

# WISERY RIDES TEXAS BLIZZARD

## ENGLISH GRAB RECORD WHEN FLIGHT ENDED

**Smash Boardman and Poland's Epic Hop to Turkey**

LONDON, Feb. 8. (UP)—Oswald Robert Gayford and Gilbert Edward Nicholletts, British army pilots, captured a long distance non-stop flight record when their plane passed Orji, British Southwest Africa, en route from England to Capetown.

They covered 5,175 miles and landed 899 miles north of Capetown. The previous record of 5,012 miles was held by Americans, Russell Boardman and John Poland, who flew from New York to Istanbul.

## SMITH INJURED AS PLANE CRACKS UP

ORAN, Algeria, Feb. 8. (UP)—Victor Smith, 19, South African pilot, was slightly injured in a crash here today on a flight in which he was attempting to break Amy Johnson's record from England to Capetown.

## MOLLISON READY FOR OCEAN JUMP

THIES, Senegal, Feb. 8. (UP)—Captain James A. Mollison landed here early today, ready to begin a 2,000 mile south Atlantic solo flight. He was flying the same plane in which he crossed the north Atlantic. The captain hoped to start at dawn Thursday.

## SOVIET PLAN FORCING MANY FROM MOSCOW

MOSCOW. (UP)—Between 300,000 and 500,000 people will be forced to leave Moscow during 1933 as a result of the new passport decree, that requires every individual in the Soviet Union to have a passport describing his social status and condition.

## Cities Crowded

Right now the big cities such as Moscow, Leningrad, and Odessa are crowded with people. Street cars are almost impossible to use on account of the dense mobs filling them and even clinging to the outside. Rooms are hard to find where from two people to ten or more. Apartments formerly designed for one family now hold three or four.

## Visas Necessary

It is hoped that the new decree will put an end to all this. People will not be allowed to travel unless their passport has a visa to do so, and the visa will not be given without good reason. In the cities every person without a legitimate occupation and living quarters will be sent out in the country some place where they can be used, either on farms or new industrial projects.

## Barry on Staff of The 'New Outlook'

WASHINGTON, Feb. 8. (UP)—David S. Barry, ousted senate sergeant-at-arms, is now congressional commentator for the "New Outlook," the magazine which publishes the articles for which he was dismissed. In the article, it was alleged that some congressmen sold votes.

## House Committee Holds Wet Hearing

AUSTIN, Feb. 8. (UP)—The house state affairs committee began a public hearing at 2 o'clock this afternoon on the bill proposing legalization of wine beverages.

## Triumphant Nazis Defy Red Foes

The Communists and Socialists in Germany—bitter foes of Adolf Hitler's Nazi organization—allegedly have summoned a general strike in answer to Hitler's being elevated to the chancellorship of the German republic. Riots have broken out. Enmity between the communists and the Nazis is revealed in this picture, just arrived in America, showing the Brown Shirts parading before Karl Liebknecht House in Berlin on the 20th anniversary of the German Empire. Hundreds of police were on duty to prevent disorders in this "Red Square" of Berlin.

## GENERAL PERSHING MAY REMAIN IN MIDLAND UNTIL SATURDAY; BROTHER IN NEW YORK HANGING BY THREAD

General John J. Pershing, who commanded the four millions of the AEF during the World war, may remain in his room at Hotel Scharbauer until Saturday unless the weather conditions improve, it was indicated at noon.

## ONEIDAS PLAN TO PICK NEW TRIBAL CHIEFS

APPLETON, Wis. (UP)—New chiefs of the Onedia Indians soon will be chosen by "the best women of the tribe" in accordance with an aboriginal form of suffrage which antedates the white man's 19th Amendment by centuries.

## Ancient Tribal Seat

The official functions will be held at Onedia, the ancient tribal seat. Old Indian law and custom will be observed and the ceremonies will last several days, Onedia spokesmen said.

## Civil Cases to Trial Next Week

Civil cases will be tried next week in district court, criminal cases the week after, it was announced Tuesday by District Judge Charles L. Klapproth.

## ADVISE STOP GOVERNMENT COMPETITION

Shannon Committee Says Initiative Is Being Stifled

WASHINGTON, Feb. 8. (UP)—The Shannon committee today urged congress to cease government competition in forty fields in order to restore millions of dollars worth of business to private hands.

## First Horse Thief Caught in Years Is Held at Big Spring

BIG SPRING.—Billie Collins, 15-year-old brown-eyed waif from Beatrice, Neb., Monday gave this city its first taste of horse theft since the last public lynching.

## 41 Lions Listen To Day's Address

Forty-one Lions braved chilly weather today to attend the weekly luncheon. The women of the Presbyterian church served.

## Sells 900 Calves To Missouri Man

W. W. Brunson this week sold 900 calves recently purchased from the ORO ranch of Caranca, Sonora, Mexico, to Carl Seaman of Tarkio, Mo.

## Fate of Nation Hinges on a Comma

The following continues a series of articles written in Washington, D. C. for The Reporter-Telegram by ex-Senator T. S. Hogan. Others will follow.

WASHINGTON—For two days last week a brilliant array of counsel battled before the judiciary committee of the senate over the infinitesimal "to" and a comma in the constitution of the United States.

To lay and collect Taxes, Duties, Imports and Excises, to pay the Debts and provide for the Common Defense and general welfare of the United States; but all Debts, Duties, Imports and Excises shall be uniform throughout the United States;

Don't laugh, but that comma and infinitive may wreck the nation. Chief Counsel Lawson of the United States Federal Power commission has published a book on this subject of the general welfare clause and he argued that the grant of power to congress was absolute. He presented to the committee Madison's letters and report on the constitutional convention. Also, at great length, letters of George Washington, Alexander Hamilton, Randolph, Wilson and others to show that it was intended to convey this power to congress. Thomas Jefferson opposed the placing of this provision in the constitution on the ground that congress under it might infringe on the rights of the states.

## Blizzard Stalls 500 Autos in Mountains

Five hundred autos and their occupants, caught in a sudden mountain blizzard, were marooned for 48 hours in the deep drifts that blocked roads between San Bernardino and Lake Arrowhead, Calif. This telephoto shows scores of the cars near Arrowhead, where their occupants had gone for a week-end of sport. Many of the autos were completely covered. The motorists suffered from the cold, but no serious casualties were reported. A blizzard raged for the past two days over most of the middle west and the east, extending to great areas west of the continental divide.

## Coldest Here Since the Year 1898

The coldest weather that Midland has experienced since January, 1913, and likely since the winter of '98, laid siege under a clear sky last night and this morning, a 5-15 to 5-30 temperature reading at Sloan field establishing the mercury standing at 11.2 degrees below zero.

## Allowable Is Met in Etex

AUSTIN, Feb. 8. (UP)—Railroad Commissioner Ernest O. Thompson announced today that East Texas oil production has been within the allowable for the past four days.

## Fail to Confirm Frank Denison as Commissioner

AUSTIN, Feb. 8. (UP)—The senate did not confirm Frank Denison of Temple as state highway commissioner but confirmed another Ferguson appointee, R. L. Daniel of Victoria, for life insurance commissioner today.

## Given Life for Deputy's Murder

TEXARKANA, Feb. 8. (UP)—James Crabtree, 43, was sentenced today to life imprisonment for the murder of Deputy Sheriff Melvin Brackman last October. The jury reported at opening of circuit court today and sentence was passed immediately. It was indicated that Crabtree will not be tried for a second indictment in connection with the murder of Deputy J. C. Crain.

## Angelo Air Mail Service to End

SAN ANGELO.—Discontinuance of air mail service between San Antonio and Big Spring is scheduled for February 10.

## Cone Johnson Worse

TYLER, Feb. 8. (UP)—The condition of Cone Johnson, highway commissioner, ill at his home here, was reported to be worse today.

## SUB-FREEZING THROUGH MOST OF THE STATE

Temperature Almost 12 Below Zero At Midland

(By United Press)

Texas cold waves damaged Rio Grande valley fruit and gardens and Panhandle wheat early today. Thousands suffered from cold, falls and accidents on iced highways.

Police found four Mexican school children unconscious near San Antonio. There were no fatalities in Texas, although there were 28 cold deaths in the nation.

Midland reported 11.2 degrees below zero, Amarillo 8 below, Abilene and Tyler 4 below, Elkhore one below, Big Spring, 13 below, Lubbock 13 above for the fourth time in 40 years, Roswell, N. M., 20 below and Fargo, N. D., 28 below.

The government weather bureau forecast fair weather, not so cold in the Panhandle tonight, with fair and warmer weather for Thursday over West Texas.

For the eastern section of the state, fair weather and continued cold was predicted, with temperatures from zero to 6 degrees in the north portion, 10 to 14 in the south, except 20 to 25 on the west coastal region and 15 to 20 on the east coastal region tonight. Thursday was expected to experience fair weather, with rising temperatures.

Livestock is suffering from the cold, especially new-born calves and sheep.

Winter grains will receive a severe setback from the cold, said dispatches. Oats and barley especially are damaged.

The cold will prove of benefit to fruit growers by halting the opening of buds in many orchards. A few trees in this section had started blooming after several weeks of balmy weather, and these will be damaged; but the bulk of the crop had not reached the blooming stage.

City streets and highway hampered traffic Tuesday night and today, but commercial transportation was not seriously interrupted. Buses in and out of Midland were following schedule, the local offices reported.

Planes on the American Airway trans-Texas route came through Tuesday, but both night schedules through Abilene were cancelled, the planes being grounded at Dallas and El Paso.

Utilities companies reported their lines nearly intact.

No Highway Wrecks

There were no highway accidents of importance reported in this area, and mishaps were rare in the city, although streets and sidewalks were slick from frozen sleet.

The sudden cold wave caught many people unawares, and frozen pipes and radiators were common. Plumbers were kept busy Tuesday and dealers in alcohol and anti-freeze preparations were doing a brisk business.

Near-zero temperatures, with sleet and snow were reported by all central West Texas points. The Colorado area had a snowfall of more than one inch, and the mercury dropped to seven degrees.

Six in East Texas Seen

For East Texas, the forecast was for a minimum of 6 degrees above zero in the north to even freezing on the west coast. Warnings were issued for West Texas, where a minimum of 17 to 20 degrees was expected.

## HOLT WELL MAKES TWO HEADS AFTER TOOLS ARE BLOWN

Striking only three times with the bit after the Landreth Production Co. No. 1 Holt, Ector county outpost, had been shot and was attempting to drill through where the hole was bridged, the tools were blown upward, necessitating a fishing job yesterday.

Two heads were made, one at about 5 o'clock and the other at about 8 o'clock. Tuesday morning, good for about 20 to 25 barrels each, it was reported.

The hole was shot with a time bomb Monday night after striking section 14, block 43, township 1 north, T. & P. railway survey, about 2 1/2 miles northwest of two flowing wells drilled by what is now Standard Oil and Gas company, on the Dick Cowden ranch.

Elevation of the test is 3,076 feet, top of the lime section was called at 3,895 feet with top of gray lime at 4,430 feet.

## FLAPPER FANNY SAYS

The stout girl with a bright colored frock has two choices—diet or dye it.

FOUR CENTURIES OF ROMANCE

The birthday anniversary of a city seldom means very much. But there are a few cities which occupy special places in history—cities which came into existence like dreams born of bloodshed and wonder and desire—and when one of these passes a new milestone the event is worth looking at.

You might be interested to know, therefore, that the city of Cartagena, in Colombia, recently celebrated its 400th birthday.

It was born in 1533, when there were still living men who had sailed with Columbus, when Cortez's daring raid on the empire of the Aztecs was still being talked about. Pizarro's raid on the Inca empire was still in progress. A new world was being opened, an age of gold was dawning. El Dorado was a reality which might lie just beyond the town.

So Cartagena was bound to be a city whose air would be hazy with romance, a city around which legends and dreams would cluster.

It became the chief port for the Spanish conquistadors. Twice a year it sent a great fleet of blunt-nosed, top-heavy galleons off to Spain, with breath-taking quantities of gold stowed away below decks, painted sails billowing out from the creaking yards, perfumed and hard-mouthed grandees at ease in draped cabins on the high poop.

Pirates knew Cartagena, and soldiers, and gold-hunters, and explorers—all the lustiest spirit of one of earth's lustiest periods. Francis Drake sacked the place, held it for a time against long odds, sailed away with vast riches. The French followed him, later on, and did likewise; lesser sea-rovers thundered against the sea walls of the port, some of them were caught and hanged in chains, some of them landed in the prison cells of the great fortress and died slowly, in the dark.

The fortress had walls 40 feet high and 50 feet thick. Six hundred thousand slaves are said to have been used to build it; thousands of them died before the job was done, and something like \$80,000,000 was spent on it.

And it is that Cartagena which has just reached its 400th anniversary. Can any man with a feeling for romance be indifferent to the occasion?

FAME WEIGHS HEAVILY

The national capitol is suffering from an excess of heavy marble statemen. The famous Statuary Hall, sometimes known as the Hall of Fame and sometimes as the Chamber of Horrors, in which each state is permitted to erect statues of two of its most prominent citizens, has all the weight it can carry, according to engineers. Delaware wants to add its two statues to the collection, but unless the floor is strengthened of the total number of statues is reduced it can't be done.

This collection is surely one of the oddest features of our national life. It contains replicas of "great men" whom none but historians can remember; it contains statuary as atrocious as any that was ever carved. There is a valid place for such an institution, to be sure, but it has been handled wrong. Higher standards, both historically and artistically, could be applied to the entire collection with vast benefits.

EDITORIAL NOTES

British railways report that they carry an increasing proportion of the annual haulage of 200,000,000 gallons of milk in tank cars. Perfect roadbeds, as well as glass-lined steel tanks, contribute to the satisfactory results. Over the rugged roadbeds of early railroading the consignee might never have known whether he was to receive a shipment of milk or butter.

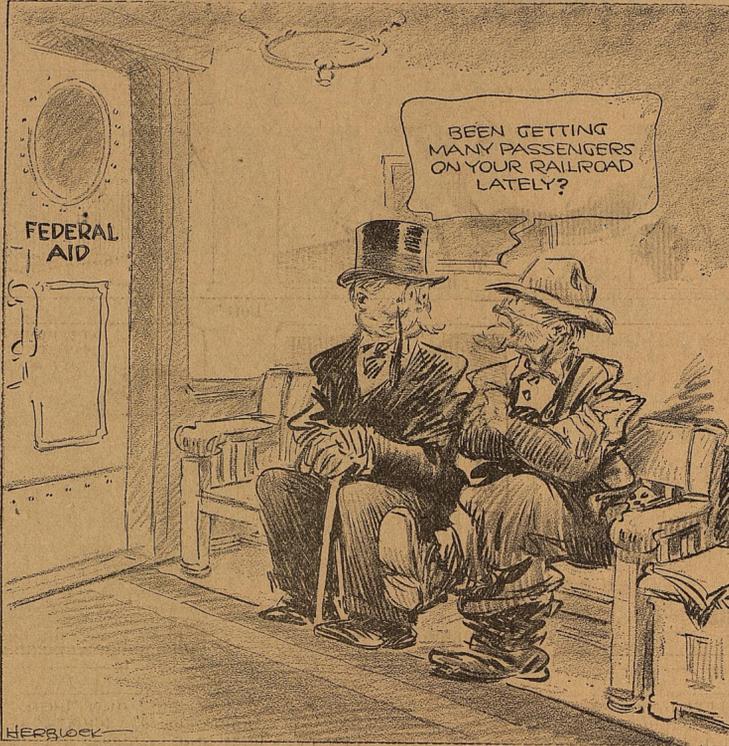

Mr. Henry M. Robinson, noted internationally as a banker, says it was not involved economics that closed many American banks, but a fear born of fallacies. If the people will undo fear, he says, they will reopen bank doors—and bank reverses of that sort would be a delight to depositors.

Side Glances . . . . . by Clark

"Baxter, I think the chauffeur was hurt when you didn't notice we had a new car."

Democracy

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

Tom Nance is one fellow who can wear overalls and a \$40 hat and looked dressed up. There is a girl here in town who isn't strong enough to wash dishes, but she can dance six hours at a time, six nights on a stretch. An honest stranger doesn't get offended if you refuse to cash his check. What has become of the old fashioned solicitor for funds for near East relief. Bennie Bizzell used to have a field with crooked furrows. His dad gave him a piece of land and told him to make a crop. Bennie was told to pick out something across the field and plow straight to it. He picked out a cow and the cow would move before he got to the end. I forgot to notice whether Bob Martin and Marvin Ulmer observed Ground Hog day as a holiday for the banks. The holdouts for baseball teams this summer are expected to be as bad as ever. I heard of a local bat boy for the handball league who is holding out for a bottle of pop per game. "Special Sale on Bathtubs. No Demonstrations," Howe and Allen. "Haircuts and Shaves. Nothing Sent out on Approval," Dave Johnson. George Phillipus says he feels qualified to lecture on how to raise children because he once was a child. You may find a lot of uninteresting articles in The Reporter-Telegram. The only way I can explain that is that the printers need a lot of early morning copy. This column is part of it. The earth is made of rock, metal, soil and water. The world is made of just one darn thing after another. Times have changed and we must change our tactics. Think of the silk worm. He used to make silk shirts. Now his work is more dainty. A sheriff in Ohio has ordered his deputies to wear spats. Suppose Audie should start that. Fish would be wearing a flower in his button-hole the next day. My pencil is like the Golden Rule. It is misplaced when I need to use it. A girl who works here in town thinks a hydraulic ram is a sheep living near the water. Another girl thinks it is a collision between two submarines. Well, what is a hydraulic ram, anyway? The dries have their minds made up better than the wets. The dries don't want beer at all and the wets don't know what kind of beef they want. ON STEER CAMPUS By H. B. DUNAGAN, JR. AUSTIN—A night or so ago, some university student sat at his short wave receiving set, fiddling around with it. He heard a call "Attention, students," and listened in a Carnegie Tech student announced over the ether that he had a tough calculus problem that no one on the Tech campus had been able to solve. He asked for assistance in case any of his hearers should happen to be mathematicians. The Texas student, something of a shark on calculus, asked for particulars over his short wave sending set. He pondered the problem a short time, and then radioed back the answer, much to the delight of the Carnegie student. And now the Daily Texan is trying to find out who the university student was who solved the problem, but cannot. The University of Texas is one of the few schools in the country where taking pictures of an educational nature, and talking picture machines to reproduce them. Senior major examinations have been completely abolished by the romance language department of the university. The action now awaits approval by the board of regents. Princetonians have an unusual custom. When the students like the quality of a professor's teaching they bring a dog to class, and many Princeton professors point with pride to a long record of dog attendance. It is further a custom at Princeton for the professors not to show delight at the appearance of dogs but to ask that the animals be removed immediately and do the asking as cleverly as possible. The classic reply to one of these gestures of approval was made when a lecturer was interrupted by a late-comer dragging in a Great Dane. The professor looked the pair over discriminately, and finally addressed the dog's escort. "I'm afraid you'll have to take him out. After all, we've got to draw the line somewhere." A snooping Daily Texan reporter-

Chinese City

SOCIETY

Mrs. Jolly Johnson Directs Fine Arts Teachers Program

Mrs. Jolly Johnson directed the Fine Arts Teachers association program at the high school this morning. The program follows: "A Concert Polka" (Foviem)—The Plechrum Club of the Watson Studio; Song and dance number—Mary Elizabeth Newman of the Vickers studio; Piano solo, "In a Persian Market" (Kataby)—Beulah Mae Coleman of the Wimberly studio. Reading, "Exercises at the Kindergarten" (Hare)—Anna Beth Bedford of the McCormick studio; Piano solo, "Intermezzo" (duet)—Dorothy Cummings of the Cannon studio.

Auxiliary Reports To Be Given in March

Annual reports are being prepared by officers of the Presbyterian auxiliary to be presented at the end of the church year which falls on the second Monday in March. Twenty members of the auxiliary met at the church Monday afternoon to make plans for that meeting.

er discovered that the grandfather of a certain university professor was the inventor of the steam shovel. The Daily Texan immediately wanted the professor to do a little plain and fancy talking so a feature on the work could be tied up in some way or other. The professor flatly refused and further forbid publication of anything. The Texan has to obey faculty ukases even though it rubs against the grain.

The largest college daily newspaper in the world is reputed to be Minnesota's daily, North Carolina's daily is said to be the most quoted and the prize for being the most charming might be assigned to Hawaii's Ka Leo O Hawaii.

Harrison Stafford, who Ray Morrison said was one of the three best backfield men in the Southwest conference last fall, is out again—this time for low health. Stafford is one of the mainstays of the track team.

"Oochie" Early, mentioned as end on several all-conference evenings, is another track luminary. He can do the 440 in less than 50 seconds. Alex Cox, who set the conference record in this event, at 48.88 last spring, is back again this year.

W. F. Girley, dean of the college of pharmacy, has been selected as one of a group of 50 over the United States Pure Food and Drugs board formulas recognized by the commission.

A university student, LeRoy Cole, has some statistical and decided how we spend our lifetime if we all live to be 70 years old. He figures we sleep 23 years 4 months of five years. We do 6 years worth of eating. We work 19 years. We spend 5 years 2 months in traveling places, walking to work or to gossip with the neighbors. Other duties take up the remainder of the time. The estimated time used in dressing—two years—might be eliminated if one joined a nudist colony, Cole suggests.

George Horace Lorimer, editor of

Announcements

Thursday Valentine and anniversary meeting of the North Ward Parent Teachers association Thursday afternoon at 3 o'clock. Regular meeting of the South Ward PTA Thursday afternoon at 3 o'clock. The Arno Art club will meet on Thursday night with Mrs. John Shipley, 1501 West Illinois.

A bridge-dance Thursday evening at 9 o'clock at the home Miss Annie Faye Dunagan will entertain members of the Anti club.

Friday Mrs. F. J. Fink will entertain members of the Belmont Bible class Friday afternoon at 3 o'clock with a Valentine party at her home, 1310 South Main.

Church of Christ Bible Class Meets

"Paul's First Missionary Journey" a complete lesson, was presented on Tuesday night at a meeting of the Church of Christ Bible class, the Rev. J. A. McCall conducting. Six members were present.

The Saturday Evening Post, in a letter has revealed that he considers J. Frank Dobie a real authority on things Southwestern. One of Dobie's articles about the brush country vaqueros was published in a recent issue of the Post. "There is," Lorimer declares, "probably as much interesting folklore and country in the forests of Wisconsin and Minnesota as in the ranges of Texas but no one has yet written it up in a readable manner."

Odds and ends. The director of the Actuarial Institute of Goettingen, Germany, made an address on the campus a few days ago. . . . the university anthropological department is constantly on the look-out for more places in Texas where old Indian and other archeological remains of all kinds may be found. . . . odds are two to one that the university will capture the basketball crown of the Southwest conference this year. . . . Two former University of Texas students are doing the art designs on the ceiling beams in the new architecture building. . . . Bohn Hilliard will still be a star ball carrier for Texas in 1934 when the backfield coach, who played against "77" back in 1926.

Today's statistics: 43 representatives and senators in the 43rd Texas legislature now at work formerly attended the University of Texas. Some are still attending the university.

Melvin Rotsch who was graduated from the university four years ago is now in the employ of the Soviet government. His first work of designing a suburb in Moscow required eight months to complete. He is now planning school buildings in eastern Siberia.

PILOT GETS AWARD

LONDON—Squadron Leader H. J. L. Hinkley of Australia was recently awarded the 1932 Johnston Memorial Prize for navigation. The award was made by the Guild of Air Pilots in recognition of Hinkley's flight across the South Atlantic in 1931.

CRUISE CLOTHES

At the left, below, is a three-quarter coat suit of yellow angora with tugged shoulders. The scarf combines yellow, gray and white lacy woolen.

In the center, crinkled wool crepe in a deep blue forms overalls with the lowest sun-back yet seen.

GLADYS PARKER

Mrs. Aldridge Estes Hostess to Members Of Entre Nous Club

Mrs. Aldridge Estes was hostess to members of the Entre Nous club on Tuesday evening at her home 801 North Webster. Miss Theresa Klapproth won high score and Mrs. Bud Estes high cut. Members attending were Misses Loretta Williams, Jerra Edwards, Klapproth, Juliette Wolcott, Cordelia Taylor and Lois Brunson, Meses. Estes and J. B. Zant.

Personals

John Davis is expected to return today from a business trip to Wink and Peecos. Ted Weisner and Walter Scott of Wink visited friends in Midland Tuesday.

Ralph Shuffler of Odessa was in Midland Tuesday afternoon on a business trip. Willard Adams of Godley visited here Tuesday night and today.

W. G. Riddle has returned from a business trip to Hobbs. J. L. Brashear and R. L. Robert of Sweetwater are in Midland on a business trip.

J. M. Hinnicut and wife, who have visited here for several days, returned to their home in Fort Worth today.

M. T. Tucker of San Angelo spent Tuesday night in Midland. E. B. Dickinson was in Midland Tuesday night transacting business.

J. L. Ryan, representative of the West Texas Gas company, was here yesterday from Lubbock. R. M. Means and Cole Means, ranchmen of Valentine, spent last night and this morning here, returning today.

R. T. Holmes of McCombe spent Tuesday night in Midland.

ARGUES FOR AN EXEMPTION OF TEXAS PRODUCT

ABILENE—Col. W. E. Talbot's argument that if a sales tax is placed in Texas it ought to be confined to the retailer and ought to exempt Texas products manufactured from Texas raw materials, has been brought into West Texas Friday by Col. Talbot in person. Talbot, an insurance executive of Dallas, is widely known for his espousal of Texas-made goods for Texas people. It was on that subject that he addressed the Abilene Rotary club Friday, making a trip back here after he had spent the morning at Stamford with D. A. Bauden, West Texas chamber of commerce manager.

Talbot's position on the proposed sales legislation is necessary for reducing taxes and public expense; monetary reform; reduction or protection for exportable surplus; creating public works; readjustment of tariff schedules; stopping of hoarding; more efficient distribution—and many other things. We can write our representatives, curse their legislation, or blame it on public officers, kick about everything—and wait.

The other route, for accelerated recovery—starting now—is to control the channel of our dollar, make up our minds to spend our money where we have a chance to get it back, give our merchant an order for our own goods. "Patriotism, faith in our own state, is at the foundation of recovery along this line. The state of Texas is about to consider a sales tax. If this tax were confined to the retailer, it would protect the small independent merchant, give him a new lease on life. If it were to exempt Texas products, manufactured from our own raw materials it would stimulate our manufacturing industry as no other thing could do. It would mean increased payrolls and reduction of unemployment. It would mean that our mills today that are turning out public cotton cloth of the cheaper and coarser designs, could immediately turn to the finer cloths for our own consumption, would mean the stimulation of cotton, beef and all our raw materials.

The world's longest range photograph was taken at Monterey, Shasta from an elevation of 23,000 feet, and a distance of 331 miles by a captain of the Army air corps. The photo covered the greatest amount of the earth's surface ever taken at a single exposure.

RIVERS CHANGED COAST

HOUSTON, (UP).—A great part of the Texas coastal area might today be just so much Gulf of Mexico water for great rivers which in the ice age 25,000 to 100,000 years ago meandered through the region.

The courses of these ancient streams, and their tributary streams which branched out through broad swamps, much like those south of New Orleans, still are evident to the scientific eye.

Dr. Donald C. Barton, local geologist and geophysicist, recently conducted a group of members of the Texas Academy of Sciences through Harris, Fort Bend, Galveston, Liberty, Brazoria and Chambers counties, pointing out some aspects of the region's ancient history.

Later, with the aid of maps and aerial photographs, he explained the importance of these forgotten rivers of the coastal region.

Fossils found from time to time in the region, Dr. Barton said, indicated the coast was inhabited by species of elephants, horses, bison, and forerunners of armadillos, cats and sloths.

VIOLIN MAKER UNKNOWN

HOUSTON, (UP).—George Thomas Shrader, said by master violinists to be among the best violin makers in the world, resides practically unknown in this city, each day working in his little shop and producing instruments of rare tone and quality.

The first Shrader violin was made in 1905. Since that time Shrader has made 59 violins and now he is working on his 60th.

In 1916 he received the highest award given on musical instruments, the silver medal at the Panama-Pacific International exposition at San Francisco. The violin was valued at \$15,000 and is now in the hands of the state building in Arkansas and never recovered.

To make violins has been Shrader's ambition since boyhood days in his native Arkansas. For many years he was a railroad conductor but since 1928 he has lived solely by making violins.

He recently received a copy of the Critical and Documentary Directory of Violin Makers, by Henry Poidras, in which he is listed. A brief history of his life and his violins is given.

MAINE IS AIR-MINDED

BANGOR, Me.—The numerous trans-Atlantic flyers who have passed over Maine en route to their destinations have made the state air-minded.

Fifteen years ago Maine first took to flying and since then has seen every kind of air travel, ranging from commercial enterprises to the spectacular Atlantic flights.

Her progress in the aviation field was slow until 1929. Now, in proportion to her population and wealth, her activity is well above the average.

There are 24 departments of commerce recognized airports in the state and a dozen or more unlisted ones. Thirty active flying services and corporations throughout the state, 69 planes and 70 pilots, flying clubs in the principal cities. These are the accomplishments of three years of rapid development.

The Pine Tree state has plans for continuing and increasing its aeronautical activities.

Diamonds are the hardest of minerals.

Nation's Fate

(Continued from page 1) in the general discussion. It was noticeable that Walsh in asking questions of the witnesses and in the general discussion would quote the exact language of any part of the constitution on the decisions of the supreme court without reference to any book, paper or manuscript. It was also evident that he was disposed to be at variance with those who argued that congress had the power to enact legislation under a declaration that the general welfare of the nation required such legislation.

His views became more important by virtue of his appointment as attorney general in the new administration. I am sure you will not expect me to put within the compass of a few sentences what it took these learned men two days to present to the committee, but the following is a rough outline of the two viewpoints.

The proponents of the doctrine that congress has the power to legislate under the general welfare clause contend that the grant of power under the language as it appears in the constitution is just as great as if it read as follows: "The congress shall have the power to lay and collect Taxes, Duties, Imports and Excises."

And now comes the comma and infinitive "to". The opposition contends that the grant of power is limited to the same extent as if the language read:

"The congress shall have power to lay and collect Taxes, Duties, Imports and Excises to pay the debts and provide for the common defense and the general welfare of the United States."

The situation took on still another aspect when Rep. David Lewis of Missouri introduced a bill for the draft of the constitution as it came from the committee on the fourth day of September, 1787, which said draft was referred to the committee on style and by that committee turned over to a clerk for copy, and it was the clerk's copy which was returned for signatures.

The debate was a great exhibition of erudition and legalistic analyses and was visualized as a great intellectual polo game of championship calibre—enjoyable to the spectators, but not very applicable to farmers and unemployed.

The situation took on still another aspect when Rep. David Lewis of Missouri introduced a bill for the draft of the constitution as it came from the committee on the fourth day of September, 1787, which said draft was referred to the committee on style and by that committee turned over to a clerk for copy, and it was the clerk's copy which was returned for signatures.

Blizzard

ished winds and clearing skies. Livestock damage was reported light but the wheat crop was materially affected. Except to Denver, there was no air traffic out of Amarillo. Lubbock had a minimum of 6 degrees below zero and a maximum of 15 above. Livestock losses there likewise were said to have been light. Fruit was damaged in the vicinity of Wichita Falls where the lowest the mercury reached was 3

"Afraid to Talk" Tells Timely Story

A dramatic screen answer to many pertinent questions American citizens are asking about rule by political parties is contained in Universal's timely picture, "Afraid to Talk," which will open a long anticipated engagement at the Yucca theatre today. Screened from the powerful drama by Albert Maltz and George Schar, "Merry Go Round" it presents a group of municipal office holders under the dictates of a party boss, who find themselves forced by a clamoring press and public to gain a conviction for an underworld murder.

Happening on the eve of an important election, the party leaders decide it necessary to act, but are suddenly thwarted when the gangster murderer produces evidence to bare the graft and bribery of the office holders. In desperation the party attempts to "railroad" an innocent man, but the crime and when public minded citizens instigate an investigation, complications develop so rapidly that the film proceeds toward its powerful climax with one intensely dramatic crisis after another.

Sidney Fox, Universal's talented dramatic actress, enacts the featured feminine lead as the snow fall wife of the bell boy who is crucified for political purposes, played by Eric Linden. Elephants live to an age of 150 to 200 years. A sleet and snow fall was negligible.

The variation at Sherman was from the average of 5.5 below zero 10 late in the day. Flurries of snow at intervals accompanied a temperature well below the freezing point at Corsicana. At 4 p. m. it was 20 but a much less reading was predicted for the night.

Texasiana reported a drop of approximately 40 degrees in 24 hours, ending at 3 p. m. Tuesday. A fine snow fell intermittently and the mercury had reached 17 in its precipitate plunge. Considerable damage to fruit and early crops was anticipated.

Port Arthur, one of the gulph points which the cold was expected to reach, had a temperature of 44 at 4 p. m., a drop of 24 degrees in eight hours. The skies were almost clear.

Other overnight minimums: Pampa, 10 below; Amarillo, 5 below; Vernon 4 below; Olney 2 above; Gainsville 7, Denton 8, Tyler 20, Longview 25, Dallas 9, Fort Worth 11, Austin 28, Waco 15, and Beaumont 48.

MIDLAND PLAINS A biting gale and blinding snowstorm struck the midland plains Tuesday, trailed by the sharpest sub-zero wave of several seasons.

The mercury plunged 30 and 40 degrees below zero along the frozen Canadian border states.

A vast black area on the weather map from Pocatello to Pittsburgh and from Corpus Christi to Duluth denoted an almost solid area of snow and rain. In that great expanse only a tiny oasis around Dodge City, Kan., was marked "clear."

A blizzard blocked trains and highways in Kansas, Missouri, Oklahoma and North Texas and aircraft were grounded through most of the prairie states. Street car and motor traffic was demoralized and motorists were stranded in Kansas City and Chicago. Oklahoma City children were told by radio to stay home from school.

Benidil, Minn., at 41 degrees below was the coldest. 5 below zero thermometers at Moran, Wyo., in the uplands below Yellowstone Park, recorded a new low at 55 below zero.

A school had not yet felt the blast, but awaited the predicted drop to the zero regions Wednesday. More than seven inches of snow fell overnight at Chicago, where the temperature was a genial 22 above, and heavy snow was to continue all night while the mercury recedes to a predicted sub-zero range.

Coast in Danger Only South Central Texas and the gulf coast escaped the freeze but these sections were still in danger. Typical temperatures in the cold zone, all below zero, ran: Cheyenne, Wyo., 22; Duluth, 30; Fairmont, Minn., the warmest, in the state at 20; Pampa, Texas, 10; Amarillo 8; Kansas City, 7; Wichita, Kans., 10; Omaha, 14; Des Moines, 8; Sioux City, Iowa, 16; Aberdeen, D. S., 11; Rapid City, D. S., 25; Jamestown, N. D., 37; Norfolk, Neb., 21; and St. Louis, 17 above; Chicago, 22 above; 27 above at Detroit. A school bus driver from North Dakota was pinned under his wrecked car seven hours in 25 below weather, and was taken to a hospital, his feet frozen.

Harley Sadler to Show at the Ritz

Harley Sadler (above) well known West Texas showman, comes to Midland Sunday with his company to play for a week at the Ritz theatre.

They say there isn't anything new under the sun—but that old saying will have to be discarded now. Harley Sadler, West Texas' own showman, has a new idea in the presentation of modern plays.

After closing at the end of last season, Mr. and Mrs. Sadler spent several weeks touring the amusement centers in the quest of new ideas, new plays and new actors and actresses, and to say that they have been successful would be putting it rather mildly. In the new cast of characters they have secured the services of the best they could find.

Plays were selected for their entertainment worth as well as for their fast moving plots and action. The vaudeville, and here is the big change in the new idea, is far beyond anything that has been presented in Midland by anyone. All the feature acts are worked in such a way as to carry you to the big time amusement places of the larger cities and were selected for their outstanding ability to entertain you, while some of the vaudeville acts have just finished seasons on the big time circuits both in the east and on the west coast.

Sadler has spared nothing in his efforts to completely reorganize and build for West Texas a show that will overshadow any of his former attractions and has succeeded so thoroughly that you will surely have to agree that there is "something new under the sun." Mr. Sadler and his new show plays in Midland all next week at the Ritz theatre.

PILOTS TO INSTRUCT

CAMBRIDGE, Mass.—The Harvard School of Geographical Exploration is to open a course in aerial photography during the second half of the present college year.

Sadler has spared nothing in his efforts to completely reorganize and build for West Texas a show that will overshadow any of his former attractions and has succeeded so thoroughly that you will surely have to agree that there is "something new under the sun." Mr. Sadler and his new show plays in Midland all next week at the Ritz theatre.

Lytle Talbot plays a man with definite ideas, who refuses to consider Miss Lombard's protestations of love until she has proved herself sincere. His other important pictures recently were "The Purchase Price," "Three on a Match," and "Klondike."

Already this scintillating story has established its popularity throughout the country from its serialization in Liberty magazine under the authorship of Grace Perkins Keene. Thompson who did the adaptation, also wrote "The Last Man," "War Correspondent," and "Man Against Woman." Gertrude Purcell wrote the screen play.

Twins comprise 1.07 per cent of the babies born in the United States. Twenty per cent of these are said to be twins of the identical type.

PELEE ISLAND in Lake Erie is the southernmost point of Canada. The latest official estimates give MONTREAL \$10,000 and MEXICO CITY \$75,000. The former Kaiser of Germany lives in exile at DOORN, HOLLAND.

FROGS WILL TRY TO STOP STEERS, A HARD PROBLEM

FORT WORTH.—The Texas Christian university Horned Frogs have set out this week to prepare to do what no Southwest basketball team has yet succeeded in doing—stop the Texas Longhorns.

Offense will be the cry of Coach Francis Schmidt in the workouts here. The Christians managed to take both games from the Arkansas Razorbacks by strong defensive work, in spite of a ragged, and at times almost imperceptible, form.

The showing of Wallace Myers at guard was the high point of both Arkansas games. He handled the ball expertly, was on his man all the time, and on several occasions proved his ability at goal shooting.

Slip Kinzy at center also showed up well against the Razorbacks. He was high point man both nights and controlled the tip practically all of the time.

The two men are at the positions that have been in doubt, but they seem to have the jobs cinched on the basis of their present showing.

The work of Captain Brannon at the other guard, and Sumner and Walker at forwards is taken so much for granted by Frog fans that no particular comment is excited when they turn in stellar games.

The Frogs should be at the halfway point in their 1933 game schedule, but the postponed Baylor game leaves them with seven contests yet on the calendar. Coach Schmidt has offered to meet the Bears in Waco Feb. 17, but no definite agreement has yet been reached.

Scheduled tilts after this date are: Texas at Fort Worth, Feb. 20; A. & M. College at College Station, Feb. 24; Rice at Houston, Feb. 25; Baylor at Fort Worth, March 1; and S. E. U. at Fort Worth March 4.

"No More Orchids" Opening at the Ritz

A more brilliant and fascinating Carole Lombard than has been seen before on the screen comes to the Ritz theatre today in the leading role of Columbia's "No More Orchids," a modern drama of a modern girl.

"No More Orchids" offers this volatile blonde screen actress more opportunities to display not only her ability to wear clothes but to carry a major dramatic role than any other of the numerous films she has made previously.

No more perfectly suited a cast could have been found for the many important roles in "No More Orchids," Walter Connolly and Louise Closser Hale, two of the finest players on the American stage and screen play Miss Lombard's father and grandmother.

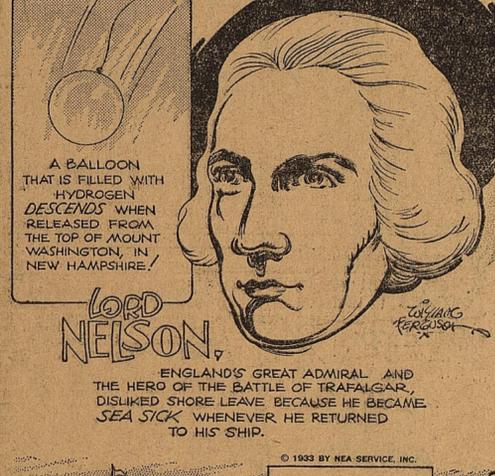

The three of them form a screen triumvirate that will long be remembered for the utter congeniality and spontaneity of their companionship. They are not grandmother, father and daughter—they are all one of the modern musketeers.

Lytle Talbot plays a man with definite ideas, who refuses to consider Miss Lombard's protestations of love until she has proved herself sincere. His other important pictures recently were "The Purchase Price," "Three on a Match," and "Klondike."

Already this scintillating story has established its popularity throughout the country from its serialization in Liberty magazine under the authorship of Grace Perkins Keene. Thompson who did the adaptation, also wrote "The Last Man," "War Correspondent," and "Man Against Woman." Gertrude Purcell wrote the screen play.

Twins comprise 1.07 per cent of the babies born in the United States. Twenty per cent of these are said to be twins of the identical type.

THIS CURIOUS WORLD

ENGLAND'S GREAT ADMIRAL AND THE HERO OF THE BATTLE OF TRAFALGAR, DESIRED SHORE LEAVE BECAUSE HE BECAME SEA SICK WHENEVER HE RETURNED TO HIS SHIP.

Wadley Returns From Buying Trip

Nightton Wadley returned last night from Chicago, Dallas and other market points, buying spring and summer merchandise for Addison Wadley company. He said that wholesalers and manufacturers were confident that conditions had reached the worst point and that only time was needed to see improvement. He found a great range of good merchandise from which he bought substantially.

Horse Thief

(Continued from Page 1) from the highway at the highway filling station. Here he continued west, stopping long enough at G. F. Hefington's to say he had ridden all the way from Lincoln, Neb., and wanted a job. Then he rode north to the R. T. Kelley place and was there overtaken by Sides and Slaughter.

They had trailed him from tracks. Sides recognized his horse's tracks when he and the sheriff first stumbled on them north of town. Anderson Merrick, deputy, was scouring the country south in an effort to find the thief.

He told of how he had read the life of Jesse James and said he was an ardent follower of wild west stories, but disclaimed the idea he was riding the horse away to show Nebraska what a Texas cowboy he had become.

Monday evening he broke into a stable when officers jokingly reminded him that horse thieves were immediately "strung up" in "these parts." Tuesday he laughed.

The capitol in Washington required 70 years to complete. Almost a third of the non-occupational causes of accidents are traceable to automobiles.

Suit Outgrowth Of Motor Mishap

BIG SPRING.—Bob Hull, father of Fannie Hull, 17, who was killed October 31, 1932, when struck by a car driven by R. L. Wright, filed suit Tuesday in the 32nd District Court asking damages totaling \$5,000.

Wright, and his employer, P. O. Sill, big contractor, were named as defendants.

Fannie Hull and Rena Nabors were struck by a car as they walked toward town from the Casino dance hall Halloween night. Both succumbed to injuries. Miss Hull's body was not discovered until several hours after the accident.

Hull alleged in his original petition that negligence arising out of one or more of four instances was responsible for his daughter's death. He alleged that Wright was traveling at a rate of speed in excess of speed limits, that the driver was intoxicated at the time of the accident, that he failed to keep a careful look out for pedestrians, and that P. O. Sill, who furnished the car, had knowledge that brakes and lights on the vehicle were bad.

Hull stated Fannie had been his housekeeper since her mother's death and cared for three younger children in the family. Value of her services as a housekeeper were placed at \$50 per month.

Carl Lagemann, the movie magnate, clerked in store in Oshkosh, Wis., in his pre-movie days.

It is estimated that each of the 120,000,000 people in the United States spends forty cents a year for books.

Spanish Wine Men Eye U. S.

MADRID (UP).—Although discouraged by the fact that there is little sentiment in the United States in favor of strong wines, Spanish wine growers hope that their products at least will be permitted to be sold again in America.

The pride of Spain's wine-growing regions—its Sherry, Malaga, Manzanilla, and similar wines are all of what is known on the Peninsula as "generous wines" for they have an alcoholic content of around 17 per cent. The table wines, especially those of Valdepenas and La Rioja, also are a little stronger than table wines of other European countries, but it is hoped that the American legislation will some day permit their re-entry to America.

These wines run from 8 to 12 per cent in alcoholic content. The Cortes has appropriated \$4,000 to be used in propaganda in favor of Spanish wines in the United States, but so far no decision has been reached as to what use will be made of this fund.

Various important Spanish wine companies are watching the situation, but so far no decision has been reached as to what use will be made of this fund.

In the meantime there is great interest in cultivating the domestic production of automobiles in Spain is a country where the per capita consumption of wine is small. Were it equal to that of several other European countries the wine industry would be much more prosperous.

Two couples sat at a table. Afterward the creamers were missed. The waitress said she could not eat much because she had just had a tooth extracted. Eubanks checked the dentists, learned one had pulled a tooth for a woman whose husband had had a nail in his foot. Physicians were checked and it was learned that a certain man had been treated after such an accident. He was asked to call on Eubanks, who asked him about the couple that was with him in the coffee shop. He got the creamers back for the shop.

Unique Clews Aid In Finding Loot

BIG SPRING.—A man who had a nail in his foot with a woman whose tooth had been pulled were supposed to have been with a couple who might have taken three creamers from a table in the coffee shop.

That was the basis from which L. A. Eubanks, Retail Merchants association manager, had to work after a request from the coffee shop proprietor that he try to recover the articles.

They eventually were recovered. Two couples sat at a table. Afterward the creamers were missed. The waitress said she could not eat much because she had just had a tooth extracted. Eubanks checked the dentists, learned one had pulled a tooth for a woman whose husband had had a nail in his foot. Physicians were checked and it was learned that a certain man had been treated after such an accident. He was asked to call on Eubanks, who asked him about the couple that was with him in the coffee shop. He got the creamers back for the shop.

October Revival Date Is Decided

Last Sunday the board of the First Christian church accepted the recommendation of the pastor, the Rev. E. B. Chancellor, to effect October 15 to be designated now as time for a revival; moreover, that Evangelist W. C. Cole and family of Des Moines, Iowa, be named as leaders.

This evangelist aid his family have conducted two revivals for this pastor in other places, both of which were successful. "The Midland church is fortunate in being able to secure these gifted people for this choice date," Mr. Chancellor said.

AIRMAIL FLYING SAFE

WASHINGTON.—The U. S. post-office department recently reported that for the fiscal year ending June 30, only one airmail pilot was lost for every 2,300,155 miles flown. The costs of transportation were lowered from 78 cents per mile in the preceding year to 62 cents. The report stated that only 0.0151 of the total poundage of mail carried was destroyed by fire in crashes.

ONE CRASH VICTIM

GREENBAY, Wis., Feb. 8 (UP).—One was killed and six were injured in a passenger train wreck near here today.

Converts in England decreased from 50,000 to 6,000 during the reign of Queen Victoria.

Beware the Cough or Cold that Hangs On

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with the two-fold action; it soothes and heals the inflamed membranes and inhibits germ growth.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the infected membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold, no matter of how long standing, is not relieved after taking according to directions. Ask your druggist. (Adv.)

Mother Is Sued For Non-Support

SALT LAKE CITY, Utah (UP).—Another proof of the contention that this world is operating back-ward was revealed when Mrs. Martha B. Burk was sued for non-support, pending her divorce action.

Mrs. Burk, mother of two children, was believed to have been the first woman to be called into court on these charges. She works as chambermaid in a Salt Lake hotel.

Burk charges his wife refused to allow him to enter their home which he, during prosperous times watched just above a device which sends an electrical shock through his body. A pan of water is placed underneath on the theory the mouse will fall into it and drown.

In the same exhibit is a "key hole finder" which should prove valuable to those who come home late with unsteady fingers. One simply lifts up a hinge-like appliance and a light shines on the troublesome spot.

Another is a hen nest so constructed that if Biddy lays an egg the next exit automatically opens. If she doesn't she has to leave through an opening which leads to the "slacker" pit.
