Subscription Price Daily, by Carrier or Mail Per Year \$5.00 Per Month .50c Advertising Rates Display advertising rates on application. Classified rate, 2c per word; minimum charge 25c. Local readers, 10c per line.

Any erroneous reflection upon the character, standing or reputation of any persons, firm or corporation which may occur in the columns of the Reporter-Telegram will be gladly corrected upon being brought to the attention of the firm.

TRIBUTE TO ADVERTISING

Action of the Chesterfield cigarette manufacturers in sending a heavy advertising plate to The Reporter-Telegram by air mail first class, at a cost of approximately \$25 postage in addition to the newspaper advertising charge, is a tribute to the pulling power of the newspapers. The advertising was issued to be released Monday of this week. Whether through error or because of the fact that quick insertion was desired after the copy was prepared, the plate was rushed by the world's fastest delivery service, costing the advertiser almost twice as much as it would have cost through the usual channel of the mails.

The cigarette manufacturers have found by actual experience that newspaper advertising is the cheapest form of coverage and that it really does increase sales volume. This may be considered as a tip to other lines of business.

TEXAS PRESS TO CONVENE

Members of the Texas Press Association, editors and publishers of the state's newspapers, will meet in San Angelo June 11th, 12th, and 13th.

While dollars and cents are poor gauges to measure the importance of the newspaper business, it is significant that the printing and publishing business ranks fifth among the state's manufacturing industries. Without newspapers, it is doubtful that Texas ever would have declared her independence from Mexico. Without newspapers it is certain that the men who won that independence could never have been lured to the raw and unknown country beyond the Sabine. In Texas as elsewhere, newspapers were the instruments of empire builders. Their worth and their importance must be measured in terms of service rendered or results achieved, rather than the dollar value of a finished product.

In the preservation of the commonwealth their predecessors helped to found, the editors and publishers of the Texas newspapers of today are confronted with a task quite as important as the one of a hundred years ago. It happens that newspapers are the substance that binds together the essential elements of a Democracy. They are the sentries of the public conscience. Through them, the people become informed upon problems of the day; through them is moulded the opinion of the majority—an opinion which, expressed through the medium of the ballot, becomes the law of the state. The old Republics perished, because there were no newspapers for the dissemination of information, no editors to make a great group of people think to the same end upon a common problem. The new Republics will endure so long as the newspapers remain true to themselves and the interests of the people.

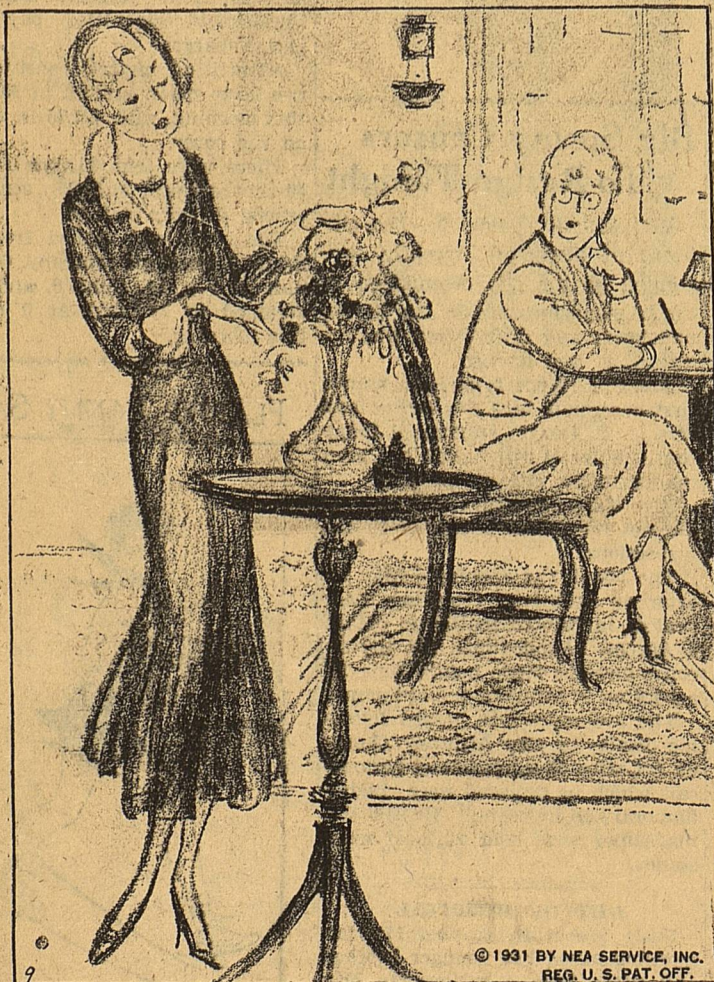

It is for reasons such as these that the annual convention of the Texas Press association at San Angelo becomes an event of more than passing importance. San Angelo is to be congratulated: it entertains one of the most influential and powerful of all conventions that come to Texas.

TAXING THE MILLION-HEIRS

The whole question of how taxes shall be spent and how they shall be raised comes up as the government contemplates a huge deficit and listens to criticisms about the vast expenditure of money by the army and navy. Regardless of sincere attempts to economize, it is evident that the cost of government will increase as the years go on. It is quite apparent, then, that the major problem is determining new sources of revenue.

Many men, including Senator Couzens, believe that the rich men should be taxed more. That might handicap capitalists using their fortunes to develop industry and give men jobs. It is a question for debate. But one source of wealth seems a logical source for increased taxation. Inheritance taxes on millions left by persons who die could be larger—perhaps as much as 50 per cent. Such taxes would swell revenues markedly. And, after all, is there any reason why heirs of millionaires, should never be forced to labor? Most of us are compelled to start at scratch.

Side Glances . . . . . by Clark

"But, my dear, these young men you're inviting to your wedding—are you sure you're not still engaged to any of them?"

Daily Washington Letter By Rodney Dutcher

Big Guns Will Boom Again in Tariff War at Next Congress, But There Will Not Be Any Particular Result

WASHINGTON.—There probably will be a swell tariff fight at the next session of Congress, but it will be only a fight without any particular result.

There will be a lot of noise in the air and the attack on the Hawley-Smoot act probably will be more ably directed than any similar assault in the past. The persistent squawks from many directions will be dimmed into the ears of both houses. But even though there will be more Democrats and Progressive Republicans than regular Republicans, the setup is such that seekers after high tariffs seem to stand just as good a chance of success as those who would scale down the rates.

To most politicians the tariff fight in congress will be so much drum-beating for next year's presidential campaign, in which it no appears that the Democrats will undertake to make the Hawley-Smoot law an important issue.

Administration Stands Pat The administration party is definitely committed to standing by the tariff. It couldn't do much else, anyway but lately its leaders have stepped out aggressively to tout the high rates as an effective to tout through the depression period rather than an important contributory factor. The present rates, the Republican National committee says in an official statement, are no more than adequate and in some cases perhaps not high enough. Senate Floor Leader Jim Watson contends that the tariff has maintained employment 50 per cent higher than in Europe, kept up the wage standard and given the farmers of America 20 to 30 per cent more for their products than those of other nations.

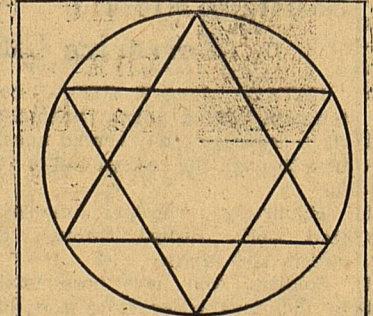

The general Democratic position is that the rates are too high and that they have resulted in cutting our important foreign trade in half. Democratic ranks, however, aren't any too firm on this tariff question. The administration Republicans, accepting the challenge to make it an issue, are able to keep demanding that members of the opposition party name specific rates they would reduce. And the Republicans can show that there was only one Democratic senator who had not voted either to raise or maintain some of the previous duties during the progress of the Hawley-Smoot measure. When Congressman Conroy of Massachusetts comes now with the boot and shoe interests to demand a 50 per cent increase on shoes and Democratic senators from the southwest keep shouting for an oil tariff, for instance, it doesn't make for party solidarity at all.

Democrats' Guns Backfire It's nearly impossible to cut at some Democrat. Democrats have industries back in their states, just like Republicans, and their industries are likely to clamor just as loudly for protection. That's why it's so much easier for the party propagandists to argue that the whole Hawley-Smoot act was a mistake than to peck at this rate and that rate and demand general reduction. As long as the tariff remains in politics the only men who will steadfastly refuse to bow to pressure from their home industries will be men as brave as Senator Norris of Nebraska—and there are hardly any of those.

Nevertheless recent months have seen a considerable growth in vocal resentment from financiers and industrialists many of whom derive no direct tariff benefits and some of whom appear to have become increasingly skeptical about the indirect benefits. The agricultural, automobile and railroad industries are among those which the Republicans must convince.

The fight in Congress promises to produce some thrills—if there is ever anything thrilling about tariff debates—because there will be three fervent, sincere and well-equipped Democrats to lead the attack. The three are Senators Costigan of Colorado and Hull of Tennessee and Congressman David J. Lewis of Maryland. Costigan and Lewis are newly elected to congress; Hull has been elevated to the senate where he will be more effective than ever. Costigan and Lewis are former members of the tariff commission. What they don't know about the "iniquities" of high protective duties Hull does.

PREVENT ACCIDENTS

Progressive Midland citizens might give more thought and time to the prevention of accidents.

Of 92 death certificates of the county for 1930, four show death from auto accidents, five from industrial accidents, one alcohol poisoning and two from accidents to children.

Quoting from the February American Child Health News as follows: That American citizens are failing to make even this country safe for democracy was pointed out by the Committee on Youth Outside the Home and School, which reported in November 1930 to the White House Conference on Child Health and Protection, 18,000 of the nation's future citizens were killed by accidents in 1929. Diphtheria used to be the chief cause of death among children from 5 to 9 years of age. Now it is accidents. Tuberculosis used to take the greatest toll of lives among young people from 10 to 14 years of age, and now it is accidents.

An accident, it is pointed out by the committee, is "something that falls across"—across a purpose. If Americans of today aim to prepare their children to be citizens and leaders in the democracy of tomorrow, accidents are an effective means of cutting across this purpose. As one step toward the achievement of their purpose, parents need to make this country safe for their children.

Safety, according to the White House Conference, is fundamentally a problem of education. Fathers and mothers, first of all need to realize the gravity of the situation. They need to cooperate with safety programs sponsored by schools, boy and girl scouts, and other community groups. Joint action will make an environment safe. Some recently settled districts have even laid out their streets and located their schoolhouses so that young children need not cross the traffic on their way to school. In long established communities a measure of safety may be brought to the child who must cross streets by dressing him in bright colored clothes.

Safe play space needs to be provided for the thousands of children in crowded cities who too often use the street, the dark alley or littered basement, places which are sometimes the resorts of "dope peddlers" and other criminals. Playgrounds, however, in order to be safe for small children must be carefully supervised perhaps with the assistance of older boys and girls acting as monitors.

Safe transportation to and from playgrounds as well as to and from schools in rural districts, is also part of the problem. Citizens need to know that now many states have

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

Dr. Ales Hrdlicka, noted anthropologist, says, "Man is not half through his evolutionary process."

You're right, Doc. Go to any picnic these evenings and take a look at the young men with their socks rolled down around their ankles and their knickers turned loose at the bottom. There's quite a distance to go yet.

Let me get my mind off of these philosophical subjects and get down to the more important events. Are you bearing in mind that there will be a barbecue and some races here July 4th?

O. B. Holt is reported to have a fast pony that he may enter in the races. He was advised this morning

to start the horse to town, so as to have him here in time for the meet.

The good part about O. B., he meets all the weight requirements. All riders must weigh 130 or more, aside from the weight of the saddle.

It is understood that Booger Bryant has Piccolo Pete under heavy guard, day and night. He's taking no chances.

Chief Policeman Lee Haynes is also chief of arrangements for the horse races.

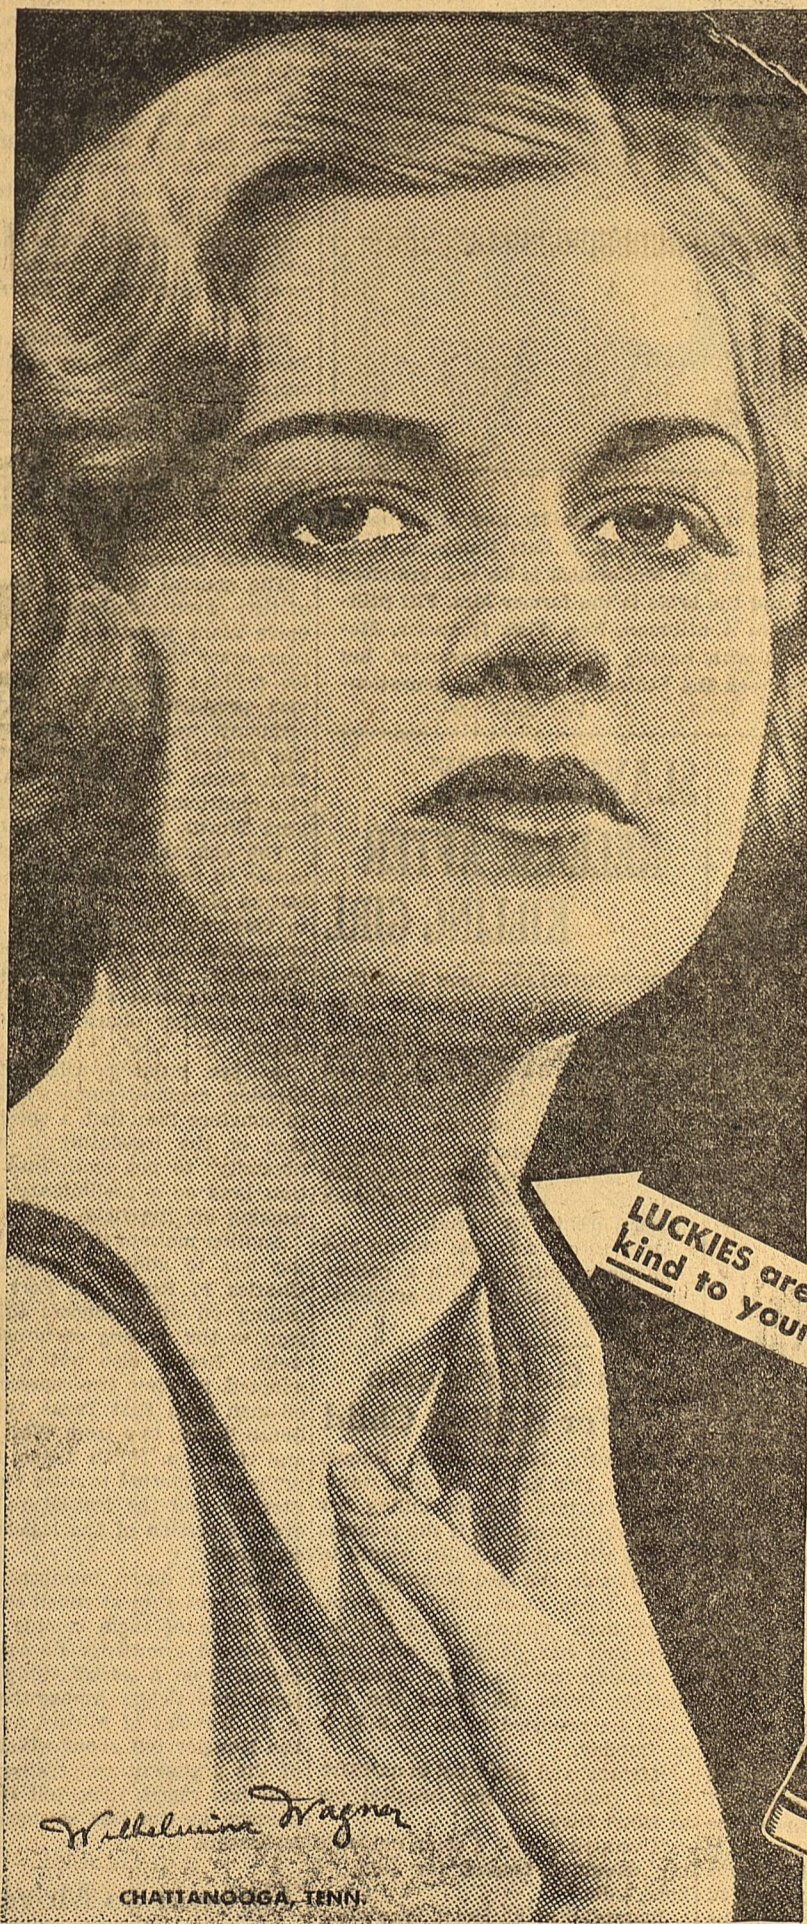

It is reported that two Midland employers attended a picnic with their employes a few nights ago and that one of the employes is still stove up. Men will be boys.

As the temperature record for Sunday showed, it wasn't the heat, it was the humidity.

After experimenting for five years, an Omaha physician has bred wingless and almost clawless chickens, which he believes will be prolific egg producers.

More than 500 toy factories in the United States have a yearly production valued at nearly \$100,000,000.

Consider your Adam's Apple!!\* Don't Rasp Your Throat With Harsh Irritants

"Reach for a LUCKY instead"

Adam and Eve in the Garden of Eden—A story we have all heard since childhood—Consider your Adam's Apple—the possession of each one of us, man or woman—your voice box—containing your vocal chords—your larynx—Don't rasp your throat with harsh irritants—Reach for a LUCKY instead—Be careful in your choice of cigarettes.

Remember, LUCKY STRIKE is the only cigarette in America that through its exclusive "TOASTING" process expels certain harsh irritants present in all raw tobaccos. These expelled irritants are sold to manufacturers of chemical compounds. They are not present in your LUCKY STRIKE. And so we say "Consider your Adam's Apple."

LUCKIES are always kind to your throat

SOCIAL NEWS PAGE FOR WOMEN

Agent to Meet With Six Clubs This Week

A week's work on pantry planning for county women was started this afternoon by Miss Genavieve Derryberry when she met with the Valley View club.

Visiting Officers Here for Eastern Star Installation

Installation ceremonies of officers recently elected to the Midland chapter of the Order of Eastern Star will be held tonight at the Masonic building, with Mrs. Florence Reed, district deputy grand matron of the state order, presiding as installing officer.

Mrs. Elizabeth Hendricks of the Odessa chapter and past grand representative to Montana, will serve as the installing marshal, and Mrs. Mary S. Ray of the local chapter and grand representative to the State of Massachusetts, will be installing chaplain.

To Big Spring Party

Mrs. J. D. Chambers left yesterday afternoon for Big Spring where she was an out-of-town guest at an elaborate bridge breakfast given by Mrs. J. A. Coffee at the Settles hotel this morning.

Madison Sandidge of Abilene is visiting here this week with friends.

Society Business Meeting and Circle Classes Are Held

A special business meeting preceded the mission study classes of the circles of the Women's Missionary society at the First Baptist church Monday afternoon.

Mrs. George F. Brown taught the Walker circle lesson; Mrs. J. M. White conducted the study of "In the Land of the Southern Cross" for the Reagan circle and Mrs. A. J. Gates, Mrs. N. W. Bigham and Mrs. M. R. Hill read papers on "Signal Fires on the Mountain" in the Lockett circle.

Each circle assembled in separate meetings in the rooms of the church following the business.

Party Enjoys Supper At Cloverdale Park Monday

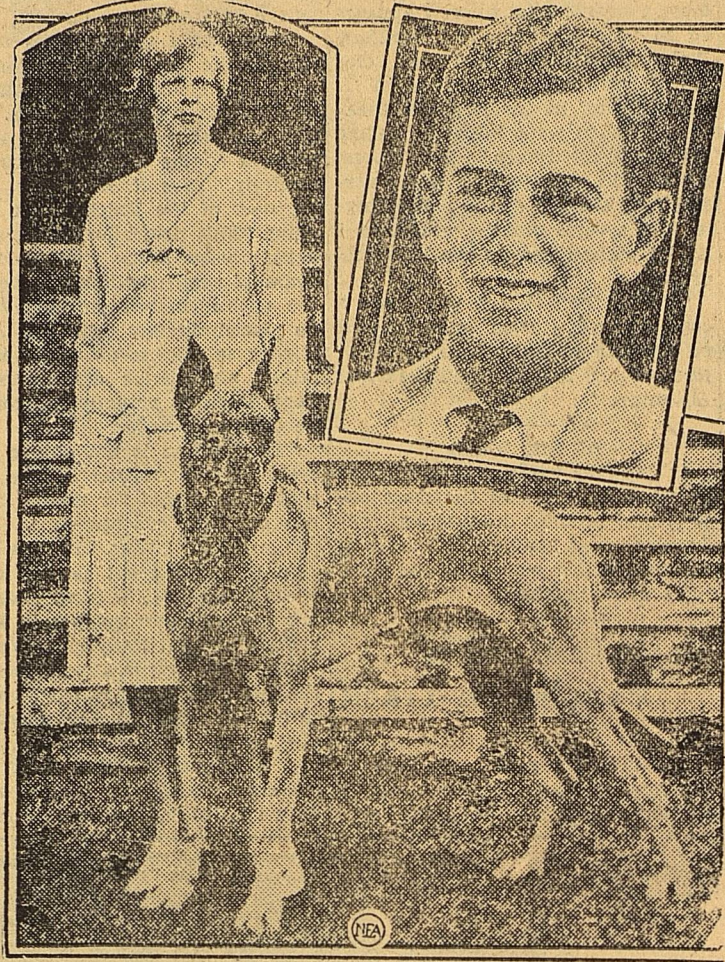

Monday evening furnished lively entertainment for a group of young folk who motored to Cloverdale for supper and informal games.

A party of 25 met at the home of Miss Helen Margaret Ulmer early in the evening. Mrs. J. O. Nobles, Mrs. Addison Wadley and Mrs. M. C. Ulmer accompanied the group.

Included in the party were Misses Martha Louise Nobles, Helen Margaret Ulmer, Ida Beth Cowden, Mary Caroline Sims, Walter Faye Cowden, Nancy Rankin, Dorris Harrison, Jean Wolcott, Marion Wadley, Ruby Hodges, Marie Hill and Theresa Brooks.

Messrs. Thomas Lee Speed, Dick Austin, Alf Reese, R. R. Browning, Ed Watts, R. V. Wasaff, Red Johnson, Sammy Tiesling, Bob Cox, Hugh West, Loyd Burris, and Willis Keisling of Stanton.

Heir Will Wed Heiress

It was an important event in eastern society when the engagement was announced of Miss Elizabeth Brinton Kent, left, to William Laurens Val Alen, upper right. For she is the daughter of Mr. and Mrs. A. Atwater Kent, and he is the son of socially prominent Mrs. James Laurens Van Alen, of Newport and Palm Beach. He also is a descendant of John Jacob Astor, founder of the Astor fortune.

Jeannette Herrington, who has been in Houston, arrived here yesterday to make her home with her mother, Mrs. Evelyn Herrington.

Announcements

THURSDAY Rainbow club will meet with Mrs. H. B. Dunagan at 3 o'clock.

Mid-Week club will be entertained at the home of Mrs. Hugh Corrigan at 2:30.

FRIDAY Community Bible class meets with Mrs. J. M. Prothro at 4 o'clock.

Belmont Bible class will meet with Mrs. James S. Noland, 1407 West Olinos, at 3:30. Study will be taken from Luke 8.

SATURDAY Catholic women will have a food sale at the M System No. 2 starting at 8:30.

Children's story hour at the Midland county library at 2:30.

Choice Cooks' Corner

Cherry Ice Two teaspoons granulated gelatin, 2 tablespoons cold water, 1 cup boiling water, 4 tablespoons lemon juice, 1 cup cherry juice, 1 cup sugar. Heat one quart of fresh cherries and strain off juice. Soften gelatin in cold water for five minutes and dissolve in boiling water. Add lemon juice, cherry juice and sugar. Cool and turn into freezer and freeze until firm.

Summer Salad One and one-half cups cold cooked green-beans, 1 cup cold cooked ham, 1 cup cooked tongue, Bermuda onion, green pepper. Cut ham and tongue in pieces the same size as the beans. Mix and add 2 tablespoons lemon juice or vinegar and 4 tablespoons salad oil beaten with 1-2 teaspoon salt and let stand in refrigerator for an hour or longer. When ready to serve, drain from dressing. Pile alternating rings of onion and green pepper cup with the salad mixture and serve with mayonnaise.

Personals

Bernard Ambrose of Tucson, Ariz., was in Midland Monday evening visiting his uncle, K. E. Ambrose, and family. He was enroute to McAlester to visit relatives. He was accompanied by four schoolmates and a teacher.

Paul Ryan returned to Midland last night after a business trip to Dallas and Wichita Falls.

Mr. and Mrs. J. A. Finlayson and sons left this morning for Tyler where they will make their home. They returned to Midland last week end to make plans for the move.

Miss Evelyn Garlington left this morning to visit her parents in Longview. She has been here visiting friends since school was dismissed in Tech at Lubbock.

T. E. Baker was in Midland today from his ranch near Fort Stockton transacting business.

Mrs. E. V. Garner and Miss Martha Holton of Rankin were shoppers here this morning.

Mrs. E. T. McKinney of San Antonio was a guest in Midland evening. She is en route to California where she will spend the summer with her daughter.

Bob Roberts of San Angelo was here this morning transacting business.

Mrs. J. R. Sales of Stanton was here Monday afternoon visiting friends.

Mrs. M. R. Hill and daughter, Jane, will leave tonight for Dallas where they will spend a few days visiting.

Mrs. Minnie Cowden left Sunday evening for Dallas where she is spending the week with relatives.

Mrs. J. P. Ferguson and daughter returned last week end from a ranch near Seminole where they have been visiting relatives.

Mrs. G. T. Martin and Mrs. R. E. Wortham of Hobbs were here Monday afternoon shopping.

Mrs. James A. Kelley of Stanton was a business visitor here this morning.

Miss Maxine Webb has returned to her home in Plainview after spending the week end with relatives here.

C. B. Harden and three children passed through Midland this morning en route to Dallas where they will make their home. They formerly lived in Van Horn. Mr. Harden is a cousin of Mrs. D. E. Clark of Midland.

Mrs. W. W. Wimberly and son, Wilbur Wimberly and wife of El Paso will arrive here Thursday evening. Mrs. Wimberly has been visiting her son for the past month.

Mrs. J. E. Moffett of Stanton was in Midland this morning visiting.

Daily Health Talk

By DR. MORRIS FISHBEIN Editor, Journal of the American Medical Association, and of Hygeia, the Health Magazine

Find Long Life Is Inherited; Experts Study of 100,000 People Shows Ancestry is Main Factor.

As Raymond Pearl points out in a recent discussion, there has been a common observation that length of days tends to run in families. Professor Pearl refers, for example, to the statement by Oliver Wendell Holmes as to how to live long. The eminent humorist said:

"The first thing to be done is, some years before birth, to advertise for a couple of parents both belonging to long-lived families. Especially let the mother come of a race in which octogenarians and nonagenarians are very common phenomena. There are practical difficulties in following this suggestion, but possibly the forethought of your progenitors, or that concurrence of circumstances which we call accident, may have arranged this for you."

The laboratory of the department of biology of the school of hygiene and public health in John Hopkins university has recently made some extensive studies of collections of genealogical material that bear on the matter.

A careful analysis of the family records of 100,000 people living near Baltimore was a part of this study. The results indicate that the expectation of life of the parents of children dying at 60 years of age or over is at all ages, from 20 years on, greater than the expectation of life of the parents of children dying under 50 years of age. The tables indicate also that the expectation of life of the sons of fathers dying at 80 years of age or over; or with fathers still living at 80 years of age, is greater at all ages from birth on than the expectation of life of sons of fathers between 50 and 79. It is also much greater than the expectation of life of the sons of fathers who died under 50 years of age.

In other words, all of the scientific data available and the careful study of such data by trained experts in interpreting figures indicate that Oliver Wendell Holmes was right and that the way to live long is to select fathers, mothers, grandparents and great-grandparents and indeed all ancestors who have lived long.

R. D. Scruggs and daughters, Mary Beth and Kathleen, plan to leave today for Georgia where they will spend several weeks visiting relatives.

# NAIL SACKERS ESTABLISH SCORING RECORD; SCRUGGSMEN ANNEX

## TWO GAMES ON TAP IN NIGHT BALL TONIGHT

Avenging a 32-7 decision handed down by Judge Red Moore and his crew in an earlier game this year, the Midland Hardware Nail Sackers socked the ball mightily in the fatal seventh inning of the playground ball game last night, scoring 23 runs to make the total 33-14.

The club batted around four times in that hectic frame and the fans got dizzy.

Bob Scruggs and his Buicks took the lead over the Rexall stores in late innings when a runner hit one to a deep field with the bases bloated. Four runs trickled in. Bob was doing the pitching for his distributors and was having trouble until that time.

In the afternoon, the Petroleum girls defeated the Business girls, 11-10. The score was tied in the 10th inning, so the girls relate, but in some fashion they are still talking about, another run was pushed over. The win gave the Petroleum girls two games won over their adversaries this season.

This evening, beginning at 8:15 the Texas Electric Service company and the DeLuxe Laundry plays under the lights. At 9 o'clock, The Reporter-Telegram plays the Cowden-Epley Ford club.

The diamond is located near Pagoda swimming pool and can be found by driving to that place and proceeding to the high lights just north.

## GOLF as the STARS play it by ART KRENZ

How should the putter be taken back? How should the ball be hit?

Calamity Jane, the famous Jones putter, swings back with an open face under pressure of the last three fingers of Bobby's left hand. Walter Hagen takes his back with the right hand, using an open face for long putts and a closed face on the shorter ones. Horton Smith uses both hands in taking the club back. They differ in the way they hit the ball, too. Jones hits with the right

hand. Hagen puts against the left hand. Smith hits with both.

"If the player will take a comfortable stance and concentrate on getting the clubhead into the ball at right angles to the line of the putt, any of the above methods will prove successful. Of course the putter must be swung low along the ground because Jones is such a renowned putter, I can't help but favor his particular style.

**Film Star Tells Of How She Was Able to Impress**

BY SIDNEY FOX

(Miss Fox comes to the Ritz theatre on Wednesday in her first picture, "Bad Sister," the cast of which also includes Conrad Nagel, Bette Davis, Slim Summerville and ZaSu Pitts.)

"I came, I saw, I conquered," wrote Caesar many years ago. Coming down to my own experiences, I have come to the screen, and I have seen many things. Whether or not I have conquered must be determined by the theatregoers of the world before whom my first picture is now to be shown. Naturally, my hopes are for an affirmative vote.

"I never realized until I went to Universal City recently just how much difference there is between the making of a motion picture and the production of a stage play. For a few days everything seemed very strange and it seemed hard to get accustomed to the idea that the entire play, or picture, was not to be rehearsed at the same time, but only each short scene as we photographed it. Even the technique of acting proved entirely different from that of the stage.

## WHY CHANGE

your oil every five or six hundred miles when SOCONY OIL IS GOOD FOR A THOUSAND MILES? De-waxed paraffin base, all of the S. A. E. numbers to fit your particular motor. Let us drain it for you and fill it with SOCONY.

Trying to serve you better is our motto.

**C. Y. BARRON**

Mgr. Magnolia Service Station, Number 478, Wall, Front & Ft. Worth Streets.

"However, I was helped somewhat by the fact that my entire stage career had been predicted on the idea that I was preparing for entry into motion pictures. Fired with an ambition to go on the screen, but having had no experience in the theatre I had gone to certain officials of the Universal Pictures, who advised me to prepare myself by securing an engagement on the stage. Accordingly, I appeared in several plays, completing my period of training in the leading role of 'Lost Sheep' in New York.

"But many interesting experiences had preceded my debut on the stage. In my early teens I decided to become a lawyer, and entered Columbia University to take a law course, with service in a lawyer's office, as an added aid to familiarizing myself with legal practices.

"Then I changed my mind, as is the privilege of my sex. At sixteen I became a newspaper writer—and what a writer! Working for Associated Newspapers and basing my opinions principally on my lack of experience in such matters, I advised readers on matters of the heart and gave learned advice to the lovers of the land. Then I wrote fashion articles for the same newspaper organization, and as an adjunct to my business served for some time as a model in a fashionable Fifth Avenue gown shop.

"It was after this that my friends advised me to seek a screen career,

and it was their advice that led me to the Universal office in New York. And the officials, as I have said, counseled me to go through a period of training. My first engagement was at the Civic Theatre in Johnstown, Pennsylvania, where I appeared in 'The Big Pond,' 'Wedding Bells' and 'The Ghost Train.' Going to New York, I played in 'Never Rains' at the Republic theatre and then went into the leading role of 'Lost Sheep.' For several months, in an effort to attain versatility I studied dancing and singing for several months, and then I paid a second visit to the Universal offices.

"It was then that I was given a contract and I soon found myself on my way to Universal City, California, ready to embark on the Great Adventure."

**At Ritz Today**

At the Ritz today comes "It Pays to Advertise," one of the most entertaining pictures of the year has produced. Carroll Lombard is the flashing-eyed beauty who takes the scene right after another.

**Valve-in-Head Is Popular on Track**

In the discussions centering around the victory of Louis Schneider in the great 500-mile event at Indianapolis, it is revealed that sev-

er out of the first ten cars to cross the line, including Schneider's were powered by overhead valve engines. The records show that for years past this type of engine construction has furnished outstanding performance in the Memorial day classic.

"Schneider's victory calls attention to the fact that wherever extremes in efficiency are demanded, such as in aviation engines, racing cars and speed boats, the valve-in-head engine is used almost exclusively," says F. A. Bower, chief engineer of the Buick Motor company. "This principle has been adhered to by Buick through many years of engine building. It permits the entire combustion chamber to be placed directly over the piston. Higher volumetric efficiency is obtained and better distribution of heat. There is actually less area to be cooled by water.

"This engine is not only a most dependable performer at the high speeds demanded for racing, but it has qualities of interest to every passenger car owner. The Buick engine develops great power in all speed ranges, at the same time giving excellent performance in acceleration and get-away in traffic.

"Easy starting is assured because the fuel mixture is raised from the carburetor through the manifolds directly to the cylinder head, flowing downward to the combustion chamber instead of having to be drawn up to the combustion cham-

ber after entering the port in the cylinder block. Servicing is simplified, as it is only necessary to remove the cover on top of the engine to gain access to the valves."

Jean Pierre Blanchard, a French aeronaut residing in England, made the first successful balloon flight across the English Channel in 1785.

**EXPERT RADIATOR REPAIRING AND RECORING**

There are few things more annoying about your car than a leaking radiator. Perhaps a simple job of a few minutes will correct the fault. We're experts in finding the trouble.

**EXPERT AUTOMOBILE REPAIRING**

Men who know the mechanics of every automobile are the men who will work on every repair job that you submit to us. That's assurance of the fact that your car will be restored to your running in tip-top shape.

Let us **SHOW** you why **Firestone TIRES** are better!

**FIRESTONE** do not manufacture special brand tires for others to distribute—but they do make a complete line of tires for us, bearing the Firestone name and guarantee, that not only meets the prices but beats any special brand tire distributed by mail order houses or others in Quality and Construction, giving greater values.

Firestone have invested \$25,000,000.00 with Firestone Dealers in establishing the most economical distributing and servicing system in the world.

Come in today—let us show you the **INSIDE FACTS** from cross sections—that you may understand the **EXTRA VALUES** in Firestone Tires.

\*A "Special Brand" tire is made by a manufacturer for distributors such as mail order houses, oil companies and others, under a name that does not identify the tire manufacturer to the public, usually because he builds his "best quality" tires under his own name. Firestone puts his name on every tire he makes.

## Of course I've switched to CAMELS

You don't have to look beyond your own intimate circle to realize what has happened.

Everywhere you see evidence of a great country-wide switch to Camels.

That is because the new Humidor-Pack performs a real new service for the smoker.

Throughout the nation, literally millions of people have found by actual test that the new air-sealed, sanitary package of moisture-proof Cellophane not only keeps out dust and germs, but also keeps in the rich, mild flavor of the choice Turkish and mellow Domestic tobaccos of which Camels are blended.

To show their real appreciation of the Humidor Pack Camels smokers from all parts of the country write letters telling the advantages of this scientific new wrapping.

Women tell us they carry Camels in the Humidor

Pack, in their handbags without having them absorb powder and perfume odors. Workingmen say this moisture-proof wrapping protects their cigarettes from perspiration and pocket dust. Sailors are enthusiastic because the damp salt air does not reach Humidor-packed Camels.

All real benefits of course, but the chief fact that is causing this great nation-wide swing to Camels is the protection which this air-sealed wrapping gives to the choice Turkish and mellow Domestic tobaccos of which Camels are blended.

No peppery dust to irritate the membrane; no dried-out tobacco to burn the tongue or sear the throat. Just the fresh, cool mildness of perfectly conditioned tobacco.

Switch to Camels for one day, then quit them—if you can.

Tune in CAMEL QUARTER HOUR featuring Morton Downey and Tony Wons  
Columbia Broadcasting System—every night except Sunday

**CAMELS**

NO CIGARETTY AFTER-TASTE

Don't remove the moisture-proof Cellophane from your package of Camels after you open it. The Humidor Pack is protection against perfume and powder odors, dust and germs. It delivers fresh Camels and keeps them right until you smoke the last one
