

ANGELO AIRMAN OVER ATLANTIC

BLAST TOLL IS SEVEN DEAD, 40 BADLY INJURED

Gasoline Plant Sets Off 10 Storage Reservoirs

LONG BEACH, June 3. (UP).—Seven were known dead from an oil blast at Signal hill today, fire devastating ten blocks with damage in excess of \$1,000,000, and 40 persons were injured.

DEATH ASKED FOR KIDNAPER McGEE

KANSAS CITY, June 3. (UP).—The state indicated today it will ask the death penalty for Walter McGee, arrested yesterday at Amarillo, who confessed participation in the kidnaping of Mary McElroy, getting \$30,000 ransom.

Stanton Plays Golf Here Today

Stanton plays its first game with Midland on the Kat Klav schedule here this afternoon, beginning at 1 o'clock.

352 Youths of WT in CC Corps

BIG SPRING.—Sergeant W. L. Chapman, U. S. army recruiting service, in charge of the local station, reported Thursday he had finished sending young men from his district to Fort Bliss, where they are being mustered into the Civilian Conservation Corps.

Mrs. Haley Attends Tech Board Meet

Mrs. John Haley, 423 W. Wall, lately confirmed by the senate as a director of Texas Technological college, goes to Lubbock Monday for a board meeting of regents that evening.

Blue Cross Starts Campaign for Funds

Work was started last week by committees of the Blue Cross, Mexican equivalent of the Red Cross, soliciting funds for local relief work. Cooperation of the public to the fullest possible extent was asked.

Six Steers Killed As Truck Overtakes

Horace Blocker of Stanton and his truck load of steers met with an accident while on the way to deliver the cattle in Fort Worth. He was smashed into by another truck. Six steers were killed.

Convict Took \$60 And Watches Here

Ed Davis, one of the convicts hunted after breaking prison at the Kansas penitentiary, kidnaping the warden and two guards, abducting men and women in their flight and, finally, shooting a watchman, was in jail here about two years ago, records of the sheriff's office show.

Stanton School Head Has Moved

STANTON.—Mr. and Mrs. C. L. Stone left Thursday morning, followed by a truck load of their household goods, for Panhandle, to make their home. Stone is with his son-in-law, who has an automobile agency. Stone was superintendent of the Stanton schools for four years. He said he might not apply for a school next school year.

'Nigger Diggin's' Mine Is Worked

Mining operations have been renewed on the famous 'Nigger Diggin's' in the San Mateo mountains of New Mexico. Rich strikes of gold and silver have been reported in El Paso. This old mine is said to have been worked by negro soldiers stationed at Fort Craig and Fort Ojo Caliente in the '70's. Apache Indians routed the soldiers, legend says.

FIRST RESIDENT. H. N. GARRETT, IS INTERRED FRIDAY

Midland's oldest pioneer, Hiram N. Garrett, 83, was interred at Fairview cemetery Friday afternoon after services had been read by the Rev. Winston F. Borum in the chapel of the Ellis mortuary.

The aged man came to Midland in 1882, before the town was started and two years before the town of Marienfeld, which later came to be known as Stanton, was established. He battled Indians and killed buffalo over most of West Texas, was the father of seven children, five of whom survive, and made and lost several fortunes raising cattle and sheep.

The minister spoke from a passage in Hebrews, "It is appointed unto all men once to die." He traced the life of the pioneer, showing how he made the mode of living in the West easier for future generations, but how at last he had "traveled the path of all mortals."

Music was by conductors of the training school culminated at the First Baptist church Friday night by the graduation of 125 young people, who assisted in the song service. Floral offerings were numerous, and there was large attendance at the services.

Survivors are three daughters, Miss Lizzie Garrett of Midland, Mrs. Gordon Reiger of Grand Falls and Mrs. Sam Holmes of Midland, two sons, Al Garrett of McCombs and Mike Garrett of Monahans, a grandson, Horace Rankin of Midland, who was reared in the Garrett home. Two brothers, Frank of Arizona and Liss of Sacramento, Calif., and two sisters, Mrs. Will Upton and Mrs. Emma Coons, both of California, also survive.

Granada Says Is 'Miss Personality'

In a contest opera that included children from the eight ward schools of Phoenix, Ariz., Granada Saye, 10, daughter of Mrs. Hazel Saye of Midland, won the title of "Miss Personality" and was awarded a free round-trip ticket to the Century of Progress, World fair, at Chicago.

Repeal of Law May Bring Back Couples

COEUR D'ALENE, Idaho. (UP).—Folks in Idaho are now preparing for an influx of bashful groom and blushing brides, since the state "gin marriage" law has been repealed, and the three day clause discarded.

Potash Production To Begin in Sept.

Potash production is scheduled to start about Sept. 1 on the holdings of the Potash Company of America in the Lake Avalon region in Lea county. The shaft is now being sunk and engineers have completed surveys for a spur track from the main line of the Santa Fe Railway company.

FARM ASSOCIATION MAY INSTITUTE COURT ACTION TO MAKE STATE PAY

L. J. Ivey, president of the Texas Pink Boll Worm Quarantine association, claims that under the laws of Texas, the state owes the farmers a debt just as valid as would be a salary claim of some official. Under this statute, tests cases may be made in suits filed against the state claims board.

STILLWATER, June 3. (UP).—Payne county officers today broadcast a general alarm for four Kansas fugitives in this vicinity. They were seen on a highway near Ripley. A posse was in pursuit. Banks were warned.

Late News

WASHINGTON, June 3. (UP).—The long guarded secret on the J. P. Morgan interest firm's profits was revealed as 25 per cent in the investigation before the senate committee, the figure varying but slightly since 1916.

HOUSTON, June 3. (UP).—Net profits of the Humble Oil & Refining company for 1932 exceeded the previous year by \$12,000,000, its annual report said today.

AUSTIN, June 3. (UP).—The attorney general said today he will ask early setting of the \$17,500,000 penalty suit against fifteen major oil companies, the American Petroleum institute and the Texas Oil Marketers' association when the 98th district court meets Monday.

WASHINGTON, June 3. (UP).—Carloadings for the week ending May 27, were 540,000 or 9,500 over the previous week.

FT. WORTH, June 3. (UP).—Clay Mann, broker, today sued C. C. Julian for \$74,000 claimed as due on a commission of \$100,000. Julian, fighting extradition from Shanghai, is wanted in Oklahoma on federal mail fraud conspiracy charges.

COLLEGE STATION, June 3. (UP).—Degrees were conferred today upon 334 Texas A. & M. college students.

STILLWATER, June 3. (UP).—Payne county officers today broadcast a general alarm for four Kansas fugitives in this vicinity. They were seen on a highway near Ripley. A posse was in pursuit. Banks were warned.

NEW YORK, June 3. (UP).—Frank Hawks' robot-piloted plane set a west-coast non-stop record of thirteen hours and 26 minutes, averaging 181 miles per hour.

TULSA, June 3. (UP).—Former Senator James Reed of Missouri was reported in good condition today after being slightly injured in a plane crash-up late yesterday. The plane crashed up in taking off.

AUSTIN, June 3. (UP).—President Roosevelt congratulated Texas today as the first state to provide a relief commission to cooperate with the federal recovery program. Former Governor Ferguson said Texas would receive from \$2,000,000 to \$3,000,000 under the program.

HOGAN OUTLINES ESSENTIAL FACTS AFFECTING PROPOSED LEGISLATION

EDITOR'S NOTE: The following statements were made before the national senate finance committee in its hearing on proposed oil legislation, by T. S. Hogan, of Midland, representative of Gov. F. H. Cooney of Montana.

Mr. Chairman and Gentlemen of the Committee:

In the brief time which you can allot to any witness it is impossible to do more than very inadequately sketch a few of the most essential facts which must be considered in making the general intelligent decision on the proposed legislation which is before this committee.

Certainly this is no time for heat, fever, suspicion or unfairness and above all it is no time for a misstatement of alleged facts or a willful misinterpretation of any of the existing facts.

At the Governor's conference held two months ago I vigorously urged the adoption of legislation in line with the general provisions of the bill now before you.

Failure to act at that time has cost the oil industry over one million dollars per day, financially ruined several hundred small operators and royalty owners, put an added burden of several million dollars on the R. F. C. in protecting the financial institutions of the oil producing states and added to the number of men in the bread lines in those areas in the several states where production from stripper wells is the principal local industry.

Whether or not the deplorable condition will be remedied or aggravated hinges entirely on the decisions which you gentlemen of this committee will make.

In order to undertake to present the situation in the briefest and simplest form I submit the following summary of facts:

- 1. The producing oil wells in the United States have a combined capacity to produce many times as much oil per day as the market can consume.
2. Five great oil pools—East Texas, Yates, Kettleman Hills, Conroe and Hobbs—three of which are in Texas, one in California and one in New Mexico—if permitted to produce without restriction from their flowing wells will destroy and render utterly valueless every stripper well field and nearly all of the other fields of the country. Included in the areas unable to compete is all of the country east of the Mississippi with some 190,000 wells whose combined production averages about 108,000 bbls. per day.
3. There is no power either in the states that would be adversely affected or in all of the oil operators of such states to protect themselves against this ruinous competition.
4. In spite of the great temporary capacity of flowing wells the total supply of oil reserves in every known field in the United States is only somewhere between twelve and fifteen billion barrels. With restored prosperity that supply would be exhausted in 12 years.
5. About twelve billion dollars are

'Strangest Household' Breaks Up

What has been described as the "strangest household in Hollywood" has broken up. Stanley Adams, singer and pianist, had been living under the same roof with Lillian Kennedy Adams, his first wife, and Aimee Rozelle Adams, his second wife, in the Beverly Hills mansion of Claire Adams, daughter by the first

Registered Bulls Sold by Aycock

B. N. Aycock recently made two sales of registered Hereford bulls, delivery being made last week. He sold to Andrew Fasken, for his Sierra Blanca ranch, 23 head of yearling bulls and to W. W. Brunson eight head of two year olds.

Big Spring Pays As Loan Is Made

BIG SPRING.—Big Spring school teachers finished the 1932-33 session with salaries paid in full. The check for the last month's salaries were distributed Tuesday, Supv. W. C. Blankenship, announced.

Vandals Damage B'Spring Property

BIG SPRING.—Vandals are marring the appearance of the city park. Picketneys, too lazy to scout for their own wood, continue to demolish benches in order to cook their lunches. Much park property has been damaged in this fashion this spring.

Alcoholic Content of Beer on the Increase

JEFFERSON CITY, Mo. (UP).—The alcoholic content of Missouri beer is gradually increasing. Although the brew ran about 2.4 per cent by weight when first analyzed, recent tests by Food and Drug Commissioner C. H. Manville showed the beverage was 2.5 per cent. No beer in Missouri has tests as high as 3.2, the maximum allowed.

Vets Gain Step In Controversy

WASHINGTON, June 3. (UP).—The veterans today appeared to have won back \$170,000,000 of the \$420,000,000 benefits and pensions which President Roosevelt planned to take away when it was indicated that the president and the house will accept the senate provision forbidding the president to cut payments more than 25 per cent.

Freight Rate Case Still Pending, Midland Told

The freight rate case in which effort is being made to move Midland back into differential point territory is not yet settled. Midland is still in common point territory, and no indication is given when a final judgment will be rendered. Midland's interests are being watched after by the Midland chamber of commerce through its technical experts, Frank Leffingwell of the Texas Industrial Traffic league and the traffic department of the West Texas chamber of commerce.

RESERVATIONS TO FAIR MADE BY 10

Ten Midlanders have made reservations for the West Texas special train to the World's fair at Chicago, to leave June 11. The low rate round-trip fare starts at Midland.

Those already certain of going are: C. A. Goldsmith, Tommie Williams, Miss Jera Edwards, Miss Lotta Williams, Mrs. Creola Vickers, B. C. Driver, Mrs. Raynee Carroll, Jack Carroll, John Turner Jr., and Rosemary Johnson. Midlanders who are seriously considering going with their friends about the West Texas special are: Marguerite Francis, Doris Harrison, Mrs. Walter Cowden, Bennie Sue Ratliff, Dorothy Ratliff, Buallah Whitefield, Mrs. Johnson Phillips, Walter Faye Cowden and Graham Brown. Time for making reservations for this special which includes the big party of Midlanders, will end tonight.

Pretty Boy Takes Over Okla. Dance

WEWOKA, Okla. June 3. (UP).—Pretty Boy Floyd appeared at a dance hall here early today, threatened peace officers and drove away. A pair believed to be his wife and son were picked up later. Officers converged here seeking the man who is blamed for 30 bank robberies and a half dozen killings.

Two Singers on Class Program

Miss Myrtle Scarborough Smith, Plainview soloist, and Hampstead Bentley, who has sung here numerous times and is known as "Southland's Sweetest Tenor," will appear on the Men's class program this morning at Hotel Scharbauer.

Colts Hosts to Crane City Today

Crane City will play the Mexican Colts at 3 o'clock this afternoon at the Indian diamond, west of El Camp Moderno. The Mexicans have played eight games, winning six.

Ship to Be Able To Proceed East

With arrival at Big Spring Thursday morning of a new engine for their Pilgrim transport ship, Lieut. W. L. Clark of the U. S. army air corps, and six enlisted men, expected to be able to resume their journey in a day or two.

Hendersons Leave On Their Vacation

Bryan C. Henderson, physical education teacher, assistant coach and instructor of history in the high school, and Mrs. Henderson left Midland Friday night for a three-month vacation in Dallas. They will live at 100 1-2 North Edgfield.

FLAPPER FANNY SAYS

REG. U. S. PAT. OFF. A man chases a girl until she catches him.

OFF FOR WEEK END

Mr. and Mrs. L. D. Bayless are spending the week end at Littlefield. They were accompanied by Mrs. Archie Dale who is joining her husband, recently transferred there by Perry Bros. stores.

LEAVE FOR DALLAS

Mr. and Mrs. R. H. Morse and children are leaving today for Dallas where they will stay for a few weeks.

PROTECTING LETTERS

McALLEN (UP).—A flood of letters and other messages left McAllen recently when it developed there was to be further delay in starting construction work on the \$135,000 postoffice and federal building.

RIG COMPLETED

Rig is completed and Cecil Lockhart at Root No. 2, center of the SW 1-4, sec. 7-17-30 is expected to spud within a few days. The well is in east Eddy county, N. M.

LONE FLYER IS SIGHTED ONCE; DRIVING FAST

Attempting to Break Post-Gatty Mark Around World

ST. JOHNS, June 3. (UP).—Jimmy Mattern, San Angelo flyer, en route to Europe on the first solo flight around the world, passed the New Foundland coast today flying low and fast.

Sparks Agent for Refinancing Here

W. J. Sparks has been named local correspondent for Midland county to assist farmers in connection with the \$200,000 fund appropriated by congress to refinance farm mortgage indebtedness and to aid farmers in redeeming their foreclosed farms. It was announced this week by A. P. Graves, agent for the farm loan commissioner, Houston.

Two Singers on Class Program

Miss Myrtle Scarborough Smith, Plainview soloist, and Hampstead Bentley, who has sung here numerous times and is known as "Southland's Sweetest Tenor," will appear on the Men's class program this morning at Hotel Scharbauer.

USING OUR WEAPONS AGAINST DEPRESSION

It is rather dismaying to find a Washington correspondent reporting that the Roosevelt administration does not intend to use many of the extraordinary powers which will be placed at its disposal through the new industrial bill.

This bit of news was meant to be reassuring. Actually it is the exact opposite. One hopes that it is not true. The industrial bill, if adopted in its present form, would bring to American life the most sweeping change that has come since the adoption of the Constitution itself.

But in spite of these facts—or, rather, because of them—the bill is in many ways the most encouraging single factor on the horizon.

That we have in Washington a Congress and an executive willing to enact a measure of this kind entitles us to hope that we shall eventually work our way out of the depression and enter a fairer era.

To pass such a bill and then to sit back and let it gather dust on the shelves, trusting hopefully that the interplay of natural forces will carry us up in such a manner that drastic action will not be needed—that would be to go straight back to where we were a couple of years ago. It would be to give up the idea of a planned economy in favor of drifting.

Our situation being what it is, we have nothing to fear from a government that is willing to live up to the president's promise of "bold, persistent experimentation." Our greatest danger would be a government that tried too hard to play safe.

Commodity prices are beginning to rise, factory production is beginning to increase—true enough, and very welcome signs they are; but to seek to ride up on these elevators without putting into effect far-reaching correctives would be to leave unaltered the fundamental maladjustments that caused our woes in the first place.

The true conservative in times like these—the man who really wants to preserve as many as possible of our traditional institutions—is the man who is willing to adopt new measures. The man to be afraid of is the man who tries to stick in the old grooves.

The inability of station owners and composers to reach an accord on fees to be paid for use of musical compositions on radio programs does not hinge, as the discriminating music lover might assume, upon the insistence of the broadcasters that the song writers should pay them for broadcasting some of the so-called "popular" numbers.

The Maine Central Railroad, after hauling in all emergency supplies without charge, sends \$1000 in advance taxes to help the burned town of Ellsworth replace itself. It takes a lot of towns a long time to build up a flourishing railroad; it is pleasant to see a grateful railroad assisting, in the shortest possible time, to build up a town.

The director of Elmira (N. Y.) reformatory discovers that more than 80 per cent of the youthful inmates have foreign-born fathers. The sins of the sons are laid to the non-assimilation into good citizenship of the parents. The inference is that that famous melting pot should strengthen its refining department.

Business appears to have its own color scheme, many a general manager coming out of the blues as his company comes out of the red.

As the red ink entries begin to fade, the world begins to find that actually it is in the pink of condition.

Side Glances by Clark

"Now, listen, buddy—this is the last time I'm going to ask you to quit jabbing me with your elbow."

Maybe?

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)
for fear it would rain on the fourth of July. Now I worry for fear it won't rain before the fourth of July.

Man has to excel in a few things. When Percy Mims looked at his boy, James', report card at the end of the year and asked him what seemed to be the most difficulty, James replied that he believed it was the lessons.

Joe Haygood once got off of the train and had a whelp looking mark on his face. A friend inquired about it and Joe said it was a birth mark. "It looks more like a wound," said the friend.

My Pal Boone got on a dinky street car in Fort Worth and a small boy sat in front of him. The car got crowded and Boone asked the boy why he didn't get up and let a lady have the seat.

It was examination time in college. A young student painfully wended his way through the test.

On finishing, he wrote this message on the bottom of the last page: "Dear Professor: If you sell any of my answers to the funny papers, I'll demand a split of 50-50."

"I never realized it till now, but I love him too!" "Idiot! Are you being honest?" "I'm going to prove it."

He danced her quickly off the floor toward the large window that overlooked the harbor.

"How will you prove it, Mr. Tommy Knowlton?" "By giving his daughter the full benefit of my undivided attention all evening."

"That wouldn't be fair to the others, would it?" She looked somewhat doubtfully at the other ladies in the ballroom.

"You mean to take you out of circulation," asked Knowlton, quickly.

"Oh, no," replied Joan, mockingly. "I mean to deprive the admirals' wives of the pleasure of your company."

"I'm not going to waste my one evening ashore towing old barges about—when I can go for a spin in the Captain's gig!"

"Where are you going to spin to?" Knowlton pointed toward the harbor front. "Oh, just out into the night. There is a big moon out there and a lot of stars and some sort of bird croaking a tune."

"Let's go. What do you say?" "No!" "Yes!"

"Young man," said the girl, striving her utmost to put severity into her voice. "I'm a lady of firm character, and when I say no, I mean it."

The carnival was in full swing. Blasts of horns at the mouths of children, the screech of rattlers in their hands, mingled with the monotonous bleating of the merry-go-round's hurdy-gurdy, the flamboyant cries of the barkers, the shrill laughter of adolescent girls under the watchful eyes of their mothers.

The crowd milled through the street, hair and clothing dotted with confetti, paper streamers dragging at their feet.

(TO BE CONTINUED) Newark, N. J., airport is said to be the busiest in the world. Nearly 500 passengers arrive and depart daily.

CHAPTER III—Cont.

Knowlton set his jaw firmly and continued whirling the old lady about in time to the Italian music. He thought the waltz was never going to end, but at length it stopped, and he exchanged desperate looks with Walters as they applauded the music.

"You simply must dance with him, my dear," Knowlton heard his partner saying to another woman on the floor. "I'll never forget you, Lieutenant."

"Madame," replied Knowlton, with his best bow, "the memory of that waltz will cling to me forever."

Walters came up to his friend, bringing the sway-backed woman with him. He took Knowlton's arm. "Ladies," said he, "if you will drop anchor here, the Lieutenant and I will fetch you some punch."

"They made for the side of the ballroom where punch was being served, leaving the two women in the center of the floor, their faces ridiculous with romantic smiles as they looked after their retreating partners.

"She walked up to my knees when the music stopped," said Walters. "Just take a four-point on that line of targets," said Knowlton, and nodded along the side of the room where sat ten women, none of them under sixty. "The charm of a line of tanks! Look at that monument—fourth from the end—with the big blue mustache!"

Walters' eyes followed the inclination of his friend's head, and he saw an obese Italian woman whose upper lip was adorned with a mustache, and whose chest was night and awe-inspiring in its immensity.

"She certainly puts up a big front," commented Knowlton. "And it's all for me!" said Walters, despairfully. "She's my next partner."

"That's mine over there," said Knowlton. "The heavy-weight Englishwoman with the large, piano legs."

"Not so bad—if she'd take off those leggings," said Walters. "Let's screw out of this place." "O. K., but how?"

"Through that window in the bathroom." "That's a forty-foot drop." "No, only about thirty-six."

They emerged from behind the cluster of potted palms where they had taken refuge to scan the youth and beauty of the hall, and slunk across the dance floor towards the window of hope and escape.

Half way across the room, Knowlton stopped suddenly. His eyes had encountered the beautiful blue orbs of an American girl on the arm of an English admiral. How he knew she was an American he could not have told for the life of him—something vivid, healthy and wholesome about her laughing eyes, her most kissable lips, the slenderness of her figures, the grace and litheness of her walk.

"Brick," said Knowlton, in a thoughtful tone, "it wouldn't be right for us to sneak out like this." "What's the matter? Aren't you well?" "I'll know in a few minutes." And Knowlton deserted his fellow officer and walked steadily back across the room to the line of hasbencs at the wall, bowing deferentially to the Englishwoman with the piano legs with whom the American girl had exchanged a few words.

turned quizzical eyes up to Knowlton. "That's Hughie, my husband—Sir Hugh Higby of the Admiralty."

Knowlton flushed with chagrin and remorse and would have tried to excuse himself, but the lady laughed. "He does look like something washed up by the sea though."

"Could we foul their cable, and stand by for repairs?" With a deft and powerful movement of his arm, Knowlton swung his partner around and managed to crash into Sir Hugh Higby, and began apologizing profusely.

The American girl watched him with a certain smiling suspicion in her eyes. "You can't take me in like that," proclaimed her eyes. "Like that was no accident."

Lady Higby took her husband's arm. "Sorry, Hughie, but will you take me in now? My propeller has fouled." She addressed the girl. "A very able navigator for you, my dear," nodding toward Knowlton, and moving away with her husband, leaving Knowlton to his own resources.

CHAPTER IV AIR RAID

Knowlton bowed to the American girl, a slight smile answering the suspicion in her eyes. She yielded to his outstretched arm and they began to waltz.

"Who are you, lovely lady?" "A hospital nurse. Under orders to flirt with all American submarine officers."

"And me representing the whole flotilla!" exclaimed Knowlton. "A bit of luck!" "Must you hold me so close?" "Navy training; make everything fast."

"Aren't you just a little fresh?" "No, just a little salty." "You dance well." "Lady, you took the words out of my mouth."

MORE PEOPLE BUY BUICKS THAN ALL OTHER EIGHTS IN ITS PRICE RANGE COMBINED!

BECAUSE BUICK GIVES MORE AND BETTER MILES

People look at the 11 eights in Buick's price range, and buy more Buicks than all of the rest combined.

Every state in the Union purchases more Buicks than any other automobile priced above \$1,000.

Five times as many people buy Buicks as any other car priced above \$1,000—sixes, eights, twelves, or sixteens.

Figures taken from Polk's National New Car Sales Survey

Buick wishes to thank the men and women whose demand for Buick cars has made possible this great sales leadership. Such popularity can mean only one thing: People are convinced that Buick gives more and better miles. Remember—there are twenty Buick models—all moderately priced and all available on liberal G. M. A. C. terms. A General Motors Value.

Eighty-six Young People Complete Courses At Baptist Training School Friday Night; Graduation Exercises Will Be Held Later

Eighty-six young people completed the Baptist training school course at the church Friday night and took their examinations. Graduation exercises for those who are entitled to diplomas and seals will be held later. The Rev. Winston F. Borum will present them.

Students taking the course "Wisdom of Soul Winning" taught by J. W. Patterson were Juanita Cox, Vivian Arnett, Evelyn Adams, Marjorie Ward, Charlene Parrott, Laura Shelburne, Lowell Webb, Barbara Gann, Theo Cosper, Roy Skipper, Fouché Pollard, James Walker and Felix Halton.

Those enrolled in the class on the senior manual taught by A. D. Bruton were Irene Lord, Lloyd Pace, Lloyd Walker, Joe Mitchell, Kenneth Webb, Dean Bryant, Helen Dunagan, Lorena Dunagan, Joan Arnett, Dorothy Hines, Lois Walker, Kathryn Cosper, Dorothy Warren and Violet Pierce.

The course, "Training in Church Membership," conducted by Miss Mary Beth Langston was taken by Wallace Blankenship, Murray Bryant, Earl Pace, George Walker, Newell Ellis, Bob Crane, Josephine Ray, Lillian Arnett, Vera Webb, Lorena Gann, Nelda Jim Hicks, Jane Dunagan, Virginia Yeats, Vera Stephens, Alma Merrill, Dannie Vance, Doris Dunagan, Beulah Mae Coleman, Pauline Buffington, Dorothy Conner, Daphne Shaffer.

"Bible Heroes," a course for junior and primary departments taught by Miss Opal Lackey was attended by Lloyd Pittman, Forest Hill, Jimmie Merrill, Fred Gordon Middleton, Buster Pittman, Cecil Warren, Helen Ruth Merrill, Elwanda Hayes, Bobby Walker, Phyllis Richmond, Van Borum, Louise Cox, Ina Bess Hicks, Louise McClain, George Halton, Lucille Arnett, Mary Helen Walker, Tad Crane, Kitty Jean Ellis, Fred Arnett, Louise Elkin, Maxine Hayes, Inez Pittman, Lucille Stringer and Kathryn Dunagan.

Members of the primary union who attended are Evelyn Pittman, Ruth Richmond, Lillian Unger, Clara Belle Stringer, Jean Brice Hayes, Allan Crane and Julian Unger. After the examinations, students were taken to Cloverdale, where they were entertained as the guests of the

Midlander Returns From Recreational Meet at Brownwood

Mrs. S. H. Gwyn and Mrs. J. T. Bell of Stokes have returned to Midland from Brownwood, where they attended a recreation institute conducted by the Recreation Association of America which has its headquarters in New York City. This association has given courses in Texas for three years and is credited with beginning recreation clubs in Floyd and McClintock counties.

The course is without cost to Texas and other states participating and it is made possible by philanthropists. It is conducted by Mr. and Mrs. Jack Stuart Knapp, Knapp, well-known playwright and poet, remarked at the Brownwood meeting that "a good way to judge a person is by the way he uses his leisure time."

Midland was the farthest county represented. Delegates stated that there are possibilities for such work here.

Home Agent Attends Howard County Meet

Miss Myrtle Miller, tri-county demonstration agent, attended a county meet at Big Spring Saturday and made a public dressing and canning demonstration. The meeting was held at the woman's club house.

Meetings This Week The following schedule has been announced by Miss Miller for meetings this week: Monday, Cotton Flat; Tuesday, Valley View; Wednesday, McClintock; Thursday, Busy Bee and Warfield to be held in the assembly hall of the Midland county court house; Friday, Martin county home demonstration council at Stanton.

Mrs. J. P. McClarty of Henderson, arrived Friday evening for a visit with her daughter, Mrs. Elliott H. Barton.

Evangelist Class. Games were played and a barbecue lunch served. An average attendance of 97 was seen throughout the school, with 110 attending Monday night.

Midland Beauty

Miss Jess Edith Carlisle, daughter of Mr. and Mrs. Wayne Carlisle, who was nominated by the sophomore class of Texas State College for Women (C. I. A.) along with eight others for class beauty. Pictures of these girls were sent with 32 others from other classes to Sir Harry Lauder in Scotland for him to select school beauties. Miss Carlisle was

Wednesday prayer service at 8:00 o'clock.

CHRISTIAN SCIENCE CHURCH
Christian Science services held every Sunday morning at 11 o'clock in the private dining room of Hotel Scharbauer. Sunday school at 9:45.

Recipe-Menu Index Saves Much Time, Home Agent Says

Purchasing a recipe index for ten cents, Mrs. J. T. Bell, 4-H pantry demonstrator for Stokes, has begun a recipe-menu file, which is a part of the demonstration being conducted, according to Miss Myrtle Miller, home agent.

A food budget to sply her family with an adequate diet during the non-productive months has been made and a garden planned accordingly. Filling the provided storage space for all preserved food and assisting others are features of the demonstration.

The recipe index included beverages, breads, cakes, cake fillings, cereals, cookies, fritters, frozen desserts, meats, pastries, pies, jellies, preserves, pickled, puddings, salads, salad dressings, sea food, sandwiches, sauces, soups, vegetables and miscellaneous recipes.

Tested recipes are pasted or written on index cards and filed. This system saves much time.

Belmont Class Has New Study Course

The Belmont Bible class met Friday afternoon to begin a new study course taken from the book of Leviticus. The time of meeting was changed from 3:30 until 4 o'clock.

Attending were Misses J. M. King, Roy McKee, R. E. Mitchell, C. F. Garrison, D. E. Holster, Earl Kelly, W. P. Collins, Herbert King, A. W. Lester, W. R. Mann, Eiland and the hostess, Mrs. F. J. Fink.

Announcements

Monday
The Women's Missionary society of the First Christian church will have a covered dish luncheon at 12 o'clock Monday at the home of Mrs. W. B. Elkin, 1307 West Missouri, with Mrs. Elkin and Mrs. W. C. Cochran co-hostesses. All ladies of the Christian church are invited.

Both circles of the Methodist auxiliary will meet at 4 o'clock Monday afternoon at the church for a business meeting.

The Women's auxiliary of Trinity chapel will meet at the home of Mrs. Day Finley at 3 o'clock Monday afternoon.

A meeting of the Presbyterian auxiliary has been called for Monday afternoon at 3:30.

Baptist circles will hold mission study meetings at 3:30 Monday afternoon. The Evangelist circle will meet with Mrs. O. P. Pope and quilt after the lesson is finished.

The Isadora Harmon circle will meet with Mrs. N. W. Bigham and the Lena Wimberly with Mrs. D. W. Brunson. Mrs. H. B. Dunagan will be hostess to members of the Annie Barron circle.

Tuesday
Church of Christ Bible class at the church at 3:30 Tuesday afternoon.

Members of the Y. W. A. will meet Tuesday evening at 8 o'clock at the home of Mrs. R. E. Witty.

Members of the senior league of the Methodist church will entertain the Young People's league Tuesday evening at 8 o'clock at the church.

Wednesday
A meeting of the Play Readers club will be held at 10 o'clock Wednesday morning at the home of Mrs. J. Howard Hodge. Mrs. R. D. Scruggs will read "Cavalcade."

Friday
The Belmont Bible class will meet Friday afternoon at 4 o'clock with Mrs. Roy McKee.

Happy Birthday

TOMORROW
John E. Adams
Dr. K. F. Campbell
Mrs. Golden Donovan
Neva Ray Drake

Personals

Mr. and Mrs. Harvey Fryar, accompanied by Bill Jackson, six year old son of Dr. W. H. Jackson of Texas Technological college, are here for a week end visit with Mr. and Mrs. C. R. Fryar. They will go to Big Spring today to visit relatives.

Mr. and Mrs. Millard Eldson of Lovington are here for the week end visiting friends.

Mrs. Ben Allen and daughter, Shirley, are here from Abilene visiting Mrs. Allen's parents, Mr. and Mrs. W. H. Spaulding.

Miss Addiee Haag, student at southwestern at Georgetown, has returned to Midland to spend the summer with her family.

Instructors from Howard Payne college that were here conducting the Baptist training school have returned to their homes for the summer. Miss Opal Lackey left Friday night for her home at Vance. Miss Mary Beth Langston left this morning for Cisco and James Carroll for Brownwood. J. W. Patterson and A. D. Bruton will go to their respective homes after conducting a revival at Pleasant Valley.

Mrs. Paul Slaton and Mrs. Charlie Frame of Odessa were visitors in Midland Saturday morning.

Dr. Lee Scarborough and family of Fort Worth passed through Midland Saturday morning en route to Rudoso, N. M. He visited for a brief while with his brother, W. F. Scarborough, and his niece, Mrs. N. Phillips. From Rudoso, the southwestern Baptist Theological Seminary president will go to North Carolina for a revival meeting.

Mrs. Forest King and daughter, Dorothy Jean, of Stanton visited friends here Friday afternoon.

John, Frank and Erskine Davis left Friday afternoon for Fort Worth and Dallas, where they will visit friends for several days.

Mr. and Mrs. Guy E. Bennett and son, Carter Ross, left last night for a month's vacation at Dallas and parts of Oklahoma.

Mrs. W. B. Holsmley and daughter, Naticia, left this morning to spend the summer with her mother at Worcester, Mass. They will return to their home at Mexico City in the early fall. While here they visited with Mr. and Mrs. W. L. Holsmley.

Mr. and Mrs. P. J. Weldon have returned to their home at Glendale, Calif. after a visit with Mr. and Mrs. Frank Norwood.

Mr. and Mrs. J. S. Noland went to Abilene Saturday to take Miss Mary Garrett, who took a train for her home at Ardmore, Okla.

Miss Melrose Bumberner of Big Spring is visiting Mrs. Joseph Dorsey.

E. D. Taulbee of Houston is a business visitor in Midland.

J. W. Triplehorn of Fort Worth transacted business here Saturday afternoon.

Mrs. R. K. Cummins of Odessa visited friends in Midland Saturday.

Mrs. J. L. Nichols and two daughters of Wink were visitors in Midland Saturday.

Mr. and Mrs. Ovid Wall are visiting Mrs. Dona Dunagan.

Miss Helen Margaret Ulmer, Miss Ida Beth Cowden and Wright Cowden will leave today for Austin where they will attend summer sessions of Texas university.

Mr. and Mrs. J. Alfred Tom of Martin county were visitors here Saturday afternoon.

Jimmy Perry of Texon was a business visitor here Saturday.

Conrad Dunagan arrived last night from Austin where he attended Texas university.

Mrs. May Witcher of Odessa transacted business in Midland Saturday.

WILD SCORES MARK FRIDAY PLAY IN THE NOCTURNE LEAGUE

HOKUS AND LINDYS OUTSLUG RIVALS FOR EDGES

By JESS RODGERS

Two games greatly different from the close games of the night before were played in the playground league Friday evening. In the first Hokus-Pokus defeated the Magnolians 9-5 and in the second encounter the Blackmans outslug Lindys' cleaners for a 11-8 victory.

The Hokus team took an early lead in the first game when Parrott hit a home run in the first inning and after that it was never headed. The losers pulled up within one run of the winners but the Hokusman came right back and made five runs in the fifth.

Manager Day of the Magnolia used 13 men in an effort but no team can win when it is making more errors than hits.

Lewellen gave up only five hits while Price was giving up 11. Mills of the Hokus was the leading hitter with a homer, triple, and single in four times at bat.

Hit 'em where they ain't was the solution that the Blackmanmen used in defeating the Lindys in the second game. After scoring two runs in the third on three errors and one hit the fillup on station bats sent 14 batters to the plate in the fourth inning to score nine runs on nine hits and a couple of errors. No matter where an infielder moved to the ball was always just barely out of his reach. Only three fly balls were hit in the inning. These were the only frames the winners were able to score in but they made more than enough runs to out-score the scattered attack of the losers. Ralph Blackman, who hit three for three, and Straughan with three for four were the leading hitters in this struggle.

IRON DUKE OF SPORTS DIES

NEW YORK, June 3. (UP)—William Muldoon, the "Iron Duke" of sports, trainer of boxing champions and presidents, was dead today at the age of 88.

He dominated the sports world for the last quarter of a century, training such figures as John L. Sullivan, Kid McCoy, Jack Dempsey, the Non Parcell and leading Edith Rockefeller, Theodore Roosevelt, and William Howard Taft at his famous Olympia health resort.

Muldoon forced fighters and managers to recognize the principles of sportsmanship.

Reserving the Reservation With the Indians

By JESS RODGERS

The Indians are no more. That is in the sock ball league. With one blow from the typewriter I am exterminating them and substituting the word Paposes. All know that a papose is an Indian youngster and why should not the younger Indians club (from standpoint of organization) have some title that will make its identity plain? When I speak of an Indian getting a hit I never know whether it is against McCamey or the Southern Ice, so The Vanishing American is hereby written off. Forgive me, Doctor.

The Indians will go to Iran this Sunday and try to extend to the Peecos county boys their first defeat of the season. The Iraan boys have been fortunate in that they drew McCamey and Big Lake, two of the weakest clubs in the league, for this Sunday and try to extend to the Peecos county boys their first defeat of the season. The Iraan boys have been fortunate in that they drew McCamey and Big Lake, two of the weakest clubs in the league, for this Sunday and try to extend to the Peecos county boys their first defeat of the season.

The loss of Sam Warren was a blow to the club's hopes but, with the acquisition of Lindy Hiett, Doc has come as near plugging the hole as is possible. Lindy, with his many years of experience, should prove a valuable asset. In a pinch Lindy's arm is probably good for a few innings of shutout ball in this league.

If Andy Northington could hit for the Hokus-Pokus like he can for Lindys Cleaners Bill Connor's smile would be wider. In four trips to the plate for the Hokus Andy has not got a hit while out of four trips up for the cleaners he has hit two homers and a single.

After one week of play in the night games, George Booth, hitting 1.000 out of three times at bat, and Ralph Blackman, hitting .888, are leading the league in the slugging department. Blackman has hit two singles, two doubles and a triple in six attempts. Blackman also leads in runs with four. In pitching, Pyron of the Paposes and Lewellen both have clean slates with one win and no losses.

The sports department said that he would leave my byline off the top of any story I might write if I mentioned myself in it as I did yesterday and my reply was, "That is quite all right for I had rather get credit for two hits than for writing a book."

FANS SHAKEN BY ACTION OF BOARD

Decision of the school board to call off the Dogs from Class A company and to sic them on Odessa Stanton, Peecos et al of the Class B district has resulted in an oral shakeup of the town.

There were protests and recommendations, jibes and amens. Some held that Midland, with limited reserve strength could not afford to send batted men into Class A games.

Others held they'd rather lose in Class A than win in Class B. The town seemed to have been evenly divided in sentiment. Football players were divided, also. Some like to run into heavy clubs of Class A on the greenward of the larger towns; others would like to break loose occasionally for long runs on dirt gridirons of Class B.

It was felt by the school board that restricted athletic manpower would continue to cause the club here to lose games, which, in turn, would cause the gate receipts to be inadequate to pay expenses of visiting Class A clubs.

Century Progress Costs Priced for Lean Pocketbooks

CHICAGO (UP)—Chicago's 1933 World's Fair has been priced to accommodate the lean pocketbooks of a populace which has passed through three years of economic depression.

Admission fees, railroad fares, hotel rooms, meals and every expense of the visitor have been placed on such a low-cost basis that officials estimate a visit to the 1933 exposition will cost less than any previous fair.

Admission to the fair itself will cost 50 cents. This entitles the visitor to see 90 per cent of the exhibits and buildings. It includes all of the structures erected by a Century of Progress and many of those built by independent exhibitors. Admission prices to concessions and special features also are low-priced. The fee for the Sky-Ride, the spectacular amusement feature which is expected to be the outstanding event of the fair for many visitors, will be 40 cents. Admission to the replica of the Jehol temple cost 25 cents.

Some of the outstanding attractions and the fees: Byrd's Polar

ship, 25 cents; Belgian village, 25 cents; Flower show, 25 cents; dirigible ride, \$2; airplane ride, \$3; midget village, 25 cents; Streets of Paris, 25 cents; Enchanted Island, free to children, attractions a penny five cents and a dime.

Railroads Offer Rates

Railroads have made widespread concessions. Under one plan any railroad in the country will sell a visitor a ticket, covering his round trip transportation, his Chicago hotel accommodations, transportation to the hotel and to the fair, admission ticket to the fair, and a sight-seeing tour of the city.

Under this arrangement the visitor can plan the expense of his tour to the penny with the exception of meals and incidentals and pay for it before he leaves home. Under another plan announced by several railroads "family fares" are offered to parties of three to five. The rate provides a reduction of 50 to 60 per cent in the rail fare cost. When three persons travel together the rate is the one-way fare for the round trip. When the group is four, it is 95 per cent of the one-way fare and for a party of five the cost is cut to 85 per cent of the one-way fare. Children will be considered as members of the party, but will pay only half-fare.

Another Offer

In addition first class fares are offered on a fare and a half, fare and one-third and fare and one-tenth basis and coach fares at one

fare and a tenth for the duration of the fair. Chicago hotel managers have agreed that rates will not be raised during the exposition. Single rooms in loop hotels may be obtained from \$2.50 a day up.

A survey of restaurant charges indicated the prices in Chicago would be as low if not lower than the average for the rest of the country.

Okl. Tire Dealer Expert Seamstress

OKLAHOMA CITY, Okla. (UP)—B. Frank Million, hard-handed, tobacco-chewing Oklahoma City tire dealer, is an expert "seamstress" and makes most of the dresses his wife and daughters wear.

He spends his days directing eight service station employees and comes home at night to indulge in his hobby of sewing, developed when he was a youth in Denton, Texas. He is of middle age, with thinning hair. Million's mother kept him indoors when he was quite small because of a bad neighbor boy, and he took up sewing to pass the time. By the time he was in high school, playing football and quite able to take care of himself, he also had learned designing.

Now he has a specially equipped sewing room in his home, where he spends his evenings. His 17-year-old daughter, Myrtle, has worn few

dresses her father did not make. Million's work is fine enough to satisfy the most exacting girl graduate. He has tried his hand at times on hats and Mrs. Million has worn several of his creations.

TAKE TO WHEELS

DENTON—Bicycling in Europe will vie for popularity with bicycling on the college campus when a party of girls at the Texas State College for Women (CWA) uses that means of conveyance on short, all-day excursions to neighboring hamlets while in Europe on the second annual college travel tour this summer.

Bicycling as a mode of transportation has been universally accepted in Europe, there being specially adapted smooth graveled paths for their use. Often three separate paths are found side by side—one for automobiles, one for pedestrians, and a third for bicycles, according to Miss Valliere Decker, director of the tour.

The party of girls will spend much of the eight-week vacation in southern Bavaria, Ommersamgau, and Paris. While in Ommersamgau they will be the guests of Anton Lang, who has acted the role of the Christus in the Ommersamgau passion play for over 20 years.

Mount Rainier National Park is situated in the State of Washington.

Slump Will Result In Goiter Increase

TOLEDO (UP).—An increased crop of goiters will be one of the results of the depression, in the opinion of Dr. George J. Conley, Kansas City, who spoke here before the annual convention of the Ohio Society of Osteopathic Physicians.

"One type of goiter," Dr. Conley said, "is the direct result of worry and nervous tension which is more pronounced in times of stress."

"Even in the past, goiters of this type have been more common than in Europe, where life is more leisurely."

Five cities in the United States have over a million population according to the 1930 census; New York, Chicago, Philadelphia, Detroit and Los Angeles.

Golfer, 74, Played Hole for Each Year

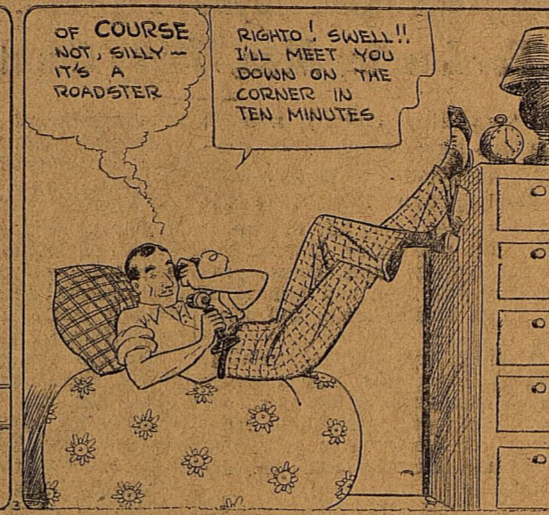

FRESNO, Cal. (UP).—H. J. (Dad) Miller, veteran Fresno golfer, may be an old-timer, but he still can out-play mere youngsters of 35 or 40.

On his 74th birthday recently, he played 79 holes on the Fort Washington course near here.

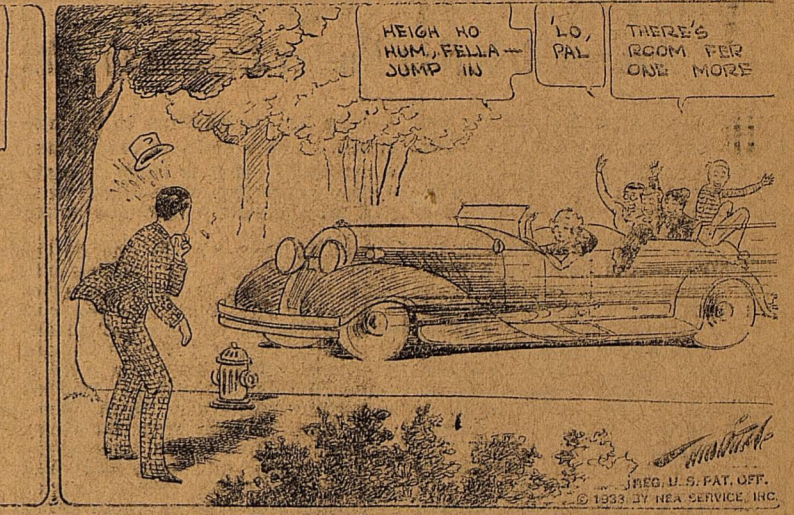

For years it has been his custom to play as many holes of golf as he was old on each birthday. This year, however, he felt so fresh at the end of the 74th hole that he played the additional five.

A California scientist states that flames lean outward from the surface of the sun at the rate of 20,000 miles a minute and sometimes reach a height of half a million miles.

Woman Tames King of Jungle in Film Drama Bringing Buster Crabbe to Ritz

Excitement runs high in the new film which opened today at the Ritz theatre, for "King of the Jungle" is the story of a real wild man—a boy brought up from early childhood by a pack of lions. And, although the story deals with the taming of the lion man, it glorifies the jungle beasts in their native setting, and builds a narrative of primitive power.

But he has, in addition to his herculean build, a smile of vast charm, a personality that is likely to make a great deal of charm to the role of Ann Rogers, young school teacher, and the only person who can handle the lion man when he is captured and brought to America as a circus performer. Nedra Westman, recent recruit from the stage, proves an adroit screen comedienne as Ann's friend and room-mate, and Sidney Toler, Irving Pichel, Douglas Dumbrille and Ronnie Cosby score in other prominent roles.

I'll be seeing you in
42ND STREET
RITZ
COMING SOON

Beginning in the African jungle, where the lion man rules supreme among his lions, the film moves from one exciting climax to another, culminating in a circus fire, during which the maddened animals break loose and stalk through a city's streets, leaving behind them a trail of blood and ruin.

Scruggs Plans Remodeling Job

Work will be started Monday on remodeling the Wall street entrance of the Scruggs Buick company building to install a complete "super service" station. R. D. Scruggs, proprietor, said yesterday. The most modern type of service station equipment will be used, Scruggs said. Hereofore the Buick and Pontiac dealer has not operated such a department except in connection with the repair shop.

Mr. and Mrs. A. F. McKee are expected to return today from Breckenridge, where they visited friends and relatives. More than 1,340,000 persons in England and Wales were receiving poor relief at the end of 1932, equivalent to 335 persons per 10,000 of the entire population.

Will Shoot Horse If No Rain Soon

Unless it rains by June 14, call the horse undertaker. Unless it rains by June 14, A. J. Olliff says it's a horse on him.

This farmer, who has a quaint sense of humor, says he believes firmly it will rain on or before June 14 that he painted with blue marks on an old white horse the characters "June 14." "If it doesn't rain by June 14, I'll shoot that horse," Olliff said. Some of Olliff's friends who heard his prediction said "Horse feathers!" and Olliff admits if it doesn't rain he'll get the horse laugh.

Hogan

(Continued from Page 1)

structure and it would be desirable if that supply could be reduced at the rate of 100,000 barrels per day, or 35,500,000 barrels per year.

The proposed title IV on oil is necessary in order to cover those conditions which exist only in the oil business as suggested in the preceding summary of facts. I ask the indulgence of those who are equally familiar with the oil business for mentioning some elementary factors for the information of those who have had no occasion to inform themselves on practices and terminology of the oil business. Some confusion may arise from the difference of interpretation of the terms used by the several witnesses unless we all have the same meaning in mind. Unless otherwise expressly qualified when we speak of the well potential we mean the amount of oil which a well can produce when permitted to flow its full capacity for a period of 24 hours. The potential of oil field is the number of barrels per acre of the wells of that field can produce when all are permitted to flow to full capacity at the same time. Unless all the wells are open at the same time field potential may be a very unreliable computation.

When the term potential is applied in fields where the wells require pumping the capacity of well or field on pump is what is meant. Allocation is the apportionment between the several states of the total daily allowable number of barrels produced in the whole nation. Allocation within a state is the division among its several pools of the amount allotted the state as a whole. By ultimate recovery we mean the amount of oil which a field will produce before it is finally exhausted or abandoned because of insufficient oil to justify further operation. When used in the past tense it means the amount of oil produced from old fields before their abandonment.

There is a marked difference between the amount of oil in an oil field and the ultimate recovery of that field as only from 15 per cent to 40 per cent of the oil content of a field can be recovered by any practical process. The average oil production of the United States for the six years ending January 1st, 1933, was 890,000,000 barrels per year or 2,428,000 barrels per day. During that six years the amount of oil in storage increased somewhat in spite of a reduction last year of 43 million barrels and about 70 million barrels in 1931.

During that same period our exports of crude oil and refined products exceeded our imports. There has been a shrinkage of not less than 8 per cent in the domestic consumption of crude oil due to the depression. Deducting this 8 per cent from the 2,428,000 barrels we have left a daily requirement of 2,234,000 barrels per day. The amount of oil in storage is roughly 530,000,000 barrels. This would supply the nation for nine months. The existence of so large a stock in storage is a constant menace to the stability of the price

Gorgeous Janet Gaynor Picks New Star For Leading Man, Henry Garat of France

A personality entirely new to American pictures—one who is expected to prove one of the most outstanding ever brought to the screen—makes his debut in "Adorable," the new Janet Gaynor romantic comedy with music, produced by Fox Film and coming to the Yucca theatre today and Monday.

He is Henry Garat—charming, talented as an actor and a singer and as handsome as any man on the screen today. For three years he has been the sensation of Europe in French, German and English pictures.

Garat already has been seen by some Americans, those who witnessed his performance in a dual role in "Congress Dances," done in English. Others have seen him

in a number of French and German productions. But to most Americans he will come as an entirely new face and personality, one apparently destined to become as popular as any of the great favorites now before the public. A famous critic who described Chevalier fairly accurately as "the French Al Jolson," could find no such easy comparison for Garat.

He has the charm of Warner Baxter, the singing talent of John Boles and the acting ability of Frederic March," this critic said, which is certainly a combination that should please everyone. The film is marked by a return to theme songs, and a remarkable cast of singers has been assembled to present those catchy hits "Adorable," "My Heart's Desire," and "My First Love to Last."

Opponents of this measure have made statements before this committee that you gentlemen from oil producing states will find difficult to reconcile with facts that are within your personal knowledge. Not the least amazing of these was the statement that the oil business is the most prosperous in America. I think I know personally a thousand and prosperous oilmen who haven't been able to get regularly for the past two years.

If it is true that East Texas has a potential, as has been stated here, of over 100 million barrels per day, that amount even for one full day, could produce more than 40 times the nation's requirements. If one group controlling a minority percentage of the field, as has been claimed, produce 7 million barrels per day, they alone can produce three times the amount of oil which the nation can consume.

No stronger argument demonstrating the need of federal supervision could be made. It is only fair to the public to say that the potential recently taken by the Railroad Commission of the East Texas field, and which showed a total potential of 123,360,000 barrels per day, does not indicate that it could produce more than 40 times the nation's requirements. In making that test the highest number of wells opened to flow at any one time was 53 out of 10,000 wells in the field. The time of the test was only two hours. All the wells in the field had been closed for several days before the test was made. But after all allowances are made it is very evident that this one field can produce for some time more oil than the whole nation can use. If permitted to do that it will break every independent operator in America including these gentlemen who so vociferously protest against interference with their inalienable right of self destruction.

In addition to the financial disaster which this policy would entail the effect on the field itself would be almost equally disastrous. Time for this analysis of the physical waste involved in the unrestrained production of this field but an illustration of what happened in the Winkler field in West Texas may be enlightening to the committee. That field was brought into production in 1927 before there was any proration, either voluntary or mandatory, and at one time it reached a peak production of 367,000 barrels per day. Like in East Texas the wells came in with a high potential flow, the largest being about 60,000 barrels per day. The only restraint on production was the ability

to find an outlet by train or pipeline or the building of storage. Consequently every producer tried to produce the greatest possible amount of oil in the shortest length of time. Within two years after that field had reached its maximum of 367,000 barrels per day it was producing only 40,000 barrels of oil and over one million barrels of water which had to be disposed of at considerable expense.

That great field has produced to date over 150 million barrels of oil but it is estimated that 75 million barrels of oil were permanently lost through the hasty and reckless manner of production which brought the water into the pay horizon and dissipated the oil.

East Texas the water which underlies the oil in the west part of the field is highly saline and it is estimated that it will cost some eighteen million dollars to pipe it to the Gulf of Mexico as it cannot be permitted to flow into fresh water streams. Whether much or little of this water will come to the surface with the oil will depend entirely on the manner in which the oil is produced. In many of the wells only a few feet of saturated sands lie above this water level and a rapid flow of such wells will bring the water into these wells in advance of the full drainage of the oil from the sands.

The present rate of production in that field is certain to result in great physical waste and financial loss.

Everyone who has a nationwide knowledge of the oil fields is reluctantly compelled to admit that there is no prospect of relief from overproduction within the next four years. The great Conroe field, accessible to tidewater, is ready to produce its flood of oil whenever East Texas subsidizes. Covering at least 12,000 acres and with a much thicker pay zone than East Texas it could wreck the stripper well areas just as effectively as East Texas.

Kettleman Hills, in California, with relatively few wells drilled, has an actual potential in excess of 300,000 barrels per day. This potential can be maintained over a long period of years as the pay sands are a thousand feet thick as compared with from one foot to 100 feet of pay in East Texas. On the other hand the producing area is only one tenth as great.

Yates field, which is only one sixth drilled on the basis of one well to each ten acres, has a potential in excess of four million barrels per day. It has been intelligently prorated from the beginning but owners of leases and royalties in that field have been heavily penalized by the violators of state laws and regulations in other fields. Hobbs field, like Yates, has been prorated from the start and its lease owners and royalty owners have been financially ruined through the unfair competition of other fields. These fields are typical of many others where the only reward for obedience to the law and fair practice is a ruinous price brought about by the lawless, or at least reckless, production of other fields.

But as great as is the potential of these fields it must not be overlooked that from the standpoint of the life of a nation our oil supply is very limited. These modern days, in our mental gymnastics, we're likely to overlook how tremendous a sum one billion is.

Since oil was discovered 74 years ago this nation has only produced sixteen billion barrels. The greatest record of production of any oil field in North America is that of Midway-Sunset field in California, and it took it 29 years to produce from

"A Better Department Store"

Expedition to Seek A Sunken Treasure

STOCKHOLM. (UP)—A legendary medieval treasure on the bottom of the Baltic sea, consisting of a large quantity of gems, trinkets, jewels and coins, will be sought for by a Swedish-American engineer and professional treasure seeker, Gunnar Hall, of New York.

About 600 years ago the city of Visby, one the Swedish island of Gotland, was sacked by the powerful Danish king Waldemar Atterdag, who placed huge vats in the market place and commanded the inhabitants of the city to fill them to the brims with their valuables.

Waldemar collected a large treasure, which he loaded on his galconced the paramount interest of the people as a whole in these oil reserves.

leons and set out for Denmark. His fleet was, however, caught in a heavy gale and sank off the southern coast of Gotland.

TO MANUFACTURE BEER

FORT WORTH. (UP)—A new brewery here will be producing 3.2 beer by the time sale of the beverage is legalized in Texas if plans of Fred Schroeder, president of the Milwaukee Bottling works are carried out.

He proposes to construct a brewery building adjoining the present "pop" bottling plant. The company's present bottling equipment with a daily capacity of 3,400 cases, will be used.

If doughnuts crack when frying, use less baking powder. They come out best when the dough is as soft as will be used.

The "Isle of Dogs" is so named because the king of England's kennels were kept there when Greenwich was a royal residence.
