makes driving easier and safer than ever before. Visit your nearest Chevrolet dealer today and have a thorough demonstration of this only complete low-priced car.

"I understand that Chevrolet is now enjoying the biggest demand in its history."

"You're right. And there's a good reason. Everybody knows that this new Chevrolet is the first motor car with all modern advantages to sell at such a low price—it's

The only complete low-priced car!

Too Bad Cubs, Yanks Can't Meet In All-Star Game

Will Direct Nationals

Battle Between Chicago, New York Could Be Preview of World Series

Charlie Grimm

(This is the first of two stories on the major leagues' all-star game at National League Park, Boston, July 7.)

By HARRY GRAYSON
Sports Editor, NEA Service

BOSTON, July 3—It really is too bad that Managers Charley Grimm and Joe McCarthy cannot use their own clubs in the majors' fourth annual all-star game at National League Park here, July 7.

At this stage of the proceedings it appears that a meeting between the Chicago Cubs and New York Yankees would be a preview of the 1936 world series.

The way things are the big number at old Braves Field should shed some light on what may happen in the fall fashion show, however, for the fans elected six Yankees and four Cubs to all-star positions.

Joe DiMaggio, Lou Gehrig, Bill Dickey, George Selkirk, Monte Pearson, and Vernon Gomez will demonstrate what has brought the Ruppert forces back like Max Schmeling, Billy Herman, Gabby Hartnett, Frank Demaree, and Lon Warneke are to show what has convinced all hands, including the St. Louis Cardinals, that the 1935 victory of the Bruins was no fluke.

Frankie Crosetti, DiMaggio, Gehrig, Dickey, Selkirk, and Lazzeri form a "Yankee murderers' row" that compares favorably with those of the club's pen-and-gathering days of the past.

Major league team records for base hits, home runs, and runs scored in a single season are marks the new Yankee juggernaut is likely to surpass.

McCarthy's sluggers, with Captain Gehrig, DiMaggio, and Dickey in the lead, hit the ball with amazing force on the western trip just closed, and if they maintain their pace the records they are heading for will come into their possession. In fact, even if they strike a snag in nitting between now and late September, they still may shatter the standing records. And one has to stretch one's imagination to vision the Yankees in a general batting slump. Too many sound swingers are hot at once.

In 1930 the National League Phillies created the base hits record. The Yankees of this year may shatter. The Phils made the mark by gathering 1783 safe hits.

If the Yankees continue their home run activities, they will top the American League record of 173 set by the Philadelphia Athletics four years ago.

The Yanks of 1931 established the present high mark for runs scored in a single campaign, 1087.

The present squad of Yankees already this season has shattered a long standing home run record. In 1922 the St. Louis Browns played through an 11-game span in which they hit 20 circuit swats. This year Gehrig, DiMaggio, Dickey, and a fe wother Yanks belted 21 home runs in a nine-game stretch.

Should the Yankees come through and improve on the Athletics' home run mark, McCarthy will have gained the distinction of having managed the record-breaking home run teams of both major leagues. Buffalo Joe guided the Cubs in 1930, when, with Hack Wilson pacing them, they established what still stands as the National League record for round-trip wallops by one team in a single season, 171.

While the Cubs haven't the power of the Yanks, they are a mootherly working array operating behind the finest pitching in either wheel.

The Bruins' attack is built around Herman, Hartnett, Ken O'Dea, Demaree, and Ethan Allen. They have the most polished defense in the majors, with Bill Jurges and Herman the acme of perfection around second base.

Grimm scarcely can object to the use of such splendid pitchers as Dizzy Dean of the Cardinals, Carl Hubbell of the Giants, and Van Lingle Munn of the Athletics; staunch hitters like Ernie Lombardi of the Reds, and Gus Mancuso of the Giants, behind the plate; such infielders as Arky Vaughan, Gus Sahr, and Wilbur Brubaker of the Pirates; young Stuart Martin of the Cards, and Pinkey Whitney of the Phils; and such outfielders as Joe Medwick of the Cards, Mel Ott and Joe Moore of the Giants, and Wally Berger of the Bees.

McCarthy isn't mad about having at his disposal the services of pitchers like Bob Grove of the Red Sox, and Schoolboy Rowe of the Tigers; backstops like Rick Ferrell of the Red Sox, and Rolly Hemsley of the Browns; infielders on the order of Charley Gehringer of the Tigers, Luke Appling and Jimmy Dykes of the White Sox, Jimmy Foss of the Red Sox, and Frank Higgins of the Athletics; and outfielders of the capabilities of Earl Averill of the Indians, Ray Radcliff of the White Sox, and Ben Chapman of the Senators.

Yet it is reasonable to suspect that Grimm and McCarthy would be just as pleased to play the 1936 edition of the all-star game with the Cubs and Yanks now marching to the world series. And the game would be even more interesting if the regular Chicago and New York lineups took the field.

Joe McCarthy

"Substitute" American Boss

The SPORTS HORN

BY JESS RODGERS

Second half play in the Permian Basin League gets underway this week-end with Texon at Ozona, Wink at Crane, and Iraan at McCamey. The Ozona Giants, winners of the first half, are favored to be hitting around the top in the second half combat, but ample competition is expected from all angles due to the fact that each of the six clubs have strengthened up considerably. Texon, perennial champion of West Texas, has added a new pitcher and Snipe Conley, manager, has issued a warning to the other clubs that the Oilers will take the second half flag and then drub Ozona in the play-off series. The Texon boys do not like to be on the losing end and this year marks the first they have not topped the initial half.

Crane, considered by many to have the strongest club in the circuit, must be figured as a strong contender under the new management of Bob Osborn who replaces the veteran Bill Orchard. The Gulf boys are confident of second half honors. If Wink is able to secure at least one more good pitcher, the Winkler boys can be expected to finish in the money. The club has led in the fielding all season and it has a host of hard and consistent hitters. The McCamey Refiners annexed several of the Odessa players and the boys from Upton county will play a much better brand of ball than they did during the first half.

The Iraan Oilers, who have upset more championship hopes than any other club in West Texas, is due to be even stronger during the remainder of the season due to the addition of a new hurler, an outfielder and an infielder. Lefty Williams, manager, has hopes of making the going very difficult for the opposition.

All in all, the best brand of baseball ever played in this section is expected to be displayed in the race for the second half pennant. Each club, with the possible exception of Texon, has the strongest club in its history and the competition will doubtless be a bit rough for all concerned.

Midland folks who drive down to Crane Sunday afternoon for the Wink-Crane tilt are assured of seeing a good game between two of the strongest contenders in West Texas' fastest baseball loop. The

Sunday game will get underway at three o'clock.

Just Wandering

Harry Grayson, NEA sports editor comes through with some very interesting dope about "Little Gene" Moore, former pitching mainstay of the Midland Colts in the old West Texas League. Discussing the Brooklyn and Boston Bee trades last winter he says:

Nothing much was said about Gene Moore when he came with Babich, but the blond outfielding refugee from the St. Louis Cardinal chain gang has developed into the spark plug of the outfit. Moore is Boston's newest baseball hero. Gene, who had a trial with the Cards a year ago and who wound up batting .326 for Rochester, is a power hitter. He is as fast as a streak and has a fine arm.

On successive days against the Phillies Moore, who is hitting .305 swatted home runs into the right field jury box in Boston's National League park and into the left field stand. Outside of Crosley Field, Cincinnati, the Boston right field is the deepest in the loop. Moore's belt into the left field stand tied the score.

Moore hit a home run over the left field wall at Forbes Field, Pittsburgh, the first time that feat ever was accomplished by a left-handed hitter. He circled the bases on a hit inside the park the same day. Competent judges consider Moore, who is the son of Gene Moore, the old Pittsburgh pitcher, the finest first year outfielder to break into the National League in some years.

Moore hit a home run over the left field wall at Forbes Field, Pittsburgh, the first time that feat ever was accomplished by a left-handed hitter. He circled the bases on a hit inside the park the same day. Competent judges consider Moore, who is the son of Gene Moore, the old Pittsburgh pitcher, the finest first year outfielder to break into the National League in some years.

Use of Autos Drops In France Over Tax

PARIS, (U.P.)—Automobile sales in France have dropped 10 per cent in the past year trucks 13 per cent and motorcycles 30 per cent. Heavy taxation is blamed.

Owners drive cars in France five year. The standard American practice of trading in old cars for new ones once a year doesn't apply here. Taxes would eat up a still large proportion of the amount spent on cars if that were done.

The result is that the private car is restricted to a proportionately much wealthier class than in America, and French automobile production declines. Sales of foreign cars (which declined 11 per cent, slightly

Big Ten Man From The West

more than that of domestic models, last year) are discouraged by heavy import taxes and also by the fact that they are not designed to save gasoline as are French cars. Heavy taxation on gasoline makes it costly.

Taxation on automobiles is jeeted almost every year. Sometimes there is a tax on purchase, based on horsepower, calculated after complicated formula. Sometimes it is in the gasoline, sometimes both, plus a few other charge here and there. But always the principal is the same—that the enterprising business who starts to spend money to bring in more business must pay the government first on his expenditure.

Results; many businessmen refrain from lighting their show windows, refrain from using poster advertising. Business thus stagnates, turnover is slow, and income tax returns drop.

It is this kind of taxation against which automobile manufacturers, salesmen and drivers are fighting, led by the daily newspaper Auto, which argues that lower taxes would mean more government revenue through increased volume of business. The drop in figures for last year is considered particularly alarming, especially because automobile business last year was none too flourishing.

Antos Become Luxury

French production of automobiles for 1935 was 127,433 units against 142,464 in 1934. Trucks dropped from 21,707 to 18,931 and motorcycles from 26,735 to 18,402. France imported more foreign automobiles than last year 111,772 a-ticle in France, and the really de-lux car is the foreign one. But im-

Scientist Works On Rock Pile Million or Two Years Old for Milestones In Evolution

PARIS, (U.P.)—Dr. T. P. O'Brien, London prehistorian and archaeologist is chipping away here at three and one-half tons of rock in an effort to catch a glimpse of life that inhabited East Africa some 2,000,000 years ago.

The rock that was gathered by an expedition, headed by Dr. O'Brien, during 20 months of research and excavation in Uganda is believed to contain traces of pre-historic man and beast. By comparing these fossiliferous bits with specimens from other parts and ages of the world, Dr. O'Brien hopes to discover new facts about the evolution of man from lower animals.

The collection reached Paris a short time ago, packed in ordinary soap boxes. The work is classification and sorting was started immediately at the French Ethnographic Institute here, which sponsored the undertaking. It will take at least six months before the entire work of checking all the hundreds of cultures through unknown ages can be completed.

Dr. O'Brien declared that he did not think he would find anything very revolutionary regarding the nature of prehistoric man, but hoped to uncover facts that would throw a new light on the intelligence and development of the Stone Age people.

"It is awfully difficult to say precisely what it is I am looking for," he said, as he sorted out chunks of

red, gray and black rock on a long work table, "because it embraces all branches of science. I may come across something that will be of interest to botany or zoology, and then again it may be of interest to physiology."

He explained that the work did not deal with dates as known in history, but rather with period of social progress marked by the use of stone, bronze and iron for weapons, and tools. The rocks that were more than a million years old looked no different, incidentally, than the rocks of recent formation.

Guinea Pigs Elusive

TOLEDO, (U.P.)—"Greased pigs" used to enliven small-town July 4th celebrations may be the most slippery to some people, but keepers at the Toledo Zoo say an ordinary guinea pig is one of the hardest to catch. It takes four good sure-handed men, they say.

War Relic Going Home

VANCOUVER, B. C. (U.P.)—When the Canadian Vimy Legion pilgrimage reaches Ypres it will restore to the burgomaster a large hand bell taken from the Old Cloth Hall by Canadian troops in September, 1916. The bell is to be restored to its original place in the hall.

Taught Landon To Swim

ASHTABULA, O. (U.P.)—Frank Hall 77-year-old custodian of the Masonic Temple taught Gov. Alf M. Landon to swim. The place was the Shenango River near Greenville, Pa. and the time was 40 years ago.

Thief Prefers Cosmetics

MARYSVILLE, Cal. (U.P.)—Local police still are trying to solve the motive for the theft of Mrs. Joseph Elper's handbag. All that was taken from it, before the thief threw it aside, was a powder puff, a box of face powder, a lipstick, and rouge. All valuable were left intact.

Pig Gets Jail Home

STEBENVILLE, O. (U.P.)—Sergeant Mat Phillips, keeper of the jail here, had a pig for an inmate. The 640-pound porker hopped from a livestock truck, and the only place the police sergeant had to keep the animal, until someone came to claim it, was in a cell.

Winkler Henderson Test Showing Gas From 2,885

BY FRANK GARDNER An unestimated amount of gas developed while drilling from 2,885 to 2,935 was showing through the drilling mud in R. H. Henderson No. 1 Leck, Winkler county wildcat as drilling proceeded below 3,000 feet in broken section. At the rate at which it was drilling, the Henderson test was expected to reach its contract depth of 3,200 feet late last night, and was then scheduled to shut down for orders. The Henderson test is in an area a mile and a half west of the large lime-producing wells in the Henderson pool, but character of section in both it and the Shell No. 1 Leck test a half mile south and slightly east has made it unlikely that the pool will be extended that far. Location of the Henderson No. 1 Leck is in the northeast corner of section 32, block 74, public school land. Bottomed at 3,211 feet, operators were remaining core-hole in the Shell Petroleum Corporation No. 1 Leck in preparation for rat-holing ahead. They will core small hole to around 3,261 feet and will test. Said to be lower than the wells in the Henderson pool on basis of lime top at 3,030, a streak of red rock was reported present in the last cores taken in the Shell test. It has had small oil showings farther up the hole, but only drilling mud showed on drill-stem tests. It is 2,310 feet from the south and 330 feet from the east lines of section 32, block 74, public school land.

CONTINENTAL COMPLETES 2 WELLS IN SETTLES POOL

A potential of 485 barrels per day was assigned to Continental No. 15-A Settles, in the Settles pool of the Howard-Cassock field. The potential was based on production of 20 to 20 barrels recorded on the second hour of test. The new Continental producer had pays from 2,440 to 2,462 and from 2,500 to 2,510, and halted drilling at 2,545 feet in lime. It is 440 feet from the south and 1,650 feet from the east line of section 135, block 29, W. & N. W. survey, Howard county. On its Eason lease in the Settles pool, Continental was last reported preparing to run acid in the No. 9 Eason. The well showed natural production of 14 barrels an hour on swab from pay at 2,438 to 2,445. Its total depth is 2,457 feet. Location is 440 feet out of the southwest corner of section 6, block 32, township 2 south, T. & P. survey.

CASING CEMENTED IN GAINES WILDCAT

Humble Oil and Refining Company No. 1 C. H. Eubank, latest wildcat to spud in Gaines county, is standing after cementing 9 5/8-inch casing at 2,767 feet with 800 sacks. Total depth is 2,800 feet. The No. 1 Eubank was spudded on June 24.

SCHLEICHER WILDCAT IS RUNNING CASING

Six and 5/8-inch casing is being run in Cardinal No. 1 Whittem, Schleicher county wildcat, to shut off salt water coming from 4,859 to 4,887. The well is now bottomed at 4,886 feet in lime. It is 690 feet from the north and 1,980 feet from the west line of section 35, block B-11, public school land, and has been inactive for the past two weeks while awaiting delivery of the casing.

Air Conditioning In Trains Make Trips Through West Easier

CHICAGO, Ill.—The long, hot reaches of the Western desert country no longer brings perspiration to the traveler's brow. The railroads have solved the problem of summer travel in the desert country, air-conditioning. This year air-conditioning will be one of the primary factors in an increase in Western vacation travel. These statements were made here today by Harry G. Taylor, Chairman of the Western Association of Railway Executives, which is considering final plans for the annual celebration of "Railroad Week" to be held this year from July 13th to 18th, inclusive. In making this statement, Mr. Taylor pointed out that the Western Railroads have \$27,000,000 invested in air-conditioning equipment of all classes. He said: "We have a tremendous investment in air-conditioning cars, but we feel that our investment will justify itself in increased travel." Mr. Taylor's report showed an increase of nearly 50 per cent in the number of air-conditioned cars now in service. For 1935 the railroads and the Pullman Company operated 2,500 cars, representing an investment of \$19,000,000 on the Western Railroads. At the present time there are 3,669 cars of all classes being operated as air-conditioned units in the western territory. The increase means, according to Mr. Taylor, that the "hot trade" in interstate travel has been eliminated from first class travel. He said: "Travelers no longer need fear the excessive heat of a cross-country train ride. The air-conditioned cars make the trip with less than a two per cent variation in cool temperature. And more, hay fever and asthma sufferers can be assured a safe haven on the sealed air-conditioned cars, for the pollens of the Goldenrod, the rag weed and the rose are all taken out of the air that is filtered and purified before being released in the cars." Mr. Taylor also pointed out that the Western Railroads were proving the workability of air-conditioning on a large scale. He added: "The progress made by the railroads in air-conditioning has founded a new industry, and the work provided by the tremendous sale of air-conditioned equipment has given the industry the necessary life blood of business to keep it going."

RULES RESTRICT SECRET SERVICE

WASHINGTON, (U.P.)—Gov. Alf M. Landon is still just an ordinary citizen in the eyes of Chief W. H. Moran of the Treasury's Secret Service division and he will not have the benefit of any plainclothes detectives to guard him during the presidential campaign. The Secret Service has no intention of guarding the Republican nominee because there is no provision in its instruction code to watch over anyone but the President and his "immediate" family. Also, after November election, a detail is requested to safe-guard the President-elect until he takes office. So unusual is the Secret Service's insistence that there has never been a law entered upon the statute books providing for its creation or operation. It was started in 1865, immediately after the Civil War, expressly to stop counterfeiting. It was merely provided for in Congressional appropriation bills and it has maintained the same legal status ever since. Taft First To Be Guarded There never was a provision even to guard the President until after President McKinley's assassination in 1902, a squad was ordered to watch over the nation's executive

3 Sisters In Same Class

PORTERVILLE, Cal. (U.P.)—Family monopoly on graduating classes was exercised to a reasonable extent by Mr. and Mrs. Frank Lalanne when their three daughters were graduated simultaneously from high school. Jacqueline and Jeanne, twins, are 18, and June, the third, 17.

FEWER FRENCH BABIES BORN

PARIS, (U.P.)—Deaths outnumbered births by 19,476 last year in France. The number of children born in 1935 was 638,881, as compared with 677,365 in 1934. Deaths numbered 658,357, compared with 634,925 in the previous year.

Movie Class Popular

PALO ALTO, Cal. (U.P.)—One class which Palo Alto high school students didn't "cut" was that of moving picture appreciation. Leading films were shown. A total of 1,327 students, or 90 per cent of the entire enrollment, attended.

"Little Miss Nobody"

Nobody to love her, no home of her own, Little JANE WITHERS plays her most affecting role in "Little Miss Nobody," showing today and tomorrow at the Ritz Theatre. She is a mischievous little harem-scurrum who fights her way to happiness through tears and laughter. And on the same program is another delightful "CARTOONLAND REVUE," a group of selected cartoons, "Foot Ball Bugs," "Cobweb Hotel," and a Looney Tune entitled "Shanghaied Shipmates."

Geological Formations In County Are Shown to Be Paleozoic and Mesozoic

Editor's Note.—The following article was prepared for the Reporter-Telegram by Mrs. Hal Peck, state game commissioner and resident of Midland. It is highly opportune in the year of the Texas Centennial when all counties are expounding their virtues.

BY MRS. HAL PECK

The geological formations of Midland county are mainly of the Paleozoic and the Mesozoic type of the Triassic era. The specific formation of the Paleozoic type is known as the Rustler formation. In the northern part of this area a thin conglomerate sandstone with some clay underlies the limestone. Almost no fossils have been recorded in this formation. Richardson, a geologist, has found only indelible invertebrates resembling the Nyltus and some plant fragments. The Rustler formation ends in Midland county where it is found within or below the Quartermaster formation.

The Triassic era is the specific geological epoch of interest to Midland county in the Mesozoic system. Shales and sandstones, silicified wood and abundant mica are found in the Triassic formations. Colored, sub-rounded, partially frosted quartz grains generally distinguish the Triassic era. The sub-angular gravel ranging from fine to coarse, is common in the Triassic era. etcherates have been studied by scientists, including Cope, Branson and Mehl.

The reptile, Phytosauria, the dinosaurs, crocodile, and a species of fish known as "Ceratodus Dorothea" have been observed in this area. Midland county has a Triassic thickness of 1215 feet in the southeastern part of the county. The region is being geographically described as the Llano Escadoco, or Staked Plains. This area is bounded on the east by prominent escarpment, and on the west by an escarpment lying east of the Pecos and parallel to it. The land within that region is a wide, shallow syncline in the Permian. The surface was developed in the pre Dockum times. The Dockum beds dip gently to the southeast. They were covered by rock of the Comanche series which were removed. In the Conozoic times, a gravel mantle covered most of the area.

The dinosaurs that roamed about, ate flesh and some vegetables. Some were small while others were at least 80 feet long. One which must have weighed more than the largest elephant had such a small head that its brain could not have weighed 1-20 as much as that of our elephant.

Fauna of County.

Prairie Dog, Coyote, Jack Rabbit, Cotton Tail, Gopher, Ground Squirrel, Horned Toad, Terrapin, Bull Frog, Skunk, Badger, Rattle Snake-PREDATOR, Prairie Runner, Black Snake, Garden Snake, Garter Snake, Lizard, Shagparel Bird, Quail-Blue, Bob White, Quail, Mourning Dove, Field Lark, Blackbird, Buzzard-Predator, Hawks-Predators (some not), Owl, Crow, Raven, Sparrow, Redbird, Scissor Tail Bird, Robin, Wild Canary, Snipe, Mud Hen, Ducks, Woodpecker, Blue Jay, Crows, Killdeer.

Grasses of County

Needle Grass, Grama Grass, Mesquite Grass, Tabosa or Buffalo Grass, Crab Grass, Burr Grass. Weeds of Midland County Mesquite is the best known tree of the state. The finished wood takes a high polish and closely resembles walnut. The flowers are a valuable source of honey, and the beans with their rich sugar content, form a nutritious food for cattle and horses. Desert Willow, this shrub has long been a favorite of both the Mexican and early settlers. The honey produced from the flowers is pure white and of excellent quality. (Naturalized). Greasewood (Larrea Mexicana, Cresote Bush) is strong scented, has sticky leaves, has bright five petalled flowers. An antiseptic lotion is made by steeping the twigs in boiling water, and is particularly effective in treatment of cuts, bruises, etc. It is one of the best sources of cement for mending broken articles.

Weeds of County

Spanish Needle, Sage Brush, Cockle Burr Purple and Yellow High-tide, Dock, Bitter Weed, Sand Burr (Tribulus Terrestris) has orange yellow flowers that open

NO OTHER SHIRT FITS YOU LIKE AN ARROW ARCHER. Praise be to the new Military Back, ARROW ARCHER—just brought out—follows the shape of your torso better than any ready-made shirt heretofore tailored. Arrow Archer curves in at your waist, flares out at your seat, then nips in again. Result: it doesn't pucker in back, blouse in front—and the tail stays put. Sanforized-Shrunk, too, for lasting fit. \$250. Wadley's "A Better Department Store"

purchased to handle tabulating, writing of checks, filing, etc. Two hundred filing cases had to be purchased. Nearly a hundred typewriters, office furniture for the State office and for the various district headquarters had to be bought through the Board of Control. The initial outlay was held to a minimum through the co-operation of the Board of Control and the Texas Relief Commission in making available to the Old Age Assistance Commission all surplus equipment from relief headquarters. Investigators, who constituted the bulk of the employees, were given jobs with the understanding that they pay their own expenses. In accordance with requirements of the Social Security Board, a staff of reviewers was employed.
