Lulled into a sense of security when he escaped suspicion in the early days of the investigation of Helene Cleveenger's murder, Martin Moore plainly looks apprehensive after having confessed.

THREE MEMBERS OF ROTARY GIVE TALKS AT LUNCH

Phillips, Maxwell and Sealy Appear On Program

Club service committeemen of the Rotary club presented the program today, the three talks being presented by Tom Sealy, Jerry Phillips and W. C. Maxwell. The phases of club service were outlined by T. Paul Barron, chairman of the committee, who said that activities of the individual Rotarian toward maintaining club life enabled him to better serve in the other three general divisions, community, vocational and international service.

Sealy's subject, "Knowing the Other Fellow," brought out the advantages of acquaintance and fellowship as a means of better understanding between fellow men.

Phillips pictured the classification principle of Rotary as a "Cross Section of Community Life," each member representing a different vocation.

Maxwell stressed the advantages of regular attendance at club meetings to attain the maximum from the club and to put the most into it. He also gave an interesting side light on fellowship as registered at Rotary clubs he visited on a recent vacation trip.

John P. Howe gave a brief talk welcoming two new members, Barney Greathouse, druggist, and O. F. Sensabaugh, radio station commercial manager. Visiting Rotarians were Henry George of Sulphur, Okla., and C. E. Wade, school superintendent of Kingsville. Other visitors were Bob Preston and Bruce Frazier.

'GOLD SHIRTS' TO MARCH ON CAPITAL

Exiled Leads Says The Party Will Dictate To Cardenas

EL PASO, Aug. 13. (U.P.)—Thousands of Gold Shirts are prepared to march on Mexico City and "dictate the course" President Lazaro Cardenas should follow to "save Mexico from communism," exiled General Nicholas Rodriguez said yesterday. Rodriguez, leader of the fascist group, was expelled from Mexico through Juarez Tuesday. Claiming the president is "sincere in his efforts" but that he is being victimized by advisors and executives under the pay of Russians, General Rodriguez said his followers and their sympathizers are ready to move the capital when the signal is given.

RAIL CARRIERS ASKING RELIEF

Provision In Act Being Protested by Members At Saint Louis

WASHINGTON, Aug. 13. (U.P.)—Rail carriers serving between St. Louis and the southern territory today asked the interstate commerce commission for relief from the long-short haul provision in the interstate commerce act on fertilizer and fertilizer material between St. Louis and southern shipping points.

SAVED FROM CAVE-IN

IRVING, Texas, Aug. 13. (U.P.)—Ed Roberts, 50, trapped on a well bottom for 18 hours by a cave-in while pumpers fought rising waters, was rescued in a semi-conscious condition today.

REPORT OF HIGHER TAXES IN COUNTRY ARE DENIED TODAY

President Is Among Those Denying Rumor

MAY CUT RATES

Will Balance Budget Earlier Than Had Been Expected

WASHINGTON, Aug. 13. (U.P.)—A conference of President Roosevelt, Secretary Morgenthau, chairman Harrison of the Senate finance committee and chairman Doughton of the House finance committee today fought the announcement that new taxes would be recommended to the next session of congress. They reported that a survey would begin immediately that may lead to reductions.

"Business is improving at such a pace that we are going to reach a balanced budget earlier than expected," Harrison said.

DOROTHY POYNTON DIVING CHAMPION AS CONTESTS END

U.S. Basketball Team Enters Final By Beating Mexico

BERLIN, Aug. 13. (U.P.)—Dina Senff, Holland, won the women's Olympic 100-meter backstroke today, an event which Dorothy Poynton, United States, won the platform diving title.

The United States basketball team moved into the final round by defeating Mexico. Harvard's four with coxswain was eliminated from the regatta by losing its consolation race to the French.

RECORD WELL IS SEEN IN FOSTER

Broderick & Calvert Test Gauges 82 Barrels In Hour

By FRANK GARDNER
Broderick & Calvert No. 1 H. C. Foster gave indication of being the largest well yet drilled in the Foster pool of Ector county when it flowed 82 barrels in one hour after shooting with nitro yesterday. Originally drilled to a total depth of 4,237 feet, the No. 1 Foster was plugged back to 4,227 with lead wool to shut off a small amount of sulphur water and three feet of gravel brought the bottom of the hole up to 4,224. The shot was with 540 yards from 4,065 to 4,224. At last reports, the well was still on test.

The Broderick & Calvert well is located 2,310 feet from the south and 330 feet from the east line of section 13, block 43, township 2 south, a quarter-mile north of the discovery well. It found its best pays from 4,146 to 4,158 and from 4,220 to 4,230.

Another Foster test, York & Harper No. 1, Witches, east offset to Stanolind No. 1, Witches, is drilling salt and anhydrite below 2,655. Sinclair-Prairie No. 1-A Johnson, wildcat test five miles north of the pool in section 42, block 42, township 1 south, is drilling salt and anhydrite at 2,855.

Hits Sulphur Water
Sulphur water at 5,055 seemed to doom chances for production in Joiner Oil Corporation No. 1 Evans-Cowden, northeast Winkler wildcat, but operators were discussing the possibility of carrying the test deeper after testing rate of water increase. Located in the northwest quarter of section 46, block 73, public school land, the Joiner test has held interest for the past few months. It was started up again recently after a shut-down of several weeks awaiting orders to drill below the old contract depth of 5,000 feet.

In the Keystone pool of Winkler, Gulf No. 13, plugged back to 3,390, flowed 77 barrels of fluid in 24 hours through tubing, shakeouts showing an average of three per cent water and one per cent mud. Cavings fill the hole to 3,360, so operators have pulled tubing and are going in to wash hole and clean out.

An O'Brien pool well, Gulf No. 71, O'Brien, bottomed at 3,185, flowed 348 barrels in 14 hours after crew broke through bridge formed after shot.

New Waddell Well
Another large flush producer was indicated for the Waddell pool of northern Crane county when Magnolia No. 8 Edwards in section 2, block B-23 public school land, struck the main pay at 3,535, drilled ahead to 3,540, and flowed 192 barrels in two hours. Plans of operators have not been announced, but the well may be acidized.

Three-thousand gallons of acid are being injected today in Henderson and Otho No. 1 Cordova Union, Crane-Opton field well. When bottomed at 2,930, it was shot and treated with acid with no results, then drilled deeper to 2,048, logging a good increase in oil from 2,040. A half-mile north of the No. 1 Cordova Union, Henderson and

'Drummer Boy of Shiloh' Is 85

Famed as the "drummer boy of Shiloh," Brig. Gen. John Lincoln Clem, U. S. A., retired, who enlisted in the Civil War at 10, is observing his 85th birthday in San Antonio, Tex. Shown here as he appeared then and in recent years, "Johnny" drummed and fought at Shiloh and Chickamauga, and was later wounded and held prisoner.

CHICAGO, Aug. 13. — Secretary of Agriculture Henry A. Wallace said Wednesday he hoped the next session of Congress would pass a crop insurance law.

He said he expected the insurance proposal he first advanced in Kansas City last month would be whipped into legislative shape by the time the session opened in January, 1937.

It had not yet been worked out in detail, he said, but in general it provided farmers would set aside a certain amount of their crops each season as "premiums" in return for having the crop insured by the government. In good years, these "premiums" would be stored as "insurance reserves." In bad years, they would supplement short crops.

Thus, Wallace contended, the consumer would be protected against unduly high prices and the farmer against unduly low ones.

Wallace said it was his opinion that the insurance plan, tied in with the new deal's present soil conservation program, would "just about answer" the farm problem.

These two subjects, he said, would be discussed at regional meetings of farm leaders he proposed to call "later in the fall" to talk over the federal farm program for 1937.

Wilson returned last week from Mendham, N. J., where he was graduated from the 49th training school, sponsored by the national organization of the Boy Scouts of America.

He was re-elected for his second year as teacher in the J. P. Cowen school of Sweetwater, but recently resigned to take the position as scout field executive.

Wilson is 24 years old, has a B. S. degree from Abilene Christian college, and did graduate work at the University of Texas. He has served as principal of the Sylvester school and on the summer school faculty of Abilene Christian college.

He has been connected with the Boy Scouts for almost two years, serving first as scoutmaster and later as district commissioner.

SWEETWATER MAN NAMED BOY SCOUT FIELD EXECUTIVE

Darold Wilson Given Post, To Be Aide Of Stiles

Darold F. Wilson was named field executive of the Buffalo Trail council, Boy Scouts of America, Tuesday afternoon by the Council executive board, which met in Midland in connection with the annual council-wide swimming meet held there.

He will travel over the entire area and will service all troops in the Buffalo Trail council, of which Midland is a part. He is to work in cooperation with Area Executive Alfred J. Stiles, who makes his headquarters in Sweetwater, but his own headquarters have not yet been fixed.

Wilson returned last week from Mendham, N. J., where he was graduated from the 49th training school, sponsored by the national organization of the Boy Scouts of America.

He was re-elected for his second year as teacher in the J. P. Cowen school of Sweetwater, but recently resigned to take the position as scout field executive.

Wilson is 24 years old, has a B. S. degree from Abilene Christian college, and did graduate work at the University of Texas. He has served as principal of the Sylvester school and on the summer school faculty of Abilene Christian college.

He has been connected with the Boy Scouts for almost two years, serving first as scoutmaster and later as district commissioner.

ESKIMOS SAVED BY ARRIVAL OF SHIP

Food Finally Reaches Point Barrow, End To Famine

WASHINGTON, Aug. 13. (U.P.)—The cutter Northland advised the coast guard headquarters today that she had landed four and one-half tons of food at Barrow, Alaska, and that the famine situation among Eskimos there was now in hand.

Two Ships Stop At Sloan Field

Only two landings were reported for this morning at the airport, one being a military and the other a commercial ship. Major Fitzgerald, flying a P-12, came in from El Paso bound for Dallas.

Garza Wooten arrived in a Beechcraft of the Trinity Drilling company. He came from Dallas and departed for Hobbs, N. M.

Guns End 11-Year Sleep
SAN DIEGO, Cal. (U.P.)—Twelve-inch harbor defense mortars at Fort Rosecrans, silent for 11 years, were unlimbered in target practice at float stowed behind the Coast Guard cutter Perseus. Four practice strings were fired at a range of 8,000 yards.

KOREAN FLOODS KILL 100
SEOUL, Korea, Aug. 13. (U.P.)—Heavy floods in south and central Korea have taken 96 lives and destroyed 1,000 homes, it was reported today.

WALLACE TO SEEK CROP INSURANCE IN THE COUNTRY

Expresses Hope The Bill To Pass In Next Session

CHICAGO, Aug. 13. — Secretary of Agriculture Henry A. Wallace said Wednesday he hoped the next session of Congress would pass a crop insurance law.

He said he expected the insurance proposal he first advanced in Kansas City last month would be whipped into legislative shape by the time the session opened in January, 1937.

It had not yet been worked out in detail, he said, but in general it provided farmers would set aside a certain amount of their crops each season as "premiums" in return for having the crop insured by the government. In good years, these "premiums" would be stored as "insurance reserves." In bad years, they would supplement short crops.

Thus, Wallace contended, the consumer would be protected against unduly high prices and the farmer against unduly low ones.

Wallace said it was his opinion that the insurance plan, tied in with the new deal's present soil conservation program, would "just about answer" the farm problem.

These two subjects, he said, would be discussed at regional meetings of farm leaders he proposed to call "later in the fall" to talk over the federal farm program for 1937.

Civil Service Jobs Announced Today

According to an announcement today from the postoffice department here the United States Civil Service Commission has announced open competitive examinations as follows:

Public health nursing consultant, of various grades, \$2,600 to \$4,600 a year, and public health nursing assistant, \$2,000 a year. Optional subjects for the consultant positions are: Maternal and child health, general public health nursing, and orthopedics; for the nursing assistant position, the subject is maternal and child health.

Junior agricultural engineer, \$2,000 a year.
Horticulturist of various grades, \$2,300 to \$4,600 a year. Soil Conservation Service, Department of Agriculture.

Soil technologist, of various grades, \$2,600 to \$4,600 a year. Soil Conservation Service, Department of Agriculture.
Bank note designer, \$3,200 a year. Bureau of Engraving and Printing, Treasury Department.

Full information may be obtained from Elma Graves, Secretary of the U. S. Civil Service Board of Examiners, at the post office.

CRESAP TO EL PASO
Pvt. T. O. Cresap of the airport force left this morning for the William Beaumont hospital at El Paso. He will be away about a month.

PATIENTS GO TO HOMES
D. A. Ray left a Midland hospital today for his home.
J. P. Howell who had been treated for several days for severe infection also left the hospital.

TO FORT WORTH
Jas. H. Goodman, Midland attorney, left today for Fort Worth. He will attend the Motor Transportation meeting.

COUGHLIN AVERTS CONTROVERSY IN RANKS OF PARTY

To Allow Townsend To Speak After Conclave Ends

PROTEST PLANS

Convention Marshal Wants Party Out Of Politics

CLEVELAND, Aug. 13. (U.P.)—A controversy within the national union for social justice was settled today with an announcement by Rev. Charles Coughlin that Doctor Frances E. Townsend should address the union's convention after the official close of business Saturday.

Townsend's appearance had been opposed by Walter D. Davis, convention marshal, on a basis of keeping the union "out of politics."

Coughlin was a guest speaker at the Townsend club convention. In his address to the assembled delegates the priest referred to President Roosevelt as a "liar and betrayer," statements for which he later apologized under orders from Bishop Gallagher of Detroit.

Both Coughlin and Townsend are to make addresses over the nation later in the year in the interest of William Lemke, union party presidential candidate.

25,000 MEN FIGHT TO OVERCOME HUGE MINN. FOREST FIRE

Thousands of Acres Of Timber Being Destroyed

SAINT PAUL, Aug. 13. (U.P.)—Twenty-five thousand men battled flames spreading through the northern wilderness today. Adverse winds and low humidity was providing a severe handicap to the fire fighters.

The flames broadened after eating 6,000 acres north of Kabetogama lake and a similar area of the grand portage state forest, destroying 22 homes in the Markhamplace section.

Chamber Commerce Has New Members

Two additions to the roster of chamber of commerce members have been announced by Mrs. Sallye Covington, secretary. They are J. C. Penney company and the Midland Production Credit association. Both firms joined the organization this week.

BEAUMONT GASSER ON NEW RAMPAGE

250 Foot Wide Crater Is Sending Flames High Into Air Today

BEAUMONT, Aug. 13. (U.P.)—The Republic Production Company's flaming Brooks number one well went on another rampage today, forcing flames more than 200 feet high.

The crater now measures 350 feet across, and fire fighters are able to see 25 feet down into the hole.

U.S.GERMANY DROP TRADE BARRIERS

Ambassador Luther Gives Important Note To State Department

WASHINGTON, Aug. 13. (U.P.)—An early elimination of trade barriers between the United States and Germany was forecast reliably today after presentation to the state department of an important note by ambassador Hans Luther.

Birth Reports Show No Partiality

Vital statistics showed no partiality to the sexes in the birth reports for Wednesday, one boy and one girl's birth being reported.

Mr. and Mrs. W. S. Blackman are parents of a son born in a Midland hospital Wednesday night.
Mr. and Mrs. James Adamson are parents of a girl born yesterday also.

Both mothers and babies are reported doing well today.

VISITS RELATIVES
Mrs. Jas. H. Goodman has gone to Lubbock and to Plainview. In the latter town she will visit her mother and sisters.
Police Reorganization Tedious
TOLEDO, (U.P.)—City Manager John N. Edy, reorganizing the Toledo police department, said he believed the department had taken in so many misfits in the last 20 years that at least five years would be required to build it into an efficient force.

San Sebastian Is Bombed Today By Planes of Rebels

Gazes Unafraid Upon Spain's Death Arena

Serene despite the scenes of grim tragedy toward which she was headed, this pretty Spanish riflewoman stood sturdily erect listening to last instructions from her commander before the march to the front started. One of thousands of Spanish women who took up arms to defend the government, she left Madrid to fight in the campaign against the rebels entrenched in the Guadarrama mountain passes.

HEAVY DAMAGE IS INFLECTED, EIGHT PERSONS WOUNDED

Main Thoroughfare Is Target For Attackers

SHIP TO ATTACK

City Will Be Shelled After Surrender Is Refused

IRUN, Spain, Aug. 13. (U.P.)—Rebel planes bombed San Sebastian, seaside resort, today inflicting heavy damage and seriously wounding eight persons.

The airport, anarchist headquarters, and the main boulevard were among targets hit by the bombs. A rebel warship prepared to shell the city as the time limit on an ultimatum to surrender or undergo a bombardment expired. Government officials controlling the town refused to comply with the demands of the insurgents.

The Socialist-Communist government last night hurled troops against the northern seaboard and urged for a merciless purge of southern Fascist rebels in a great offensive to end the bloodshed of civil war throughout the nation.

Loyalist troops battered again at the gates of Oviedo, and sought to turn back the fascist march in that sector.

Far to the south troops reinforced with new militia volunteers were flung against the African forces imported by rebel General Francisco Franco.

Aerial bombardment of fascist Granada, Cordoba and Seville impeded.

Bitterly, the government forces sought to stem the threat of the fascist rebels who seek to substitute a military government for the regime of President Manuel Azana.

COTTON SEED CAKE INDUSTRY PROBE ASKED OF WALLACE

Livestock Group In Charge Against Companies

WASHINGTON, Aug. 13. (U.P.)—Texas livestock interests spokesmen asked Secretary Wallace today to investigate the cotton seed and cake industry which they charged "taking advantage of the drought to charge excessive prices."

The group that met Wallace included Roger Gillis, president of the Texas sheep and goat raisers' association.

JUDGE STUDYING ACTRESS' SUIT

Calls Astor, Thorpe Into Consultation With Attorneys Today

LOS ANGELES, Aug. 13. (U.P.)—A few minutes after superior court judge Goodwin J. Knight said that he would require "hours" to study the proposed settlement of actress Mary Astor's child custody suit against her ex-husband Franklin Thorpe the judge called the warring couple and their attorneys into a conference, the nature of which was not disclosed.

FLAPPER FANNY SAYS: REV. BORUM SPEAKS TO BIG SPRING CLUB

Rev. Winston F. Borum, was the principal speaker at the weekly luncheon of the Kiwanis club at the Crawford hotel in Big Spring today.

The subject of his address which was an inspirational talk was "The Tale of Two Cities".

Special music was arranged for the program which was in charge of Houston Cowden.

Thieves Try Base Steal
TOLEDO, (U.P.)—Two men, apparently tried to "steal" third base at Swayne Field, home of the American Association Mudhens at 2 in the morning. But the nightwatchman routed the intruders when he fired his revolver twice and turned on the field lights.

Dogs Win Trial Right
REDWOOD CITY, Cal. (U.P.)—Dogs have come into their own under the terms of a new city ordinance against both barking and biting dogs. Before any dog can be condemned to death, however, it must be given a regular hearing in police court.

Your dislike of a picture is most positive when it's negative of flattery.

Diplomatic Ties Are Strained Over a Name

SYDNEY, Aug. 13 (U.P.)—By hastily changing the name of a polar bear in the local zoological gardens from "Kosciusko" to "Polar" zoo officials are convinced they have averted an international incident.

The zoo, which is operated by the Taronga Park Trust, had decided to call the polar bear "Kosciusko," because there seemed to be some affinity between the snow-capped mountains in New South Wales and the icy regions which are the natural haunts of the polar bear.

The name appeared innocent enough and the bear appeared quite happy.

Unfortunately, a copy of "Walkabout" published by the Australian National Travel Association, containing a photograph of the bear with his baptismal name fell into the hands of the historic Polish family. Boleslaw Strzelecki, chairman

of the Strzelecki family committee, who immediately sent the following ultimatum to the editor of "Walkabout":

"It is really unbelievable that a civilized Australian magazine could use great foreign heroes' names for their zoological exhibits. I would highly appreciate your apology before I would be compelled to file my protest to the department of state and the Polish Embassy in Washington. For your information, the General Kosciusko was a great Polish patriot, and it is very unethical to use his name in such a manner."

To prevent a possible international incident the "Walkabout" appealed immediately to the Taronga Park Trust, the latter to the Australian government and authorization was granted to change the bear's birth certificate from "Kosciusko" to "Polar."

Headquarters of emotions in the human body are located at the base of the left brain, according to Dr. Leland A. Alford, of St. Louis.

BEHIND THE SCENES IN WASHINGTON

By RODNEY DUTCHER
Reporter-Telegram Washington Correspondent

WASHINGTON, Aug. 13.—The administration is seriously worried by the extent to which farmers are resenting the increase, under the New Deal, of agricultural imports.

Evidence that some of the large western farm states are veering toward London is attributed in large part to Republican success in publicizing recent statistics. Six months ago it was commonly believed that benefit payments and higher farm prices would deliver nearly all these states to Roosevelt.

Officials are meeting in secret huddles to determine the best way of convincing the farmer that the import figures are merely an indication of his increased prosperity and not of a diabolical plot to encompass his ruin through "planned scarcity."

AAA men insist they have a good argument, but that it's difficult to translate into an emotional appeal.

The present drought makes the imports question important aside from its political aspects, since it seems bound to result in further increase of purchases on farm products abroad, although the import curve this year has been generally downward.

Imports On Rise
What bites the farmers is that competitive agricultural imports increased from a value of \$296,000,000 in 1932 to \$623,000,000 in 1935 (this includes about 50 millions in alcoholic beverages); cattle imports from 66,000 head in 1934 to 378,000 in 1935; canned beef from 19,585,000 pounds in 1931 to 76,265,000 in 1935; wheat from 3,000 bushels in 1932 to 27,439,000 in 1935; corn from 160,000 bushels in 1933 to 43,242,000 in 1935; and butter from 1,014,000 pounds in 1932 to 22,675,000 in 1935.

Many farmers feel that these and other considerable quantities of imported food should have been raised and bought in the United States. They are being told that it is all a direct result of "planned scarcity."

The New Deal is in no position to say that its agricultural adjustment programs had nothing to do with the reductions in food supplies which preceded the big rises in imports, except as it may point out that there were no curtailment programs for such commodities as cattle, dairy products, and eggs.

Of the drop in wheat production in the 1934-35 crop year from normal, about 310 million bushels it attributed to drought and 54 millions to acreage reduction.

In corn the proportions were 1,003,000,000 bushels below normal as a result of drought and 182,000,000 because of the A A A.

Drop From 1928
On the other hand, imports in most cases are lower in quantity than in various pre-depression years. As against 378,000 imported head of cattle in 1935, about 663,000 head were imported in 1928.

Not so much butter has been imported as in 1935 since 1923 and wheat and corn imports have reached new highs. But competitive agricultural imports were valued at \$1,017,000,000 in 1929, as against \$623,000,000 in 1935.

Imports always rise when American prices are high and decline

when they're low. Higher consumer purchasing power also stimulates imports and, more important to the farmer, farm imports and farm income tend to rise together.

Thus, while competitive farm imports went up from 296 millions to 623 million dollars in value from 1932 to 1935, farm income rose from 5337 millions to 8110 millions.

In pre-depression years, imports of that type ran around a billion dollars a year and national farm income between 11 and 12 billion. Wheat was selling here for only 38 cents in 1932, when only 3,000 bushels were imported; in 1935, when 27 million bushels were imported, the price averaged 84 cents.

Percentage Is Lower
Percentages of imports last year in relation to average national production were: Corn, 1.7; wheat, 3.2; beef, 3.0; pork, 0.1; butter, 1.1; eggs, 0.8; cotton, 0.7; and cheese, 1.0.

Corn imports were only 4.1 per cent of the drought loss in corn, wheat imports but 4.5 per cent and the 387,000 head of cattle imported last year compared with a reduction of 4,000,000 head as a result of drought.

Economists also say that imports seem to rise in relation to general prosperity, which brings improvement in domestic demand. Thus, from 1932 to 1935 the index of industrial activity rose from 36 to 60 and the index of competitive farm incomes rose from 25 to 60.

The question of farm exports is another story. The drop there came prior to 1933 and farm exports have subsequently somewhat increased. But the job of explaining the imports increase is explaining one for the New Deal.

Pedestrian Laments Fate
HAMILTON, Ont. (U.P.)—James O'Flaherty is telling of his experiences with "the world's most discourteous motorist." O'Flaherty said he was knocked down by a car while crossing the street. The driver leaped out, waited for O'Flaherty to regain his feet, and then knocked him unconscious with a blow to the jaw, jumped back in the car and drove away.

Glass Jug Sets Fire
WOODLAND, Cal. (U.P.)—Official investigation of the burning of a truck here developed that it was due to a glass jug of water left lying on a sack in the truck. The sun, shining through the glass jug, set fire to the sack.

STORIES IN STAMPS
By I. S. Klein

SILENT ANIMALS OF THE JUNGLE

RECENTLY, the game warden of Kenya, Africa, reported that he heard a young giraffe, separated from its mother, bawl and howl like a hungry cat. And so the general belief that this tall, long-necked animal cannot utter a sound is shattered.

But compared with other animals, the giraffe is mute, and among the most timid, nervous, and delicate creatures in existence. Only its spotted skin saves it from the sight of preying enemies, for it grazes in clumps of trees, and its fleet legs enable it to escape when attacked.

The giraffe's long neck contains no more vertebrae than that of man or of any other animal except the sloth and the "sea-cow." It reaches three times the height of man and can run at a speed of 30 miles an hour.

This strange animal is confined to Africa, south of the Sahara Desert. Countries such as Tanganyika, Nyassa, Northern Rhodesia, and Abyssinia picture it on their stamps. One of the popular triangular postage due stamps of Nyassa, shown here, is an example.

Thompson Leads Morris in All But 12 Counties

The map above shows the position of Ernest O. Thompson, chairman of the state railroad commission, and Frank S. Morris, second man in the first primary vote in the road commission race in July. Last figures on the race showed that Thompson had led Morris 288,130 votes and had almost carried his election by a majority over all his opponents.

Despite the overwhelming lead of his opponent, Morris is making a campaign in the run-off primary August 22 against Thompson.

The shaded area shows the counties in which Thompson led Morris. The white ones were the only ones in which Morris ran ahead of the forceful railroad commission chairman. In the white counties Morris' lead was only 9,666.

SETS RECORD IN MARATHON

Still traveling at full speed after running 26 miles and 385 yards, Kitei Son, shown in this NEA radiophoto about to breast the tape in Berlin, established a new world and Olympic record of 2 hours, 29 minutes, 19 2/10 seconds in winning the classic marathon for Japan. The Korean college student refused aid of doctors after the race.

Mrs. Barnes Reads Paper on Christian Steward at Meeting

EDITOR'S NOTE: The following paper on "The Christian Steward and His Church," based on a scripture lesson from Luke 19, 10-26, was read by Mrs. H. C. Barnes at a recent meeting of a Methodist missionary society circle.

BY MRS. H. C. BARNES
Christian stewardship may be defined as a sense of moral responsibility for all of life. Life is a gift from God, it has an immortal, eternal value. To develop all of one's powers of personality to the utmost and then to use them unselfishly in service to humanity is Christian stewardship; a service all can give.

vice can be found than this. It takes consecration, however. The one accepting this place of responsibility must be willing to invest a large amount of time to study, not only the Bible and the current Sunday School lesson but the literature of his church, parallel books, and so forth. In addition, much prayer, thought and time must be given to making personal contacts. Other special fields of labor are: Dedication of one's gift for song, ability to lead in field of woman's work, young people's work, social welfare, and so forth.

FEMININE FANCIES

By KATHLEEN EILAND

In this column recently we expressed a hope that some bright spirit somewhere might teach us how to dispose of dead flies at a profit, thus turning liability into asset.

Personals

Mrs. B. S. Edmiston and daughter of Americus, Kansas, arrived today for a two-day visit with Mrs. Julia Filson.

Mrs. Joe Youngblood returned Tuesday morning from Dallas, where she attended the market display, while visiting relatives.

Announcements

Friday
Friendly Builders class of the Methodist church will hold its monthly picnic at Cloverdale Friday evening at 7:30 o'clock.

Most of the time we feel we'd be content to blunder along through life with fingers that act like thumbs if we could only handle words as we want to do.

Mrs. Howard Goodpasture of Altus, Okla., is visiting her father, Lee Bradshaw, here. She will leave Friday.

Mrs. Bertie Boone has returned from a vacation trip to Ft. Worth, where she visited her daughter, Mrs. Drew Ellis.

L. C. Harrison, Dallas oil operator, is here today looking after West Texas interests.

Methodist Young People's Choir Holds Meeting

The initial meeting of the young people's choir of the Methodist church was held at the home of Miss Lydie G. Watson, 210 W Ohio, Tuesday evening. Miss Watson is pianist for the organization.

Marshall Crawford Has Birthday Party

Marshall Crawford, son of Mr. and Mrs. M. H. Crawford, was complimented with a party on his third birthday at the family home, 901 North D street, Wednesday afternoon from 5 o'clock until 8.

Fishing Intrigues Finance Wizard

This intent angler is accustomed to talking in big figures, so he should be able to tell a tall story about the one that got away—so-o-o long! Intensely concentrating on his task, Bichi Baba, Japan's minister of finance, wearing a straw hat, is seen as he enjoys his favorite sport at his summer home near Misaki, scoring intricate tackle.

GARDEN GATE GOSSIP

Arranging flowers is an art which everyone can practice and enjoy. Yet, to explain exactly how to arrange flowers is almost as difficult as to explain how to paint a picture. Proficiency in the art is more a matter of repeated practice, than precept, and nearly everyone can learn to make delightful arrangements by trying often enough.

Many formulas have been advanced to govern flower arrangements. The Japanese have given much serious thought to this and their simple yet severe arrangements are in keeping with their national character. In contrast are the more varied and informal arrangements favored by present fashions in our country. Yet the same laws of composition govern both.

There are a few general principles which will help you in making arrangements. Most important among these is simplicity. You could

even call it economy, for you will find that very few flowers are needed to make a really fine arrangement.

Use a container simple in outline and inconspicuous in color which tapers to the top. The flowers should be about one and a half times the height of the container.

To determine the size of the container, measure the tallest flowers you are to put in it; the flower stems should be about one and a half times the height of the container.

Mass your colors to avoid a spotted effect. This is especially important when contrasting colors are used.

Do not strive for symmetry, but balance your arrangement, so that the seeming weight is equal on both sides of the axis. In this connection it is interesting to note how dark colors will appear to "weigh" more than light ones.

When small flowers are used with larger ones, mass them to avoid losing their identity.

When many colors are used, softening the warm colors by using fewer of them. It is much easier to

Social Security Board to Remain At San Antonio

SAN ANTONIO, August 13—The regional office of the Social Security board for the three states, Texas, Louisiana and New Mexico, has been permanently located at San Antonio, Texas, according to advice received here today by Oscar M. Powell, regional director, from Frank Bane, executive director, at Washington, D. C.

The regional office will be headquarters for the director and his staff, consisting of representatives of the various bureaus, who will handle technical matters in connection with the administration of the social security act in the three states.

In addition to the regional headquarters, an administrative office with a personnel larger than that of the regional office will be established in Austin, Powell said. This administrative office will be concerned with the administration of the federal old age benefits section of the act. The old age benefits plan will be financed and administered by the federal government, no state legislation being required to put it into operation.

"What a Money-Saver Dodge Is!"

SAVES MRS. MARY RANSON SMITH, Pelham, New York.

I'm delighted with our new Dodge! In the first place it's such a gorgeous-looking car. I doubt whether we could find greater riding comfort in any other car...

...It handles like a dream...so easy to steer and shift gears—and the brakes are marvelous...and what a money-saver it is...

We haven't had to add any oil between regular changes... What's more, our Dodge is giving us at least 7 more miles to the gallon of gas than our old car. No wonder they call it the Money-Saving Dodge!

Hawaii Warned Of Lava Flow Dangers

HONOLULU, Aug. 13 (AP)—Sunset colors and planetary positions, as well as movements of the sun and moon, hold the keys to weather and seismic disturbances for Brother Othmar of St. Louis College, Honolulu.

Brother Othmar, who seems headed for a reputation as great as that of Father Richard, late famed "patron of the rains" at Santa Clara College, Cal., already has listed a probable series of events for Hawaii this year. He predicts a major eruption of the volcano Mauna Loa on the island in February, 1937.

He also has predicted a flood in the Nuuanu valley above Honolulu in September, and continuation of rainy weather in Honolulu proper all summer.

Next February the planets Jupiter, Saturn and Venus will be in superior conjunction, with only the moon between them and the earth.

"There is going to be a lot of fun when this happens, and Hawaii will expect another major eruption," he says.

A fiery, blotchy-red sunset in Hawaii may be followed shortly by typhoons in the distant Philippines, according to Brother Othmar. He said that "red" sunsets seen for five months in Hawaii in 1935 likewise followed a terrific earthquake in Japan.

"The stars can talk if you can only listen long enough," he cryptically contends.

Jupiter controls earthquake movements, he insists. Once, he says, he noticed the Pleiades were shining with unusual brilliance. Within a short time a severe storm struck, and after the storm had passed the constellation could be seen but dimly, indicating the storm originated in its direction.

Atop Luzon mountain, Philippine Islands, are hundreds of bodies of Igorots, clothed and sitting in groups resembling "picnic" parties, that have been there for years and have been perfectly unmolested by the hot, dry air.

The British Museum in London is said to have the world's largest collection of coins and medals. There are more than 500,000 pieces in the collection, the oldest having been made about 700 B. C.

Violin strings are made from sheep gut and the strings on the bows from horsehair, while the wood of the bows comes from Brazil.

A novel clock in a South American city is in the form of a searchlight. The clock in revolving, falls on a different landmark every hour.

Wrenches Good As Ball
AMSTERDAM, N. Y. (AP)—When Walter Morse was fined \$2 on a reckless driving charge he offered five monkey wrenches in lieu of bail. The wrenches were accepted.

Some species of birds, due to yellowish-red filters in the retina of the eye, possess excellent vision. Such birds can see the coast of Africa while flying over Italy.

Korea is the only country in the world where the marriage certificate is divided, one half being given to the wife and the other half to the husband.

STORIES IN STAMPS

By I. S. Klein
**BEN FRANKLIN
OF FRANCE**

SCIENTIST, philosopher, author, and diplomat was Benjamin Franklin, great American patriot. A similar figure, in the annals of French history, was Marcellin Pierre Eugene Berthelot, who was born in 1827 and died in 1907.

Berthelot proved that organic compounds can be synthesized, or composed from other chemical elements, despite the belief of his day that Nature's processes could not be duplicated. He produced the explosive gas, acetylene, which led to the discovery of even more dangerous war gases, and to the composition of synthetic rubber.

After 40 years' research, he established the rule that chemical forces can be measured by the heat that is emitted.

Yet, despite his scientific activity, Berthelot participated in the War of 1870 and became minister of public instruction in 1871. In this capacity he improved the system of science instruction at the French schools.

In 1895, at 68, he became France's minister of foreign affairs.

In 1927 France issued a stamp on the centennial of his birth.

100 Children Will Begin Acting at Stage of Yucca for Part in Films

2-Reel Comedy Will Be Made With Local Kids In Cast

Lights - Action - Camera - These Hollywood catch lines will be heard in Midland Friday evening at the Yucca Theatre, when approximately 100 children will begin acting in the first scenes of a children's motion picture, in theme similar to Our Gang comedies. The camera will be

Makers of Midland Photoplay

Hollywood comes to Midland Friday when production of a children's comedy, with 100 Midland children in the cast, will be started. The picture is expected to be finished Sunday. Shown above is a sound truck, camera, and members of the staff of Melton Barker Juvenile productions, that are making the film here.

gin grinding at 8:30 o'clock on the Yucca stage, enabling the audience to see reproduced a sound studio like those used by major companies.

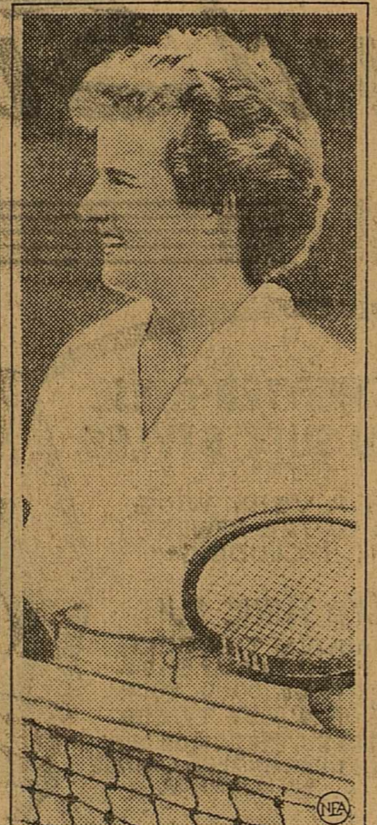

The film will be a two reel Melton Barker Juvenile comedy. Shooting of the picture will be completed Sunday, weather permitting. Pagoda Pool, Cloverdale Park, and several private homes here in Midland will be the location of several of the scenes. A few adults are to be used in the cast, in addition to the children.

Rehearsals opened today at the Scharbauer Hotel. Melton Barker, discoverer of "Spankey" MacFarland, and representative of the Hollywood Film Company and Melton Barker Juvenile productions, has been working with numerous applicants who have been trying out for parts in the picture.

NETTER LIKE MA

By 1938 the tennis world will see another Bundy reigning as women's champion, predicts John Hope Doeg, American men's title holder six years ago. The youngster in question is Dorothy Mae Bundy, above, daughter of Mrs. May Sutton Bundy, queen of the net in the early years of this century, and a cousin of Doeg. The 19-year-old girl took part in the Seabright, N. J. tournament, and is expected to participate in the national singles at Forest Hills in September.

Boy's Dynamite Cache Seized

LDOL, Cal. (U.P.)—When the police learned that a 12-year old boy was in possession of a deadly dynamite cap they decided it would be better for the protection of the public for them to take it in charge. They did, along with 90 others that the boy had found cached at Paradise Dam.

Bull Wins Over Truck

LACOLLE, Que. (U.P.)—A Holstein bull engaged a five-ton truck in combat on a highway here and won. The bull was being driven with several cows when it sighted a crimson truck and charged headon, sending it into a ditch. The driver and a passenger were injured and the truck damaged, but the bull escaped unscathed.

Legitimate Births In Country Mount

NEW YORK, N. Y.—A close relationship between illegitimate births and the depression is shown by statisticians of the Metropolitan Life Insurance Company who declare that from 1929 to 1934, illegitimate births in the United States increased at a greater rate than legitimate births declined, with the peak in the legitimate rate coming in 1932, the same year that the marriage rate was at its lowest point. With improvement in business since 1932, however, a gradual increase in the marriage rate and a corresponding decrease in illegitimacy have occurred.

The legitimate birthrate declined from 1.851 per 100.00 in 1929 to 1.656 in 1934, while a similar comparison of the illegitimate birthrates shows an increase from 60.3 to 53.2. These figures represent a decline of 11 per cent in the legitimate birthrate and a rise of 12 per cent in the illegitimate rate.

"Undoubtedly this phenomenon is in close relation to the reaction of the marriage rate toward the economic depression," the statisticians say. "After a first sharp drop, this rate continued to decline as the depression deepened. By 1932 the lowest figure on record for the country as a whole was reached, when 7.87 marriages per 1,000 population were recorded. "But if mating under the recognized convention of marriage is seriously hampered by economic stress, the primitive instinct of reproduction is apparently not so easily suppressed. In fact, there is some evidence to show that fertility actually may be increased under economic stringency. Recent surveys indicate that in families on relief, birth rates are found much in excess of those obtaining in families who have retained their economic independence. Furthermore, the very increase in enforced idleness at such times tends toward a moral let-down and to a rise in illegitimacy."

"Certain it is that during the years when the marriage rate was declining there was a marked and steady increase in the illegitimate birthrate, the peak of the curve of the latter being reached in exactly the same year in which the marriage rate attained its lowest point. This was the year 1932, which authorities generally concede marked this nadir of the depression. Significantly with improvement in business conditions since 1932, there has been recorded a gradual increase in the marriage rate, accompanied by a corresponding drop in illegitimacy. At least 24 States recorded lower illegitimate rates in 1934 than in 1932, although in most cases the 1934 rates still exceed the figures for 1929."

"It seems certain, therefore, that the rise in illegitimacy since 1929 was natural concomitant of one of those social maladjustments which follow in the wake of great cataclysmic events, economic or otherwise. As such, it may be expected to subside with the return of prosperity."

Old Sol Cooperates With The Centennial

DALLAS, Texas.—Old Sol has co-operated with the management of the Texas Centennial Exposition in dissipating the commonly held theory that the Southwest is hot in the summer time.

Anticipating a probable warm summer Exposition officials air-conditioned the principal buildings in the grounds. When they completed the work they found that 3,000 square feet of cooling had been conditioned, this represents 1,500 tons of cooling capacity, measured in terms of ice. Its operation involves 2,000 horsepower. The total area is ten acres of buildings.

And then weather conditions themselves entered to make the efforts of the Exposition more effective. Statistics in the offices of the United States Weather Bureau in Dallas reveal it actually was cooler in Dallas and at the Exposition during July than it was in the central and northern states. The variation of temperature in favor of the Exposition center amounted on most days to more than 10 degrees.

During the drought period in the central and western states there was not a single fatality in the Southwest, while the death toll mounted into the thousands in other sections.

More encouragement from the Weather Bureau is that unless drought conditions become more acute in other sections, the worst of the heat has passed in Texas. Statistics reveal that July is the hottest month. August shows a gradual drop to cooler temperatures, and by September the need of air-conditioning will be almost gone.

But the Exposition did not stop with the air-conditioning of ten acres of building. Mechanical ventilation takes care of some 400,000 more square feet of space, or approximately 12 acres. This accounts for some 90 per cent of the building space on the Exposition grounds.

Another gratifying feature to Exposition visitors has been that the principal hotels of Dallas also have made the same provision for their comfort—and all of it has been done without an increase in prices.

Devil's Tower Booms
SUNDANCE, Wyo. (U.P.)—The number of persons visiting Devil's Tower Monument, near here, have increased 32 per cent over the same period a year ago, according to Newell F. Joyner, custodian. Since the close of the 1935 season, Oct. 1 to July 1, 1936, more than 10,500 persons have visited the tower, Joyner said.

Fruit Jar 60 Years Old
TOLEDO, (U.P.)—Mrs. Martha Perkins has a glass fruit jar which has been in constant use for 60 years and is still in perfect condition.

Teaches Tennis, Too

Bull Protects Master From Police Inquiry

August 16 Is Named Midland Day at The Double Heart Rodeo

SWEETWATER.—All details for Nolan county's sixth annual Cowboy and Cowgirl Rodeo, to be held at the Double Heart Ranch, 10 miles south of Sweetwater, Friday, Saturday and Sunday, Aug. 14, 15 and 16, are complete, and it is expected that at least 15,000 people will witness the show during the three days. August 16 has been designated Midland Day.

Grandstand and bleacher accommodations have been increased, additional chutes for the roping and bucking events have been built, and the arena has been improved, making the Double Heart plant one of the largest in the southwest.

Thirty cowgirl sponsors from West Texas and New Mexico towns will be competing for the title of West Texas Cowgirl Sweetheart and for a beautiful hand-carved saddle as first prize, a \$35 pair of hand-made boots as second prize, and a \$10 pair of hand-made spurs for third.

The celebration will open Friday morning at 10 o'clock with a big parade headed by the Sweetwater Municipal Band and in which the sponsors, the more than 100 contestants in the rodeo events, will ride. Many Sweetwater business houses will also have decorated cars in the procession. A \$5 prize will be awarded to the best dressed cowgirl and cowboy in the parade.

The rodeo will start at 1:30 each afternoon of the three days, and will include calf roping, steer and bronc riding, wild-cow milking, bull-dogging and all the other rodeo features. Cille Cox, veteran West Texas ranchman and manager of the show, has acquired the famous Red Lions string of bucking horses, and will use 75 head of Brahma steers and calves in the show.

Theatres on Playgrounds

HOLLYWOOD, Cal. (UP)—The city's playground department has introduced two novelties for the summer. One is miniature theatres on six playgrounds where children can present plays and the other is sketching classes for adults.

Great Pals in All but Politics

Damon and Pythias were implacable enemies compared to these two fellow Nebraskans, Legionnaires, and fraternity brothers, Dwight Griswold, left, and Gov Roy L. Cochran, shown smiling, with arms hooked in comradely fashion. But, listening to either of them on the political stump, you'd never know it. The reason is that both are running for governor in the Cornhusker State. Griswold, the Republican candidate, was defeated by Governor Cochran in 1934, but hopes to turn the tables this year.

Indian Tomahawk Is In Exhibit at Univ.

AUSTIN — Through tears and bloodshed an ancient Indian tomahawk has come to rest peacefully on the shelf of an exhibit case. The tomahawk, one of the latest editions to the exhibits in the division of anthropology in Gregory gymnasium, main exhibit hall of the University Centennial Exposition, was lent to the university by James LeGette Yelvington of Hunt, Texas.

In the pioneer days a man named Deway settled with his wife and five children, two boys and three girls, in Kerr county. Indians attacked and killed both the parents, but the children stayed on and worked on the ranch. After some time their grief passed somewhat and they forgot their fears of the Indians.

Finally they let their herd of sheep stray too far from the house. One of the boys went back for something, and the youngest girl was playing beneath some nearby bushes. Came the war-whoop of the Indians, and the boy and the two older girls fell beneath their axes. The Indians failed to see the little girl who had crept back out of sight beneath the bushes. After the Indians had gone, she came out and picked up this tomahawk which one of the Indians had dropped.

When the other boy came back from his errand, that was the scene that met him. His brother and two sisters dead and his little sister carrying that tomahawk around. The little sister has kept the tomahawk in a closet in her room until three years ago when Mr Hunt purchased it.

The tomahawk is a crude piece of flint with raw hide fastening it to a handle made from a tree limb. The original handle is in place. Few of these tomahawks have ever been found with that original handle and rawhide lacing.

Other additions to the anthropology exhibits include a Malay kris, with its wicked edges curved in wave like undulations; a beautiful ebony carving of a human figure on a water buffalo; and an ifal wood carving of a human figure. Both of the carvings came from China where they were carved by the Malay natives.

There is also a Moro head knife from the Philippine Islands. The chief who gave the knife to an American officer no longer had any use for it because the United States refused to let him chop off any more heads with it.

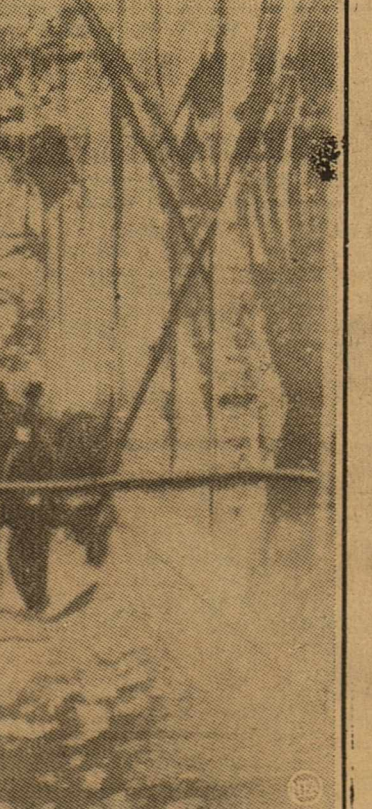

Continued from Page One others No. 1-B Hughes is drilling at 2,082 in lime. Its last increase was from 2,070 to 2,081.

Recommencing Casing After drilling ahead to 4,212, water broke in around 7-inch casing set at 4,110 in Grisham & Hunter No. 1 R. B. Cowden, northwest Ector wildcat, and operators will lower the pipe to recommence it. The casing was cemented originally with only 10 sacks. The No. 1 Cowden is located in section 10, block 45, township 2 north, T. 2 P. survey.

Grisham & Hunter: No. 2 R. B. Cowden in section 8 a mile and a half to the west is drilling lime at 4,104. It set 7-inch casing at 4,150.

The deepest salt mine in the world is said to be near Berlin. It is 4157 feet deep.

Wreckage in Wake of Revolt Wrath

The debris littered street and timbers jutting from the damaged buildings of the Montana army barracks in Madrid, tell of the furious fighting waged in the Spanish capital. Seen gathered around the buildings in this NEA photograph are volunteers prepared to enlist in defense of the government.

'Macbeth' Will Open At Centennial Thurs.

DALLAS, Aug. 13.—The New York WPA federal theater's production of Shakespeare's immortal tragedy Macbeth with an all-negro cast of 150, will open in the amphitheater on the Texas centennial grounds August 13 and run through August 23. Macbeth comes direct from a sensational fifteen week run in New York where it thrilled and amazed more than 100,000 blue New York theatergoers.

The all-negro version of the bard of Stratford-on-Avon played at the Lafayette theater in Harlem and the Adelphi on Broadway. The company has been literally compelled to tour the country because of the flood of requests.

Ticket scalpers sold tickets for the Broadway show as high as \$50 a pair. The show has been playing to standing room only for weeks. The prices at the centennial will be forty and sixty-five cents.

The play is an authentic presentation. For justifiable reasons the locale of the play is not in drab Scotland but in the colorful island of Haiti during the Napoleonic regime. Negro actors lend themselves easily to the elegance of colors and the change in locale improves the brilliance of the spectacle. The army of 150 actors wear splendid military costumes of the Napoleonic regime play against three major settings—a tropical jungle, a majestic castle and a seaboard town. Brilliant lighting effects vividly bring out the magnificent and terrifying beauty of the scenes.

Voodooism furnishes one of the most distinctive features of Macbeth. There were three witches in the original script but witches are alien to Haitian tradition so voodoo ceremonies are substituted. The cast includes an authentic voodoo doctor, Abdul Assen. Abdul

has devoted a lifetime to the study of voodooism in Africa. He goes into a trance nightly in order to cast the spell on Macbeth—a genuine trance which can only be broken by certain Arabic chants echoed by his fellow practitioners, Abdul says. Abdul will have an opportunity to cast his spell on audiences over a territory of 4,000 miles on the present summer tour the Harlem company is making.

Mrs. Nellie Smith left Wednesday for Hobbs, N. M. She has been employed at King's Jewelry for several weeks.

MANY NEVER SUSPECT CAUSE OF BACKACHES

This Old Treatment Often Brings Happy Relief Of Pain Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys.

The kidneys are one of Nature's chief ways of taking the acids and waste out of the blood. If they don't pass 3 pints a day and so get rid of more than 3 pounds of waste matter, your 15 miles of kidney tubes may need flushing.

If you have trouble with frequent bladder passages with scanty amount which often smart and burn, the 15 miles of kidney tubes may need flushing out. This danger signal may be the beginning of nagging backache, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait for serious trouble. Ask your druggist for Doan's Pills—which have been used successfully for over 40 years by millions of people. They give happy relief and will help flush out the 15 miles of kidney tubes. Get Doan's Pills.

BUDGET HEARING

There will be a meeting of the County Commissioners' Court on the 28th day of August 1936. This meeting is called for the purpose of adopting a budget for the ensuing year. Any taxpayer of the district may be present and participate in the hearing. It will be held in the County Commissioners' Court room, at the Court House. (135-1)

YOU NEVER SAW SO MUCH TIRE FOR YOUR MONEY! Buy THE NEW Firestone STANDARD

FIRST GRADE QUALITY—The new Firestone Standard Tire is built of first grade materials by skilled workmen, in the world's most efficient factories.

GUM-DIPPED CORD BODY—Every cotton fibre in every cord in every ply is soaked in liquid rubber, preventing internal friction and heat, which provides greater strength and blowout protection.

TWO EXTRA LAYERS OF GUM-DIPPED CORDS UNDER THE TREAD—This patented Firestone feature cushions road shocks, protects against punctures and gives longer life.

LONGER NON-SKID MILEAGE—The non-skid tread is wider, flatter, with more and tougher rubber on the road, giving longer wear and thousands of extra miles.

LOW PRICES—Volume production makes these low prices possible. THE FIRESTONE NAME AND GUARANTEE—Every Firestone Standard Tire bears the Firestone name, your guarantee of greater safety, dependability and economy.

FOR TRUCKS AND BUSES

FIRST GRADE MATERIALS AND EXPERT WORKMANSHIP—The Firestone Standard Truck Tire gives long non-skid mileage—blowout protection—dependable service.

GUM-DIPPED CORD BODY—Gum-Dipping prevents internal friction and heat, giving extra strength and blowout protection.

TWO EXTRA LAYERS OF GUM-DIPPED CORDS UNDER THE TREAD—Prevents tread separation. Specially compounded rubber in two outer plies from bead to bead rivets sidewalls securely to cord body preventing ply separation.

TWIN BEADS WITH CORD REINFORCE—Twin beads give tire firm seat on rim. The beads are tied into the cord body by the special Firestone method of cord reinforcement, making the tire one unit of greater strength.

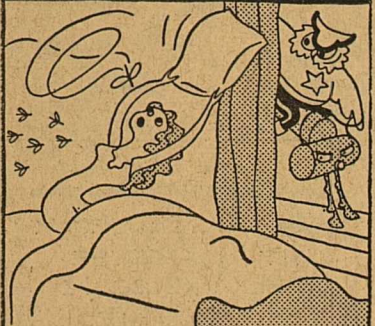

FIRESTONE NAME AND GUARANTEE—Assures greater safety, dependability and economy.
