## Kansas Gas War Flames Anew; Doherty Buys Newspaper

### MAGNATE TO FIGHT IN PRINT

Journal Post and the Star Lined up in Battle

NEW YORK, Aug. 7.—(UP).—Henry L. Doherty, head of the billion dollar Cities Service corporation, announced today that he had bought half interest in the Kansas City Journal Post with the intention of meeting the Kansas City Star on equal footing in a gas rate battle.

Doherty's entrance into the newspaper field heightens the battle between his company and the Star which has been opposing utility rates.

Doherty, after winning court actions in which the state of Kansas sought to bar the Cities Service stock from state sale, recently filed a \$12,000,000 libel suit against the Star. The case has not been tried.

The Star is one of the most influential papers in the midwest and has sought to force the Cities Service to lower Kansas natural gas rates.

### Cotton Truck Law Injunction Allowed

HOUSTON, Aug. 7. (UP).—Federal Judge T. M. Kennerly today granted the J. H. McLeish company and several associated petitioning companies a temporary injunction restraining the enforcement of the state cotton truck law.

The application claimed the law was attempting to force shippers to use railroads instead of trucks and that it is unconstitutional and discriminatory.

### Glass to Take Sea Voyage to Gotham

George Glass will leave Midland Aug. 14 for New York, on a trip given complimentary by the United Fidelity Life Insurance company of Dallas.

He will proceed by train to Dallas and Galveston, where he will go aboard the Mallory line steamship Algonquin for an ocean voyage to the metropolis.

In New York, Glass will be in a party of several agents from thru-out the United States, and will visit four days. Afterward, he will visit in Washington, St. Louis and other cities en route back to Midland.

The trip was given Glass in recognition of his ranking seventh among 700 agents in the United States for the past 10 months. In the recent 10 months, he ranked first in the past four and a half years selling a policy.

He will be gone two weeks.

### ICE CREAM PARTY

Mr. and Mrs. W. S. Hudson and Mr. and Mrs. Drew Ruple were hosts to the Reporter-Telegram force on Thursday afternoon at an ice cream party.

### HAS MINOR OPERATION

Mrs. C. C. Foster was resting well this afternoon following a minor operation at the Midwest hospital-clinic this morning.

### Still Vacant

And people are looking for good places to live! Use Reporter-Telegram classifieds and rent that place of yours.

People are begging for furnished houses. Have you got one?

Phone 77

### Stuck Up!

"Let's get right to the point of the whole affair," gurgled six-months-old Richard Gronik of Milwaukee as he posed with this giant safety pin, a surprise gift to his parents from friends. "I'm sorta stuck up you might say." Richard added, "but it's pretty snappy, just the same!" The pin is four feet long and weighs seven pounds.

### LIFE TERMS IN STEAD OF CHAIR GRANTED 2 MEN

HUNTSVILLE, Aug. 7. (UP).—Clyde Thompson, 19, condemned Eastland county slayer, and Dave Goodwin, Bowie county backwoodsman who was condemned to death for the slaying of Lloyd Elliott in a hog argument, rejoiced today after Governor Sterling had commuted their sentences to life imprisonment a few hours before Thompson was scheduled to die in the chair last night.

The governor in a proclamation last night said Thompson had the mentality of a child. He is the youngest man ever condemned in Texas. He was convicted of killing Lucien and Leon Shook, brothers, "just to see them kick."

Goodwin's sentence was commuted after a long fight by defense attorneys claiming that the trial was dominated by a mob.

### MAY MUFFLE NOISE

CHICAGO.—A punice-like substance, formed from molten lava spouted from volcanoes centuries ago and deposited on the shores of Salton Sea in the Mojave Desert of California, may supply a substance which will successfully muffle at least 50 per cent of the noise of subway trains.

This substance, called Kalite, when bound with cement into a hard product, is the most efficient sound absorber of this type, according to the U. S. Bureau of Standards.

In a plaster form it is laid on an inch thick and is said to absorb over 50 per cent of the sound striking it. On office ceilings, it muffles the clatter of typewriters and the jangle of telephone bells. New York and Chicago are planning to use it in their subway systems to cut the noise which now beats on the ears of the passengers.

In years past this material has been used for rubbing down painted finishes on automobile bodies.

### ARRANGEMENTS COMPLETE FOR ARMY BAND IN CITY; BASEBALL GAMES, A DANCE AND SPEAKING ON PROGRAM

Military band concerts, military parade, two baseball games and an American legion dance are scheduled for Midland Saturday and Sunday. Mayor Ken M. Reagan, Pecos; Van S. Avert, Marfa; Henry T. Winfield, Fort Stockton; and Leon Goodman, Midland, will make addresses Saturday evening.

The city officials are coming with 51 soldiers from Fort D. A. Russell at Marfa. Harry Lambert, commander of the Davis Mountain association of American Legion posts, is in charge of the party, which is visiting 12 West Texas towns in interest of retention of the fort at Marfa which, along with others, has been ordered abandoned by the war department.

The soldiers will parade at 6 p. m. and a 30-piece military band will give a free concert, after which the mayors will speak. An orchestra from the fort will play for a dance in charge of the American legion post here, beginning at 9 o'clock Saturday evening. A baseball team with the party will play Carroll Hill's Oiler-Busher selected players Saturday and Sunday at 3:30 in the afternoon. A second free band concert is planned for Sunday.

**Players Lineup**  
The following lineup for Saturday's baseball game with the Marfa soldiers was announced today by Carroll Hill as follows: Robinson, c. Hill, p; Simpson, 1b; Butler, 2b; Langley, ss; Stevens, 3b; Heath, if; Girdley, cf; Cunningham, rf; utilities: Long, Chewing, E. B. Estes.

Hill said the lineup for the Sunday game would be announced early Sunday morning in The Reporter-Telegram.

Dick Graves, popular umpire, will call both games.

### Legion Meeting A Busy Affair

Election of delegates to the state convention in El Paso, organization of a playground ball club, and final arrangements for the program of the 1st Cavalry band here Saturday and Sunday were business matters discussed by the American legion in a meeting Thursday evening.

Fred Middleton, Charles Berry, C. B. Ligon and F. B. Ford are delegates to the convention on Aug. 24, 25, and 26. Alternates named were D. H. Pope, Otis A. Kelley, W. B. Standifer and H. W. Moutrey.

Dulaney Ward was elected manager of the ball club. Equipment was purchased today.

Two terrapins will be entered by the Midland legion in the terrapin derby to be held at the convention. Entrants were named Will Rogers and Col. Lindbergh by Adjutant Charles Berry.

Berry and Standifer are to be in charge of the dance at Hotel Scharbauer Saturday evening, at which the cavalry orchestra will furnish music.

### PLAYED DRUMS 51 YEARS

LINDSAY, Ont. (UP).—For fifty-one consecutive years, Alf Bates has beat the drum in the 45th Regiment and Citizens' bands in the Orange parades in Lindsay. Alf claims he is the oldest continuous "pigskin beater" in Canada. He joined the band in 1879, and pounded his drum in the last Orangemen's parade last July 11.

### PLANS FILMLAND SATIRE

ALPINE, Tex. (UP).—Jack O'Conner, who deserted his job here as English instructor in the Sul Ross State Teachers college to write books, is in Hollywood gathering material for a satirical novel about the movie colony. O'Conner is the author of "Conquest," which caused quite a stir when it was released last year.

### POND FENCED FROM PETERS

LYNN, Mass. (UP).—Peters are going to cost this city \$5,000. The money has been appropriated to erect a fence around Birch pond, a city water supply. Water Commissioner Thomas Heath blamed petting parties for "polluting" the water. It was pointed out that some petters enjoyed moonlight bathing in the pond.

### New Laurels

This plucky little British lass, Amy Johnson, bid for new aerial laurels in her flight from England to Tokyo after failing in her first attempt. She first achieved fame in her spectacular solo flight from England to Australia not long after leaving a stenographer's desk in London to take up aviation. She landed at Tokyo at 3:17 (E. S. T.) yesterday.

### ENGLISH SEEK 1932 ARMS CUT BY CONFERENCE

GENEVA, Aug. 7. (UP).—England and the dominions have brought a fresh moral pressure to bear upon other leaguers for an actual reduction of armaments at the 1932 disarmament conference.

In notes addressed to the Secretariat both by the mother country and the various dominions who are dependent members of the league notice has been given that they cannot accept the necessary amendments to the covenant to bring it into harmony with the Kellogg Pact until the bringing into force of a general treaty for the reduction and limitation of armaments.

The question of harmonizing the two documents is one of vital importance to the smaller members of the league, who count on the incorporation into the covenant of the Kellogg pact abolishing war as constituting for them one of the greatest guarantees of security.

### Great Difficulty

The question of harmonizing the covenant and Kellogg pact was on the agenda of last year's assembly and after great difficulty necessary amendments to the covenant were found which it was believed would be acceptable to the members of the league as a whole.

The question was accordingly placed again on the agenda of this year's assembly, at which time it was confidently hoped the necessary changes in the covenant (See DISARMAMENT page 6)

### Girls Leave Home When Theatre Is Denied Them

When Ida Dee and Nancy Ruth, 503 East Indiana, return to Midland they may go to the theatre, more often.

At least "I'll talk to them about it some," the mother said this morning when told by the chamber of commerce the two girls had been intercepted in Fort Worth by the Travelers Aid society as they were hitchhiking through that place.

"My daughters wanted to go to the show more than I thought limited means during the depression would permit," the mother told the Reporter-Telegram this morning. "I remonstrated with them and still believe I was right. But if the chamber of commerce will wire them I forgive them all and that I still love them."

### JAPS HOLD AMERICAN AVIATORS

Viewing of Secret Fortifications Alleged

TOKYO, Aug. 7. (UP).—Clyde Pangborn and Hugh Herndon Jr., were unable to get to their plane at the airport here today because it is held by Japanese authorities who are ascertaining if the flyers inspected secret Japanese fortifications from the air while en route from Siberia.

Pangborn, who piloted the plane here, said he had not received telegrams instructing him to remain at Khabarovsk until a landing permit had been arranged. He said he believes an emergency landing permit will be sufficient. The flyers are planning a nonstop flight from Tokyo to Seattle.

### Missouri Minister Will Preach Sunday

The Rev. E. S. Cook, outstanding Presbyterian minister of Warnsburg, Mo., will be in Midland Sunday to preach at the morning and evening services of the First Presbyterian church.

Officials of the Midland church say the Rev. Cook, a Texan, is a prominent church builder in Missouri. The public is invited to the sermons.

### Robbins and Jones Returning, Thought

SEATTLE, Aug. 7. (UP).—Reginald Robbins and Harold Jones were believed to be en route to Fort Worth today but lack of communication facilities to Fairbanks prevented definite word movements reaching here.

The men planned to leave Fairbanks at midnight flying to Alberta where they could consider a plan to refuel for a non-stop flight to Fort Worth.

### Gangster Admits Child Was Foil

NEW YORK. (AP)—Tony Trobino, admitting that he was the intended target of gangster bullets that killed one child and wounded four others last week, told police Thursday that he used the body of a little child as a human shield from the leaden spray.

Trobino is said to have admitted that he was a member of a narcotic ring recently split up by civil war.

According to the admission to detectives, Trobino said he was sitting in an automobile when the gangsters started to fire from their automobile. He crawled along the sidewalk to where a group of little children were playing.

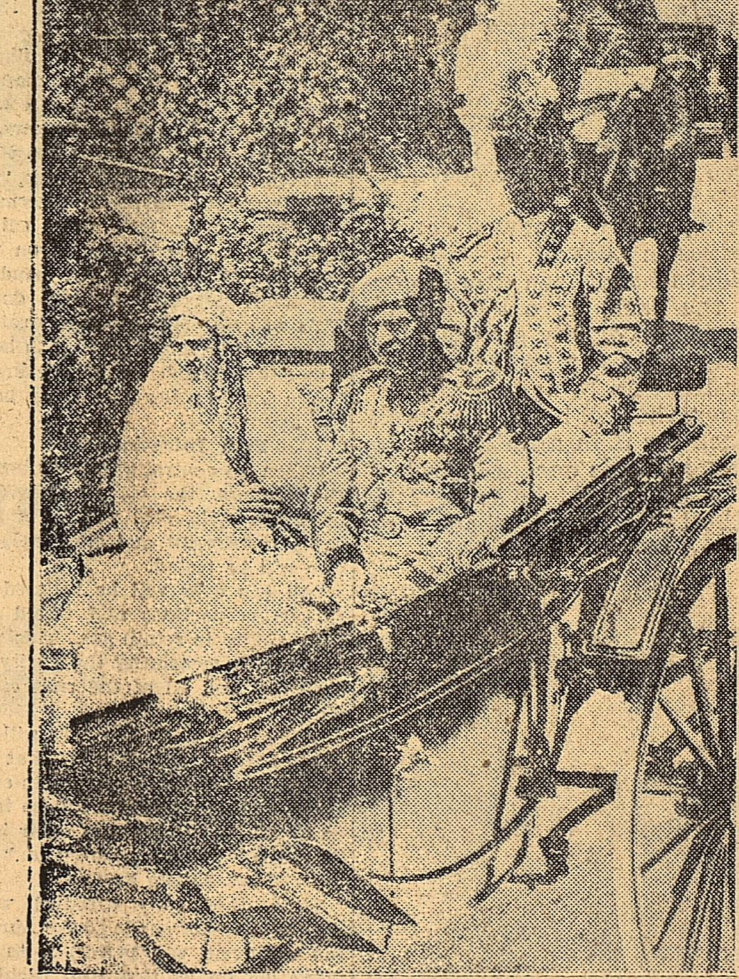

Then, Trobino said, as the gangsters' car approached the spot to which he had crawled, he grabbed a little boy and held him up as a human shield.

A spray of bullets burst forth, killing little Michael Vengalli.

### Royal Marriage Ceremony

Europe's most recent royal newlyweds, Princess Ileana of Rumania and Archduke Anton of Austria, are shown here after they had been married amidst scenes of regal splendor at the palace of Peleth, in Sinaia, Rumania. Almost every royal house in Europe was represented at the ceremony, which marked the first marriage of a member of the Hapsburg line and a Hohenzollern.

Resplendent in the blue uniform of a general of the chasseurs, prodigal carrier Carol of Rumania is pictured here as he escorted his sister, Princess Ileana, to the summer palace.

### BRICKS NOW HAVE ULTIMATE KICK!

NEW YORK. (NEA)—Fifth avenue pauses. Portly business men, hurrying office workers, ambling strollers, lady shoppers, gum-chewing stenographers—and Mose, the colored boy who shines their shoes. They all look in. And a very great many go in.

A policeman is stationed there to prevent any possible disorder. It's an orderly business, though. Just the sale of "California Grape Bricks."

But New Yorkers are all fermented about it. They buy the bricks, listen to an attractive saleslady tell them such interesting facts as: "You dissolve the brick in a gallon of water. Do not place in a glass or jug and put in a cupboard (See BRICKS page 6)

### SENATE AGAINST MEASURE

Votes 17-11 Against Engrossment of The Bill

AUSTIN, Aug. 7. (UP).—The senate voted today 17 to 11 against engrossment of a bill to create a three-member oil and gas conservation commission requested by Governor R. S. Sterling.

Sitting as a committee of the whole, the house voted to recommend to the house as a body that the enacting clause be stricken from the Wagstaff oil and gas con-

### TEXAS BLAMED

WASHINGTON, August 7. (UP)—Complete responsibility for the chaotic condition of the oil industry was laid upon Texas today by acting Secretary of Interior J. M. Dixon.

Dixon said the failure of Texas authorities to control the East Texas pool had dragged the whole industry down, ruining thousands of independent producers and creating unemployment and hardships.

There would be no critical situation in Oklahoma if Texas had cooperated with other states to limit production, he declared.

Unbridled East Texas production has nullified the works of the federal oil conservation board and represents the most heart-breaking waste of national resources of a generation, he said.

### POLLARD BILL PASSED

AUSTIN, Aug. 7. (AP)—The Texas senate Thursday afternoon passed the Pollard pipe line bill, substituting the house bill on the same subject by vote of 27 to 1.

The Pollard bill would empower the state railroad commission to order pipe line companies to make "reasonable" connections with oil and gas wells and would prohibit discrimination in oil and gas takings. The sum of \$50,000 would be appropriated to the commission for enforcing the act.

The bill was designed, under proponents' explanation, to protect the small, independent producer and afford him an outlet for his production.

Connections made could not be unmade except by authority of the commission or the owner of the well. (See LEGISLATURE page 6)

FALLING FOR HUMBUGS

One thing that does not always get the attention it deserves is the average man's unquenchable desire to believe in something that he knows to be impossible.

A short time ago—right in the middle of a spell of extremely hot weather, as it happened—people who live along the shore of Lake Erie near Sandusky, O., got all excited about a sea serpent which was supposed to be cavorting about in the neighborhood.

First one man reported seeing it, then another. From all accounts it was a veritable monster—long, scaly, horrendous, doing everything that traditional sea serpents do except breathe out fire and brimstone.

For about a week these tales kept bobbing up. People laughed, of course—but they enjoyed them, just the same. For no matter how sensible we try to be, we always get a secret kick out of letting a part of our minds believe in something we know isn't so.

Then, finally came the climax. Two men went out in a boat—and came back with a veritable serpent, an 18-foot python, alive and authentic. They had captured it in the water, they said, stunning it with their oars before hauling it aboard.

Here was proof enough to satisfy anyone. Unfortunately, the climax was followed by an anti-climax. The man turned out to be a carnivalman, the snake turned out to be a side-show snake and the whole business turned out to be a hoax. The two men and the snake vanished, and northern Ohio resumed its usual calm.

But it was fun while it lasted. It was fun, first of all, to pretend that innocent Lake Erie really harbored a sea serpent. Then it was fun to pretend that an 18-foot python could somehow find its way from India to make a home in a North American lake. Everybody knew, all along, that it wasn't really true—but that didn't matter.

Why is it we get such a kick out of persuading ourselves to accept facts which we know to be false?

A TOUGH ROW TO HOE

Prohibition Director Woodcock's promise that the government will demand a vigorous prosecution of the Indiana bootlegger who shot and killed two federal dry agents will meet with sympathetic agreement in all parts of the country.

The complaints that have been made in times past about promiscuous shooting on the part of irresponsible dry agents have made many of us forget the fact that the dry agent also runs into irresponsible gun users occasionally.

The honest dry agent does not have a very easy time of it. He has to deal with the most dangerous group of criminals in the country. When he makes a mistake it is trumpeted across the land from ocean to ocean. When he runs into a crook who happens to be quick on the trigger his own life is a forfeit.

TOLL BRIDGES VS. FREE BRIDGES

The famous "bridge war" between Oklahoma and Texas originated out of trouble that followed construction by the two states of a free bridge beside a privately owned toll bridge.

The incident serves to bring up for renewed consideration the subject of toll bridges in general.

In certain places toll bridges have been public conveniences. The fees paid by the users have led private capital to put up bridges where state or city governments could not afford to; and a bridge that you have to pay to cross is at least a little better than no bridge at all.

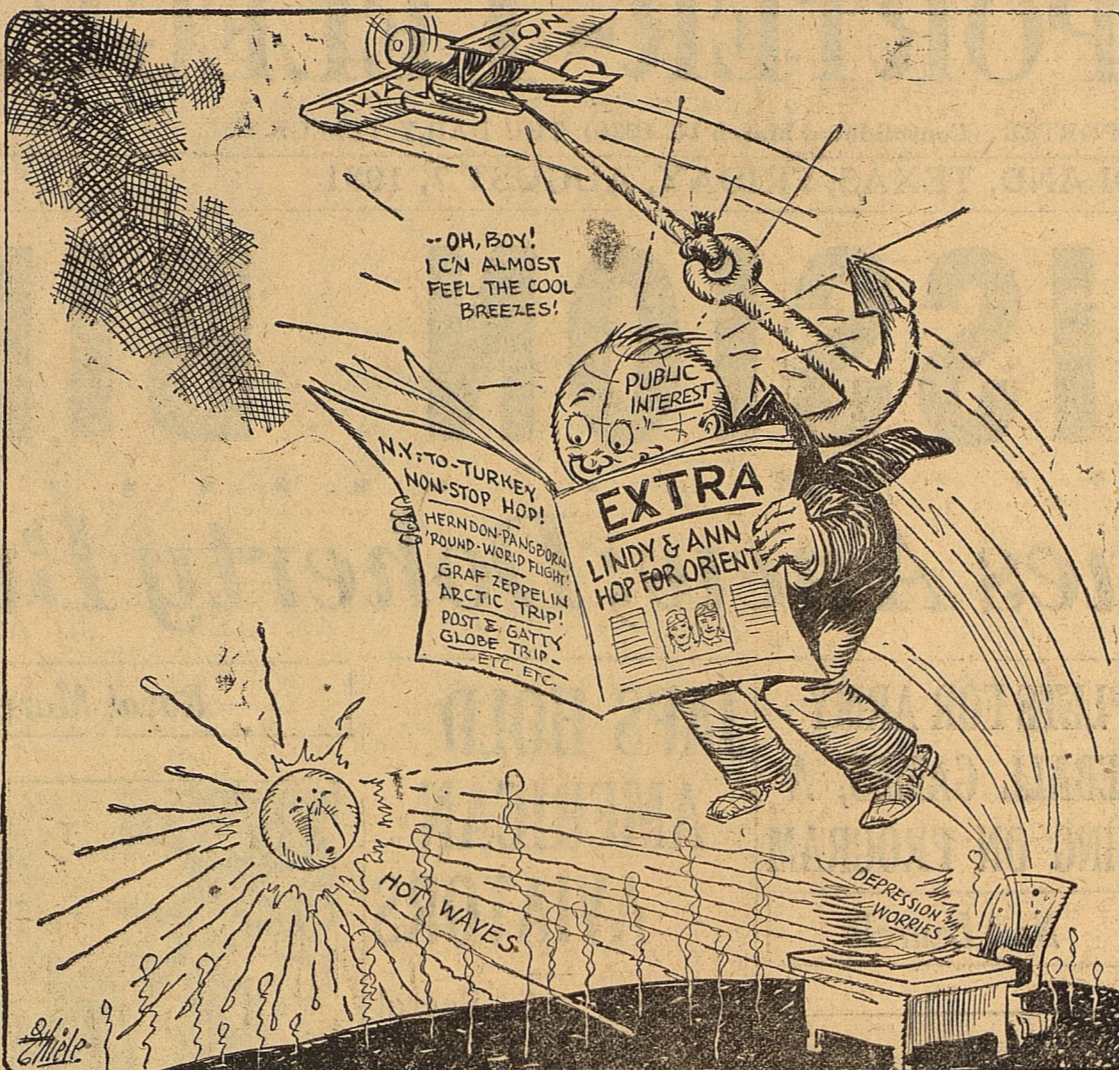

As a general thing, however, the toll bridge is simply a nuisance. There is little place for it in a nation so devoted to cross-country auto travel as this one. All bridges should be public property, and all should be free. It is to be hoped that the day of the toll bridge is about over.

Side Glances . . . . . by Clark

"We must be brave, dear. They're going to operate."

A Little Midsummer Relief

Newest Zep Wonderful in Every Feature of Build

This is the third of six stories on the U. S. Navy's new Akron, mightiest of the world's greatest airships, which is to be christened by Mrs. Hoover at Akron, O., on August 8. Previous stories have told of the size of this great \$5,000,000 Zeppelin and the safety measures taken during construction to preclude the possibility of another disaster like that of the Shenandoah.

By ISRAEL KLEIN Science Editor, NEA Service (Copyright 1931, NEA Service, Inc., AKRON, O., Aug. 7.—Launching of the U. S. S. Akron here will mark the end of a series of exacting constructional tests and the beginning of a new series of operation tests designed to prove the complete safety of Uncle Sam's sky dreadnaught.

These operation tests will determine whether the world's greatest airship really answers the specifications and designs of the engineers who built it.

First will come the dock tests, or shed trials which will be made before the Akron is allowed to leave its dock.

Next will be a series of trial flights in which the ship will be maneuvered under certain specified conditions prepared by the engineers.

"In the dock," explains Dr. Karl Arnstein, designer of the Akron, "our chief purpose will be to determine the agreement of our stress calculations with actual stresses on the ship. We shall do this by bending the ship first up and then down. This will be done by concentrating loads on both ends in order to bend her down and by concentrating a heavy load in her center to bend her upward.

Plan Intensive Tests "Then all control lines running to the rudders, the elevators, ballast bags, gas cells, etc., will be tested. Every instrument and electrical device will be tested.

"All gas cells will be inflated to various proportions and tested for their ability to retain gas. This will be done by measuring the purity of each cell and all of the cells combined."

Still in the dock, the ship will be allowed to ride statically—that is, by the lift of the helium in its cells alone—and observations will be taken on all the phases that enter into its static equilibrium or "trim."

Must Satisfy Engineers Then, thoroughly satisfied with the static performance of the Akron, the engineers will permit it to be taken out on its first trial flight.

This first venture out of the huge dock will be one of the most ticklish and exacting operations in the entire schedule of tests. For the movement of a huge airship like the Akron in and out of its berth involves

STICKLERS ABC DEF GHI. In the square above each letter stands for a number. The lowest number is one and the highest 100. The problem is to replace the letters with the proper numbers so that each row, horizontal, vertical or diagonal, will total 1000 when its three numbers are multiplied together. Can you fill in the necessary numbers? 7

Traces Ancestry To Big Paddle Man

When Robert Fulton gave the signal that started the history-making "Claremont" successfully up the Hudson river and thus into the halls of fame, steam was his ally, steam that was to revolutionize the world.

All of which precludes the announcement that his direct descendant, appropriately named Robert Fulton, is directing some of his own personal steam into a tenor saxophone as one of the important cogs in the Lucky Strike dance orchestra.

Robert, the elder, now probably perfecting improvements on the celestial barge that plows the River Styx, can be imagined twirling the dials on his super-astral receiver some evening, and, tiring of the heavenly chords of some interplanetary symphony, suddenly pricking up his ears as the sparkling syncopations of B. A. Rolfe and his Lucky Strike orchestra come bounding out of the loud speaker.

After long, weary days on the lonely Styx, and exhausted from the strain of keeping his boat on schedule, we can easily imagine his pleasure and exhilaration on hearing Lucky Strike's novel and distinctive music.

What a thrill the famous paddle wheel man must have had the day Clancy Rosenstein, the barque gossip, leaned over his shoulder and listened to the cheerful strains of "Happy Days Are Here Again" nudged him and said "the sweet tenor saxophone you hear is played by a descendant of yours."

And when Robert asked, "Not young Robert Lee Fulton," and Clancy nodded, we can imagine (such is our imagination) the old boy getting all steamed up, no little, and sighing contentedly as he murmured: "There is no stopping us Fultons, Steam is the thing."

docking of an airship as long as a city block and as high as a 11-story building.

Daily Washington Letter By Rodney Dutcher

Signals in the State Department Seem Crossed Up With Stimson Gumming Up Castle's Hoover Publicity.

WASHINGTON.—Regardless of who may have conceived the latest plan for saving Germany and irrespective of whether the plan is anything to brag about, it is obvious that the astute Undersecretary of State William R. Castle attempted to put over some splendid publicity for the administration and that the attempt was gummed up by none other than Secretary of State Henry L. Stimson.

Castle's assiduity in obtaining the utmost credit for President Hoover has been noted before and so has Stimson's penchant for getting things gummed up. But this is the first time that the respective tendencies of these two distinguished statesmen have clashed on such a delicate matter as that of picturing Mr. Hoover as a world savior and that is why you now hear predictions here that Castle will be the next secretary and perhaps before very long.

Dividing the Honors Castle was here working with Hoover throughout the save-Germany negotiations and handling the publicity. Stimson arrived to represent us at Paris and London after France, through haggling, had accepted the debt moratorium plan. After the statesman had hashed things over and it seemed apparent that Germany couldn't get anything more than a prolongation of existing credits Castle suddenly announced a new "Hoover plan" providing for prolongation of existing credits and a committee of experts to study the Germany situation and the question of how best to turn short-term credits into long-term credits.

Stimson promptly denied at London that there was any new plan, insisting later that the Castle-Hoover plan was old stuff already thoroughly discussed referring to it as a British-American plan and giving much credit to Premier MacDonald. One also observes that credit for the extension of the \$100,000,000 Reichsbank credit is given by the French to their own M. Moret, governor of the Bank of France.

But the point is that this government wanted that plan to be known as a "Hoover plan" pushed forward at a critical moment to save the situation. Stimson spoiled the effect and all good friends of Mr. Hoover are pretty sore. It is impossible to say whether Stimson merely didn't get the point of the Castle announcement and didn't realize the importance of giving the president full credit or whether he was sincere in thinking that the credit should be divided.

His Other "Bulls" Without choosing sides between Stimson and Castle, it must be admitted that the incident has recalled some of Stimson's previous "bulls" to the obscurity of his better achievements. There was the time at the London naval conference when Hoover was issuing a statement condemning the consultative pact idea while Stimson in London was explaining the kind of a consultative pact this country would accept. And his declaration of an embargo on arms to Brazil, designed to bolster a government which was promptly overthrown. And his sharp note to Russia after the Manchurian war scare was all over.

One of Stimson's strongest points has been considered his implicit obedience to Hoover, but Castle has been much more active in promoting the president's interests and advancing his own cause at the same time. Stimson is said to dislike Castle, but had to take him as undersecretary after the death of his good friend, Undersecretary Joe Cotton.

It was Castle who, when the story was widely current that Young, Morrow, Dawes and various New York bankers had sold the debt moratorium to Hoover after

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

Louie Arrington says it pays to advertise. He ran an ad in Sunday's issue of this paper telling the people again about his super service at Midland Drug Co.

He made mention of the fact that you can buy stamps there, use his telephone and directory, check your parcels free of charge, ask all questions you wish, meet your friends there and drive up and honk for curb service.

Louie says he sold 146 claps of thunder Sunday afternoon and Monday morning (he said he had 'em in stock).

But every time I think of Midland Drug I recall the incident of those crazy Frenchmen killing those poor, innocent kittens.

Chewing: "So you have just regained your eyesight. How did you support yourself during the time you were blind?"

Bull McCall: "I umpired night baseball games."

I can hardly wait for activities to open up at Lackey field.

I like to see turf kicked up by horses and I like to see it fly from cleats.

A drive by Midland's A-1 football field will reveal the fact that an enormous amount of growing has been going on there this summer. The fence is entirely covered with vines and it looks as if the boys on the burros will have to flop down the coin and go in through the gate.

long and desperate pleading, issued a timetable to demonstrate how, day by day for many weeks, Hoover had worked out the moratorium idea all by himself.

All the nasty little cynics here subscribe to the theory that Castle, in ballyhooing the "First Hoover Plan" and the "Second Hoover Plan" as such, has been working gradually toward his reward. If so, Stimson may have made Castle's path to the secretaryship just so much easier.

Mid Week Club Honored at Party Given by Mrs. Meek

Entertaining Thursday afternoon Mrs. Malcolm M. Meeks gave a colorful party to compliment members of the Mid Week and a number of guests.

Summer blooms in a variety of bright hues and pink roses graced the playing suite. Further appointments stressed a note of rose and white.

iced beverages were served during the games, which were won by Mrs. Homer Rowe for guests, Mrs. R. J. Moore for club and Mrs. J. L. Greene for cut.

Mrs. Meek's guests were Meses Clarence Scharbauer, Homer Rowe, Harvey Sloan, W. O. Pelphey, Foy Proctor, Fred Hull, Hayden Miles, Fred Turner, A. W. Thomas, Allen Tolbert, W. L. Brown, Elliott Cowden, R. J. Moore, I. E. Daniel, J. L. Greene and W. E. Wallace

Country Club Party Thursday Evening For Four Tables

Mrs. Harry Tolbert and Dr. W. G. Whitehouse were winners of prizes at the semi-monthly bridge party at the Midland country club Thursday evening. Mrs. Tolbert received glasses and Dr. Whitehouse won a card table.

Four tables were in play during the enjoyable evening. The next party will be Thursday evening, August 20.

Co-Workers Change Classroom in Baptist Parsonage

Due to the large increase in attendance, the Co-Workers' class will meet in the living room of the Baptist parsonage Sunday morning at 9:45 instead of the class room at the south entrance.

Sunday will be the second day of a four-week membership contest between three groups. It is expected that a much larger attendance will result this Sunday.

Specials on the program are a reading by Evelyn Myers and solo by Mrs. Barney Smith.

Supper for Mr. Driesell on Birthday

Honoring Mr. George A. Driesell on his birthday, a group of friends motored to the city park Thursday evening for supper.

Just before the picnic was served, Mary Elizabeth Newman greeted the honor guest with a clever birthday reading.

Following the meal, ball and other sports were enjoyed by Mr. and Mrs. W. E. Collier and son, Mr. Wesley Shull, Miss Georgia Barber, Mr. and Mrs. Butler Hurley, Mrs. G. C. Newman, and daughter, Mary Elizabeth, Mrs. Claude Ferrell and her daughter, Mary Lou, and Mr. Driesell.

Nancy Poses With Writer-Husband No. 2

Her divorce from Jack Kirkland, playwright, was only a week old when Nancy Carroll, red-haired film star, was married again—to another member of the writing craft. And here you see her with her new husband, Bolton Mallory, editor of "Life," as they posed for an exclusive photo at Newton, Conn. They met on a cruise to Havana last January.

Happy Birthday!

TOMORROW  
Mrs. B. W. Floyd

Musicians on Program

Mr. B. T. Smith, violinist, and Mrs. Smith, soloist, who recently moved to Midland, are on the program prior to the church service at the First Methodist church Sunday morning.

Mrs. Smith will sing "Wings of Peace" and for the offertory Mr. Smith will play "Adoration." Mrs. Holt Jewell will accompany the artists at the piano.

Watch our windows for daily specials. Stanley's Self Serve Grocery. 129-62

Personals

Mrs. A. B. Capers has returned from points in Colorado. She was called to Peona because of the death of her sister's husband.

Mrs. R. L. York and sons returned yesterday from a visit with relatives in Mineral Wells.

Mr. Dean of the Shepley Hardware company of St. Louis was here this morning on business.

Mrs. Harvey Conger is in Midland visiting in the home of her parents, Mr. and Mrs. B. H. Blakey.

W. C. Hamilton made a business trip to Odessa this morning.

Mr. and Mrs. W. S. Crook left Thursday morning for his home in Paris to spend a week's vacation with relatives.

Mrs. H. A. Houston of Stanton was in Midland shopping Thursday afternoon.

E. W. Anguish, former Midland oil man, was here for a few days this week from his home in Pecos.

Bob Blevins, former Midland resident, is here on business from Marshall where he has been located since the first of the year.

Mrs. W. L. Brown and son, Billy, and Mrs. C. E. Patteson left this morning to spend a few days in San Angelo.

Mr. and Mrs. J. A. Sacre left this morning for El Paso after spending a few days here on business.

Fritz Estill has been in Midland for a few days this week from Kermit, where Mrs. Estill and baby are visiting relatives.

Floyd Perryman and Howard Wertheimer returned to Fort Worth this morning after a few days here.

Mr. and Mrs. F. L. Stern and children of Dallas spent Thursday night here. They are en route to the Pacific coast on a vacation.

Mrs. Alice Fasken, David Fasken and Mrs. Mollie Ramsay left this morning for the Fasken home in Ross, Calif., after visiting relatives here several weeks. David is returning to complete high school work in Ross.

C. P. Martin, representative of GMAC, was here from El Paso this morning.

Mr. and Mrs. Edwin Horst of Dallas visited his brother, A. E. Horst and wife this morning. They were en route home after a vacation in New Mexico.

H. C. Mayfield of Sweetwater is a business visitor here today.

More Powerful Than Any Gasoline

"I changed to Esso"

It's Powerful Fast

13 TO 74% FASTER ACCELERATION

Publish the facts:

FIVE leading premium-priced motor fuels, including Esso, were recently tested for acceleration. Tests were made with a 7-to-1 compression ratio motor—an unusually severe test.

The time required to ac-

celerate from 18 to 45 miles per hour without knocking was accurately recorded on a dynamometer.

Here are the results:

- Fuel A . . . 18.2 seconds
- Fuel B . . . 19.2 seconds
- Fuel C . . . 20.0 seconds
- Fuel D . . . 28.1 seconds
- ESSO . . . 16.1 seconds

This is 13% faster than the best competing premium

fuel—actually 74% faster than Fuel D.

A phenomenal success in 20 foreign countries, Esso was perfected in America by the world's leading petroleum technicians. It contains Ethyl—but it is far more than an ordinary Ethyl fuel.

Make a ten-day test of this new fuel. Find out for yourself what your car can do with Esso. Then change back to any other type of gasoline—if you can.

Edwin C. Calhoun, Pastor  
Two musical numbers are on the morning service program. Mrs. B. T. Smith will sing and Mr. Smith will play a violin solo during the offertory.

The pastor will preach at the morning and evening hours. Epworth leagues will meet at 7 o'clock.

Choice Cooks' Corner

**Tomato Jelly Salad**  
3 cups cooked tomatoes  
1-4 cup chopped onion  
1-2 cup chopped celery  
1 bay leaf  
1 clove  
1-4 green pepper pod  
1 teaspoon sugar  
1 teaspoon salt  
1 tablespoon granulated gelatine  
1-2 cup water  
Mayonnaise  
Lettuce

Cook the fresh or canned tomatoes with the onion, celery, bay leaf, clove, pepper, sugar, and salt. Soak gelatine in cold water and add to the boiling tomatoes. When gelatine is dissolved strain and pour into small molds. When serving turn each mold into a nest of lettuce leaves and place 1 tablespoon of mayonnaise on top. These may be made to look like small tomatoes or the jelly may be molded in a square pan and cut in diamonds or cubes

Helpful Health Suggestions

By Martha Bredemeier

Is Your Bed Right for Sleeping?

1. Do you sleep alone?
2. Is your bed at least 39 inches wide?
3. Is your bed spring made of a large number of vertically placed coils?
4. Is the mattress free from lumps?
5. Are the springs firm enough that you cannot push the top of them more than half an inch to one side with one hand?
6. Is the mattress too soft, so that you sink into it so far that it is difficult to turn over without getting up?
7. Are the sheets at least 2 feet longer and wider than the top of the mattress so they can be tucked securely under the mattress and prevent wrinkling and loosening during the night?
8. Is your bed frame well built so it is free from creaks and squeaks?
9. Do you use wool or camel's hair blankets in winter so you will have the most warmth with the least weight?
10. Is your bed soft enough that when you are on your side your arm will sink comfortably into the mattress?

What is Diphtheria?

Diphtheria is a germ disease. It is caused by a special kind of bacillus which finds the most favorable place for its development on the membranes of the surface of the throat. The germs find their way directly from one person to another usually from the sick to healthy persons, with whom they come in contact. When once established in the throat, the diphtheria germs produce large amounts of strong poison (toxin). This poison is absorbed into the patient's blood and is responsible for the alarming character of the disease. Sometimes apparently healthy individuals harbor the germs in their throats, yet remain perfectly well. They are called "carriers" because they spread the germs. The undiscovered "carriers" in a community are a constant danger to those who are unprotected.

**Asparagus and Tomato Salad**  
Choose small uniform tomatoes, one for each person to be served. Cut a slice off of both the stem end and the blossom end of each tomato and carefully scoop out the center so as to make a ring about an inch or more wide. Dress with French dressing and put a bundle of asparagus tips in each tomato ring. Serve on lettuce with French dressing and cheese straws or cheese wafers. These may be served on individual salad plates or they may be placed on a large platter from which they can be served later.

# HARDWARE AND TELEPHONE COMPANIES CLIMB NOCTURNE LADDER

## Stanton's Smooth Playing Starettes Knock Co-Eds Off Bi-City Perch

### NEWSPAPERMEN IN LOSS TO BELL SLUGGERS

Midland Hardware drew away from The Reporter-Telegram, to take sole possession of second place in the standings of the Nocturne league, and Bell Telephone company slipped into a tie with the newspaper club for third place—when the Bell boys won from the Newsies last night, 6-5, and the hardware company had little trouble in blasting out a 13-3 win over Texas Electric.

Hard hitting of the hardware crew won its game, but Bobby Miller's pitching and errors beat The Reporter-Telegram in the first game. The Barron boys collected only four hits during the night, while the Telephone company launched out seven.

Joe Pyron will have to be added to the list of pitchers who are growing proficient in the "sock ball" league. He allowed the Electricians only five hits while his mates were pounding Joe Chambers for 17.

### SPORTS REPORTS

By R. C. HANKINS

Got a good start, or thought we did, this morning by sticking the Texas Electric Service crowd for coffee. But found out Pat Dillard was from Cow Town, our old home town, and played golf on the course at Katy Lake, next door to our home. The amenities changed around, automatically, so what could one do? Dillard is with the commercial department.

Along comes the intelligence from our friend, Forest King, president of the Stanton country club, asking 15 Midland golfers to visit there for a tournament Sunday afternoon. Marion M. Seymour, secretary of the Midland country club, and Harry Rountree for Calhoun in the fourth. Bloss for Templeton in second.

ry Tolbert, former member of the sports-greens committee will nozzel each other as they get their heads together some time this afternoon in selecting the players. In Midland-Stanton games, an effort is made here to get players well known to Stanton, so that the long tramp around the course may be given over more to renewing friendships than to bowing from the hips in continual acknowledgement of introductions.

Play begins promptly at 1:30 and, for once in our life, we'll be allowed in the swim. Was it an eye for Stanton business that prompted Forest to specify that our bags be brought along? Thanks, very much for the kid invitation. We'll be there, whether we tee up with the others or not. We can carry some one's clubs very nicely, and are the sort of caddy who never coughs when one is about to address the ball, and keep our slim shadow in our pocket when on the putting green.

Our Midland golfers like to go to Stanton. There's always an atmosphere of friendliness for us. Stanton golfers don't particularly play to win—but play such steady games as to prohibit losing. At least, that has been the order up to date. Stanton has polished off Midland golfers on two occasions, and as we took occasion yesterday to mention, made the pot pourri extend to some of the B teams of other towns. The luster of the polishing was barely distinguishable the last time we were in Stanton, however, as a heavy sand storm came up and coated us all in dust of the consistency of pumice.

We understand a lot of work is being done on Stanton's sand greens and everything is greener on the fairways due to the excellent showers of late. Stanton's course never grows monotonous. It is up hill, down hill and otherwise, with plenty of natural hazards and rolling distance. The No. 8 over there ranks with the hardest fairways anywhere, a fence to the right, a bad rough to the left and the green miles away, seemingly ahead. When Tolbert and Seymour call you, asking that you make the trip, don't back up on the

proposition. Say yes in a hurry, for a lot of the boys want to go.

Baseball games Saturday and Sunday with the Marfa soldiers. Band music everywhere. Dances. Baseball games to begin at 3:30. Carroll Hill has collected an all-star aggregation to oppose the sharpshooters of the army, and wants a big crowd out to see the affair, which will be played at Rainwater diamond. Carroll and company worked the diamond over today and will give it another touch or two before the game. The soldiers have lost few games in the past several seasons and may give the locals something to worry about.

Incidentally, who will head the Stanton Starettes? We don't know, and have no guesses to hazard. The Betty Co-Eds were easy to that club.

The Petroleum girls made it hard for the Martin county fair sex in the last meeting of the rivals, but Stanton seems to have the punch that lets them steadily forge ahead to wins, even if the margin is only one score. Can Mmes. Frazer, Herrington, Hurst et al turn the trick? If not, who can? There you have us. But we'll be on the sidelines when the Business girls meet Stan-

ton next game. It ought to be good.

An interesting grouping of the fighters by Dixon Stewart shows Sharkey and Stribling far down the list:

Recent developments have forced a complete revision of standings in heavyweight boxing ranks, with promising youngsters advancing to the places formerly held by the better known veterans.

Our own personal ranking of the heavyweights—in case anyone is interested—shows Max Schmeling holding the No. 1 position and Tommy Loughran of Philadelphia retaining the runner-up berth, but from there on down there are numerous changes, with the contenders rated as follows:

The list shows a wide variance from the 1930 heavyweight rankings, as compiled by the Everlast Boxing Record book from a vote of 70 of the nation's leading boxing critics. In this listing Stribling was given first place, with Sharkey second, and Heavyweight Champion Max Schmeling, third. Carnera, Tuffy Griffiths, George Godfrey, Campolo Loughran, Max Baer and Johnny Risko were given the remaining berths in the first ten.

Ranking of Retzlaff, Schaaf and Hamas above the better known stars is open to dispute, but these three youngsters have made rapid strides and are recognized as the best prospects in the game. Stribling and Sharkey forfeited all claim to recognition as championship contenders in their respective bouts against Schmeling and Mickey Walker, while Walker's showing against Sharkey did not establish the former midweight champion as a real heavyweight threat.

Sharkey hopes to get back in the picture by belting Primo Carnera from further consideration in a September bout, but Stribling—a distinct disappointment against Schmeling—appears likely to desert boxing for all time.

Neither Campolo nor Carnera has shown anything to date to warrant serious consideration. Primo's opponents being limited

### STAR ALWAYS WEDS MONEY OR DUNCE IN SCREEN WOOINGS

Winnie Lightner, now at the Ritzy theatre in her latest Warner Bros. laugh riot "Gold Dust Gertie" hasn't had any luck at romance at least on the screen.

All her conquests have been false ones. Never once has she married the hero, and only once has she even been allowed to appear actually in love with him.

In every screen romance Winnie has been the aggressor, picking her victim and then going out to get him. Love never seems to enter into her affairs in pictures, except in the one unsuccessful instance mentioned before.

"Evidently I'm not the type," Winnie says resigned. "I'd like a picture in which I could be a lady and have sleek and desirable men bidding for my favors. But executives, writers and directors are all against me."

"I guess I'll just have to be content with a lot of goofy matches in my picture career."

Winnie's first screen mate was to fourth and fifth-rate "tankers," while Campolo has failed in every important bout.

Probably Stribling or Sharkey and perhaps even the little Walker could defeat any of the three young prospects—Retzlaff, Hamas or Schaaf—at present, but the first named trio are veterans who are on the down grade, while the youngsters are coming along fast. Schaaf, most experienced of the trio, will receive a stiff test against Campolo this month, unless court troubles halt the bout, are limiting their competition to the better second-raters.

Loughran, a veteran, who now is fighting better than at any time in his career, would be Schmeling's most dangerous opponent at present. Tommy's boxing skill probably would carry him to victory over a ten-round route despite his lack of punch, but it is doubtful if he would have the endurance for a 15-round bout with the champion.

Albert Gran, tipping the scales completely over when he stepped on them and only two sizes smaller than a house.

She gave him plenty of punishment in "Gold Diggers of Broadway" but she landed him in the net of matrimony to the tune of a good round sum before the picture ended.

The second screen romance was the nearest to the real thing in her experience. She loved Chester Morris and he loved her—like a sister or an aunt—but not like Winnie loved him, if you remember. So in that picture she just didn't get married at all, which after all, was different.

Then in "Hold Everything" Winnie at the last moment was allowed to marry Joe E. Brown. In fact she has married him twice, if that is any distinction. It was one of those stories in which she was crazy to marry anybody, and particularly crazy to marry anybody as foolish as Joe E. Brown.

With that match to her credit, Winnie starred in "The Life of the Party" and before the picture ended she had succeeded in wheedling Charles Butterworth into matrimony. Brown she had married for no reason at all. Butterworth she married for money, and because he was seldom home.

Next was the second trial with Joe E. Brown in "Sit Tight" whom she married in that picture particularly because they found themselves on a boat bound for Havana. Anyway the public rather expected them to end up as domestic partners in any pictures in which they both appeared, after "Hold Everything."

Widows in Korea do not remarry, no matter how young they may be. Even though they have been married only a month, they may not take a second husband.

### CLUB SHOWS MUCH POWER; FAVORED TO COP FLAG

Scoring 13 runs on eight hits and on 13 errors of their opponents, Stanton's Starettes took the Women's Bi-City league lead in Stanton yesterday. The Midland Betty Co-Eds were the sacrificial victims.

Stanton looked like the strongest club of the league, fans said. There were few extra-base hits, three doubles being the only bingles to be charged to that department, but Stanton girls flashed in the field, taking 12 fly balls and muzzing only four chances during the afternoon. The Starettes gave a monotonous demonstration of the stuff that puts three up, three down.

Mary Wilson of Stanton hit three times out of five times at bat.

By virtue of their play in the last three games, the Starettes are expected to win the first half of the women's league by many of the fans who have been watching them play. The only club likely to prevent their winning the first half is seen as the Business Girls, who are now in second place.

The Petroleum and Business Girls play this afternoon at 7 o'clock at Rainwater diamond.

### Improved Ford Car Announced

**DETROIT.**—Maintaining a non-committal attitude on recurring rumors of plans for six or eight cylinder models, officials of the Ford Motor Co. announced that an improved "Model" will be presented next month.

A September schedule of 100,000 units of the improved four-cylinder car is planned, it was said.

Spokesmen for the company refused to divulge details of the improvements. It was reliably learned, however, that the car will be lower and faster than the present model. Test drivers are reported to have attained an average speed of 100 miles with the improved machine.

### OIL PLANE ENGINE

**BERLIN.**—The Deutsche Luft Hansa, German aviation organization has been conducting extensive tests with an airplane engine burning heavy oil as fuel. The designer of the engine claims that the heavy oil engine will lessen the danger of fire and effect a saving of 65 per cent in the cost of fuel, and increase the radius of a plane using it from 2,500 to 3,675 miles.

### Legislature--

(Continued from page 1)

scope, successfully was offered by Senator Walter Woodward of Coleman. The amendment was designed to make any pipe line, whether it be a common carrier or not, a common purchaser and subject, therefore, to regulations requiring common purchasers to buy oil without discrimination as between the various producers.

### Bitter Opposition

Unexpected and bitter opposition to the new commission developed in the house and the fate of the bill was expected to be decided by a few votes.

While the senate was arguing an amendment to include the duties of several other boards and commissions in the duties of the new conservation commission, the house adopted an amendment restricting its activities to oil and gas conservation.

Oratory flew fast and thick in the house as members debated the advantages and disadvantages of appointive and elective commissions. Charges that the railroad commission, present administrators of the conservation laws, had failed to discharge its duties and had been negligent were met with the counter charges that the commission had gone farther in conservation matters than the present law allowed. The recent opinion of the federal court holding their prorator orders invalid was cited to back up this argument.

### Wagstaff Bill Scored

An amendment to strike out the enacting clause of the Wagstaff bill was pending when the house adjourned. The amendment, submitted by Rep. Walter E. Jones of Jourdanton, drew the battle lines more tense and caused another flood of oratory to be unleashed.

Proponents of the bill faced the combined strength of two factions, the factions supporting the present railroad commission and a group opposed to establishment of any new commission for any purpose. Whether proponents of the Wagstaff bill would be able to overcome the opposition was a moot question, with few predictions being made as to the outcome.

For the second successive day, the senate, worn with the fray, adjourned without action on the highly controversial amendments to abolish the several departments and add their duties to those of the proposed new conservation commission

### East Texas Helps

**TYLER, Aug. 7. (P)**—Impetus was given the shutdown movement in East Texas Thursday when 37 of 60 oil operators meeting here voted to voluntarily shut down their wells.

The group asked for a mass meeting to be held in Tyler August 14 at which time the general shutdown would be declared.

A sharp denunciation of East Texas operators offering oil to Oklahoma refiners "thus nullifying the efforts of the governor of that state" was made by the group.

### Operators Condemned

A resolution condemning such operators was adopted.

"We condemn the action of those who are willing, for their own self ends to disregard the rights of others in order to dispose of a few thousand barrels of 40 gravity oil at 10 or 15 cents a barrel," the resolution said in part.

The operators balloted to institute the shutdown movement thru the adoption of a resolution which decried inequitable marketing and called attention again to the chaotic condition which caused alarm and distress in the oil industry.

Members of the shut-down supervision committee named were: Marvin Kelly and Fred Stuckey of Longview; J. Malcolm Crim and Roy Laird of Kilgore; Judge Charles Brackfield of Henderson; Gus F. Taylor and F. W. Fair of Tyler.

Among those agreeing to shut-down were: W. L. Randall, Clark and Cowen, Early Calloway and associates, Gilcrease Oil company, W. G. Johnson, J. C. Kilgore, Lewis Hart, Harry Harbury, Fox and Butts, F. M. Burke, Mudge Oil company, M. D. Gosvenor, O. V. Intyre, Black and Strube, L. M. McCracken, T. J. Cannon Oil company, Eugene Mays, Jake Hudson, Hamill and Smith, E. C. Ellzey and Shano Oil company.

### Disarmaments--

(Continued from page 1)

could be made.

The notification just given, however, by England, and the dominions makes it evident that the necessary unanimity for the covenant amendments cannot be secured unless the rest of the nations agree to a actual reduction in armaments.

In the meantime, France also has taken an almost identical attitude.

### French Argument

In a note she points out that while favoring fully the harmonizing of the covenant with the Kellogg pact, it is quite apparent that this never can be done until a successful disarmament conference has been held.

However, as she always has insisted that if war is to be abolished as a means of settling international disputes some other means must be substituted, she urges that the league in the meantime concentrate all its efforts on securing the most universal ratification possible of the league's general act of arbitration. The latter, which is the league's last word towards obligatory arbitration, has been ratified to date by fifteen nations.

### Bricks--

(Continued from page 1)

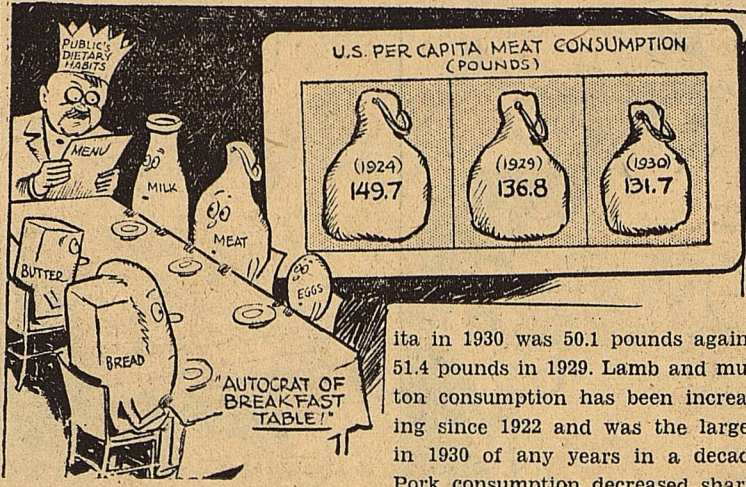

for 21 days, for then it will turn into wine. Do not shake the bottle on a day, because that makes it work."

There is a twinkle in her eyes as she says it. Customers smile back—and some have been known to wink knowingly. Then after they have received instructions on what not to do (translate to suit the taste) they walk airily out, in one hand a package that looks amazingly like a pound of butter.

### All Kinds of Bricks

## DEMAND FOR MEATS LOWEST SINCE 1922, SURVEY SHOWS

**BY ALLARD SMITH**  
Executive Vice President, The Union Trust Co., Cleveland, O.

Changing of dietary habits of the American people constitute an important factor in the market on food stuffs. The farmer who turned to live stock when the consumption of wheat, flour and cornmeal fell off some 40 per cent between 1889 and 1919 now finds the per capita production of meat declining in favor of fruits, vegetables and dairy products.

Production and consumption of meats in 1930 reached the lowest total since 1922, according to government estimates, while the per capita consumption was smaller than in any year since 1919. Depression conditions which have interfered with the earning capacity of many probably accounts for a part of the decrease, but the urge for the "vitamin" foodstuffs has been largely responsible.

Per capita consumption of all meats was 131.7 pounds in 1930 which compares with 136.8 pounds in 1929 and 149.7 pounds in 1924. The consumption of beef per cap-

ita in 1930 was 60.1 pounds against 61.4 pounds in 1929. Lamb and mutton consumption has been increasing since 1922 and was the largest in 1930 of any years in a decade. Pork consumption decreased sharply.

Contrasting with the decreased use of meat there has been a marked increase starting with 1920, in the use of dairy products and in the same period a 54 per cent increase in the consumption of green vegetables and fruits. Some of this latter increase must be credited to the improved methods of refrigerated shipment and of storage and sale in modern food depots.

In order to keep step with the changing dietary habits of the people farmers have shifted the character of their crops. Live stock, fruits, vegetables and poultry have to a considerable extent replaced staple crops of grain and the raising of live stock may center still further on dairy animals rather than those raised for meat. Although wheat is dramatized as the great farm crop, it furnishes only 7.89 per cent of the farmer's cash income each year, while eggs and chickens account for 8.15 per cent. These products, together with milk, cotton, cattle and hogs produce practically 60 per cent of the farmer's cash.

### Chef to Grease Skillet on Skates

**CHEHALIS, Wash. (UP)**—Imagine not being able to grease a frying pan without getting your feet into it.

That's just what the fellow who greases the eight-foot pan for the Farmers and Merchants picnic here, has to do.

The specially prepared skillet will cook a 10,000-egg omelet in celebration of the event. The chef will attach large slabs of bacon to his feet and in the manner of a skater, sliither about the hot metal.

Even the Lewis county farm organizations, who are contributing the eggs intend to make it a day of fun breaking the eggs for the omelet. Women will have a contest to see which is fastest on this typical breakfast duty.

Governor Roland Hartley will don the white muffin cap and apron to serve visitors.

When evaporated, one ton of water from the Red Sea yields 187 pounds of salt; the same volume of water from the Atlantic yields only 81 pounds.

James Fenimore Cooper wrote 70 books in 30 years.

Claret, malaga, muscatelle, port, sherry, zinfandel, tokay—bricks of all those flavors are on sale. Reads a display in a window: "Manufacturers, clergymen and rabbis who have government permits to manufacture and dispense sacramental port or sherry wines may use these bricks for their legitimate purposes."

And they're "excellent for punch, syrups, and flavoring for cakes and pies." Oh, yes?

Down the street a few blocks Fred A. Victor, superintendent of the Anti-Saloon league hears reports of the "wine brick" store and admits nothing can be done now.

And a curious New York public which used to be interested in gold bricks has turned all its attention to bricks of another and more modern kind.

Friday and Saturday are the last two days to have your car washed and greased for \$1.00. Will call for and deliver. Midland Motor Co. Phone 300.

### Goat's Diet Cause Of His Demise

**KINSTON, N. C. (UP)**—After eating one of the most varied diets in the history of goats, extending over a long period, William B. Alston's goat "Bill," was shot to death and given to a negro family to be eaten.

Here's the goat's record:

Tuesday—Ate part of the seat in an automobile.

Wednesday—Ate the hollyhocks in the flower yard.

Thursday—Ate Alston's pajamas.

Friday—Ate two days' mail.

Saturday—Ate the straw out of every hen's nest on the premises.

Sunday—Tried to eat Alston's prayer book.

Monday—Consumed three rows of assorted flowers.

Tuesday—Goat was eating black-eyed Susans. Owner picked up shotgun and blew goat's horns off. Goat itself then eaten by negroes.

### Camel Orchestra Features Sinatra

Few know it, but Ray Sinatra, arranger for Jacques Renard's Camel orchestra, was well on the way to a career as a concert pianist when Renard persuaded him to enter the dance orchestra field. At the age of 13 he gave a concert with Arthur Mahoney, boy soprano, in Boston's symphony hall. One of the distinguished guests was Governor Calvin Coolidge. Ray played some chopin and Brahms waltzes.

After that Ray studied in the Walter Damrosch school and with Percy Grainger and Henry Levine. He studied harmony and composition with Fortuna Gallo. His father, who had played the violin in Italy, had visions of a classical career for his son.

But to have a career there was the matter of money. So to finance his studies, Ray played the piano in dance orchestras. His thorough knowledge of music and his ability, to make delightful arrangements made him of increasing value. Finally Renard met him, and the two have been together now for seven years.

Those silvery notes you hear during the Camel program come from the celeste, which is also played by Sinatra.

RENT WITH CLASSIFIEDS

### Farmer Has Only One Stalk Cotton

One stalk of cotton came up on the S. H. Gwyn farm, three miles north of Midland, and the farmer promptly chopped it down.

Gwyn, formerly a good cotton farmer of the cotton belt of Texas, did not plant a cotton seed this year, the single stalk being a volunteer. The farmer has 13 acres in grapes, fruits, vegetables and legumes, and makes more profit from these products than he could with any number acres of cotton, he explains.

### Seal Dodges "Life Saver"

**PORT TOWNSEND, Wash. (UP)**—Next time J. H. Worthington of Sheboygan, Wis., attempts to rescue a drowning person, he will make some inquiries before jumping into the water.

He was walking along a pier when he heard a strangled cry coming from the water. It was nearly dark and he could see a head bobbing on the waves.

"Keep paddling, I'll save you," he cried as he kicked off his shoes and removed his coat. Worthington, it was said, had won a medal for saving a man in a lake near Sheboygan.

He dived off the pier and started swimming toward the bobbing head which was uttering strange noises.

"I couldn't imagine what the fellow was about," Worthington said after he had been pulled out of the water. "He kept making strange noises and diving, and kept out of my reach. It was nearly dark and I had trouble keeping him in sight, but I kept plugging away, trying to reach him."

Worthington was exhausted when some men in a small boat pulled him aboard.

He had been trying to rescue a seal.

### BATTLE OF RIGHTS

**KNOXVILLE, Tenn.**—Lawyers may have a persuasive way with juries, but Ted Livingston, taxi driver, will bandy words with the best of them when it comes to disputing the right of way on a city street.

Livingston recently tangled with C. Raleigh Harrison, local lawyer, and as neither would move for the other, they blockaded Market street for 45 minutes until police came along and broke up the jam.

### GOLD CARAVAN GUARDED

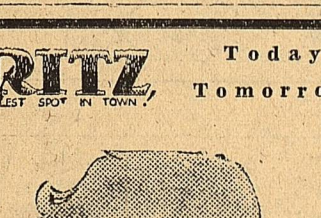

**ELKO, (UP)**—The "wild west" atmosphere of the movies was put to shame when a caravan of cars loaded with a ton of bullion arrived here from Jarbidge. Ten booted, sombered men accompanied the precious metal as guards. They were walking arsenals, armed to the teeth with six-guns, rifles and sawed-off shotguns. The bullion was sent to the mint in Salt Lake City.

The camel was one of the first animals to be domesticated.

China's unused resources, despite the age of the country, are said to be similar to those of the United States 400 years ago.

### Convicts Moan Auburn Changes

**AUBURN, N. Y. (UP)**—Old Auburn prison "ain't what it used to be", prisoners agreed as they prepared to move into the newly finished building.

Airy cells complete with wash-bowls, toilets, and running water, as well as radio connections, awaited them.

No lead pipes will be available to bash guards, however. Architects have designed the cells in such a way that all plumbing is concealed; the wash-bowls are even set into the walls and the pipes enclosed in steel. Each cell is eight feet by ten feet.

Civilians employed in building the new north wing daily look down into the "crow's nest" where offenders against prison discipline march in circles for their exercise. Perched on the top of the south wing, surrounded by high walls, the only view available to the marchers is the sky. At the end of their prescribed "turkey strut" they are herded back into the 230 new isolation cells. Here they look across the hundred foot alleyway toward the 426 "de luxe" cells of their fellow prisoners.

TURKLE TRADEMARK UNLUCKY

**TORONTO, Ont. (UP)**—If you manufacture goods bearing the likeness of a turtle as trademark, change your trademark before trying to sell in China, advises Col. I. M. Cosgrove, Canadian trade commissioner, at Shanghai. In China, the turtle is a "bad joss" character and an insult, says Colonel Cosgrove. One firm which shipped goods with that trademark to China were "stuck," according to him.

### ENTERTAINMENT FOR JOBLESS

**TORONTO, Ont. (UP)**—Free movies and free books will be provided for Toronto's unemployed, if Mayor William J. Stewart's plans materialize. The mayor has instructed A. W. Laver, recently appointed city commissioner of public welfare, to try to find some public-spirited citizen or citizens, who will provide movie equipment and educational and instructive films, and high-class books.

### LIGHTNING DESTROYS PIPE

**RICHLANDS, Va. (UP)**—Dick Blankenship was sitting on the front porch of his home here when lightning struck a tree in the yard and killed a cow and six pigs standing beneath it. Blankenship was unharmed, but the pipe he held in his hand was burned to a crisp, and the soles of both his shoes were neatly ripped away.

### FROG DROWNS ROBIN

**LYNCHBURG, Va. (UP)**—Park Policeman Wesley Gilliam saw a robin dart into a pond and start flying away with a large bullfrog. The frog was too heavy and the robin dropped it into the pond only to return and try again. Several times it was obliged to drop back until finally the bullfrog managed to pull it down and keep the bird under the water until it was drowned.

### HAS DONE SOME PEDALING

**EVANSVILLE, Ind.**—Will Vickery is 72 years old, and in the past 51 years of his life has pedaled his trusty bicycle more than 100,000 miles, a durability record to be envied by the best automobile.

But Will hasn't used one bicycle all that time. In 51 years he has worn out 11 machines, and has "burned up" more than 100 sets of tires. He rides from his home to his grocery store every day, a distance of four miles. Sometimes he boosts up the distance to six miles by pedaling home for lunch.

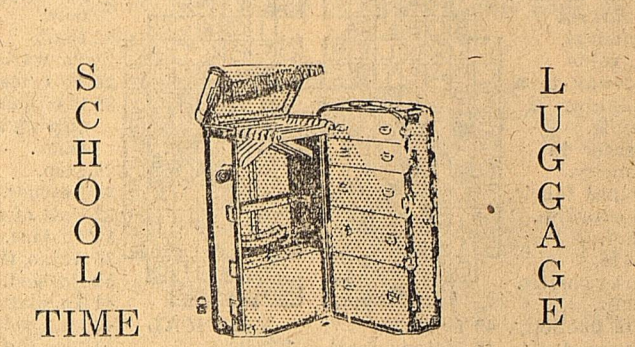

Despite his age Will can "step on her" when he has to. When it looks like rain he jumps up his speed to 15 miles an hour. In nice weather, however, he rolls along at the easy speed of six miles an hour.

### STICKER SOLUTION

50	1	20

**CUT FROM THE "HEART" OF THE CRUDE**

GASOLINE 35%
KEROSENE 10%
GAS OIL 22%
PARAFFIN NEUTRAL
CYLINDER STOCK

997's 2% of the Crude Contains only Petroleum, High Grade, Lubricating Oil, and Anti-Oxidant.

Many refiners use as high as 54% of the crude. The diagram above shows the actual amount of crude we use for 997—only 2% of the total.

Above all else you want one thing in a motor oil

## Stability

—that's what 997 gives you

The average motor oil is made from parts of the original crude that are either too light (like kerosene) or too heavy and sluggish (like so-called "cylinder stock"). That's why you'll notice the difference if you change to Humble 997. It's made from just 2% of the crude. That's why 997 won't break down under the severest heat and that's why it assures lower oil consumption. Ask your nearest Humble dealer to drain and refill your crankcase.
