### Post and Gatty Realize Sleep After Harrowing Flight

### TOLL OF MOST FATAL HEAT WAVE IN YEARS PASSES 1,500

#### MILLIONS IN DAMAGE TO CROPS

Hundreds Suffering In Hospitals of The East

CHICAGO, July 3, (UP)—A toll of 1,500 deaths was revealed today in a survey, as the most terrific heat wave in recent years tightened its grip on the eastern section of the country.

A survey showed that crops had been damaged to the extent of \$10,000,000 and hundreds of persons were in hospitals from prostration.

More than 700 have died of prostration during the past eight days. An equal number of deaths has been caused from drowning and diseases aggravated by heat.

**Ideal Here**

Temperature in Midland was ideal for the holiday program. The highest point in the mercury column today was 94—just good race weather.

Midland people slept comfortably Thursday night, when the thermometer registered as low as 65.

#### GENERAL MEET SEEN FOR DEBT DISCUSSIONS

PARIS, July 3, (UP)—Heightened possibility that Franco-American conversations may lead to a general conference on the war debts and reparations problems was seen today.

Conversations, continuing today after another delay, may be enlarged to include Great Britain, Italy, Germany, Belgium and Greece, in the event that the present Paris parley is not successful.

#### Howe and Gates To Water Crowds

Plenty of iced water will be available for everybody at the barbecue tomorrow. John P. Howe and Abe J. Gates have a water set-up that guarantees to wet everybody's whistle. Howe has devised a faucet system to assist in sanitation. Gates was at work Friday handling the fencing system for pedestrian passageways at the pits.

#### McCall to Conduct Daily Services

Daily services at the Church of Christ will start July 17, continuing through July 29, under the direction of J. A. McCall, minister of the Polytechnic Church of Christ, Fort Worth.

McCall has spoken before the Midland church before.

**MRS. KING IN HOSPITAL**

Mrs. J. M. King was admitted to the Mid-West clinic-hospital this morning for treatment. She was doing well this afternoon.

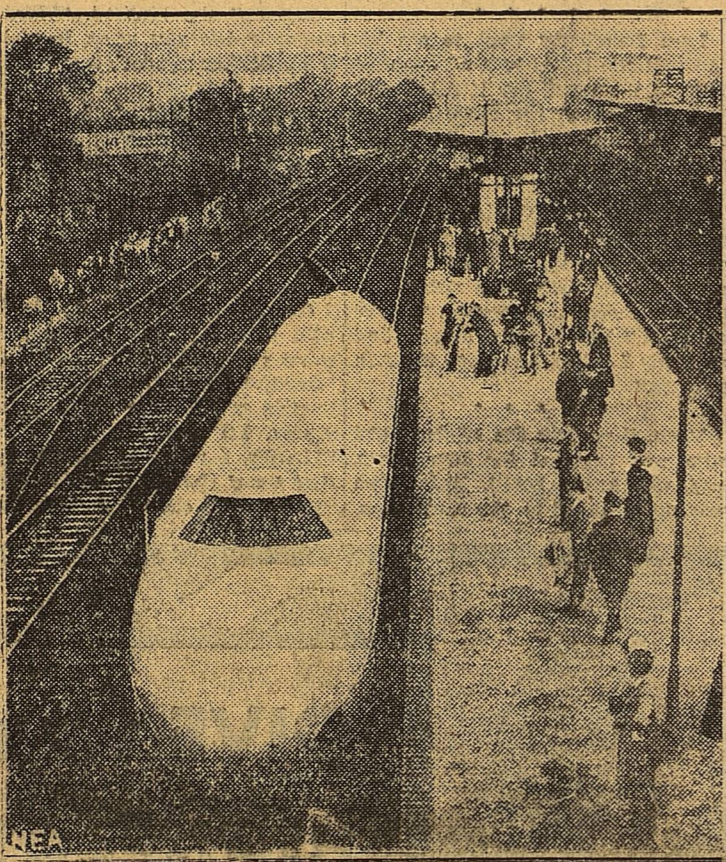

**EXTRA PAPER**

A racing extra will be run off the press a few minutes after the Cowboy park events are over this afternoon.

Look for it on the newsstands and on the streets.

The extra is being published for the convenience of those who otherwise would not get to read racing results until the Sunday issue.

Swift "Rail Zeppelin" and Its Inventor

With a long-drawn wall of its siren, the strange-looking "rail Zeppelin" pictured at top coasted to a stop at a Berlin railroad station while German officials pushed forward to congratulate its inventor, Franz Krukenberg, on the inauguration of a "new era in railway transportation." The scientist, pictured below with his wife, announced that the propeller-driven car, stream-lined like a bullet, had covered the 173 miles between Hamburg and Berlin at an average speed of 106.31 miles an hour. At one time it attained 145.75 miles an hour—a world's record for rail travel.

#### Hopes of Impeaching A. Mellon Outlined Today

HOUSTON, July 3, (UP)—A plan through which hopes are held to bring impeachment on charges against Secretary of Treasury Andrew Mellon were outlined today by Congressman Wright Patman, Texas, who is here attending the Veterans of Foreign Wars encampment.

Patman said that positive proof of Mellon's disqualifications would be presented to the house of representatives.

"I don't see how members can vote against impeachment without violating the oath of office," he said.

He scored Mellon's domination of large corporations, saying that by holding office he is violating the United States law.

#### Musicians Need Big Reed Section

The composite band that will play for the Fourth of July will meet for practice this evening at 8 o'clock in the county court room, according to Wallace Wimberly, director.

About 25 musicians gathered and offered their services Thursday evening, Wimberly said. The ensemble is strong on trombone, clarinet, drum, trumpet and bass sections, but is weak in the reeds, altos and baritone sections, he said.

#### Several Stores to Close on Monday

Several Midland business establishments have decided to close doors Monday, because proprietors "feel that sales people who will be deprived of the legal holiday on the Fourth deserve a day's rest during the hot weather."

Until noon, the following had signed the petition circulated: A. Wadley company, Wilson-Adams company, Kaydelle shop, United Dry Goods store, Everybody's, City Dry Goods company and the Golden Rule store.

Stores will be open Saturday as usual, but the majority of all business houses will close Monday.

Banks will be closed Saturday due to its being a National holiday, but banks will be open Monday.

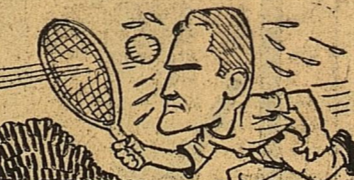

Midland people are urged to do their buying Saturday, particularly in clothing or dry goods lines, as all of these stores will be closed Monday. Groceries are generally planning to remain open Monday.

**FREE BALLOONS**  
Kids will get 1000 balloons free tomorrow at the Trades day program, Magnolia Petroleum Co. through the Midland agent, H. B. Dunagan will present 1000 of the inflated rubber bags. The first thousand kids on the grounds will get them.

#### HERE on the 4th

Dick Harrison of San Angelo, Frank Rose of Lamesa, and Midland's Ellis Cowden are favorites in medal play at country club July Fourth and Fifth. C. L. Jackson of Midland and Satterwhite of Texon are expected to make it hard for the leaders. Reports say an Alpine caddy, an unknown until the other day when he shot a qualifying 36 on the first round of the Pecos Invitational tourney, will be here to "put the pressure" on those who start holing out on the last few holes. Midland men are finishing their qualifying today. Visitors qualify Saturday. Finals will be played Sunday.

Tennis players from Fort Worth to the east and Arizona to the west will be wielding rackets on six Midland courts. Cups go to winners. Preliminaries will be played Saturday, finals Sunday. Both men and women are entered. Several varsity conference and high school sectional champs are here for the matches.

All sorts of baseball games will be played, including a "decrepit game" between old ones and young ones. Two diamonds will be utilized. Bizzell park and Busher-Colts diamond will be utilized. Besides the baseball games will be a playground ball affair at 8:15 Saturday evening, at Pagoda diamond.

One of the best race cards ever arranged for Midland fans began this afternoon at 3 o'clock. Races will continue over the Fourth, and some of the finest horses ever stabled here are in the pink for them. Novelties on the program will be well worth watching, especially the jollybean handicap. This was to be run today, and will be run again Saturday.

At Pagoda pool, at 7:30 on the evening of the Fourth, a swimming carnival will be staged. Fresh water has been run into the big reservoir and fast swimmers are entered. Still room for more entries, Alvon Patterson announced this morning.

#### TO SLIP AWAY ON SEA TRIP

Banquet Given Them; Lindy and Other Flyers There

NEW YORK, July 3, (UP). The 48 hours of sleep Wiley Post and Harold Gatty have promised themselves so long appeared near today.

Only one official appointment was scheduled before leaving for Stamford, Conn., to board William H. Todd's yacht for a three-day cruise along Long Island sound.

Today the flyers went with Mayor Jimmy Walker to Roosevelt field for an inspection of the Winnie Mae. The plane was then placed on exhibition to the crowds.

The flyers were guests last night at a banquet attended by Col. Chas. Lindbergh, Chamberlain and other famous aviators.

**Biggest Trial**  
(By Associated Press)

NEW YORK, July 3.—Wiley Post and Harold Gatty covered perhaps the most nerve-wracking stretch of their record-smashing trip around the world—the six miles between the Battery and 14th Street.

Only the "Winnie Mae" herself, sturdy maid of the world skies, had a chance to take the day quietly. She stood, like a patient charger, in her Roosevelt field hangar, into which she had been rolled when the world-rounding flight ended after eight days, 15 hours and 51 minutes.

The day began for Harold Gatty, navigator of the flight, when his wife, after a plane-train trip from Glendale, Calif., crept into his room at his hotel, and awakened him with a kiss shortly after 9 o'clock. Mr. and Mrs. Gatty and Mr. and Mrs. Post, together with Florence C. Hall, millionaire oil man who backed the flight, breakfasted lightly and then the procession of welcome began.

**Great Enthusiasm**  
There was no privacy for the filers or their wives. New York's enthusiasm over their feat was too great for that.

At city hall, Mayor Walker extended the hand of official greeting, saying they had "written another page into the history of science, a page which would make for greater progress, greater happiness and greater thrill to civilization itself."

He presented each with medals significant of the esteem in which the city held them.

Post and Gatty responded briefly, saying merely they "appreciated the reception given for us by New York."

**Reg About Ready**

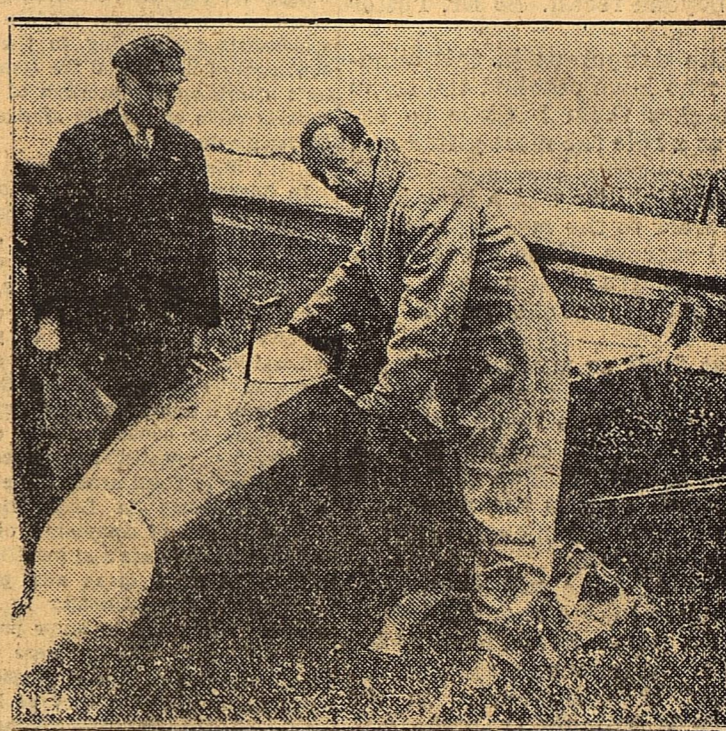

SEATTLE, July 3, (UP)—Weather permitting Reg L. Robbins and H. S. Jones, Fort Worth flyers, plan to take off tomorrow on a non-stop refueling flight to Tokyo in a single motored second-hand Lockheed plane. They will carry no radio.

The flyers plan to refuel over Nome and Fairbanks, Alaska, from a Ford Trimotor piloted by Jimmy Mattern.

#### Money Saved by Truckmen Here

Probably the single most expensive item on the July 4 barbecue was done with no expense, through the generosity of men with trucks. All beves were hauled in donated trucks, with men furnished to operate them. The Rosebud Transfer Co., owned by J. B. Ford, Joe Roberts with his Midland Transfer Co. trucks, J. O. Nobles' equipment operated by John Jr. Nobles and Earl Ray, L. J. Stephens, B. C. Stephens and Perry Craddock furnished trucks. F. W. Stephenson was among those aided with the work.

Glider Pilot Who Conquered Channel

Twenty-two years after Louis Bleriot, aviation pioneer, made the first flight across the English Channel in an airplane, Robert Kronfield, Austrian glider pilot, successfully completed a round trip of the same course in a motorless craft. Here you see him boarding the glider near Calais, France, at the beginning of the feat that won him a \$5000 prize.

#### Mexicans May Sue State For Killing of Two Boys

SAN ANTONIO, July 3, (UP)—Attorney M. C. Gonzales of the Mexican consulate here today said that the families of Emilio Cortes Rubio and Manuel Garcia Gomez were considering filing \$500,000 damage suits against the state of Oklahoma and former Deputy Sheriff William E. Guess.

Guess was acquitted a week ago on charges of murdering two students, one of whom was a nephew of the Mexican president.

#### Parking Plans for Barbecue Completed

Parking spaces for cars were completed Thursday by the J. J. Willis Truck and Tractor Co. This was the third liberal help given by the company to make the July 4 celebration a success. The work was in charge of Keldo Adams, field man for Willis and T. L. Holman.

Boy scouts will have charge of parking. All parking between Virgil C. Ray's house and the barbecue pits and on each side of the pits to the roads on each side must be done in orderly fashion, according to orders of the scouts, officials say.

#### July Fourth Program

- 9 o'clock—Free admission to championship tennis tournament, Wall street courts.
- 9 o'clock—Free admission to golf tournament, country club.
- 10:30—Free band concert, corner Texas and Main.
- Noon—Free barbecue, just off West Kansas near old Holmsley place
- 2 o'clock—Trades day program, corner Main and Illinois
- 3 o'clock—Horse racing at Cowboy park. 50 cents admission
- 3 o'clock—Busher-Colts-Oiler baseball game. Diamond just east of Rainwater apartments
- 5:30—Midland-Colorado baseball game at Bizzell park, two miles south of town
- 7:30—Swimming carnival at Pagoda pool
- 8:15—Free all-star playground ball exhibition at Pagoda diamond (lighted)
- 9 o'clock—Free street dance, near Hotel Scharbauer
- 9:30—Dance at Hotel Scharbauer ball room
- Free tickets for out-of-town women, and children 12 years old and under, may be had at the chamber of commerce for shows at the Ritz theatre in the afternoon.

Several events last through the Fourth and Fifth, including the American legion convention, horse races, baseball, and golf and tennis tournaments.

#### 5,000 TO COME TO CITY

Program Started in Races at Puncher Park Today

Midland people who expect to keep the hours sandwiched with these and those events here on the Fourth of July should make out a schedule of hours from the program on this page, it was advised today.

Midland has so many events listed that it would be impossible to see everything, certainly to attend every function.

There will be everything on schedule from the most ambitious barbecue of the city's history, to golf and tennis tournaments, American Legion convention, band concerts, Trades day program, horse races, baseball, playground ball, swimming carnival, street dance, hotel dance, free motion pictures for out-of-town women and children.

Legionnaires were pouring in today by the dozens, and over a wide area. The convention lasts through July 4 and 5, and headquarters in Hotel Scharbauer.

More than 5,000 out of town people are expected for the holiday program here, it was announced this morning after a check made by the chamber of commerce committee in charge.

**Meat Is Hauled**

J. L. Stephens, truck operator, is giving further assistance to the July 4 barbecue by hauling the meat tonight from the Southern Ice & Utilities plant to the barbecue pit.

The Texas Electric Service Co. had given valuable assistance by the lighting arrangement at the grounds. The Texas Electric also assisted by lending digging tools.

Red Knight, Gulf agent, donated 50 gallons of kerosene to light the fire in the 300 feet pit.

Virgil C. Ray's crew was all set with its pitchforks at a late-hour Friday and the meat cutting crew had their knives sharp and their dishes burnished.

**Says "Snooter Nose"**

"Midland will have the greatest July 4 celebration ever held in West Texas."

These are the words of James E. Kelly, widely known as "Snooter Nose" in his column in the Stanston Reporter. Kelly, a big friend of Midland, says he will be here with plenty of appetite. He has given generous space to aiding Midland in the exploitation of the July 4 celebration.

**FLAPPER FANNY SAYS**

Hard-time travelers are gripping packs instead of packing grips.

ON TAKING HUSBANDS

The reason that a great many men and women aren't marrying isn't just because the men have decided that they can't afford wives. It is because a great many women have decided that they can't afford husbands.

At least, this is the opinion expressed in a recent interview in Every Week Magazine by Dr. Charles Francis Potter, founder of the First Humanist Society in New York City. Dr. Potter has used New York City, in whose heart he has preached for many years, as a practical observatory.

Women who have been economically independent dislike asking a man for money to buy a powder puff or get a permanent wave. They have no special yearning to be subservient to a man's wishes, either. The day of the liege-lord, and sweet Alice who trembled with fear when Ben Bolt frowned, is as far gone as smelling salts and other relics of the dear, dead days beyond recall. So Dr. Potter has found it.

There is something a little dangerous in this situation. Those girls and women who have reached the stage of economic success which makes them hesitate to exchange a desk for a stove are as a rule the most gifted and capable of their sex.

If they would apply the same ability which they have used to achieve a successful career to the making of their homes, they would have equal success. Even greater, for a woman is more at home by a hearth than a typewriter, in spite of the so-called emancipation that she likes to talk about.

It isn't women that are at fault so much as it is the institution of marriage. People forget sometimes that there are two personalities involved. The twin shall become one flesh, the ministers says, but no one has yet discovered two minds with but a single thought. And it is the woman who errs just as often as it is the man. She forgets to live up to her part of the companionship, home-making bargain.

It is the knowledge, though, that she will be tempted to do this that makes her afraid to take a chance.

Still, it would seem that Dr. Potter needn't worry too seriously as long as there are summer moons, pink organ-dies, star-plashed beaches and crooning tenors in the world. The old biological urge is stronger than the economic.

And enough of the women who can't afford husbands probably decide that they don't care if they can or they can't—they will take them anyway—to keep the world peopled at least until the third or fourth generation.

CUTTING THE COST OF WHEAT

The necessity for reducing production costs has been learned by American wheat farmers, and a large part of the 1931 wheat crop should be marketed at a profit despite current low market quotations, says a bulletin issued by the Union Trust Company of Cleveland.

Group and corporation farm schemes have been developed, and in some cases have been able to raise wheat at a cost of 26 cents a bushel. These systems are better suited for western wheat fields than for those in the east; the eastern wheat grower, consequently, finds little light in his sky.

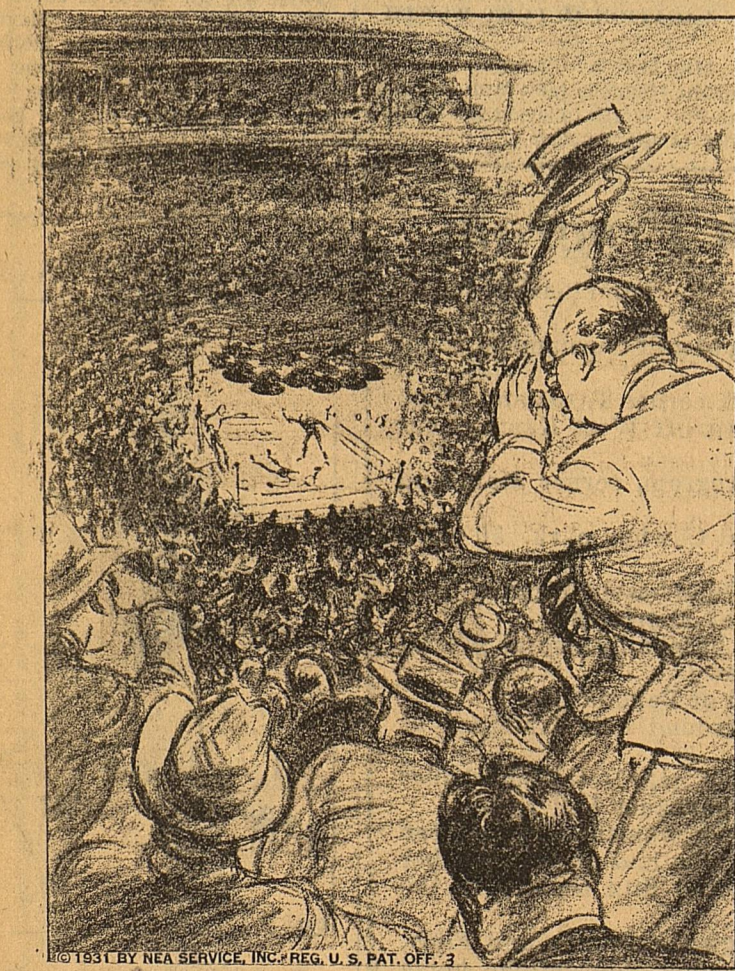

If mechanization and large-scale production can, over wide areas, reduce the cost of raising wheat to the figure quoted by the bank, there is little doubt that America can hold its own as one of the world's wheat sources. It will be interesting to see if developments of the next decade follow this path.

PIPE LINES AND RAILROADS

Among the things that have been worrying railroad executives in recent years is the growing use of the long-distance pipe line.

What this means in the way of competition to the railroads can be seen from the news that a Pennsylvania oil company recently completed a 700-mile pipe line from

Side Glances . . . . . by Clark

"Get up, you bum—that wasn't a hard punch."

Daily Washington Letter

By Rodney Dutcher

Municipal Doctor System, Giving People Free Medical Treatment, Proves Success in Canadian Towns— Idea Might Work in Many Rural Communities in the United States Where Service is Poor and Physician's Cost High.

EDITOR'S NOTE: This is the second of two stories concerning some of the more interesting discoveries and conclusions of the Committee on the Costs of Medical Care which is making a series of studies of the economic aspects of illness and medical service.

BY RODNEY DUTCHER NEA Service Writer

WASHINGTON.—Some people can have a doctor's care without any doctor bills.

Not very many, it is true, but the Committee on the Costs of Medical Care located some community experiments of the sort which it considered worthy of exhaustive study.

Thirty-one communities in two Canadian provinces have employed community physicians to treat their citizens and one large American shoe company for more than 10 years has provided free medical care for its 15,000 employees and their dependents with a medical department employing 100 persons. The reports of the committee's experts indicate that both experiments have been carried out with more than a satisfactory degree of success. The reports are especially interesting because of the attention modern day sociologists are paying to the inequalities of illness and the committee's attack on the problem of reasonable costs of medical service for its recipients.

Might Try It Here

In Saskatchewan and Manitoba—mostly in the former province—31 rural communities now have community doctors. These rural communities resemble our counties, being about 18 miles square. The community doctor system is 10 years old and it may be applicable to some communities in the United States in view of a recognized tendency for physicians to concentrate in cities because of unsatisfactory incomes obtainable in rural areas. The system has grown in Saskatchewan partly because of complaints of excessive medical costs and insufficient service in rural areas and partly because of the difficulty in persuading physicians to enter private practice where returns were very low. Sometimes local physicians have demanded that they be hired by the community if the community wanted them to stay.

Seven additional communities voted to hire a municipal doctor last December and not one of the 31 which have had a municipal doctor has abandoned the plan.

Physicians are eager for the positions and it is said that from 30 to 50 apply whenever one is open.

Gets \$4,000 Per Year

The average community served has a population of 1800 and the median salary of the Saskatchewan municipal doctor is about \$4000. He may or may not be permitted additional income from certain fees. He serves not only as a general practitioner to the rural municipality but also as the public health officer. In several communities besides the 31 the local physician is subsidized to the extent of \$1500 or less in return for public health services and his care of indigent persons.

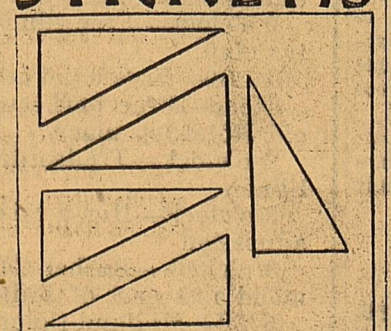

Usually the municipal physician serves all residents without charge, although sometimes nominal fees are set for certain specified services. Office calls are invariably free of charge. Most surgery is exempted from the 'free care' system, although about half of the municipal doctors perform tonsillectomies free, and there is usually a charge for drugs administered.

Make Over 300 Visits

Each doctor has from 1000 to 1500 office calls annually and makes from 300 to 500 visits to the homes of his patients. The committee reports that the average family expense for medical service of all kinds—including taxes for the physician's salary and any extra fees paid, drugs, nursing and so on—is \$20 a year.

Most municipal doctors say they are doing more work now than they would be if they were in private practice but that their income is greater on the same amount of work.

STICKERS

Can you, with the five pieces shown above, form a perfect square? One of the pieces may be cut in two, but the others must remain intact.

its Pennsylvania refinery to Cleveland. Gasoline will be pumped over this line by thousands of gallons.

Formerly all of that gasoline would have gone to Cleveland by railroad, in tank cars. Since this particular pipe line is only one among a great many in all parts of the country, the way in which the railroads' business has been hit is too obvious to need explanation.

Daily Health Talk

By DR. MORRIS FISHBEN Editor, Journal of the American Medical Association, and of Hygeia, the Health Magazine

Frequent Changes of Underwear Necessary for Summer Comfort, Bacteria Collects on Garments Worn Next to Skin.

BY DR. MORRIS FISHBEN Editor, Journal of American Medical Association and of Hygeia, the Health Magazine.

In a review of the relationship of clothing to life Sarah MacBride and Ellen Beers McGowan discuss especially the question of the relationship of clothing to health. This is important because summer is upon us and the choice of the right type of clothing means a great deal for comfort. The human body is constantly throwing off heat. Clothing acts either to conduct this heat outward or to hold it in. Some fibers permit heat to pass more readily from the body than others. Cotton and linen garments permit heat to pass off readily and thus help to keep the body cool. Silk and wool, on the other hand, do not conduct heat very readily and are therefore better suited to winter than summer wear. Of special importance is the choice of underclothing, since this is worn next to the skin. Overheating is serious, particularly for infants. Therefore, in the summer, all cotton or lightweight silk, or mixed silk and cotton garments are more suitable than woolen garments. It has also been found that some types of clothing permit the ultraviolet rays of the sun to penetrate more readily than do others. A fabric with an open mesh not only permits the circulation of warm air and the radiation of heat, but also permits more sunlight to pass through than does a fabric with a closed mesh.

The human body gets along best with a fairly even temperature. Hence, clothing should be chosen with that idea in mind. When people used to have to walk long distances to and from work in the open air or to work a great deal outdoors, it was necessary to have thick woollen underwear. Under modern conditions of transportation and with the development of modern types of clothing, such underwear has practically disappeared, except for lumbermen and ice cutters.

Of particular importance in using any type of clothing is the frequent changing of all that comes in contact with the skin. It has been shown that the number of bacteria increases constantly on a garment the longer it is worn. Many modern garments are ruined by boiling in hot water, and it is therefore necessary to have them dry cleaned frequently. Any garment that is so tight as to prevent circulation through and expansion of the organs of the body is not a healthful garment. Garters, belts and bands which are so tight that they leave red marks on the skin and dents in the flesh interfere with the circulation of the blood and cannot be considered suitable.

More than 1800 families have been recorded in China since 180 B. C. The famine of 18,77-78 claimed 9,500,000 lives.

Plants are most active during the period between noon and 3 in the afternoon.

than if they had to contend with bad debts. General opinion among them is that the "contract" system does not interfere with the important personal relationship between doctor and patient and some of the physicians even admit that the annual salary basis intensifies the doctor's interest in the patient's recovery. It is also believed that the quality of preventive medical service has been considerably improved in the areas served.

Idea in Industry

The Endicott-Johnson Shoe company, operating in New York state, at the time of the committee's survey was spending \$900,000 a year for complete medical service for its 15,000 workers and their families. The staff of its medical service included 28 physicians, four dentists, 67 trained nurses and 32 technical and professional assistants. The physicians made 87,000 house calls and received 118,740 office visits in the year surveyed. Besides using its own medical service the company paid more than \$300,000 to community hospitals and specialists and consultants from other towns in the same year.

The free medical care includes physical therapy, X-ray therapy, heliotherapy and even the services of a psychologist. Nursing is free and "helpers" are sometimes furnished families stricken by illness.

Cowmen Plan Camp Meeting

McCAMEY, July 3. (UP)—Thousands of cowmen from the Big Bend country and other parts of West Texas are expected to attend the Paisano Baptist Assembly, which will be held at the mile-high religious resort between Marfa and Alpine July 31 to Aug. 9.

Those who have attended the encampment in the past say it is one of the unusual gatherings of the nation. It is an old-fashioned camp meeting, and boots and spurs are worn by hundreds who listen to the addresses and join in the songs and prayers.

The only gospel some hear during a year is that which they hear at the encampment. Camp Paisano is said to have stamped its influence on the citizenship of this entire West Texas territory. The regard the people hold for spiritual things is attested to by their generosity when the big pie pans are passed to raise funds to defray the expenses of the meeting and for other projects. More than \$10,000 has been taken up at one time.

The presence of Dr. George W. Truett, of Dallas, president of the Southern Baptist association, has been a feature of the meeting annually for the past twenty-five years. A tree off the grounds is known as the one under which Dr. Truett prays daily. At the encampment he will preach daily at the 11:30 a. m. service.

Other notables who will speak are former Governor Pat M. Neff, chairman of the board of trustees of Baylor university, and Ollie Webb, representative of the Texas & Pacific railroad. Neff will speak on "Christian Education" and Webb on "Business and Religion."

The district B. Y. P. U. will hold a two-day session at the resort just before the encampment begins.

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

The Scotchman who lives on our block had only one of the twins photographed. Said they looked alike and he could save the difference.

Nothing goes to a fellow's head so much as the hay fever, one of the playground ball moguls sneezed as he waved aside a congratulation on a two-base hit last night.

By virtue of the Nocturne league, the local matinee idols of yesterday are the matinee idols of today.

John Howe was asked by an ignorant Scotchman the other day to do a bit of plumbing repair service on his bag pipes.

Bridge is getting to be popular with the firemen here. Why should hosemen not be proficient at rubber games?

Lum Daugherty went to see his girl and she baked him a couple of biscuits. He asked her if the doctor had not warned her against heavy work. No wonder he is still in the market for a wife!

They say Ben Whitefield, when a young man, brought in some fish one night and his wife kidded him about buying them at a market. "I saw you there," she accused. "That's all right," Ben assured her. "I had so many I sold a bunch to the fish monger."

Then, there was the Midland girl who was engaged for four years, and was never bored. Note: She was not engaged to the same man.

WE MANUFACTURE POTATO

CHIPS. Why eat a musty chip made several days ago in some other town when you can buy Midland Potato Chips. Actually better. Guaranteed to be fresh and purchasable at Smith-Stevens, Stanley's Self Serve Grocery, M-System No. 1, Piggly-Wiggly, Stanley's Service Station & Grocery and M-System No. 2 and Townsend Sweet Shop, 105 S. Main St., Midland, Tex. 98-32

It features a cartoon of a man with a large oil drop on his head, a diagram of an engine showing the distribution of oil components (Gasoline 35%, Kerosene 10%, Gas Oil 22%, Paraffin Neutral, Cylinder Stock), and a list of benefits. The text emphasizes the oil's stability and heat-protection capabilities.

SOCIAL NEWS PAGE FOR WOMEN

"Tomorrow and Tomorrow" Read by Mrs. Flood Who Saw Production in New York

Mrs. William Simpson
The Play Readers were delightfully entertained Wednesday morning when Mrs. T. B. Flood read "Tomorrow and Tomorrow," in the home of Mrs. Edwin C. Calhoun.

Mrs. Flood recently saw this play produced in the Henry Miller theatre in New York.
"Tomorrow and Tomorrow" will probably be acclaimed as Philip Barry's best play.

The play centers around Eve Redman—a young woman of fine character, with perhaps the sensitiveness of an artist, but she has no art—no outlet for her emotions other than to manage her home. Each tomorrow is too soon, just another uneventful day.

Gail Redman, her husband is a splendid fellow, the sort everyone just naturally likes. Life for him is great, his wife is wonderful, business is good, and horses are his hobby.

This latest effort of Mr. Barry's is a plea to husbands to remember that wives must have a big interest in life, that they must try to understand, and be interested when a wife wishes to talk of the things which mean so much to her.

One more character, in the person of Doctor Hay, is necessary in the proof of this argument. Hay is a restless fellow who has not found happiness. He meets Eve. She is pretty and interesting, but she is married—he believes, happily. He is curious because he feels there is a lack in her life—discovers it is because there are no children. His sympathy and understanding develop into love.

The play opens, Gail has returned from a college reunion—tired—but he has had such a great time. During these ten days alone Eve has become rather morbid, due to her fear that there will never be a child. She is talking to Gail about it—and he goes to sleep. Eve is hurt. She awakens him and tells him news of the business and his horses—he is interested.

Next day Doctor Hay arrives for his four weeks stay as a guest in their home while he is lecturing at a summer session in the Redman college. He is delighted to find the

Redmans young and such interesting people, especially the hostess.

Here the author proves how easy it is for a woman to fall in love with an interested man, even though married to a man she loves. A love born of companionship develops. It proves to be a strong love.

Fate throws them alone the evening before he sails for Europe to be away for years. They confess their love, but agree not to discuss it—she loves Gail also. As she starts to bid him good night, love must be discussed. They are sure their's will endure forever. The moon is marvelous and they go into the garden.

Two months later Gail is ready to discuss the adoption of a child, but Eve tells him it is not necessary—now. Happiness seems to have arrived for them.

After nearly eight years have been added to the life of little Christina Redman, we discover him lacing his riding boots. He has a bandaged head, and is pale and nervous. He fears many things, most of all horses, and resents Gail's insistence that he be a horseman. Eve tries to persuade Gail to be patient, she was timid as a child.

Turning the dial of the radio, Eve discovers Doctor Hays' voice, lecturing on emotions. He is now famous and has evidently returned to America. As his lecture is about finished, the stableman carries Christina in moaning, "My head." He had made the desired ride and jump—galloped back to the stableman and fell off the horse limp into his arms. He has a high fever. He has had them before, they are serious. Eve rushes to the phone, calls long distance, the broadcasting station and locates Doctor Hays. He comes at once, but after three days Christina is still in a stupor, which he believes is due to some emotion. Such fevers are not uncommon in high strung children. Through questioning Eve he discovers the boy's fear of horses and his resentment toward Gail's insistence that he be a horseman. She also tells him that Christina is his child, not Gail's. Now that he understands that it is a mental case he goes to Christina's room confident that he can save him.

Gail is desperate, swears that if Christina will only live he will never make him ride again, or force him to do anything. Christina regains consciousness and is soon quite well. Hays and Eve discuss their love, it has endured, she must go with him—he must have his son. She is on the verge of leaving, when Gail comes in jubilantly with the model of an ice boat for Christina. The child is so delighted over it, and no longer seems to fear Gail. The scene is too much. Eve recognizes her stronger love now—she turns back to her practical and happy Gail. Perhaps he has acquired sympathy and understanding.

M. P. Anderson of Crane was a business visitor here Thursday morning.

World Club Honored At Picnic and Program

Boys and girls of the World club of the First Methodist church were pleasantly entertained with a program and picnic supper at the home of Mr. and Mrs. Harry Tate Thursday evening.

Proceeding the supper a splendid program included a piano solo, Frank Nixon; reading, Dorothy Lou Speed; piano solo, Cleta Dee Tate; reading, Melba Nixon; playlet, "Never Again War," Dorothy Lou Speed, spirit of peace, Frank Nixon, America and Edwin Ferrell, Dutch.

Children of the club present were Cleta Dee and Betty Jo Tate, Cleo and Doris Tidwell, Melba and Frank Nixon, Helen Smith and Minnie Merrill, Edwin Ferrell, Charles Patterson, Dorothy Lou Speed, Dorothy Pittman, Dorothy Conner, Dorothy McKee, John Turner Jr., and Louise Elkin.

Visitors attending were Mrs. Nixon, Mrs. E. B. Patterson, Mrs. J. M. Prothro, Mrs. J. L. Tidwell, Mrs. Frank Prothro, Mrs. Claude Ferrell, Mrs. Harry Tate and Mrs. E. M. Ferrell.

Party of Friends Enjoys Evening at Cloverdale Park

An outing to Cloverdale park Thursday evening was delightful for a group of friends who took supper to the park and enjoyed music and frolics.

In the party were Mr. and Mrs. M. C. Ulmer and daughters, Helen Margaret and Ann, Mr. and Mrs. J. O. Nobles and children, Martha Louise, John Jr., Jack and Jerry, Mr. and Mrs. Addison Wadley and children, Marion and Barron, Mrs. Ethel Hancock, A. B. Richards, R. R. Browning, Alf Reese and Sammy Teasley.

North Ward Class Finishes Health Course This Week

Members of the North Ward Adult Health class completed this week a specified course of health under the direction of Miss Martha Bredemeier, county nurse, and diplomas will be received in a few weeks.

The South Ward class will conclude its work next Tuesday with a demonstration on nursing. Gold Star club women, who met Thursday afternoon with Miss Bredemeier, studied an interesting lesson, on tuberculosis. Home visits for the past week by the county nurse totaled 50.

County Women to Raise Money for Delegates

Five booths are being maintained by county demonstration women at the festivities today and tomorrow for the purpose of raising funds to send delegates to the Short Course in A. & M. the latter part of the month.

Three booths have been placed at the barbecue grounds, one at the Cowboy park and one near the dance on the streets tomorrow evening. Lemonade, cigars, chewing gum and confetti will be sold by the women.

Announcements

Saturday Children's story hour at the county library at 2:30. Special July 4 program arranged.

Country club dance for members and guests at the club house at 4:30 a. m. Men asked not to wear coats.

The only known health hen in existence is to be found on Martha's Vineyard off Massachusetts.

Figures show that 90 per cent more women than men jump from buildings and bridges when committing suicide.

PROTECT AND RELIEVE yourself of many common ills. Use CRAZY CRYSTALS—A Mineral Water Treatment THE CRAZY MAN 301 E. California St.

MIDLAND LODGE No. 623 A. F. & A. M. Stated communications 2nd and 4th Thursday night in each month. All members and visiting Masons invited.

Henry Butler, W. M. Claude O. Crane, Secy.

Happy Birthday!

TODAY Ben Hedges. TOMORROW Mrs. Ellis Cowden. Wayne Lanham. Francis Ferguson.

Mrs. Wallace Clears \$97 in Sale of Produce

Mrs. J. E. Wallace, a member of the Prairie Lee home demonstration club, has netted since January 1, above her monthly grocery bill \$97 made from the sale of milk, eggs and butter.

The total income for the products sold during the six months was \$158, an average of \$26 per month. The monthly grocery bill averaged \$10, leaving a clear profit of \$97.

Choice Cooks' Corner

Broiled Veal Chops Trim the fat from a number of chops and beat them until quite tender. Put them into a pan, pour over enough boiling water to cover, replace the lid, and stand the pan at the side of the fire where the chops can be allowed to simmer gently until done. When about three-fourths cooked, sprinkle over a small quantity each of pepper and salt. When done, remove them from the pan, dry them in a cloth, spread a little butter over them, brush them over with egg, and then sprinkle with bread or cracker crumbs. Place them on a baking sheet in the oven, and when they are nicely browned arrange them on a dish around a pile of mashed potatoes.

American Black Pudding Put a quart of small berries, such as blue or elderberries, into a saucepan with one cupful of sugar and a pint of water, cooking until the berries are done. Then cut a small loaf of bread into thin slices, butter them well and put a layer of them at the bottom of a pie dish, pour over a small quantity of the berry mixture, and fill up the dish in this manner, alternating the layers. Place in a refrigerator and when it is thoroughly cold serve with cream and sugar.

CHURCHES

FIRST METHODIST CHURCH Edwin C. Calhoun, Pastor Members of the American Legion will be honor guests at the morning service when the pastor speaks on "Higher Patriotism." The evening subject will be "Vanishing Sinner." Regular hours have been announced for Sunday school and Epworth leagues.

Helpful Health Suggestions

By Martha Bredemeier

"Drive Slowly" The grim warning "Drive Slowly Death is so Permanent!" has been heeded by thousands of drivers over dangerous roads.

In this country accidents are now the largest single cause of the crippling, dependency and destitution which call for relief.

Here are listed the twelve most frequent means of accidental injuries in the order of their fatality: Automobiles, falls, drownings, burns, railroads, poisonous gases, firearms, machines, mines and quarries, fires, poisons and suffocations.

Personals

Mrs. John Fowler and daughter, Francine, were here Thursday afternoon shopping. J. Neil Potter and William Bowie of Hillsboro visited friends here Wednesday evening.

T. U. Kennedy and J. Ernest Spare of Fort Worth will arrive here this evening to spend July 4th.

Mr. and Mrs. Avery Matthews of Monahan are expected to be visitors of relatives here tomorrow.

Mr. and Mrs. George Woodward of Lovington, N. M., will arrive tonight to be guests of Mr. and Mrs. R. E. Witly this week end.

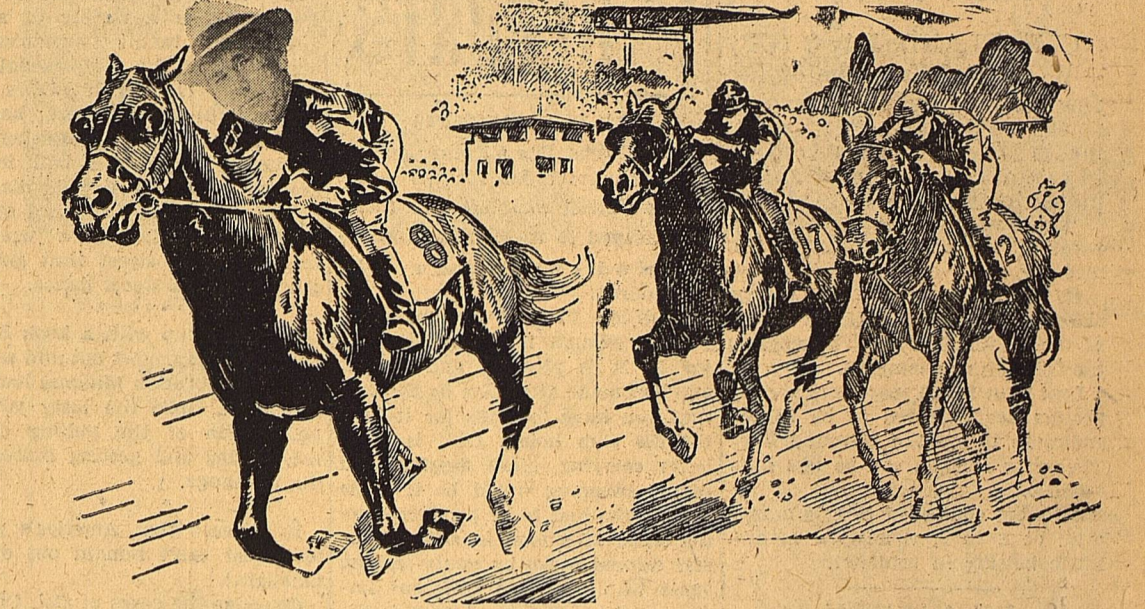

Guests in the home of Mr. and Mrs. J. O. Cooper this week end will be his parents, Mr. and Mrs. James Cooper of Big Spring.

Mr. and Mrs. J. Alfred Tom and son, Charles, will spend the week end with her parents, Mr. and Mrs. Frank Orson and attending the celebrations.

Miss Beulah Bates of McCamey will be in Midland Saturday attending the celebrations.

Mr. and Mrs. Carl Aiken and daughters, Imogene and Oculta Ruth of Odessa, are expected to visit friends and attend July Fourth activities here tomorrow.

A Consistant Winner Everywhere

Do you recognize the Jockey on the winner of this race? He is Mr. J. J. Willis, owner of the Willis Truck and Tractor Co.—riding his favorite mount "GOODYEAR." This horse has never lost a race. Mr. Willis is the Midland distributor for Goodyear Tires, McCormick-Deering Farm Implements and International Trucks.

Pete Sneed and Ted Brownlee of Big Spring will be visitors here tomorrow. R. L. Gray of Abilene is a business visitor here today.

Mr. and Mrs. Young Lee will be in from the Goldsmith ranch tomorrow to attend the celebrations and visit relatives.

Mr. and Mrs. M. D. Cox and family left Wednesday for Lubbock where they will make their home.

Mr. and Mrs. R. K. Ferguson of Crane were in Midland for dental treatment Thursday.

Mrs. T. Paul Barron and son, Charles, returned Thursday afternoon after a visit with relatives in Big Spring and Lubbock.

Mrs. Cecil Sneed and son, James, of Corsicana have arrived in Midland to spend a week visiting Mr. and Mrs. C. Hawkins and family.

# STRIBLING TO GO INTO RING FAVORITE, 6 TO 5, AGAINST MAX

## GOATHAM COMMISH DOES NOT HOLD MAX CHAMP

CLEVELAND, July 3 (UP)—W. L. Stribling, one of the few heavyweight challengers to enter the ring as a favorite, meets Max Schmeling tonight in one of the strangest championship fights ever held. The men had not been weighed in officially early this morning.

If Schmeling wins, he cannot claim the championship in New York as the commission doesn't recognize the German as champion.

Less than 50,000 spectators are expected to be in the enclosure to see the 15-round bout. The gross receipts will be less than \$400,000.

Stribling continued to rule a favorite at 6 to 5, with even money. Little betting in evidence.

### HA! A SCANDAL

OTTAWA—A consignment of liquor from Scotland for I. M. Tokugawa, Japanese minister here, failed to arrive. A search was made of the city. It was finally found in the cellar of a church. The liquor had been consigned to "The Japanese Minister" and the delivery clerk thought it was intended for a religious minister.

### BITING NOT ALLOWED

EL PASO—Mrs. George Fritze doesn't fight fair, her husband thinks. In divorce court here George said that the good wife had beaten him, whipped the children, struck him on the head once while he was kneeling and once bit him on the knee. George weighs more than 175 pounds and his wife doesn't tip the scales at 100.

### Why a Balanced Gasoline?

MAGNOLIA MAXIMUM MILEAGE GASOLINE is so refined that it gives you the right percent for starting, the right percent for pick up and the right percent for maximum mileage and power. Try it, you will be convinced that it is cheaper "on the long run." Use Summer Grade.

## SPORTS REPORTS

BY R. C. HANKINS

Alvin Hicks, like all other golfers, always hunts alibis for his game. Here's a bit of consolation he found and relayed to us on this anniversary of a 110 we shot and a 103 he squandered:

"Golf is a form of work made expensive enough for a man to enjoy it. It is physical and mental exertion made attractive by the fact that you have to dress for it in a \$200,000 club house. Golf is what letter carrying, ditch digging, and carpet sweeping would be if these three tasks had to be performed on the same afternoon in short pants and colored socks by gouty-looking gents who require a different implement for every mood. Golf is the simplest looking game in the world when you decide to take it up and the toughest looking when you've been at it for ten or twelve years. It is probably the only known game a man can play as long as a quarter of a century then discover it was too deep for him in the first place. The game is played on carefully selected grass with little white balls and as many clubs as the player can afford. These balls cost from 75 cents to \$25 (depending on who one hits with his tee shot) and it is possible to support a family of ten people for five months on the money represented by the balls lost by some golfers in a single afternoon. A golf course has eighteen holes, seventeen of which are unnecessary and put in to make the game harder. A hole is a tin cup in the center of a green. A green is a small parcel of grass costing about \$1.98 a blade and usually located between a brook and a couple of apple trees or a lot of unfinished excavation. The idea is to get the golf ball from given points into each of the eight-hole cups in the fewest strokes and the greatest number of words. The ball must not be thrown, pushed or carried. It must be propelled by about \$200 worth of curious looking implements especially designed to provoke the owner. Each implement has a specific purpose and ultimately some golfers get to know what the purpose is. They are the exceptions. After each hole has been completed the golfer counts his strokes. Then he subtracts six and says, "Made that in five. That's one over par. Shall we play for fifty cents on the next hole, too, Ed?" After the final or eighteenth hole the golfer adds up his score and stops when he has reached 87. He then has a swim, a pint of gin, sings "Sweet Adeline" with six or eight other liars, and calls it the end of a perfect day."

The little high school girls batted out a decision over five of the business girls and five of Mrs. Say's

team in a game played last afternoon at Scharbauer diamond. The score ended 13-6. Only one run had been scored by the women until the last inning, when they crowded in five.

Don't forget to remember: the Fourth offers a variety of sports. Invitational tennis tournament at six courts of the city; medal play at country club, with golfers from all over the country here; baseball at Bizzell park and Busher-Colts diamond; playground ball in the evening under the Pagoda diamond lights; a swimming carnival at 7:30 at Pagoda pool, and a wrestling match on the street that goes by the name of a street dance.

Don't den up with a koob Saturday or Sunday. Get out and see the biggest celebration Midland has ever celebrated since the lusty yowl in observation of the pulling off of safety pins and getting buttons in the exchange.

It appears that America's public idols just can't remain out of the limelight!

Consider the cases of Col. Charles Lindbergh and Gene Tunney, both of whom married heiresses and professed a sincere desire to slip down from their thrones and into the oblivion of private life. Both Lindy and Gene just hated publicity, according to their own admissions, and both of them displayed considerable resentment because the newspapers insisted upon reporting their every activity.

Tunney even attempted to break away from all connection with boxing. Finally the public found new interests and Lindy and Gene no longer found any difficulty in remaining in the background. A year of consecutive obscurity, however, appears to have killed the desire of both men to remain in the background.

Now we find Lindbergh again breaking into the public prints with announcement of his plans to make another sensational trans-oceanic flight—this time, with his wife as co-pilot, across the Pacific.

Tunney also has stepped out of the background and is displaying keen interest in boxing—the very sport which he found so degrading a short time ago.

Gene still claims that he has little interest in boxing and that he wants to escape publicity but his actions belie his words. Sports writers who have known the former heavyweight champion throughout his career—from the days when he was a "ham and egg" fighter who would go to any lengths to get his name or picture in the newspapers, on through the stage when he attracted photographers who attempted to take his picture to the present time—are getting a great "kick" out of Gene's obvious, although possibly unconscious, desire to regain public attention.

Gene's keen desire to remain aloof from boxing is evidence by the fact that he has made the trip from New York to Cleveland for the express purpose of witnessing the heavyweight championship bout between Max Schmeling and Young Stribling and his lack of interest in the sport.

## MODERN LEAGUE RECORDS FALL AS TWO GAMES RESULT IN 60 ERRORS UNDER LIGHTS OF PAGODA DIAMOND

Midland's sweltering, candlelight ball fans saw the most unusual happening of the local sports year last night—when four clubs played two games and made a total of exactly 60 (sixty) errors!

Fawney such a thing, and within three blocks of a state highway.

It happened, nevertheless, as a glance at the score records of J. E. Adams shows. Bell Telephone sloped with one additional point over De Luxe laundry, 18-17, and Midland Hardware collected a 26-12 decision over the Rexall Soda Poppers. The Rexalls fell short one error of making half the night's total, Cochrane contributing seven on first base. Midland Hardware made only five as a club, the phone boys made 14 and the laundry an even dozen.

Two games will be played at the diamond this evening, beginning at 7 o'clock.

## BUSHER-COLTS PLAY OILERS; TAHOKA 'OFF'

BY JESS ROGERS

After receiving word from Tahoka at the last minute that their ball club would be unable to be here for their series with the Busher-Colts, Manager Lewis Wraga announced that he has scheduled games with the local Oiler team for games the Fourth and Fifth.

De Luxe Laundry

Home run, Girdley, Two-base hits, Rogers, Dorsey, Pierce, Umpire, Gemmill.				

These games should be hot affairs because of the rivalry that has always existed between the two clubs and they are sure to put out all they have to win. Either club would rather win one of these games than all the other games of their season.

On paper the Oilers seem to have the edge but the Bushers will have their full strength for the first time this season.

The big guns for the Oilers, from past games, seem to be Ward, catcher; Pipkin, first base; and Dahl, pitcher. Skipper Wraga announced that the Oilers will have to have some fine pitching to stop the heavy hitting of Warren and Simpson. Holt, the new catcher for the Bushers appears to be a real find. Besides being a fine receiver he hits the ball hard and runs more like a Cy Leland than a big man usually does.

These games are to be played at the new Busher diamond just one block west of the barbecue pits and, as the holiday game is scheduled to start at 2:30, it will be convenient for all. The game for the fifth is slated to start one hour later.

The managers have Dick Graves to call the games and unless you have heard Dick call them, well—

## More Powerful than Any Gasoline

ONLY three days after its introduction in Texas, Esso is duplicating the phenomenal success it has had in 20 foreign countries.

There can be only one reason for this. Esso is the world's leading power-fuel. Esso was designed to give more power—and does it.

*In many cars Esso actually develops as high as 20% more power than ordinary gasoline.*

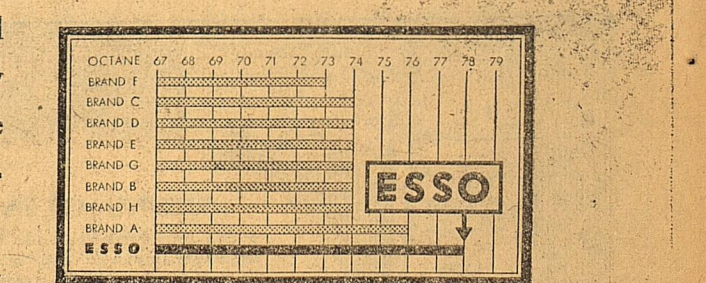

This is an increase you will notice instantly. It gives an entirely new "feel" to driving.

Look at the chart on the right. It shows how Esso compares not with ordinary gasolines, but with the leading premium fuels on the market today.

Try Esso in your own car. Fill up when your tank is as nearly empty as possible—and get the sensation of driving with Esso undiluted by any other gasoline.

Esso was perfected in America by the world's leading petroleum technicians. It contains Ethyl—but it is far more than an ordinary Ethyl fuel.

Make a ten-day test of this new fuel. Find out for yourself what your car can do with Esso. Then change back to any other type of gasoline—if you can.

"Octane Rating" is the new, exact way of measuring the anti-knock quality of motor fuels. Note how far superior to all other premium fuels ESSO's Octane Rating is. (Samples of premium gasolines picked at random from roadside pumps.)

### DIVORCES BRING FAME TO TOWN NEAR OHIO LINE

ST. CLAIRSVILLE, Ohio, July 3. (UP)—Not only has St. Clairsville gained a reputation for coal mine strikes, but it also is beginning to gain fame as a divorce center.

The situation hasn't quite reached the proportions of Reno's "mill," but for its population of some 2,240, nearly 1,000 couples decided to end their marital state last year.

While St. Clairsville is a "parting of the ways" center, Wellsburg, West Virginia, 30 miles up the river, is the center of marriage "traffic" of the two states. Wellsburg has a population of 5,000 and boasts of 5,000 marriages last year.

"Big Business" for Two—Meanwhile the traffic brings "big business" to the two towns. Hotels, road houses, gasoline stations, mid-geet golf courses, restaurants, ministers, taxi-cab drivers, bell hops and the two counties are "cleaning up."

The only requirements for a marriage in Wellsburg call for being 21 years old and single. Citizens of the town have the process well organized. Two taxi-cab drivers will meet a couple at the train, see that a marriage license is procured, find a minister and take husband and wife back to the train there for a flat rate of \$10. Pastors have shortened the marriage vows for "hurry-up" marriages and charge a flat fee of \$5.

"Extreme Cruelty"—Here 30 days in Belmont county constitutes time for "residence" in order to obtain a divorce. "Extreme cruelty" is stretched to the extreme and three minutes in court with a \$50 fee bring a divorce, provided, of course, that the case is uncontested. Then it may take a day or two.

It is estimated that during the spent \$40,000 to have wedding bells ring up the river, and \$100,000 to muffle them here.

### Child Donates a Calf to Barbecue

Buster Cole, about eight years old, son of Mr. and Mrs. Ed Cole, has raised objection to a story saying his father donated a calf to the July 4 barbecue.

"That is a mistake," he said. "That calf was sucking a Diamond cow, not a Flying U."

The Diamond brand is registered in the boy's name.

Use of motor vehicles has increased more rapidly in Japan than in any other country in the Far East, registrations growing from 22,000 to nearly 90,000 in the last six years.

NOTICE—I have sold my Boot & Saddle Shop at Midland to Mr. R. R. Tate, who will continue to run the business at the same location. I want to thank all of my customers for the business given us in the past and want to ask a continuance of your trade for Mr. Tate.

It will be greatly appreciated if all persons owing us accounts will come in immediately and take care of same.

H. H. HERRINGTON.

### Hang Out Your Flags Saturday

Attention of merchants was called to the fact Friday that all flags should be in place Saturday morning. Homes are ready in most of the sidewalks and business houses are reminded to have their flags placed early Saturday morning or this afternoon.

### New Mexico Oil Men Inspectors

T. A. Stanciliff and J. D. Hunter of Roswell have been made deputy oil and gas inspectors of New Mexico. They were appointed by Dr. E. H. Wells, state geologist. Stanciliff will have charge of the Eunice, Hobbs, and Jal areas and Hunter will be inspector in the remainder of the state.

### First Oil Run of Messenger Line

First oil was run this week through the new Wadsworth-Messenger at al pipe line from the Pecos Valley field to the Shipley field in Ward county. The Wicket refinery was scheduled to begin a 24-hour operative program this week.

Survey of the Texas Pipeline Co. for a new six-inch conduit from the Iran pump station east of the Yates field to the Big Lake field has been finished. The Texas company has contracted to run a minimum of 5,000 barrels and a maximum of 25,000 barrels daily through the 27-mile line.

### McCamey Man Says Midland Folk Okeh

People of Midland are highly complimented by A. Garland Adair, outstanding weekly newspaper editor of the McCamey News at McCamey. Adair wrote the following letter praising the Midland people for their cooperative activities as carried on through their chamber of commerce:

"I am going to try to be with your legion men this week end for the Fourth of July celebration and we are carrying articles to boost the thing good in this section.

"It has always been a pleasure to cooperate with you in your plans which are outstanding in commercial club activities. If such practical programs were devised and executed more generally there would be less criticism of chambers of commerce and there would be easier sailing as well as greater progress. We think often of how remarkable are your efforts and how your people should appreciate the Midland Chamber of Commerce."

### Pratt Succeeds As Tax Assessor

W. I. Pratt succeeded July 1 to the office of city and schools tax assessor, formerly conducted by M. B. Robertson, who has moved to Weatherford to enter business. Pratt has been manager of Hassens'.

### Gold Pans Back As Store Stock

BUTTE, Mont., July 3. (UP)—Gold pans for sale! For the first time in 40 years newspapers here are carrying advertisements of hardware stores that gold panning pans have been stocked.

Thus Montana revives her oldest and most romantic industry—placer mining. And the boys are taking to the hills.

It sounds funny—hundreds of men drifting into the hills along streams, over the old trails along which the frontier forged.

A good living can be made panning the precious metal from old stream beds. Too, there's always the chance to make a lucky strike, a bonanza.

Ghost towns are showing signs of life. An occasional prospector from one of them is seen in town, a little bottle, or bag of gold dust, giving token of his industry. Others return to the hills with him.

Always men seek gold, more so in times of depression. For as

### Grapefruit Grows In British Favor

LONDON, July 3. (UP)—After a long, uphill fight, the grapefruit at last has squeezed its way to a place on the English breakfast table.

True, the every morning dish of bacon and eggs still looks with disdain upon the new founding whose rapidly increasing popularity is reflected by government figures.

Statistics show that seven times as much grapefruit was consumed in England in 1930 as in 1924, peaches trebled in sales, but consumption of pears, grapes, plums, cherries and gooseberries declined.

The United Kingdom's fruit bill, imports only, for 1930 was \$155,000,000. It was estimated that every man, woman and child is eating 33 pounds of fruit a year, 12 1/2 pounds more than in 1924.

Iron and food and other indispensables go down in value, gold goes up, its price a standard, being fixed by international agreement.

### TRADES DAY, TOO

More than 5,000 people are expected to crowd about the Trades day truck at 2 o'clock tomorrow when the big regular trades day program will be held.

Business men are urged to be ready for the program by 1:45 so that the program may move off on time. Pedestrians are assured of plenty of room, as no cars may park on the vacant lots south of the Baptist church.

### THREE BABIES BORN

Mr. and Mrs. John J. Burley announce the birth of a nine pound baby boy in their home on June 25.

A seven and a half pound girl was born to Mr. and Mrs. Oscar Bizzell on June 30.

Birth of a ten pound boy on July 2 to Mr. and Mrs. Jim Franks has been announced.

Losses from forgeries in the world now total more than \$250,000,000 annually.

### Suit Against Oil Company Filed

Suit to cancel an oil lease held by the Midwest Refining Company has been filed by W. N. Terry and Ora B. Terry of Gaines county. The suit is to cancel the lease on 30 acres in Lea county which joins a lease on which the Ohio Oil company drilled a well within 250 feet of the line. The Terry plea charges that Midwest failed to comply with terms of the lease requiring an offset well within 30 days.

### REAL HELPMATE

EL PASO.—When Mrs. Anna Du Bois Cameron married J. J. Cameron she turned out to be a real helpmate—in getting a divorce.

Cameron sought a divorce in court here and his wife helped him get it by testifying that charges made in his petition were true. The charges said that she found fault with him without excuse, had outburst of temper and told him she never loved him.

### Thousand Will See "Skippy" Here

More than a thousand women and children are expected to take advantage of the Ritz theater's complimentary program Saturday for visiting women and children. All women and all children whether boys or girls not over 12 who live outside the city limits of Midland will be guests of the Ritz at a free show anytime between 1 p. m. and 6 p. m.

Tickets must be obtained at the office of the chamber of commerce. Women and children living in Midland are not eligible. "Skippy" one of the greatest shows of the year, according to the critics, will be exhibited.

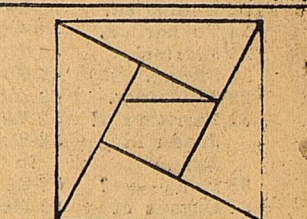

### To Talk in Unknown Tongues on Sunday

A demonstration of talking in unknown tongues will be given at the Men's class in Hotel Scharbauer Sunday morning. The lesson is on Pentecost and concerns the talking in cloven tongues. All of the men who attend Sunday morning will

not only hear a man talk in unknown tongues, but all of the men will be shown how they can learn also to do this type of talking. The regular teacher will speak as usual. Men who took names of absentees to see this week are reminded to see their men today.

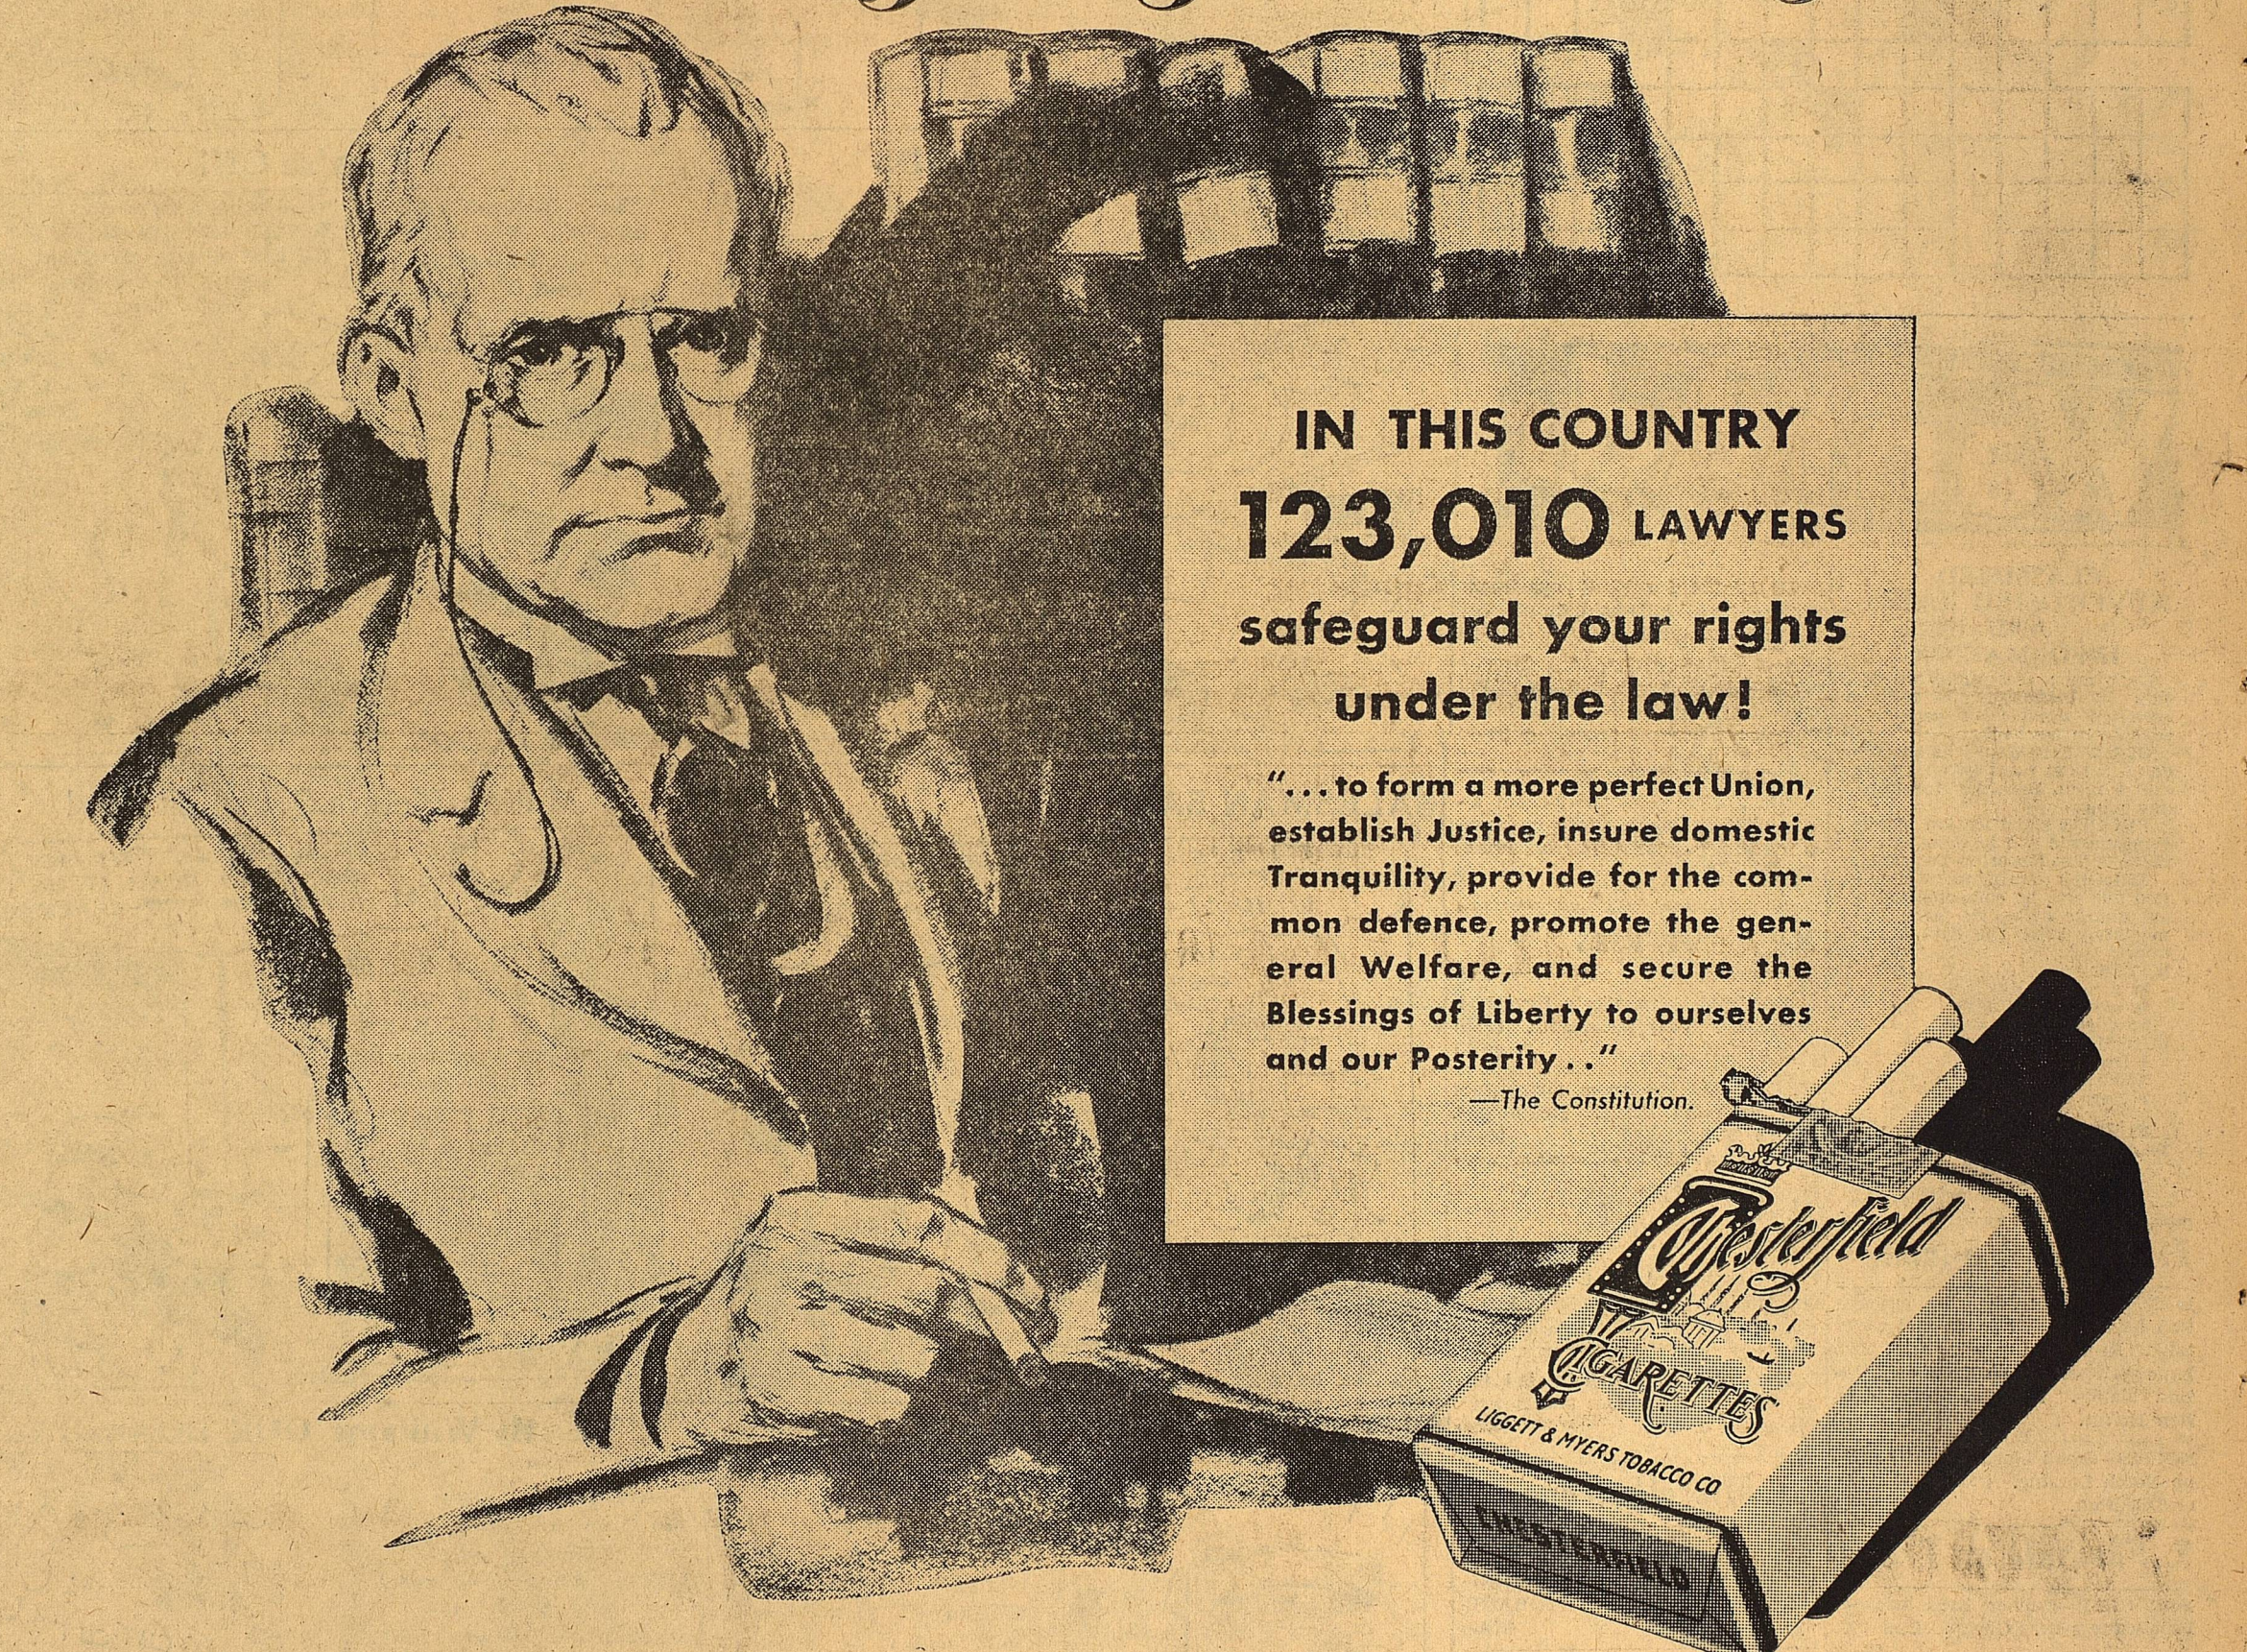

The correct thing to do is to have that kind of ballot which stupid people will spoil, because in that way you will disfranchise the stupid part of the population.—Sir Martin Conway.

### STICHER SOLUTION

The diagram shows how the five pieces of the same size can be formed into a perfect square, only one piece having been cut in two.
