

Humble And Shell Raise Howard Crude Price

It is beginning to look like the old West Texas oil country is due for a come-back.

Big Spring is prepared in every way to care for any number of oil people and let us hope that any marked revival of activity in the Permian basin area will be accompanied by a systematic campaign by local forces to have the companies locate their offices here.

The Petroleum building, the fine hotels, the many other modern office buildings and the city's convenient location with reference to the areas expected to see most of the activity when it does come should give us a mighty good case before oil company executives.

With Howard and Glascock county crude going up 15 cents to 50 cents per barrel, after months at ten, 25 and 35 cents, we have some reason to feel things are going to get better.

We hear much about surpluses of various commodities. The following little piece, written by Stanley Resor, president of J. Walter Thompson Company, who suggests "for a change let's consider the deficiencies:

"It will cost a billion and a quarter to wire the more than eight million homes in the United States which are now without electricity. Just the wiring inside these homes—not the additional central or domestic power plants, distributing lines, and electrical fixtures and appliances that will be required.

"Nearly nine million homes have no bathrooms. It will cost close to two billion dollars to supply them in the simplest form—not counting the additional water mains, sewers or septic tanks.

"It will cost more than seven billion dollars to put central heating into the nearly fifteen million homes which have no furnaces.

"Sixteen million homes are without telephones.

"More than five million farms are without tractor, without electricity, without water mains, sewers or septic tanks.

"We hear much talk these days of surpluses. Glutted markets. 'Point of saturation.'

"Surpluses? Let us concern ourselves with the problem of deficiencies.

"What we think of as the commonest things of life are not yet half made or sold. When we get the wheels turning our work is cut out for years to come."

There is food for much thought there. Especially when you live in a section whose natural resources are so slightly developed, as are those of West Texas. Our population has grown manifold within a decade but our country remains a field rich with promise of future development.

Offentimes, when in our weakness or shortsightedness, we begin to feel that this town or county or section of the state has seen its best days we should look around at other towns and sections of the nation and, when you compare them, you always come to the conclusion that this is the best place after all and that we'll all be getting along pretty well next year, and the next too.

WHO'S NEW In Congress

Gerald J. Boileau: He Is Representative At 31

WAUSAU, Wis. (AP)—The new representative from Wisconsin's eighth district finds it difficult to make people believe his correct age.

He's only 31, but Gerald J. Boileau appears even younger than that. Twice his youthfulness almost proved a stumbling block, but in both cases Boileau didn't let it stop him.

Boileau is Wisconsin's youngest congressman, and one of the youngest in the 72nd congress. He is a staunch follower of LaFollette principles, and is a member of the Wisconsin progressive faction that served notice it would not support the regular republicans in the organization of the house unless its demands for unemployment and farm relief received consideration.

"Jerry," they said, "you look young. You are young enough, but wait."

Big Spring Club Leads State In Scoring, Only Team Not Scored On; 10 Undefeated

Of the 85 class A teams which started out in the chase for the school boy championship of Texas a month ago only ten remain undefeated and defeated after the first month's play.

Nine of the sixteen districts have their leaders with unimpaired records, a fact which promises some real entertainment when the bi-district play gets under way.

According to the Dallas News, "The most impressive team in the state is Big Spring which has rolled up 388 points in eight encounters and has not had its goal line crossed."

Corsicans rated as such a powerful contender for the state title is third in the list of ten schools and has had more points scored against it by the opposition than any of the other teams.

Records of the undefeated teams follow:

Team	1	2	3	4
Big Spring	8	0	388	0
Lubbock	8	0	353	12
Corsicana	7	0	352	26
Quanah	7	0	343	18
Ablene	7	0	321	19
John Reagan	6	0	204	19
San Angelo	6	0	196	6
Tickenridge	7	0	186	6
Marshall	7	0	156	8
Oak Cliff	5	0	136	12

Column 1, won; column 2, lost; column 3, points; column 4, opponents.

Going into the Armistice Day game with the Mustangs as the only team in the state with its goal line unbreached will give the Steers the edge on the Mustangs as far as paper strength is concerned. The Steers have a powerful team and one of the best high school games to be seen anywhere in the state during the present season will be staged when the two eleven's tangle on November 11.

75 Colorado Boys, Girls Attend Wm. Thornton's Plays

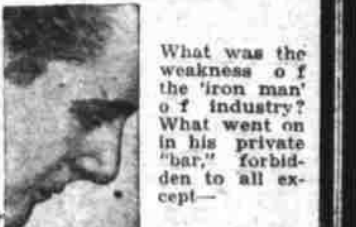

The two Shakespeare plays presented by William Thornton of the Shakespeare Guild of America at the high school auditorium Monday drew fair-sized crowds, according to the reports of the faculty, and were presented with the all finished grace and polish for which this actor is noted.

In the afternoon "The Merchant of Venice" drew many out of town guests from Midland, Stanton, and the nearby communities and school, twenty-five students from the Colorado schools came in a body. Many adults and high-school children enjoyed "The Taming of the Shrew" which was given at the evening performance. This is one of the most popular comedies and the cast supported Mr. Thornton very ably.

Prin. Geo. Gentry, said that although the crowds were not as large as those of last year, the school took in sufficient funds to cover the expenses, and that the interest in the plays indicated that their popularity was both sound and permanent.

SUCKER BAIT—CHEAP PRICES

So called cheap prices have produced such a demoralized business condition that the best minds of the nation, so far, have been stumped to cope with it.

Cheap prices beget unemployment. Unemployment is depression. Rising prices absorb the unemployed and make for prosperity.

Prices are now on the upgrade—the first vigorous step back to security. Therefore, look the fellow over, large or small, who through ignorance or design, would lend his influence, through cheap prices, to further demoralize conditions and impede the progress of rising prices with their promise of ultimate prosperity.

COSDEN LIQUID GAS is the only gasoline that can do big things for you and Big Spring. It is not cheap in performance or price, but is worthy of your support and influence and will assuredly prove the most economical in the long run.

—The United States Daily, Sept. 23, 1931.

Is This the Answer?
 In a memorandum, signed by Wm. H. Stayton, secretary of the Association Against the Prohibition Amendment, subpoenaed by the United States Senate Lobby Investigation Committee, and reported in the records of the Hearings, pages 4185-7, appears the following as a suggestion by Mr. Stayton of one appeal to be included in a letter asking support of big income tax payers of the anti-prohibition fight.

Irene duPont is one of the big donors listed above:
 "Irene duPont's statement that one of his companies would save \$10,000,000 in corporation tax if we should have, say, the British tax on beer."

A speaker for the women organization in favor of the return of the legal liquor traffic charged recently that the National W.C.T.U. can no longer point to prohibition as having an effect on American prosperity. The depression, this wet woman claimed, takes the prosperity argument away from the drys. Simultaneously, the new wet leader, Augustus A. Busch, prominent St. Louis brewer, put out his open letter begging America to restore beer and thereby restore prosperity.

This argument is made for the unthinking. No American industrial leader or financier, be he ever so wet, argues for a return of liquor as a constructive economic favor when he is talking to financiers or making serious statements for publication in financial newspapers.

We'd rather have a Chesterfield and now we'll tell you why...

Three mighty good reasons!

"MILDER"—smoke as many as you like! That's what every Chesterfield smoker knows...and it's not hard to prove, either. Just try this blend of milder, riper tobaccos!

"TASTE BETTER"—you'll like as many as you smoke! That's what more smokers are learning every day. Not over-sweetened, but just sweet enough for constant enjoyment. The mild, rich flavor of the finest Turkish and Domestic tobaccos.

"THEY SATISFY"—in every way! The tobacco, the paper, the package...everything about Chesterfield is the best that money can buy or that science knows about!

GOOD... they've got to be good!
