

WEST TEXAS: Fair and frost in the Panhandle tonight. Friday fair.

BLIZZARD HOWLS IN MIDDLEWEST

Business conditions are spotty, to say the least, and there is every reason to believe that improvement will be equally spotty. —Gage P. Wright.

SIX DIE IN TRUCK ACCIDENT

Thirty-three Injured As Trailer Runs Off Road

MARION, Ark., Oct. 29. (UP)—Six cotton pickers were killed and 33 others injured today when a trailer broke loose from a truck and plunged down an embankment.

Midland People to Take Part at Meet

The Big Spring associational workers' conference in Stanton next Tuesday, which will be attended by a large delegation of Midland Baptists, will be devoted to the advancement of the Every-Member campaign of Texas Baptists.

List for Richest Race to Close

AGUA CALIENTE, Lower California, Oct. 29. (UP)—The closing date for nominations for the world's richest race, the third renewal of the Agua Caliente Handicap, is Dec. 1.

Chinese Bandits Murder Soldiers

MUKDEN, Manchuria, Oct. 29. (UP)—Three Japanese soldiers and civilians were killed today by Chinese bandits outside Mukden walls.

Acresage Proration Plan Will Be Used

AUSTIN, Oct. 29. (UP)—Governor Ross Sterling announced today that the acreage plan of distributing East Texas allowable oil production is to be put into effect.

Chinese Bandits Murder Soldiers

MUKDEN, Manchuria, Oct. 29. (UP)—Three Japanese soldiers and civilians were killed today by Chinese bandits outside Mukden walls.

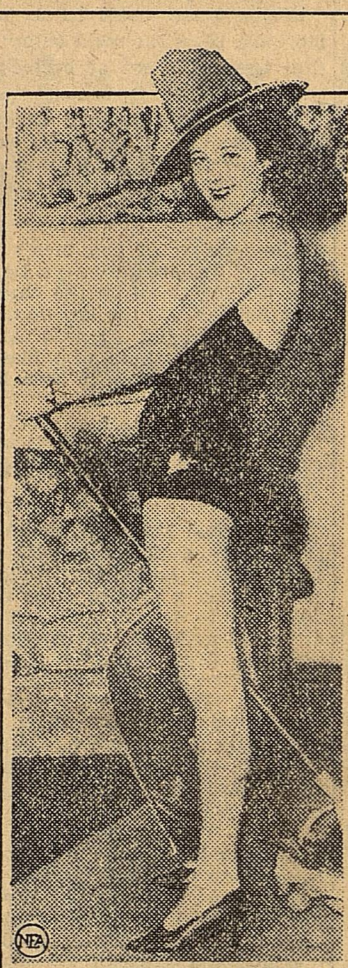

BUYS CAR FRIGIDAIRE

The Midland Hardware company today placed an order for a car load of Frigidaires, it was announced by George D. McCormick, manager.

Frankie and Johnnie Were Lovers

And that loving was kept intact by a cozy little home located through the classifieds of The Reporter-Telegram.

1931 "Witch"

That's what Sally Levin, astride a vacuum cleaner instead of a broom represented in this costume which carried away honors among the Halloween garbs devised by sorority girls at the University of Missouri.

DALHART LADS HELD AFTER A GIRL SUCCUMBS

DALHART, Oct. 29. (UP)—Three youths, who attended a party here last night, were held for questioning today following the death of Juanita Criswell, 20, from stab wounds.

Address at Rotary Honors Roosevelt

High spots in the life of Theodore Roosevelt were given in an address by John P. Hoy before the Rotary club. Howe brought in many interesting historical topics in connection with the speech.

Installment Suit; Modern Miss

HAMILTON, Ont., Oct. 29. (UP)—Finding that he was unable to pay the installment payments on a new suit which he had ordered, Robert Baker, 19, decided that he would wear it on installments.

SWAPS FEED TODAY

Boss Wilson, farming on the Montgomery place four miles south of town, brought in a load of bundle begins today to pay his newspaper subscription.

EAKER TO MARRY

Capt. Ira C. Eaker, who sped to fame on the wings of army airplanes, plans to wed Miss Ruth Huff Anderson, 23, of Washington, D. C.

Frankie and Johnnie Were Lovers

And that loving was kept intact by a cozy little home located through the classifieds of The Reporter-Telegram.

BREAKING BY URCHINS OF STREET LIGHTS THREATENS TO DARKEN A STREET AND ALONG WEST WALL

Unless the breaking of street lights in Midland is stopped, those sections of the city where the breaking is so bad will be left without lights.

An orgy of street light breaking has determined the city to let those areas where lights are broken remain in darkness unless parents see to it that their children quit shooting out the lights or breaking them with stones.

The street lights are expensive. Parents who permit their children to break street lights are adding costs to themselves, because in the last analysis, the people pay for the lights, city officials say.

The limit of patience has been reached, an official statement said Thursday, and unless street light breaking be ended immediately by cooperation in reporting offenders parts of town will be left without lights.

Has Relics of Merrie England

When one reads the favorite newspaper of M. S. Middlemiss, visitor with his wife in the home of Mr. and Mrs. Frank Edsall, he finds an account of George Washington's farewell address, doings of the English court, shipping news, discussions of a stormy period in France, and the like.

BAPTIST CHURCH ELECTS SEVERAL NEW OFFICIALS

Elliott H. Barron was elected superintendent of the Baptist Sunday school at a church business session Wednesday night.

Presbyterian Man To Preach Nov. 8

The Rev. W. J. Coleman, new pastor of the Midland Presbyterian church, will preach his first sermon in Midland on Nov. 8, according to word received here by church leaders.

Modern Miss Just a Replica

ANN ARBOR, Mich., Oct. 29. (UP)—The modern miss who raises an arched eyebrow, or favors you with a twittry smile, is merely a replica of the girl of nearly a century ago.

Texas Co-Eds Bar Caveman Tactics

BELTON, Tex.—Friends of Baylor college co-ed aren't try caveman tactics on their fair friends. They've got smacked down. A survey of the college girls, some 200 of them, shows that 191 dislike the primitive type of wooing and prefer to be fondled gently.

ADVERSITY USE

BIG SPRING, Oct. 29.—Using a blow out spot in a cotton patch to make a profit of \$171 the family achievement of Mr. and Mrs. G. W. Hilliard of Hwy community in Howard county, according to the report of Mrs. Loucille Allgood, home agent.

Taylor Better

C. A. Taylor, reported to be critically ill Wednesday afternoon, was slightly improved this morning. He has been ill for several months caused by a fractured hip.

Edwards Returns

Mr. and Mrs. Charles Edwards returned to Midland Wednesday evening from Mineral Wells where they spent several weeks.

Club at Airport

The Arno Art club will meet tomorrow afternoon at the home of Mrs. W. H. Sloan on Sloan field at 3:30. The announcement appearing early this week that the meeting would be held at Mrs. John Shipley's is incorrect and members are asked to note the change.

BRITISH VICTORY HELPFUL

Economic Restoration Expected to Be Abetted

LONDON, Oct. 29. (UP)—The national government's overwhelming victory in the general election was seen today as an important step toward restoration of the world's economic stability.

The government in a cabinet meeting began work today on a program to include stabilization of pound sterling, a tariff program and international reparations conferences.

The government is expected to take curative measures as soon as parliamentary procedure permits.

Fox Wouldn't Sit After Wild Dash

The restraining of two girls Tuesday, potages of Benny Fox, from staging a marathon dance on top of a 50-foot flag pole in Texarkana, recalls an interesting story that happened in Midland about two years ago.

Fox, a flag-pole sitter, proposed to break the sitting record in Midland. He was getting his publicity together and making arrangements toward having a pole built.

His office was in the rumeral room of the Barrow Furniture company and, in the half light of a cool afternoon, he walked into the place, not knowing a body was there.

He sat down beside the corpse on a bed and started to use a typewriter drawn up on a table in front of him. While pausing to think of what he should write, his hand wandered over the face of the corpse.

"Benny knew exactly what to do. He leaped the typewriter desk, knocking the machine to the floor, ran into the side of a door, staged a broken field run through the furniture display department and headed for the open street.

Immediately he came to the office of the Reporter-Telegram and announced the flag pole sitting here was off.

"No amount of money can induce me to stay," he said. "I'm not in the habit of saying 'I'm superstitious, but I know when I get enough. The next time I travel the Bankhead highway, I'll skirt around this town.'"

He refused to spend the night, leaving for the East. He has not been back since.

Fourth Victim of Fire Is Numbered

INDEPENDENCE, Mo., Oct. 28.—(UP)—Edith Fern Wright, 11, died today, bringing a total of four fatalities resulting from an explosion when five children locked in a house attempted to start a fire in a stove with kerosene.

GLASS AUTO

NEW BEDFORD, Mass., Oct. 29. (UP)—A glass automobile is being built for Col. E. H. R. Green, multi-millionaire son of the late Hettie Green, once known as America's richest woman.

The glass roof will enable the colonel, an aviation enthusiast to watch airplanes overhead as he is motoring along the highways.

GAINES RANCHER HERE

E. R. Crews, ranchman of Gaines county, was in Midland today transacting business. Crews and his family formerly lived in Midland.

SEYMOUR IN DALLAS

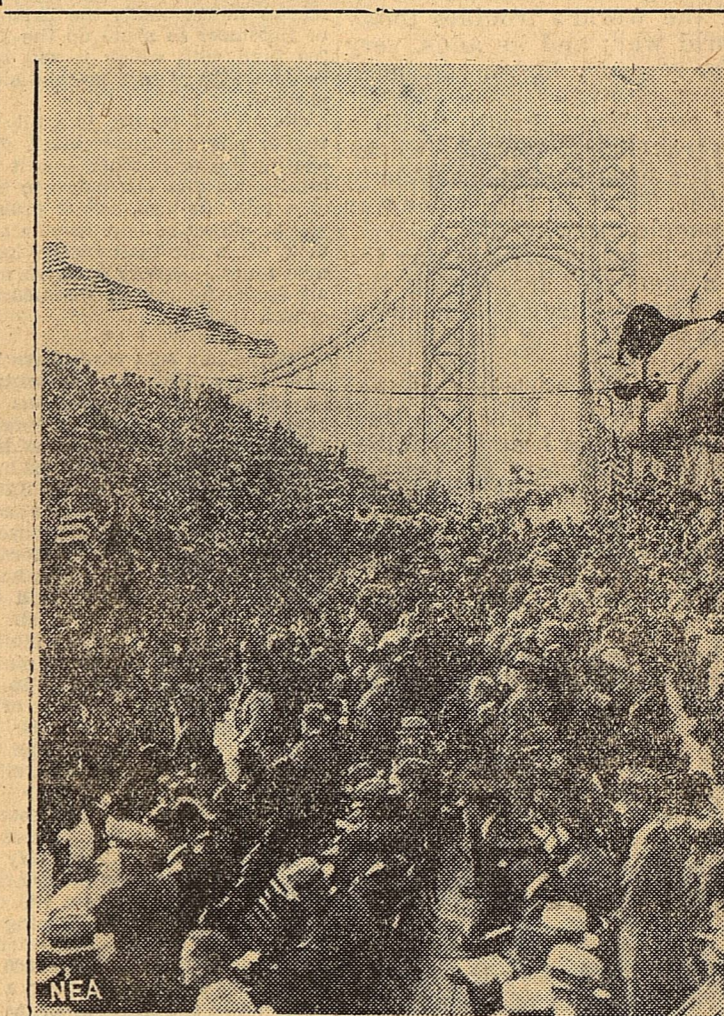

M. M. Seymour, manager of the Ever-Ready Auto Service, is in Dallas today on a business trip.

BUSINESS MAN

WINTERPORT, Me., Oct. 29. (UP)—Roy L. Farnald is only 29 years old, but he is:

A lawyer. A director of business placement. A college professor. Incidentally, he holds eight earned college degrees.

Link Between Two States

With bands and fanfare, fleets of airplanes droning overhead and 6000 persons crowded in the center of the George Washington Bridge, the \$60,000,000 structure spanning the Hudson River between Manhattan and New Jersey was dedicated in the colorful fashion pictured above.

POLICE DO NOT CREDIT STORY OF EL PASO CHEMIST WHO CLAIMS HE FIRED SHOTS INTO JUDD VICTIMS

LOS ANGELES, Oct. 29. (AP)—Police yesterday were investigating the confession of Fred Williams, young El Paso chemist, that he helped Mrs. Ruth Judd slay Mrs. Agnes Leroi and Hedvig Samuelson in Phoenix.

He asserted that he shot Mrs. Leroi after Miss Samuelson had knocked Mrs. Judd down.

He was taken by detectives before Mrs. Judd in the hospital ward of the county jail.

"Please don't talk and please see my attorney," she said.

Officers condemned Williams' story as a piece of imagination and said that it failed to match facts at any point.

At first she said she did not know him. He was taken away but as he left, she cried: "Bring him back."

"Wouldn't it be wonderful if he took the blame?" she said as he was led away.

Although officials say they intend to release Williams, they declined instead to hold him a while longer after his visit to Mrs. Judd. He was booked as a material witness.

Williams voluntarily walked into police headquarters to give himself up.

Mrs. Judd will ask for a change of venue, her lawyer, Louis P. Russell, said.

Mrs. Judd favors Nogales for the trial. Should it be transferred, the state will propose that it be held at Florence.

County Attorney Lloyd J. Andrews said he will oppose any defense move for the change of venue.

Russell said two alienists will be named to examine Mrs. Judd.

Mrs. Judd left the jail hospital long enough yesterday to be fingerprinted and photographed by police. She was composed and smiled frequently.

To questions about reports that she is an expectant mother, Mrs. Judd was noncommittal, finally terminating the interview with the sly suggestion that reporters "see my attorney."

El Paso city detectives today found a valuable gold watch in an El Paso pawnshop where it was pawned by Dr. W. C. Judd, husband of Mrs. Winnie Ruth Judd, confessed slayer of Miss Hedvig Samuelson and Mrs. Agnes Leroi.

SNOW AND SLEET IN 4 STATES

Frigid Temperature Heralds First Cold Snap

CHICAGO, Oct. 29. (UP)—Driving snowstorms in southern Colorado accompanied by generally frigid temperatures throughout the middle west and scattered snow and sleet in northern Minnesota, Wisconsin and the Dakotas heralded the year's first cold snap.

Strong winds whipped snow to a blizzard fury at Cheyenne, Wyoming.

Fear was expressed for several millions of dollars worth of sugar beets unharvested in Colorado.

Storm warnings were displayed on Lake Superior and Lake Michigan.

Consul's Daughter Is Found Murdered

MEXICO CITY, Oct. 29. (UP)—Miss Lorna Hogg, daughter of the British consul at Vera Cruz, and Alexander S. Taylor, formerly of Glasgow, Scotland, was found shot to death in an apartment here today. Police believed Taylor killed the woman then himself.

K. C. Exhibit Is Being Planned

KANSAS CITY, Mo., Oct. 29. (UP)—Ten acres of floor space under one roof is being put in shape for the 33rd annual American Royal Livestock and Horse Show.

More than 9,000 head of beef cattle, dairy cattle, swine, sheep, draft horses and mules, show horses and ponies will be assembled under the roof of the American Royal building.

The exposition, also designated as Kansas City's official fall festival, opens Nov. 14.

An aggregate of \$90,000 in cash premiums, including horse show awards, will be distributed. Some 3,000 boys and girls will participate in the national meeting of 4-H clubs, vocational agricultural high school students and future farmers of America.

There will be inter-state judging contests in live stock, meat and grain, conducted by members of these groups, as well as contests in judging between students from a dozen or more state agricultural colleges.

Special rail rates of approximately one cent a mile for Kansas day, Missouri day and Dairy day, one and one-third fares on the open rate plan from the western, southwestern and southeastern passenger associations territory, and a rate of a fare and a half on the "identification certificate" plan from all other parts of the United States, will prevail.

Tests Invention, Killed in Blast

CHICAGO, Oct. 29. (UP)—Emil Schoenberger, chauffeur, was killed today when his first invention exploded in his garage workshop during an experiment.

Schoenberger was testing a device for vaporizing gasoline when the blast occurred. His friend, Robert Foss, who was helping, was burned badly.

Mrs. Schoenberger and two children, living upstairs, were trapped by the flames. The mother tossed the children out the windows to firemen, also leaping to safety herself.

Schoenberger had received a patent on the invention last week.

PEOPLE WANT PEACE

Charles M. Schwab, addressing the Iron and Steel Institute, remarks that most of the world's troubles today stem back directly to the World War; and he adds, very sensibly, that the only hope for recovery lies in continued universal peace.

"I was talking recently," says Mr. Schwab, "with a shrewd observer who has been traveling around the world. He tells me that the desire of the masses of the people in all parts of the world is for peace. The talk of another war has no place in the hearts of people anywhere."

This is true enough; and the great problem facing the world today is how to find a means of translating this world-wide desire into reality. The ordinary people themselves are converted. It remains only to bring their leaders into line.

And this, in turn, brings us to the curious fact that the ordinary man is usually a lot farther advanced than he gets credit for from the men who rule him. The follies and crimes that blacken the record of history are not due to the stupidity and iniquity of the mass of humanity; they arise because the men in high places cannot realize how eagerly mankind in general wants to be led along the right path.

It was not the common people who have kept hatred, suspicion and bitterness alive since the war ended. The world is in a mess today, and has been in one for 17 years, because its leaders could not understand that the race as a whole will respond just as quickly to altruistic idealism as to selfishness and jealousy.

For mankind in general is capable of almost infinite things. It asks only for the right kind of leadership. For a great many years it has been cheerfully going out to die in innumerable battlefields for causes it could not understand; it has asked only that it be shown an ideal, only that it be urged to exhibit all the bravery and self-denial that it possesses.

Today its face is set toward peace. Yet the world continues to move toward war. How long before the leaders will discover what humanity really wants of them?

LET PRISONERS HELP

Ordinarily, one does not expect prisoners in a state penitentiary to take an extensive part in reforestation programs. Yet Pennsylvania's prisoners have just put through an amazingly complete forestry project, and the state has 84,000 new trees as a result.

All over the nation people have been planting trees to celebrate the bicentennial of George Washington's birth next year. More than eight million trees have been planted, under the guidance of the American Tree Association; and the Pennsylvania convicts have had a big part in it all.

Prisoners at the Western Penitentiary have planted 30,000, many of them along a state highway. Those in the state's Eastern Penitentiary have planted 54,000 trees—and the work is still going on.

Here is a wise program for convict activity that other states might profitably copy.

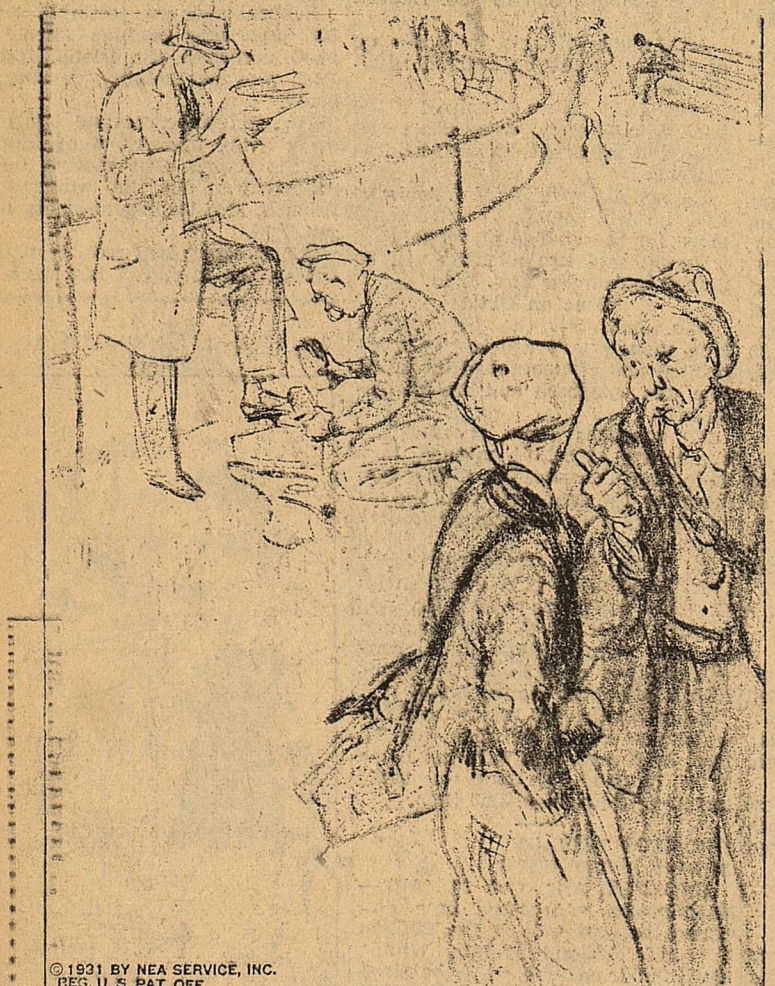

INTELLIGENCE OF DOGS

The traditional dog show of society, in which bored-looking and immaculate dogs sit around and wait for the judges to decide which is the finest example of well-bred uselessness, are more or less familiar to everyone. In London, recently, however, a new kind of dog show was staged, and it sounds as if it must have been highly interesting.

This was a show of Scotch sheep dogs—collies, most of them. Instead of strutting at the end of their leashes, these dogs were taken out into fields and made to show how skillfully they could, each in turn, handle a flock of sheep. Before it was over, spectators discovered that the dogs could do the job just about as intelligently as any human being.

A dog show of that kind must be refreshing. There is some point to it—and the prize winner is useful as well as ornamental.

Side Glances by Clark

"Look at that shine. I remember when old Pete was the best man in the park, but I'm afraid he's slipping."

Washington Letter

By Rodney Dutcher

National Prohibition Board of Strategy Expects a Million Dimes in the Mails to Help Fight a Referendum and Prevent Reduced Prohibition Appropriations.

WASHINGTON—Imagine yourself a pile of dimes nearly a mile high, or an end-to-end row of dimes about 10 miles long or a big heap of dimes weighing something like two and a half tons.

Then you visualize the million dimes which the National Prohibition Board of Strategy expects to receive in the mails the first part of December to make up the \$100,000 fund with which it will begin its campaign to save prohibition for posterity.

Nobody, of course, is really going to pile all those naked dimes one on top of another, but it certainly does give one pause to think of a pile like that and it probably will be almost as impressive a spectacle when the mail trucks, loaded with dimes, actually do drive up to an especially rented warehouse to deposit them.

One million coin cards have been ordered for distribution through the 33 national dry organizations represented by the Board of Strategy. The cards, with envelopes addressed to headquarters here will be handed in bulk lots to churches, Sunday school, temperance people's societies and young people's groups. In each card will be slots for five dimes because a man might have a wife and three children and wish to contribute a dime for each.

Mailing day for all the dimes is Nov. 30. A two-cent stamp must be placed on each envelope. So, besides the \$100,000 objective of the prohibitionists, there will be \$20,000 in revenue for Uncle Sam, who has a big deficit and needs all the money he can get.

The Board of Strategy coordinates the effort of the various dry organizations and will unify the battle not only at the next national political conventions and the campaigns, but also in the coming sessions and all subsequent sessions of Congress. Part of the \$100,000 will be spent against efforts for a referendum in the next session as well as to prevent Congress from reducing prohibition enforcement appropriations. After the conventions next summer, a national strategy conference is expected to meet to endorse a presidential candidate.

Jolly old Dr. Edwin C. Dinwiddie, who wears green shirts and suspenders, is executive secretary of the board. He has spent 37 of his 64 years as a temperance worker. Gleefully he stresses the significance of the "million dimes" stunt. Wet movements are financed almost entirely by a few millionaires, he says, and the dime demonstration will be in the nature of an uprising of the masses. The wet millionaires, he is prepared to prove, feel that beer and liquor taxes would save them much of the tax money they now pay.

So emphasis is being laid on the fact that in this fund-raising a millionaire has to come down on the same level with the laborer. He can give only a dime. Certain millionaires and other prominent dries have agreed to give dimes. Their names will be publicized at the proper time.

Of course, Dr. Dinwiddie says, much more than \$100,000 will be needed and after the dimes are in, the dry millionaires will be permitted to resume former privileges and give money in any amount. Funds will be spent on office maintenance, personnel, traveling expense and literature. Full reports of receipts and expenditures will be filed with the Clerk of the House.

UNLOCK JAWS

MEMPHIS—Modern surgery had unlocked the jaws of Eugene Barnette, 17, whose jaws became locked 10 years after he had been hit in the face with a baseball. Surgeons chiseled out surplus bone from the jaw and propped the mouth open for several days. This operation freed one side of the mouth, but a second must be performed in about three months to unlock the other side.

SCHOOL DAYS

LONDON—Miss E. Alleroff is one school teacher in England who receives the undivided attention of her pupils. She teaches an Embellish school, at Tarsset, Northumberland, said to be the smallest school in the British Isles. She has four pupils, and they have to walk three miles to get to school. The teacher herself rides 10 miles on horseback each day to school.

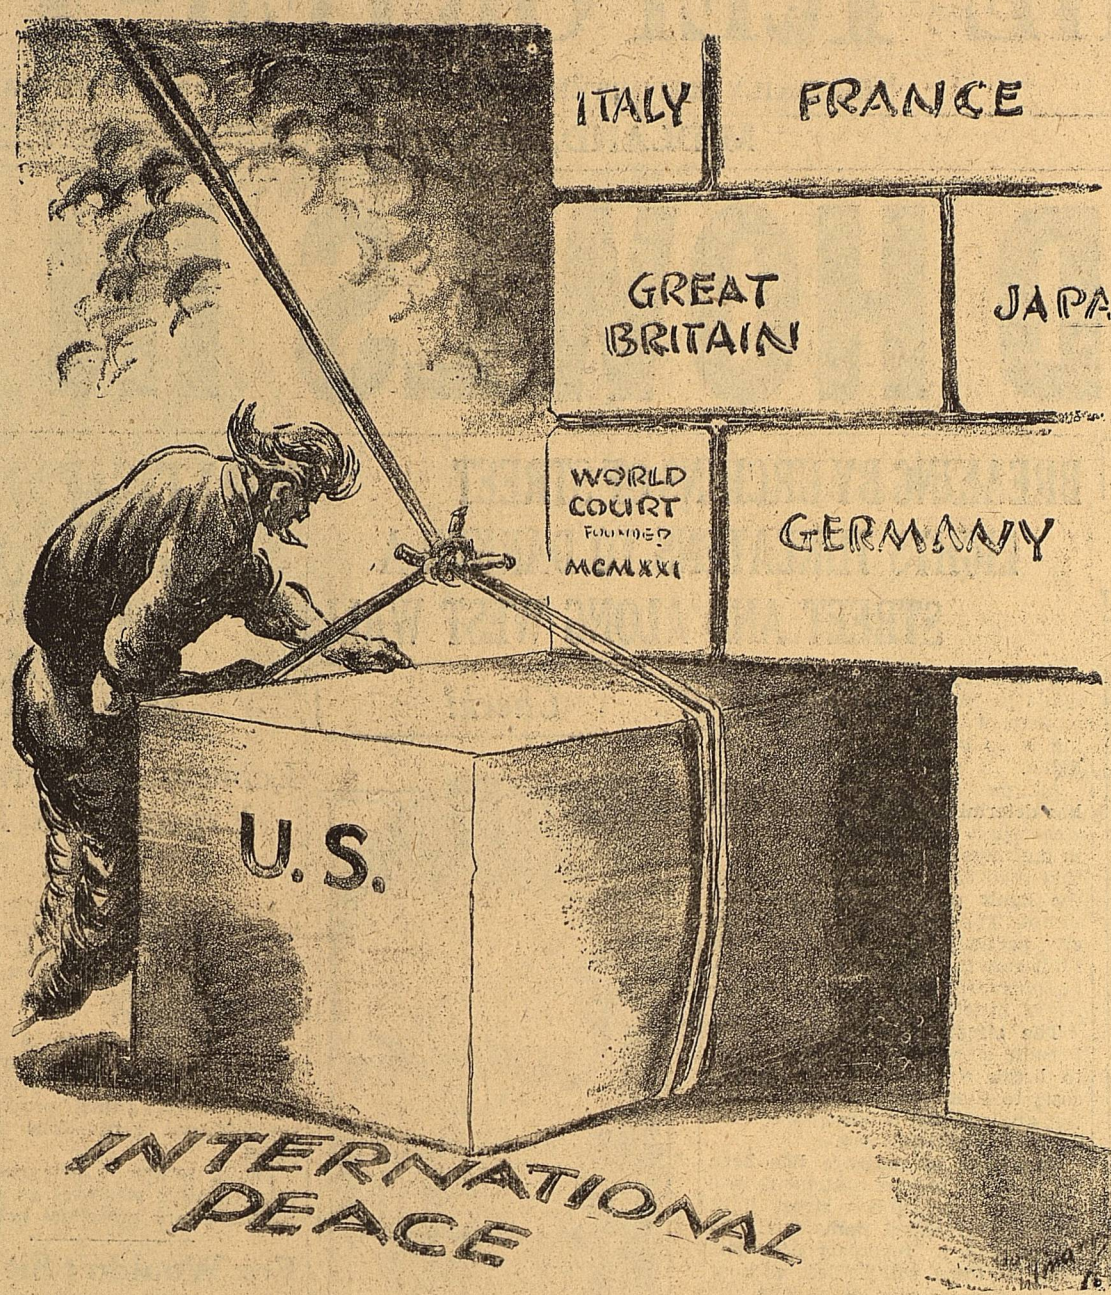

Fall Hats Popular Prices McMullan's.

STICKERS

A SAT IN HIS GRAY WATCHING THE MOONBEAM'S PLAY ON A KEG THAT IN THE BUSHES LAY THE LEAVES, WITH A TOOK UP HIS SONG: "THOU THE BRAVE; THOU THE STRONG; TO THE DOH OF GREAT BATTLES BELONG. FRIEND OF THE TO THEE I SING, AND HAIL THEE AFAR AS JOHN BARLEY CORN, KING."

There are eight words missing in the above verse. The missing words are composed of the same six letters, differently arranged. Can you supply them?

The Cornerstone

EDISON

Editor's Note: This is the sixth of 12 exclusive stories on Thomas A. Edison, as told by Major William Joseph Hammer, lifelong friend and scientific associate of the great inventor. As a boy, Major Hammer went to work for Edison at his Menlo Park laboratory in 1879 and rapidly grew in importance in the great electrical wizard's organization. He is now a consulting engineer and chemist in New York City.

By WILLIAM JOSEPH HAMMER, Lifelong Friend and Scientific Associate of Thomas Alva Edison, as Told to Willis J. Ballinger (Copyright, 1931, NEA Service, Inc.)

One night in Menlo Park, light was born into the world—real light. Edged was the annoying tyranny of the fluttering wick and the danger from fire of the sputtering gas lamp. But the nativity of incandescence as a usable light was unattended by any solemn wise men. You might have thought they were colleagues.

It was in 1860. And on the memorable night the hands of the clock pointed somewhere between 10 and 12. A worker mounted the steps of the laboratory three at a time. His name was William Joseph Hammer and in his hand he tightly clutched a small lamp. Searching out Edison on the floor he sped to his side with the momentous news. The word spread like wildfire—an incandescent lamp had burned for 1569 hours undiminished.

Mechanics from the shops dropped their tools and hurried to the laboratory. Then began a triumphant procession. At the head walked Hammer, holding aloft the mother of rays that were to light a globe. By his side, marched Edison, his face radiant. In serpentine style the marchers swept around the laboratory, started downstairs, wove in and out of the buildings. They yelled their praise. They clapped their hands. They danced. By instinctively they sensed drama. A religion of incandescence had been founded. Sleeping millions, countless of the unborn, were to embrace its rayful ritual.

The incandescent lamp was undeniably Edison's greatest brain-child. But he did not regard it so. He always maintained that his premier accomplishment was his great Jumbo dynamo. And his favorite invention was the phonograph.

Hammer, you are better posted on my inventions and patents than of the men I ever had around me. —Thomas A. Edison.

Now Edison was not the inventor of the incandescent lamp. Many people have claimed that he was. But Edison himself never acknowledged it. In fact, he told Major Hammer more than once that he was not. What he did was to make the first incandescent lamp usable for commercial purposes. He was the father of the commercial incandescent lamp.

Many people put the origin of the Edison incandescent lamp on Oct. 21, 1879. But that was not the lamp. That lamp could never have been used for commercial purposes. Edison had merely made a few improvements on early efforts in that lamp. The lamp of 1879 burned only 40 hours. It stood only a feeble candlepower charge. It contained platinum and that metal was more costly than gold. Edison had to discover

This sketch shows the scene of wild confusion as Hammer, hearing the light, and Edison at his side, paraded through the laboratory on that night in 1880 when commercial electric light was born.

how to extend the life of a bulb many-fold longer, how to substitute for platinum in the conducting of the current and how to increase the candlepower so that more light would be given off.

Up to the first commercial lamp of Edison, the world had relied on kerosene, candles, gas, whale oil and arc lights. All were hopelessly inefficient as compared with the incandescent light. Many of them, moreover, were highly dangerous. Gas was particularly so. There was the danger of suffocation. There was the inconvenience of leaks in the pipe, the blackening of the ceiling and walls, pipes freezing in winter, the annoyance and cost of repairing pipes into which water had seeped.

And then kerosene, gas, candles and the arc light were all liable to start a fire. Major Hammer made a tabulation of the number of fires in New York City before the advent of the Edison incandescent lamp. They were numerous and expensive as the following table shows:

Caused by	Fires	Loss
Kerosene	259	\$ 94,657,000
Gas	110	128,174,000
Matches for gas	35	22,570,000
Candles	88	30,667,000

Arc electric light... 7 550,000
Incandescent lamp 1 Insignificant
The arc electric light had insuperable handicaps in the competition for a safe and luminous electric light. This kind of light had always to be burned standing straight upwards. If it inclined at an angle it promptly burst into flames. If it were rocked a little, ignition resulted. The incandescent lamp of Edison could be burned at any angle. It could be shaken at will. No ignition would result.

Now, not only were there arc lights in existence long before Edison began work on his incandescent lamp, but incandescence was nothing new. Major Hammer spent 34 years collecting the history of the incandescent lamp. He sold his collection for \$10,000 to the General Electric Company, which presented it to the Edison Illuminating association. When Edison heard about the terms of the sale he remonstrated:

"You can't sell that for \$10,000. Why it's worth a good deal more than that!"
But Major Hammer had agreed to sell it, and today experts say that this collection, consisting of four cases 10 feet long, is well worth over \$1,000,000 and getting more

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

It was a Spitz?

Loafers and "people who think they are too good to pick cotton won't even get free turnip greens this winter, welfare officials say. He who loafs now won't even get half a loaf this winter.

And speaking of turnip greens. It's a good thing those greens were planted on land belonging to the deep water Baptists or they would have died of drouth before these last rains came.

Talking about Baptists reminds me of Methodists. That new men's class taught by Charlie Klapproth may be meeting in an undertaking parlor, but it's a live wire bunch, and once you hear Charlie you'll know he doesn't give dead talks.

And speaking of Methodists reminds me of Presbyterians. The Presbyterians will soon be herding together again, and from what, everybody says the Rev. Mr. Coleman is a good herdsman.

And speaking of Presbyterians reminds me of Christians and Church of Christ members. You know every pastor in town now is a young man—Cotton, Coleman, McCall, Borum and Peters. Now, Peters may have a few more gray hairs than McCall and the others, but he's just as peppy as a lad. Look how he jumps around to Arkansas, Missouri, and Van Zanit county, for all I know, to hold revivals.

Now that I've said so much about preachers and churches, I'll conclude with "Amen," or should it be "Selah"?

Did you hear about that honest-to-goodness Midland woman who bought a cuspidor to put her new dog in because her husband told her

valuable every minute. The Hammer collection set a useful fashion in the technical world. When the Bell people beheld it they wondered why something like that hadn't been done by the telephone. Those connected with the development of the telephone were along in years. Soon they would be dead. So a wonderful collection of the history of the telephone was made. Today this is being done with all inventions.

To Major Hammer was intrusted all the tests and records of the incandescent lamp when Edison was pondering the problem. That is why Hammer rushed upstairs the night the first successful commercial incandescent lamp had been created. He had been watching a lamp test for weeks and for over a year had been tinkering away with Edison and others on this great invention.

The year Edison was born two inventors—Gardner and Blossom—took out patents on an incandescent lamp. Before that two Americans had showed Michael Faraday, the celebrated English physicist, a candleabra of 26 lights each representing a state of the Union.

But though incandescence had been studied many years before Edison decided to make the lamp, all such products were useless for commercial purposes. Not only was the platinum used expensive, but it was a poor conductor. It could stand but little voltage without melting. And thru it the current shot too rapidly. What was needed to perfect the incandescent lamp was a filament inexpensive, of high resistance to current so that more light would be given off in the passage of the current, and capable of standing high voltage without melting or breaking down. Platinum failed in all of these tests.

Edison began working on the incandescent lamp in 1878. In that

year he attended the transit of Venus expedition in the west. He had gone there to attempt the measurement of the heat of the star Arcturus, which is at one of the farthest points in the heavens. To do this he had devised what he called a "basimeter." This consisted of a piece of carbon mounted in such a way as to be tremendously susceptible to heat. The tests did not turn out very well, but, on the expedition he fell in with some of the leading scientists of the nation. On the way back they suggested that all go and see "old man Wallace's laboratory" in Connecticut.

William Wallace was one of the pioneer figures in electricity in the nation. He had a wonderfully well equipped laboratory. So they went to see Wallace.

It was here that Edison was greatly stimulated in his ideas on incandescence.

Wallace was pottering away on arc lights trying to improve them.

"Wallace," said Edison, "I believe I can beat you making an electric light. I think you are working in the wrong direction."

Edison went back to Menlo Park and in 1879 the world was greatly startled to hear that Edison had solved the problem of the subdivision of the electric light by incandescence. But the problem was still unsolved. The experiment of 1879 was simply one step to the final step. But the final step did not come until a year later.

Next: Experiments with sewing thread, paper, horseshoes and bamboo in the long, long search for electric lamp filament to substitute for platinum, which cost more than gold . . . success at last! . . . The world's first commercial incandescent lamp factory. . . The discovery of tungsten.

Glamor—Via Black and Green Lace

There's sheer magic in black lace and green when Worth combines them to make this lovely, graceful gown for semi-formal occasions. The yoke, decorative sleeves and lower edge of the long skirt are of the green lace, the body of the dress black. It is worn with classic black satin pumps with rhinestone buckles and a dashing little Elizabeth Schoen hat of velvet, with a touch of feathers.

Clare Claibert Is Sensation of Music Festival

The remarkable artistry of Mme. Clare Claibert, who is soon to be heard in Abilene, has been compared to that of Melba and Sembrich. Her sensational triumphs in Europe and in her first year of opera and concert in America have placed her in the van of those bright birds of song led by the immortal Patti.

Mayor Sam McKinney of Odessa transacted business here Wednesday.

Herbert Berry has returned to Midland from Chicago where he spent a vacation visiting relatives.

Fred Fuhrman has returned to Dallas after a visit in Midland.

Friday Hallowe'en open house at the room of the Co-Workers' class from 7:30 to 8:30. All members are expected to attend.

Saturday Children's Story hour will be held at the country library from 2:30 to 3:30.

Helpful Health Suggestions

Welfare Group Studies Homeless Men One thousand homeless men in New York City will be given health examinations during a study of the welfare council of that city in an effort to ascertain the mental and physical condition of the large group of men commonly referred to as homeless.

Choice Cooks' Corner

Orange Pie 2 large or 3 small oranges 2-3 cups sugar 2 cups scalded milk 2 tsp. cornstarch 2 eggs 1-2 cup sugar 1 tsp. salt Peel the oranges and cut in small pieces, removing all membrane. Add two-thirds cup of sugar and set aside. Make a custard of the milk, cornstarch, egg yolks, sugar and salt. Cool. When cool add the orange sections and pour into a baked pastry shell. Cover with a meringue made from the egg whites. Brown slightly in a moderate oven.

HOUSE OR RENT SEATTLE, Wash. (UP)—Mike Creek, laborer, wanted to set up light housekeeping but he didn't have a house. Chancing upon a suitable tool shed in the yard of a construction company, he hired a truck and hauled it to a location which pleased his fancy. From a nearby dump he produced furniture to fit out his new home. Its appearance, when completed, made Mike's eyes sparkle with pride. Police, however, interrupted his reveries to drag him off to jail for stealing the tool shed.

"None so good as LUCKIES"

"I've tried all cigarettes and there's none so good as LUCKIES. And incidentally I'm careful in my choice of cigarettes. I have to be because of my throat. Put me down as one who always reaches for a LUCKY. It's a real delight to find a Cellophane wrapper that opens without an ice pick."

How One Woman Lost 20 Pounds of Fat

Lost Her Double Chin Lost Her Prominent Hips Lost Her Sluggishness

Gained Physical Vigor Gained in Vivaciousness Gained a Shapely Figure

When your vital organs fail to perform their work correctly—your bowels and kidneys can't throw off that waste material—before you realize it—your growing hideously fat!

Take one half teaspoonful of KRUSCHEN SALTS in a glass of hot water every morning—cut out pastry and fatty meats, go light on potatoes, butter, cream and sugar—in 3 weeks get on the scales and note how many pounds of fat have vanished.

Notice also that you have gained in energy—your skin is clearer—your eyes sparkle with glorious health—you feel younger in body—keener in mind. KRUSCHEN will give any fat person a joyous surprise.

Get an 85c bottle of KRUSCHEN SALTS from City Drug Store or any leading druggist anywhere in America (lasts 4 weeks). If this first bottle doesn't convince you this is the easiest, safest and surest way to lose fat—if you don't feel a superb improvement in health—so gloriously energetic—vigorously alive—your money returned.—Adv.

SAN ANGELO BOBCATS BOAST EIGHT-POUND WEIGHT ADVANTAGE

SHIFTY HARRISON AT QUARTER AND 190-POUND DELKER AT FULL LOOM AS BUGABOOS TO BULLDOGS

A weight bugaboo lends a slight air of depression to dopesters of the Midland-San Angelo game Saturday in the Concho capital, following the receipt here of a weight sheet of Bobcat men.

Where Midland's first string averages 152 pounds, Angelo's main string carries an average of 160; Midland's first string backs average 145, Angelo's 157.

The Bobcat squad, true enough, has a few weak spots, judging by weight, but there are some big men who loom here and there to offset most of the disadvantage. For instance, three backs on the main squad travel under 150 pounds or less. But where the flashy 140-pound Harrison cross-steps his way across the sward for runs anywhere up to 100 yards and McGlothing and Reid carry only 150 pounds, a very terrible young man named Delker, fullback, packs 190 pounds.

The San Angelo line is not a welded aggregation of elephants like that of the Big Spring horde, but will not likely stand being run over and deflated by anybody's club in this district. The ends weigh 170 each, the tackles 150 and 165, the guards 160 each and the center 170.

The heaviest man in the Midland lineup is D. Booth, who weighs 165. On the entire Midland squad there are only four men who weigh as

SPORTS REPORTS

By R. C. HANKINS
The following from Blodny Cross of the San Angelo Evening Standard:

The Midland high school football team, San Angelo high school's district four opponent on the Bobcat gridiron at 3 o'clock next Saturday afternoon, may give the domestics a meaner gallop for their jacks than many of the boys and girls imagine. The club was steam-rollered into defeat a couple of weeks ago by the big and heavy Big Spring contingent. The Midland boys got off on the wrong foot and never could get right. The Bulldogs are unusually fast, are fairly adept at the passing game and are more determined than ever. Barry's boys learned a lot in the Big Spring defeat. San Angelo incidentally, has not shown itself very capable at blocking an aerial attack. The Midlanders truly stand a chance of making it very interesting for the admittedly favored Conchoans.

"Gene Lowrie has a nickname all his own for Bill Harrison, the Bobcats' baffling broken-field runner. He alludes to him as 'Long-Gone' Harrison.

"The department's good friend, Mr. Jim Tucker of the Waco News-Tribune takes a job at the ambitious Wendell Bedichek and O. Brant's Big Spring football team.

"A Mr. Bedichek, a scribe of Big Spring, read last week where Corsicana had made more points than any in the state, and he immediately flooded the state with publicity to the effect that Big Spring had made a few more points than Corsicana, but at the time Big Spring had played six games and Corsicana five and when Corsicana played its sixth game it found opposition similar to the kind Big Spring had been playing and Corsicana added 115 points to the total. We doubt if Big Spring makes that many more points during the balance of the season.

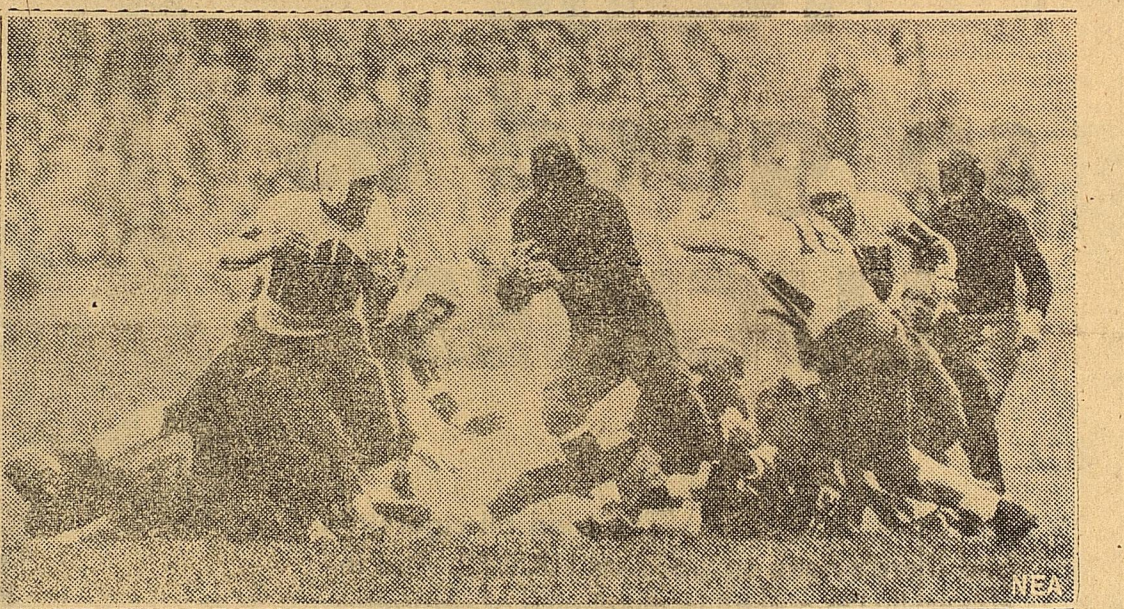

"Still, we have on fairly reliable authority that the Big Spring team is pretty tough, and has three or four football players on the roster. Tack Dennis, the imported fullback, our informant declares was a whiz against the fastest high school competition in Oklahoma. They're beginning to compare David Hopper, Big Spring tackle, to Scrap-Iron Grimes. Bill Flowers, captain and half back, is a pretty pert young man to have about, anybody who saw him go last year will tell you."

Dr. William J. Anderson, director of the Yale gymnasium, foresees the decline of football and the growth of the so-called minor sports to the point where they become self-sup-

When Harvard Downed Visiting Texans

With husky Texas Longhorns charging him from both sides, Jack Crickard, fleet Harvard halfback, had but a few yards to go when this picture was snapped at the stadium at Cambridge, Mass. But it was a disappointing day for the Texas eleven, making its first appearance on an eastern gridiron, for the Crimson downed them 35-7. Crickard, who here is shown carrying the ball, made three of the Harvard touchdowns.

Army Charge Wins Only Tie With Yale

For three full quarters of the Army-Navy game at New Haven, Conn., some 72,000 spectators watched a hard but scoreless contest. This picture shows an unusually large gain for Army, with Bill Frenzler, left, backfield ace, streaking around right end for 22 yards. Two touchdowns, one by each team, were made within half a minute of actual playing time in the final period and the game ended in a 6-6 tie.

AGGIE BACKS SHIFTED AGAIN FOR BIG GAME

COLLEGE STATION, Oct. 29.—Drill in fundamentals and practice against Centenary formations has been the program this week for the Texas Aggie football players as they prepare for the first invasion of Shreveport to play the Centenary College Gentlemen Saturday at the Louisiana state fair grounds.

The Aggie players, about twenty-eight strong, will entrain for Shreveport Friday afternoon and will stop off for a few hours at Houston to have dinner. They are scheduled to arrive in Shreveport early Saturday morning. For the third time this season the Cadets will not hold a workout on the day before the contest. Train schedules kept the Cadets from practicing on the Friday before their games with Iowa university at Dallas and Texas Chris-

tian university at Port Worth.

Two special trains of Aggie students and other supporters will leave College Station Friday night for Shreveport. The trains will be routed by way of Houston and will arrive at Shreveport in time for the cadet corps to parade through the main streets of the city at 11 o'clock Saturday morning.

Besides being the first game for the Aggies against the Gents at Shreveport, Saturday's game will mark the first time the Aggie student body has made a corps trip to a point outside of Texas. It also will be the first corps trip of the year for the cadets.

The Aggies tentative lineup for the Centenary game shows that Coach Madison Bell still is seeking his most effective backfield combination. The starting backfield for the most of the Aggies' games this year has been composed of Jimmie Aston at fullback, "Goat" Hewitt at quarterback, and Paul McFadden and Henry Graves or Rue Barfield at halfback posts.

Against Baylor the past Saturday,

however, Coach Bell switched Aston to right half and sent in Ted Spencer at full, "Frenchy" Domingue at quarter and "Dub" Williams at left half. It was the first game of the season that Spencer, Domingue and Williams, all of whom are sophomores, have started.

For the Centenary game it seems that Coach Bell will have Aston resume his fullback duties and will start McFadden and Barfield again as halfbacks. Nelson Rees, the main spring of the Cadets' attack against Baylor, has been named as the starting quarterback.

The Aggies probably will enter the game with memories of the 96-yard run that Ralph (Little Bull) Murff, Centenary back, made against them in 1930 for a touchdown on a punt return. Murff also is rated as a good passer and place kicker.

Comparative scores of previous games this season indicate nothing on the probable outcome of the game. Both the Gents and the Aggies have played the Baylor Bears, the Aggies winning their game 33 to 7 and the Gents winning 24 to

Feed Is As Good As Cash

The Reporter-Telegram is accepting from Midland county farmers bundle hegari or maize in payment of subscriptions, either new or renewal, allowing four cents per bundle.

If you are not a subscriber to the paper, bring us 125 bundles of maize or hegari and get the paper for a year. If you are already a subscriber, the offer holds good on renewing the subscription, bringing it up to date or paying for a year in advance.

The feed must be brought to the vacant lot opposite the newspaper office any time before noon Saturday.

At 3 o'clock Saturday afternoon the entire lot of feed will be auctioned. Midland cattlemen and livestock feeders will be there to bid. You may find a buyer for some more feed if you have more to sell.

Farmer Forecasts Like a Veteran

MACON, Mo. (UP)—Buffalo's mystery man baseball prophet has a rival here in a farmer, unknown to fame, who says this business of weather forecasting is a simple matter if you keep tab on the first ten days of each three-month cycle.

He submitted his scheme, along with a challenge to W. C. Brown, chief of the weather bureau here. He suggested that Brown junk his rain gauges and barometers and adopt his system.

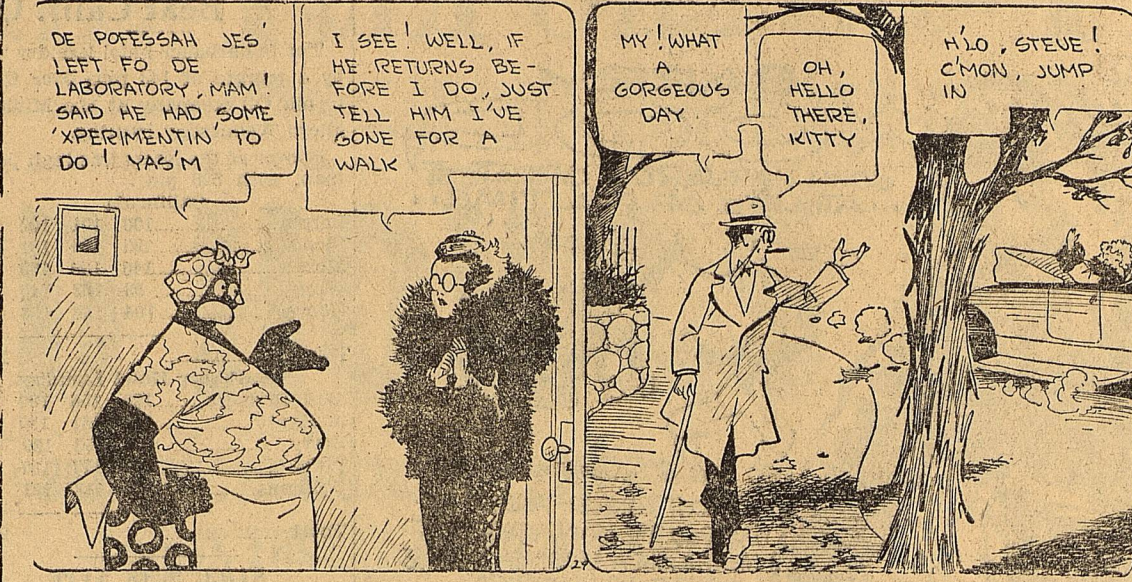

The farmer doesn't want his name used until and if the bureau verifies his forecasts. Brown agreed to check with him for the next three months.

Early in June the mystery forecaster got the papers to announce there would be no drought this year. The rain sufficient for crop needs would fall in July, August and September. Such proved the case.

Weather during the first ten days of each three months cycle indicates what will happen during those months, he contends. His cycles begin in January, April, July and October.

HE CRAVES SPEED
LOS ANGELES.—Joseph Hart, 57, was riding in a friend's automobile at a fast speed when it hit another. Hart climbed out unscathed, remarked that he was just beginning to enjoy a fast ride when the ambulance rolled up. "Now I can really ride fast," he remarked as he was put in the ambulance and whirled away to the hospital. He was given another fast ride home in a police car when it was found he was not injured.

Doug and Loretta Here in Picture

"I Like Your Nerve", new First National picture now on the screen at the Ritz theatre, is the second in which Douglas Fairbanks Jr. has been starred, the fourth in which Loretta Young has teamed with him.

Mrs. Judd--

Continued from page 1

In July, 1920. A Phoenix physician, now dead, signed the death certificate, giving the cause of death as "narcotic poisoning." At the time, Dr. Judd was an assistant physician at the Arizona state hospital for the insane.

Judd known to have married Menard girl. Dr. William Judd in 1920 married the daughter of Mrs. Dollie Colwell of Menard who was a witness to the ceremony.

Advertising Done In Other Towns

Advertising was done in Odessa and Stanton this week by the Midland chamber of commerce to assist both the new trades day group of merchants and the group which is giving away merchandise.

saying the death was the result of acute indigestion and heart disease.

INSANITY PLEA TO BE WELCOMED LOS ANGELES, Oct. 29. (AP)—With Winnie Ruth Judd, confessed slayer of two women, reported under observation in the county jail by a psychiatrist, Arizona authorities here seeking her return to Phoenix said they would welcome an insanity plea in event the indicated one of self-defense was dropped.

"They can't get anywhere with an insanity plea," said County Attorney Lloyd Andrews of Phoenix. "Mrs. Judd tried to conceal her crime and that indicates she is capable of distinguishing between right and wrong. It is this ability which is the determining factor."

Extradition papers were signed by Governor Rolph. Mrs. Judd's attorneys said they would claim an error was made in the issuance of the extradition papers and, failing in that, would seek action on a writ of habeas corpus.

FATHER TELLS OF FAMILY INSANITY DARTINGTON, Ind., Oct. 29. (AP) The claim of Mrs. Winnie Ruth Judd, confessed slayer of two women, that there has been insanity in her family was substantiated here by her father, the Rev. H. J. McKinnell, 74-year-old retired minister.

His own uncle, Joseph McKinnell, was insane the last 10 years of his life, McKinnell said. The uncle died in Scotland. George Wilson, a first cousin of Mrs. McKinnell, died insane at an asylum in Bartonville, Ill., according to McKinnell.

Judd known to have married Menard girl. Dr. William Judd in 1920 married the daughter of Mrs. Dollie Colwell of Menard who was a witness to the ceremony.

BACK FROM COLORADO R. D. Scruggs, manager of the Scruggs-Buick Motor company, has returned home from Colorado Springs where he spent a few days transacting business.

CLASS PARTY Members of the Martha Fidelis class will entertain for the husbands with a Halloween party at the home of Mrs. Fred Chapman on North Colorado street Friday evening at 8 o'clock.

STILL SETS TYPE

HOLDENVILLE, Okla. (UP)—Oklahoma's oldest newspaper publisher and editor, Richard Y. Blackwell, still sets the type for his paper by hand, after making his daily beat gathering news.

Blackwell, who is 81, is editor of the Enterprise, a weekly, in the small town of Calvin near here. Blackwell, assisted by his wife, has published the paper since 1902.

NOT THE DAVEY

SEATTLE, Wash.—Police had Davey Jones in a locker, but it wasn't the Davey Jones and locker of nautical fame. Jones was a companion of three holdup men, and not the fictitious character who's supposed to wait at the bottom of the sea to receive drowning sailors.

Coleman, Texas, shipped over 200 carloads of grain this season.

FIND CAVE DWELLERS LIVE TO BE 140 YEARS OLD

LONDON.—Dr. Irvin Baird and Miss Jill Crossley Batt are back in England from an expedition to the Himalayas with news of a race of cave dwellers who live to be 140 and over.

"We set out to discover a tribe of cave dwellers living at a height of 22,000 feet and existing on fruit and vegetables," they explain. "We claim that the tribe we did discover—600 men, women and children, all of splendid physique—are the last of the Chaldeans mentioned in the Bible."

"We believe they traveled from their original home in Mesopotamia to their present home. They speak their original language—Chaldean—and live to a great age. The race is free from all disease."

FIND SPAWNING BED

WASHINGTON.—After years of search, the spawning beds of the halibut, long a mystery, have been found in ocean shallows within 50 miles off the coast of Alaska. Here, according to J. F. Babcock, chairman of the Canadian-American Halibut Commission, the large fish go to spawn. It is expected that this bank will give much valuable information on the life of the fish.

Floyd county has the distinction of having three women who have won the Master Farm Home Makers award.

A 24-hour weather report station is to be established at the Sweetwater municipal airport, stopping place for Transcontinental Airways.

An Indian grain crusher in excellent state of preservation has been found near Lamesa.

COLDS THAT DEVELOP INTO PNEUMONIA Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with two-fold action: it soothes and heals the inflamed membranes and inhibits germ growth. Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs. Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold, no matter how long standing, is not relieved after taking according to directions. Ask your druggist. (adv.) Bear Killed With Tiniest of Guns TWIN BRIDGES, Mont. (UP)—Daniel Boone killed a bear with a hunting knife and achieved immortality in the mind of every American school boy, but Ed. Shultz, a mighty huntsman of Twin Bridges, despatched a mother bear with a single-shot .22 calibre revolver and in recognition received a few paragraphs in his home town newspaper. Shultz was wandering around in the Canyon creek country, which is located in the Beaverhead National forest, when he came upon the bear and two cubs, and with that meeting began one of the classic additions to the repertoire of Montana hunting tales. Unlike most mighty hunters, Shultz was not armed with a trusty long rifle which played such a prominent part in the winning of the American wilderness. His only weapon was the little revolver. His first shot struck the mother bear, but did not inflict a fatal wound. He reloaded the gun. His second shot failed to kill. He again reloaded the midget pistol. The bear, enraged by pain, started to obliterate her tormentor, but the third bullet bored her skull just between the eyes and she sank to the ground dead. Shultz then killed the two cubs with a club, because when he had

DOUG FAIRBANKS JR. "I Like Your Nerve!"

Ladies From Missouri FOUND in the back of any old cook-book, in the "Useful Compendium of Household Hints." "To test muslin for 'filling'—rub a small section vigorously between the forefingers, and note any starchy substance that breaks out of the fibers. "To test for color-fastness—before buying wash goods of any kind it is safest to obtain small samples of all patterns and soak in clear water. "To detect cotton in an 'all-wool' fabric—pull the threads apart and apply a lighted match," etc., etc. How funny they were—these old suspicious-of-everything shopping tests! Grandmother knew them all by heart, and descended on Mr. Biggs, the linen draper, with defiance in her eye. Her little, moistened forefinger shot suspiciously under every proffered length of sheeting or dish-toweling. She took nobody's word for anything! But how differently you approach a yard-goods purchase in any store today. A name on the selvage . . . a label on the end of the bolt . . . a guarantee-tag that also suggests a method of washing. These are your safety-signals in buying. To the questions "Will it wash?", "Is this pure wool?" or "pure silk?", the saleswoman has only to remind you of the trade name of the fabric. When she mentions a name familiar to you through advertising, your doubts are dispelled. Yes . . . we still look before we leap, but today that means READ BEFORE YOU SHOP!
