IT'S FOR OUR OWN GOOD

There is nothing much more pleasant than that warm glow of satisfied virtue that comes when you feel that you are doing a highly righteous and praiseworthy act which you could very easily have avoided if you hadn't been so upright.

Such a feeling, it is apparent, is stealing over the American nation today as President Hoover and Premier MacDonald prepare to hold their conference on the reduction of naval armaments.

The average American seems to be convinced that this conference is being held simply because this nation is so high-minded, idealistic and self-sacrificing that it can't help giving its own selfish interests a kick in the pants for the sake of the rest of the world.

It's comforting to be able to feel that way. It's nice to be able to say, "Look what we did in 1921-voluntarily cut our naval building program when there was nobody on earth that could have matched us if we'd gone ahead with it. Now we're doing it again-cutting down our armaments when it's the other fellow that needs it more than we do."

Yes, that's very soothing. It would be even more soothing if it were true.

America's action at the 1921 conference was very fine, indeed; but did you know that if that conference had not been held this country would very probably have been involved in a war with Japan in another 12 months or so? That, at any rate, is the opinion of competent diplomats. Slashing our naval program then was nothing more than a very practical means of averting trouble.

The situation is a good deal the same today. War isn't as imminent new as it was then, of course; but there's ports range and cattle in good trouble in the air, and the Hoover-MacDonald conference is a level-headed means of getting it out of the way.

Milton Bronner, European correspondent for this paper, recently presented an able series of articles analyz- ports conditions good in his part of ing the European situation. He presented some quite ob- the country. vious and unpleasant facts.

Bronner showed that Uncle Sam, quite literally, hasn't a real friend overseas. He showed that there is an extremely ominous mixture of suspicion, jealousy and lownright hatred brewing against us on the other side of the Atlantic. In every capital the United States is viewed

with marked distrust. inat being the case, Bronner demonstrates clearly that a naval agreement with England is nothing more or less than ordinary, unexalted common sense on our part

In other words, it is highly important to us, as well as to the British, that President Hoover and Premier Mac-Donald reach an understanding. In agreeing to cut down our fleet we shall not be making a fine, self-sacrificing ges-

ture; we shall simply be serving our own best interests. It would be a good thing if we could recognize that fact. Our pose of idealistic altruism doesn't quite square with the facts.

Hair Rats Are Gone! AN ANCIENT PREJUDICE HAS BEEN REMOVED

Modern woman, freed of the restraint of long tresses, realizes the comfort and sanitation of the bobbed head. The shears in the hands of AMERICAN INTELLIGENCE have severed the bonds of another archaic dogma.

"toasting did it"

Gone is that ancient prejudice against cigarettes—Progress has been made. We removed the prejudice against cigarettes when we removed harmful corrosive ACRIDS (pungent irritants) from the tobaccos.

TEARS ago, when cigarettes were made without the aid of L modern science, there originated that ancient prejudice against all cigarettes. That criticism is no longer justified. LUCKY STRIKE, the finest cigarette you ever smoked, made of the choicest tobacco, properly aged and skillfully blended-"It's Toasted."

"TOASTING," the most modern step in cigarette manufacture, removes from LUCKY STRIKE harmful irritants which are present in cigarettes manufactured in the old-fashioned way.

Everyone knows that heat purifies, and so "TOASTING"-LUCKY STRIKE'S extra secret process-removes harmful corrosive ACRIDS (pungent irritants) from LUCKIES which in the old-fashioned manufacture of cigarettes cause throat irritation and coughing. Thus "TOASTING" has destroyed that ancient prejudice against cigarette smoking by men and by women.

It's toasted

"It's Toasted"—the phrase that describes the extra "toasting" process applied in the manufacture of Lucky Strike Cigarettes. The finest tobaccos—the Cream of the Crop—are scientifically subjected to penetrating heat at minimum, 260°-maximum, 300°, Fahrenheit. The exact, expert regulation of such high temperatures removes impurities. More than a slogan, "It's Toasted" is recognized by millions as the most modern step in cigarette manufacture.
