a sense of digestive well-being.

"THE BEST MEAL I ever ate would be a disappointment if I couldn't enjoy Camels," says William H.

WHAT WILL YOU HAVE? Reading in a circle, there's a piping-hot Plum Pudding

... luscious Pumpkin Pie... Mince Pie à la mode...and layer cake with inch-deep

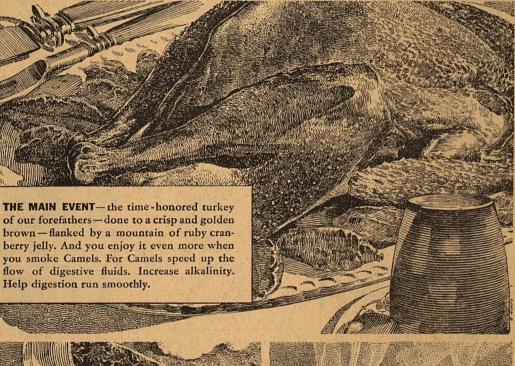

icing. Thanksgiving dinner just wouldn't be complete without one of the tradi-

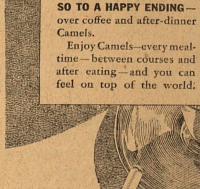

tional desserts shown here to add their

characteristic touch of holiday cheer.

AMELS set you right! They help to ease tension. And to increase the flow of digestive fluids—alkaline digestive fluids -so important to your digestive well-being. You enjoy food more and have a feeling of greater ease after eating when you smoke Camels between courses and after meals.

Enjoy Camels all you wish—all through the day. Camels don't get on the nerves. And when you're tired, get a "lift" with a Camel.

WHY PAVE STREETS WITH CONCRETE?

here's why -

Every street demands a gritty, non-skid surface for the protection of motorists and pedestrians.

At night you need a pavement with high visi-

Safety also calls for a pavement that is free from chuck holes, ruts and bumps . . . and stays that way with minimum maintenance.

You want a pavement that drains quickly: that is easily cleaned and stays clean . . . no

depressions to catch dirt. You want a pavement that makes the whole neigh-

borhood look modern, prosperous, attractive. Concrete ... and only concrete ... completely meets all of these specifications.
