# THE REPORTER-TELEGRAM

THE DAILY REPORTER (Consolidated March 10, 1929) THE DAILY TELEGRAM  
MIDLAND, TEXAS, TUESDAY, JUNE 19, 1934

There really is painless dentistry today. The trouble with adults is they had some bitter experience when they were youngsters and they can't forget.—Dr. Arthur C. Wherry, president of the American Dental Association.

VOL. VI

Number 87

# BLAZE DESTROYS EVER-READY

## 78th Congress, Most Active in History, Completes Job

### 'Miss West Texas'

MISS VIRGINIA CUSHING, daughter of Mr. and Mrs. Wm. Cushing of Big Spring, a recent graduate of Big Spring high school, was crowned "Miss West Texas" at the bathing beauty revue held at the recent formal opening of Lake Sweetwater in Sweetwater. She was the winner of the contest in competition with other young ladies of various cities of West Texas. As an award she was given a beautiful silver trophy besides a check for \$25 from the arrangements committee of the lake celebration.

### \$100,000 Heiress

The entire estate of Lew Cody, motion picture star, valued at more than \$100,000, will go to his pretty half-sister, Cecil Cote, 15, shown here in Hollywood where she lives with her mother, Mrs. Lena T. Cote.

### MANY PLAN TO GO TO AMARILLO

AMARILLO.—Derby day at the races in Amarillo next Monday, June 25, will bring together some of the best 3-year-old thoroughbreds in the entire Southwest. American Red, a horse that was once considered for the Kentucky Derby this spring, will head the list of great horses entered in this event. American Red will soon go to the major tracks where he is expected to hold his own with most of the present crop of colts.

### THE FORECAST

WEST TEXAS: Generally fair except probably showers in Panhandle tonight and Wednesday.

### LEGISLATION OF MAJOR IMPORT IS AMONG LAST ACTS

#### Filibuster Is Broken; President May Veto Bill

WASHINGTON, June 19. (U.P.)—The seventy-third congress which enacted President Roosevelt's new deal went home today. The body adjourned at 11:45 last night after the senate approved the farm mortgage bill, adopted the deficiency bill conference report, broke the filibuster against the railway labor act and approved the housing bill. It was believed President Roosevelt will veto the farm bill which would grant a virtual moratorium on indebtedness of insolvent farmers.

#### Child Drowns in Fish Pond Sunday

BIG SPRING.—James Patrick Rainbolt, 1-year-7-months-old son of Mr. and Mrs. M. Rainbolt, was found drowned in a fish pond in the back yard of his parents home, 1211 Wood street, Sunday afternoon at 6 o'clock by the housekeeper.

### Late News

COLEMAN, June 19. (U.P.)—John Newton of Chickasha, Okla., faces fifteen years for participation in the \$23,700 holdup of the First National Bank in Oklahoma City yesterday. Two associate bandits had not been arrested today.

AUSTIN, June 19. (U.P.)—The executive and advisory committee of the Texas Petroleum Council will plan extensive support of the federal and state efforts to halt the 100,000 barrel flow of hot oil from Texas, in a meeting at Houston June 21, it was announced today.

HOUSTON, June 19. (U.P.)—A strike for higher wages was launched today by 150 union employees of Armour and Swift packing plants. The strike was called when companies refused to participate in a contract conference, union officials said.

RIO GRANDE CITY, June 19. (U.P.)—Private I. L. Schuff quarreled with his wife after he was relieved of guard post duty at Fort Ringgold, where his wife and he were shot to death, it was testified today.

DENVER, June 19. (U.P.)—Representatives of 12 states, including Texas, conferred here today to inaugurate the government's drought relief cattle buying program. The \$100,000,000 worth of cattle and to ship those which the present owners cannot care for.

AUSTIN, June 19. (U.P.)—Railroad Commissioner E. O. Thompson announced today that Gordon Griffith, commission petroleum engineer, will succeed William Knobe as chief petroleum engineer.

Knobe resigned to open a professional office at Corpus Christi.

### They're Named America's Ten Most Beautiful

With only two film actresses among them, these 10 women have been named the most beautiful in the United States by a committee of judges, from nominations made by prominent artists and photographers in the top dozen large cities. In the top row, left, Mrs. John H. Goodwin, Kansas City, Mo., with daughter Ann; circle, Norma Shearer, Hollywood screen star; top center, Mrs. Florence H. Plamondon, St. Louis; top right, Dolores del Rio, Hollywood cinema star. Below, left to right, are Mrs. Potter Palmer, Boston, Mass.; Miss Avery Wright, Toledo, O.; Princess Anna Ilynski, formerly Audrey Emery, wife of Grand Duke Dmitri of Russia; Mrs. George Grant Mason, New York; Mrs. Constant Blicke, Los Angeles; and Miss Honore White, Chicago.

### BALL PARK DEDICATION FRIDAY

#### SEN. CONNALLY, LATE TO CAMPAIGN, CALLS ON MIDLAND FRIENDS TO AID

Senator Tom Connally, recognized as one of the most powerful men in Washington and a special friend and honored counselor of President Roosevelt, is hopeful that Midland friends will assist him in his campaign, as he had to remain in Washington so late he will have a difficult time covering the entire state.

Midland friends point out that he has been of direct aid to Midland and West Texas in working to get the country in the drought relief area; in assisting in every movement made in behalf of the cattle industry and in a number of other ways working in interest of matters of great importance to Midland county farmers, stockmen, oil men and business men.

Some of his legislative accomplishments are set forth as follows:

First senator to advocate reduction of the gold content of the dollar. The reduction of the gold content of the dollar is the basis of the new monetary policy and a keystone in the entire structure of the Roosevelt recovery program.

Advocate of guaranteeing principal and interest of Home Owners' Loan corporation bonds. Approved by congress after recommendation by President Roosevelt in March, 1934.

Vigorous and successful opponent of all attempts to wreck Texas' community property laws by federal tax bills in proposing joint income tax returns.

Led successful fight for import tax on oil in 1932 revenue bill. Designed to stem the flow of foreign oil and protect American producers and land owners.

Author of amendment adopted by the finance committee and incorporated in the 1934 revenue act placing an excise tax upon foreign animal and vegetable oils and fats. Helped all producers of cotton-seed and oils and fats.

Co-author of the Jones-Connally Cattle Relief act, placing cattle as a basic commodity under the provisions of the agricultural adjustment act and allotting \$250,000,000 in benefits to the producers.

Author, in the senate, of the American legion bill permitting coinage of memorial half dollars for Texas Centennial.

Author of the "hot-oil" amendment, designed to help the states enforce their conservation laws and protect the land owners and law-abiding oil producers.

Author of complete schedule of income tax rates in the Revenue act of 1932. These rates sought to equalize the tax burden, and increased the rate of tax upon the biggest incomes.

Author of amendment to Tariff act of 1930, increasing duty upon cattle to protect livestock raisers against competition of cheaply-produced foreign cattle.

Author of amendment adopted by senate finance committee in the public works law apportioning federal aid road funds, in part, upon a mileage basis. Resulted in Texas' getting \$1,500,000 additional road aid.

Proposed at Haskell, Texas, drought conference in 1929, crop production loans and continued activity in behalf of this kind of relief at the next session of congress. Adopted by congress in 1930.

Author of amendment adopted by senate, January 12, 1932, directing and bank directors to consider pleas for extensions on the merits of each application and not upon general conditions only.

Author of amendment to independent offices appropriation bill in 1933 limiting reductions in compensation and pensions to World War veterans (service-connected cases) and to Spanish war veterans and widows to 25 per cent. This amendment, which was adopted when Vice-President Garner broke the tie and voted for it, proved the basis for the compromise agreement which was later reached between the house and senate, liberalizing compensation to disabled veterans.

Senator Connally voted for: Farm oil relief act, including farm mortgage relief plan and inflation amendment; repeal resolution, submitting a vote of the people; some loan bank act; gold dollar devaluation; guaranty of bank deposits; to sustain President Roosevelt's veto of independent offices appropriation bill; act granting direct relief; Muscle Shoals act; cattle relief act; and other measures.

Aggressive and militant supporter of the Roosevelt Democratic administration.

Tom Connally was born in McLennan county, Texas, Aug. 19, 1877. He attended the public school at Eddy, a small farming village and graduated at Baylor university and took his law degree from the University of Texas. He practiced law in Waco and Marlin prior to being elected to congress.

### ADJACENT BUILDINGS DAMAGED; FIREMEN BATTLE EFFECTIVELY

An early afternoon fire that started in the Ever-Ready Auto Service shortly before 2 o'clock this afternoon made for the gravest property loss threat here in the past few years, and one of the greatest since the local era of fireproof construction.

### JUNE 'TEENTH IS OBSERVED

Texas negroes, observing the Emancipation proclamation of 1863, are nearly six months behind on their "June 'teenth" rites.

It was on Jan. 1 that President Lincoln signed the proclamation, a Midland negro explained, but commemoration in the old South was not what it is today, and information of their freedom did not reach Texas slaves until June 19, being brought by General Granger, who steamed to Galveston on a gunboat from the Hampton navy yards.

The Midland program includes a barbecue held at the home of Eugene Franklin, a baseball game with Roswell, N. M., and a dancing dance. The baseball club has won 12 and lost only two games this season, and has played all the strong clubs that could be matched.

### Boy Fatally Hurt On Oil Lease Sun.

BIG SPRING.—Carl Flint Jr., 8-year-old son of Mr. and Mrs. Carl E. Flint Sr., residing on the Plymouth lease, south of Big Spring, was killed instantly Sunday evening about 8 o'clock while he was standing near an oil well, which was being slushed. It was reported a rope slipped from a guide and hit young Flint on the head, causing instant death.

His parents left this morning at 8 o'clock for Santa Anna, where funeral services were to be held this afternoon at 2:30 o'clock at the Presbyterian church.

### Kimbrough Mgr. For McDonald

Duke Kimbrough, Midland attorney, has been named Midland county campaign manager for C. C. McDonald, candidate for governor. Kimbrough was also asked by John Howard of El Paso, McDonald's western district manager, to assist him in the eastern end of the district and the Midland lawyer is now working on additional county appointments.

Kimbrough has written McDonald's state headquarters asking that the Wichita Falls candidate come here to make an address and also to speak in Big Spring.

### Scarboroughs off For N. M. Vacation

The W. F. Scarborough family left Tuesday morning for Ruidoso to spend part of the summer at their lodge there. Scarborough will join his family within a few days.

Dr. Lee Scarborough, president of the Southwestern Baptist Theological seminary at Fort Worth will be his brother's guest at the New Mexico resort until July 17, when he will sail for Berlin to attend the Baptist World Alliance of which he is a director.

### Popular Student Visiting Midland

One of the most popular high school students ever to be graduated from the Big Spring high school, Miss Dorothy Dublin, is visiting her grandmother, Mrs. J. R. Dublin of Midland.

Miss Dublin made an enviable record in school, her average for 11 years being A plus. She was president of "so many school organizations she cannot keep account of them," a recent issue of The Wheel, Big Spring high school publication, says.

"She has been yell leader for the past three years, editor of The Wheel, president of the freshmen class, secretary of the senior class, elected the most popular sophomore in 1932, received the Cushing medal for citizenship, and, this year, was elected the Best All Around girl."

She was salutatorian for this year's graduating class of 108. She hopes to become a journalist, and may attend TCU next school year.

There is a spirit in the air today among fans, business men, society leaders among the women as well as men, and the people in general to stop everything for two hours Friday afternoon and go to the ball game.

### EVERY-READY WILL CONTINUE SERVICE

Patrons of the Ever-Ready Auto Service will be adequately served at the three Magnolia stations here, it was announced at press time by Rufus Parks, manager, and Jerry Phillips, Magnolia Petroleum company representative, both in the employ of Fred Wemple.

The stations are Magnolia 666, phone 390, located at 703 West Wall street; Magnolia 478, phone 141, Wall and Front streets, and Paul Smith's Petroleum Service station, phone 233, across the street west of the Petroleum building.

Phillips and Parks publicly expressed thanks and praise for the heroic work of the fire department and other volunteers who aided in extinguishing the blaze.

### 800 ATTEND FEED FOR STANOLIND CO.

Stanolind Oil company employees were guests of the E. L. Farmer Trucking company and the Noble Drilling company at a barbecue at Odessa Monday night.

About 800 employees of Stanolind from Midland, Odessa, Wink and other areas, and friends attended the barbecue, which was given at the home of Farmer, Earl Ray, Midland barbequer, had charge of the dinner.

The regular monthly safety meeting was held by Stanolind workmen preceding the barbecue.

### Pecos Boy Breaks Neck While Diving

PECOS, June 19.—Physicians held no hope Monday for the recovery of William Buddy Propp, 18, Pecos baker, who suffered a broken neck in a dive from a bridge over the Pecos river near Odessa. Those establishments affected included the West Texas Office Supply, George Friday's Boot shop, the Midland Petroleum company, Keadle shop, W. E. Wallace of the North Lawn building vacated yesterday by the Self-Serve grocery and the big Texan club, an upstairs location. All establishments on the adjacent Liano hotel alley were choked with smoke, which made fire fighting extremely difficult.

### Big Spring Crowd Hears Woodward

BIG SPRING.—Walter Woodward launched his West Texas campaign before a throng of Howard county citizens Monday night by calling for support of the best qualified man for office of attorney general of Texas.

During the next four years the attorney general will be called to decide intricate legal questions involving the very foundation of our state government, he said.

Woodward said he supported the present oil and gas conservation laws, and if elected attorney general he would see that they were enforced. Woodward pointed out he has served on principal state senate committees, is the author of many laws passed during his 10 years in the upper house at Austin and has had 25 years of active law practice.

### Hot Sun Is Blamed For Mental Lapse

BIG SPRING.—Frank B. Maguire, Louisville, Ky., wall paper salesman Monday blamed a scorching sun for a mental lapse which resulted in his being held in custody here by city police.

He said he suffered a sun stroke while crossing the Texas desert country in a transcontinental bus. Growing increasingly worried over the nonsensical rantings of Maguire, the driver had him taken into custody here by city police.

Monday morning, after his wife had been notified and left for Big Spring to obtain his custody, Maguire apparently recovered.

"It seemed like a dream," he told police. He had written a manuscript of unrelated questions while suffering from the stroke.

### WEMPLE'S FIRST WORDS: 'WAS ANYONE INJURED?'

Reached by long distance telephone by Dr. W. E. Ryan and by F. Paul Barton, at Blossom, Fred Wemple, owner of the Ever-Ready Auto Service, first asked: "Was anyone injured?" Assured none was hurt, he said: "I am certain." (See FIRE, page 6)

MOTHERS MAY WELL BE PROUD OF THEIR TASKS

The old folks, particularly the mothers, can get quite a bit of satisfaction out of the report, just released at the convention of the American Medical Association in Cleveland, that the breast-fed baby has ten times more chance for life than one brought up on artificial feeding; that it has 50 per cent greater resistance to all forms of disease.

Such satisfaction would lie the in knowledge that here, at last, science recognizes a fact that had been known to mothers long before infant feeding was put on anything like a scientific basis.

The report of the physicians was the result of a survey among 20,000 children in Chicago, from 1924 to 1929. Nearly 50 per cent of these were breast-fed; a little more than 40 per cent were partially breast-fed, and the rest were on an entirely artificial diet.

It was discovered, as the children became subject to various types of illnesses, that the proportion of those affected rose as their tendency toward artificial feeding went up. And so did deaths among the infants.

And the report of this interesting study concludes: "Obviously, therefore, if we hope to decrease further the infant mortality of this country, it must be done by encouraging breast feeding."

What a glorious tribute to old-fashioned motherhood! The motherhood that took its duties seriously and that paid its obligations to infancy as Nature intended it should!

There was a short time, during the last decade or two, when there seemed to be a fad for artificial feeding; when young mothers sought every which way to avoid the burdens of breast feeding, at least partially; when to feed a child at the breast seemed to be a sign of Victorianism.

Fortunately, however, this mode is passing and the doctors are encouraging mothers to recognize their natural relationship to their children.

Artificial feeding, to be sure, will be necessary in many cases where mothers are not in position to furnish the necessary food for their babies.

But, at any rate, it should be resorted to only when the doctor prescribes it.

A scientist urges a "scientific approach to politics." But in the meantime the politicians would get elected.

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.)

ocrats got away with the New Deal, are asking now for a Square Deal.

To my way of thinking, they are getting it.

A local farmer remarked that during this dry weather the story of the flood is the hardest part of the scriptures to believe.

Horses used to run away and hit a pedestrian. Now a motorist hits a pedestrian and runs away.

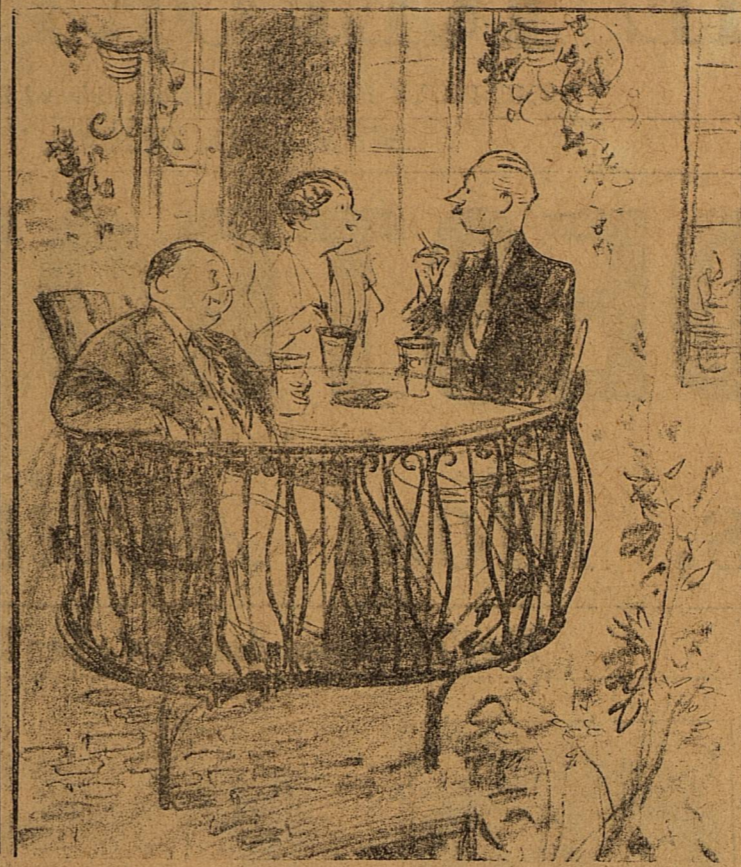

Another local farmer got bit by his mule the other day and now he's expecting his dog to kick him any time.

California grows 85 per cent of the lemons consumed in North America—and that doesn't include any of the Hollywood variety.

Grover Cleveland Bergdoll, notorious draft dodger, wants to return to the United States. There's positive proof that Germany is

Side Glances . . . . . by Clark

"Instead of going to the country this summer, we're going to spend our vacation right out here."

3-PLACE JOBS NUMEROUS

Three-seated airplanes are more numerous among civil aircraft in the United States than craft of any other capacity according to an announcement today by Eugene L. Vidal, director of aeronautics, department of commerce license and identification records show that three-seated types occupy second place in this respect.

On June 1 there were 3,873 three-place, 2,445 two-place, 816 four-place and 700 one-place airplanes. Totals in the groups representing larger capacities were smaller. There were 44 airplanes capable of carrying 16 or more persons, including crew.

These facts appear in a study made by the aeronautics branch of the age, weight, number of engines, horsepower and seating capacity of aircraft which its records show as bearing licenses or identification numbers as of June 1, 1934.

Single-engine airplanes outnumbered multi-engine craft 8-451 to 309. However, multi-engine designs lead in proportion license, for nearly all of them hold Department of Commerce licenses.

About one-fourth of the single-engine airplanes have been assigned identification numbers only, the remaining three-fourths bearing licenses.

Of the aircraft in service June 1, the majority were manufactured in 1929, 1930 and 1931. Aircraft manufactured in 1929, totaling 2,538, comprise the largest group. Aircraft in civil use as of the date of the survey and manufactured in 1930 numbered 576. This does not represent total production, however, since it does not include airplanes delivered to the army or navy or exporter. About 200 of the airplanes were found to have been manufactured in 1926 or prior

shortly. More than 4,000 airplanes were found to be powered with engines of 90 horsepower and under.

BIRDS, WEATHER PROPHETS

MILWAUKEE. (U.P.)—Peacocks at the Washington Park zoo have proven to be reliable weather prophets. On dry days the birds seldom utter a sound, but as humidity increases and rain is in the offing, they start to cry. As a storm becomes more imminent the cries become louder and more frequent. Usually by the time the storm breaks, the peacock section is a virtual bedlam.

N. Y.-CHICAGO COMMUTER

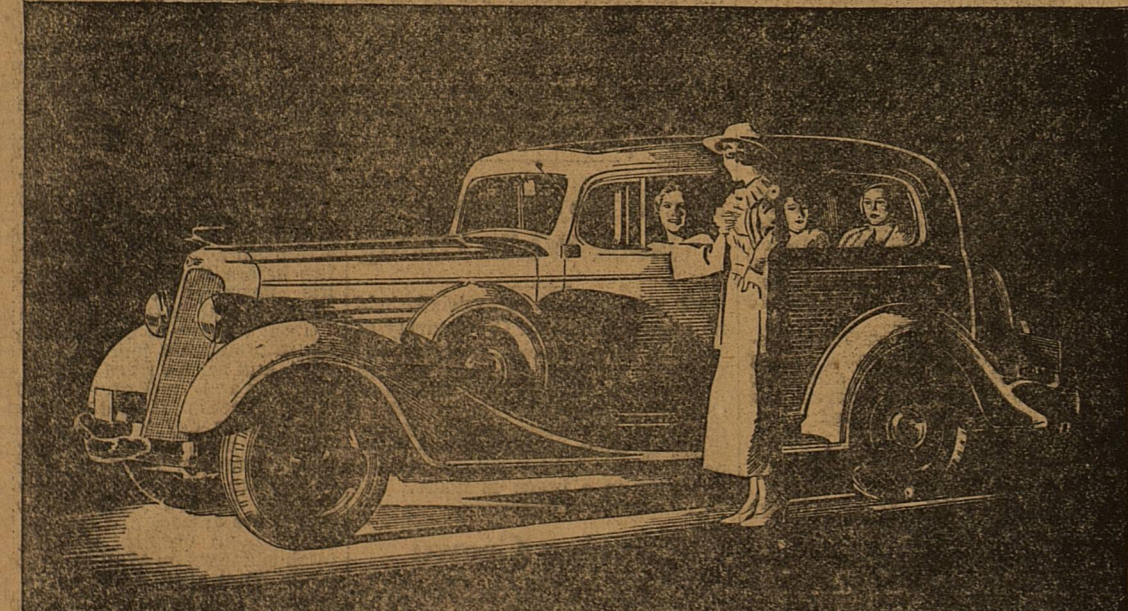

CHICAGO. (U.P.)—The New York-Chicago airway is the world's busiest sky route. United Airlines, which has just started the innovation of commuters' service with hourly planes, is flying every 24 hours a distance equivalent to one and one-half round-the-world flights. There are 16 planes in each direction every day.

ATE FISHHOOK WITH BREAD

CHICOPEE, Mass. (U.P.)—Walter Pasco bought six fishhooks and then went home to eat. He put the fishhooks on the table. While eating, he noticed suddenly that there were only five fishhooks. He realized he had swallowed one with a piece of bread. He choked, coughed. A doctor came, took him to a hospital and removed the hook.

A mirage is due to the unequal heating of the different parts of the atmosphere, which bends the light rays, and so produces distorted images.

THE NEWEST BUICK [A STRAIGHT EIGHT]

Here's Your Buick at the Price You Can Pay

\$795\*

\*Series 40—\$795 to \$925. Series 50—\$1110 to \$1230. Series 60—\$1375 to \$1675. Series 90—\$1875 to \$2175. List prices at Flint, Mich. All prices subject to change without notice. Illustrated above is model 48, \$865, at Flint. Special equipment extra. Duo fenders at no extra charge.

93 Horse Power— 85 miles per hour— 15 miles per gallon!

Those who bought quick when Buick announced its amazingly low list price of \$795 are delighted. They find that this new Buick is indeed a Buick through and through—with Buick quality, dependability, performance and economy raised to new high levels. They are enjoying the magnificent performance of Buick's Valve-in-Head Straight Eight engine, and the solid feel of Buick in action. which they light. Although the danger from this source has been exaggerated, perhaps, there is enough danger that every breeding place of flies, and other insects as far as possible, be destroyed, and that there should be proper screening on all houses.

**Typhoid Carriers**—One of the important modes of transmission of this disease is by means of the human carriers. Examinations of convalescent typhoid cases show that 1 per cent continue to pass typhoid bacilli for years, perhaps for life. In numerous cases they are found to pass the bacilli for several weeks or months after convalescence. Some of the bacilli carriers do not know either that they had typhoid fever or were in contact with it. These cases may be called "healthy or normal carriers" in comparison to "convalescent carriers." A large epidemic was recently traced to a dairy farm looked after by a typhoid carrier who had typhoid 47 years previously.

We think of the chances such cases have to spread infection as they pass from place to place, we begin to realize how epidemics can start without apparent cause. Convalescents should not be allowed to visit places where contamination of the water supply is possible, without at least warning them of the necessity of great care in disinfecting their own feces and urine for some weeks. It would also seem important to warn every food handler of the possibility that he may be a carrier of the infection, especially if he has ever had the disease.

## Helpful Health Suggestions

**EDITOR'S NOTE:** Material in this article was taken from "Practice of Medicine," by Stevens, and "Public Health and Hygiene," by Parks.

The Typhoid Carrier and Other Modes of Transmission.  
Water—Although it is now known that the typhoid bacilli do not multiply in water, the majority of large epidemics may be traced to the use of drinking water contaminated by the bacilli. After heavy rains and floods water reservoirs may become polluted from infected privies, cesspools, or the subsoil. The bacilli do not remain alive in the water more than seven days, and die more rapidly in the

warm water of summer than in the cold water of winter. This is probably the reason we have more water borne epidemics in the spring, winter and fall.

Improvement in the water supply of a community is almost invariably followed by a marked decrease in the general incidence of typhoid fever. In Philadelphia the mortality fell off 80 per cent almost at once upon the installation of a filtration system.

Food and Flies.—Milk, originally pure, is often contaminated on its way to the consumer. Ice cream and butter have been known to carry infection. Pasteurization of milk and milk products have no doubt had a great deal to do with the lowering of the incidence of the disease in cities.

Foods that are eaten raw sometimes convey the disease. Raw oysters, clams, mussels, and other shell fish grown in polluted waters, or contaminated by infected hands, flies, etc., have been the source of several small epidemics in this country. Such vegetables as celery, lettuce, and radishes, which may be grown on land fertilized with contaminated soil may become the means of transmitting the disease. Also fruits and vegetables handled by a typhoid carrier may become contaminated. Epidemics have been traced to these sources.

Flies and other insects, acting as mechanical carriers of the bacilli may undoubtedly convey infection from exposed typhoid discharges to food and the surfaces of things upon

# The clean Center Leaves are the mildest leaves

## They Taste Better!

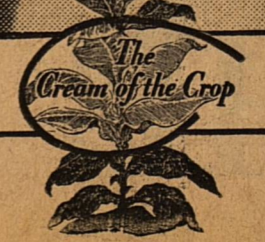

Wherever the finest tobaccos grow—in our own Southland, in Turkey, in Greece—all over the world, we gather the very Cream of the tobacco Crops for Lucky Strike. And that means only the clean center leaves. The center leaves are the mildest leaves—they cost more—they taste better. These clean center leaves are the only ones used in making Luckies. Then "It's toasted"—for throat protection. And every Lucky is fully packed with these choice tobaccos—made round and firm, free from loose ends—that's why Luckies "keep in condition"—why you'll find that Luckies do not dry out—an important point to every smoker. Naturally, Luckies are always in all-ways kind to your throat.

**The next time a dealer urges you to buy an unknown substitute product for an advertised brand and he tells you . . .**

**“Yes m’am, it’s just as good and cheaper”**

**● ask him this Question ● ●**

**“How much more profit do you make on this item over the advertised brand?”**

If he tells you no additional profit, then ask him how many free cans, bottles, or whatever it happens to be, he receives with every order. If he will tell the truth, you will find that he either makes a much greater profit on the substitute, unadvertised product or he receives many free cans with every order, which is just a round-about way of increasing his profit. He has to make more money in one way or another, because he must spend his own time in creating for the product a demand that does not exist. The first question a dependable dealer asks when offered a new product is, “Do you plan to tell my customers about your product by advertising?” He knows that to sell his goods profitably there must be a consumer demand larger than he could create himself.

People who endeavor to substitute unadvertised brands argue that they can sell their goods cheaper because no money is spent in advertising. The principle of mass production refutes this argument. High quality at today’s low cost is possible only by mass production. Mass production is possible only by advertising. The cost of good advertising is extremely low. Take, for instance, a well-known brand of soap. It sells for \$0.07 and to advertise it costs \$0.002 (one-fifth of 1c). Since advertising adds so little to the cost, could unadvertised brands sell so cheaply unless the quality was cheap, too? Save yourself money by refusing unknown substitutes. Insist upon *known* brands of *known* quality.

# THRILLING 4-3 WIN TABBED BY SCRUGGS OVER SOUTHERN ICE

## SENSATIONAL STOP AND THROW IS ONLY FACTOR PREVENTING A TIE IN LAST PLAY; HOKUS CLUB A WINNER

Scruggs advanced along the beaten path last night with a thrilling 4-3 win over Southern Ice.

Hokus Pokus, save for one bad inning, had a comparatively easy time keeping Midland Auto Supply men off the paths, but its hitters could get to Lewellen only in spots. The score was 8-4.

For a time, in fact right up toward the last, it seemed the Plymouth-Chrysler lids would win by a 1-0 score. Straighan, slender as a twig having hit one a country mile for four bases and having let no Icer get his feet planted on the initial sack. A couple of Icers er-

rors took the game out of the perfect rating, however, and the Ice-men came up in the last frame of the last inning with no runs balanced against the four held by the Scruggsmen.

Then matters developed swiftly. The Ice-men, coupling hits and passes, got the bases loaded by the time two were down and Bill Howard, glittering in the cleanup role, cleaned the sacks with a hard drive to right center. Bob Scruggs could not field the ball, but gave it a Big Lee kick with his hook and Sam Warren, playing right field, came in like a hawk to cover up, grabbed the ball and made a quick throw to third to catch Howard.

It was a honey of an inning—and one of those dramatic finishes the crowd keeps hoping to see. Few games over the past three or four seasons would stand comparison.

Hokus Pokus, the club that has "one bad inning," played shut-out ball behind Slim Newton for several innings, only to go haywire and let four runs trickle in during one frame. It started with three consecutive errors by the first baseman, then Lewellen, pitching ace for the Supply club cleaned the sacks when an outfielder stumbled and fell while going after the ball. Jones and Newton led the hitters of the evening, getting two blows out of three trips.

The box scores:

Scruggs

Byron, 2	3	0	0	0

## Home Brewed

BY R. C. HANKINS

This might properly be called the revenge of Sam Warren.

A few nights ago the Hokus Pokus manager played the Southern Ice team. Hurstel Howard, Icer manager, would not agree to Warren's playing of Loyd Burris when Hokus Pokus had to pick up a man or two to complete his roster.

Southern Ice won by a narrow margin. Sam vowed revenge.

Last night he got it by playing with the league-leading Scruggs Motors club.

It was the last half of the seventh inning. The Icers were at bat. Not an Icer had even remotely looked like a scoring threat. Both outfielders and infielders, for that matter, had been playing heads-up ball, but Warren's long runs in right field had snared several hard Icer tries. Scruggs' team was four runs up.

And then things started happening. Straighan, Scruggs hurler, grew wild and started passing batsmen. Hits were scattered here and there and, by the time two were down, every base was populated. Bill Howard, cleanup man, was at bat. He took a fabulous swing or two and then gave one a ride that looked like a certain home run. Scruggs couldn't get to it cleanly in center field. Warren, playing over toward the foul line in right, tried to cut at the ball. He was raced over to back up Scruggs. The ball hit Scruggs' foot, came into the air and Warren swooped down on it just as Howard was well started down to third. Warren cut loose with a perfect peg that caught Howard on third—and the game was over. Southern Ice had lost where, by all percentages, it should have won. Warren grinned and home and slept better than he had for weeks.

Incidentally, Warren had just played such a game to help his own club win over Midland Auto Supply, bringing his club to a third place tie with the Icers.

Incidentally, Warren had just played such a game to help his own club win over Midland Auto Supply, bringing his club to a third place tie with the Icers.

**Personals**

Mr. and Mrs. Claude O. Crans and children have returned from a vacation spent at Ruidoso.

Dr. Tom C. Bobo is back from a business trip to Fort Worth.

Miss Martha Louise Robertson of Big Spring was in Midland today. Miss Robertson and her mother, Mrs. W. A. Robertson, will leave this afternoon for Cleveland, where she will be dancing at Asmott-Phisker for several weeks. She will return to her home July 25 and will organize her dancing classes

Miss Margaret Moody of Fort

## "I Like It That Way" Brings Fun, Music to Yucca

The three branches of motion pictures, comedy, drama, and music have been skillfully combined and blended to make entertainment in Universal's new screen production, "I Like It That Way," at the Yucca theatre Wednesday only.

The story of a high pressure insurance salesman who tries to sell love on the installment plan is one of the most amusing plots seen on the screen in many a month.

Particularly noteworthy in this production is the unique photography and trick camera angles directed Harry Lachman has incorporated in the story. Much attention was given to the production numbers which show a bevy of beautiful girls whose rhythmic movements are a bright spot of the picture.

Max Scheck staged the dances. Conrad Goidler and Mitchell, famed New York song-writing team, provided the picture with such songs as "I Like It That Way" and "Miss 1934," sung by Gloria Stuart in the glittering DeWittville club atmosphere, and "Let's Put Two and Two Together," introduced by Sidney Grey at a whoope party in her apartment.

Gloria Stuart and Roger Pryor head an exceptional cast which includes Marian Marsh, Lucille Gleason, Shirley Grey, Noel Madison, Merna Kennedy and 24 dancing girls.

## Bonnie and Clyde Picture, Geo. Raft At Ritz Theatre

A short feature depicting the Clyde Barrow and Bonnie Parker killing and showing a reenactment of the lives of the two desperadoes, will be shown at the Ritz theatre today and tomorrow.

The short, put out by the Jamieson Film company of Houston, was made at the scene of the killing and shows full all connected events, with intimate interviews with their crime pals and the officers and rangers who ended their career.

This subject in two reels, about 20 minutes in length and will be shown today in connection with George Raft in "The Trumpet Blows," with Adolphe Menjou and Frances Drake. Tomorrow the feature is being changed, showing Richard Barthelmess and Jean Muir in "A Modern Hero," giving those who have seen "The Trumpet Blows," and want to see the Barrow-Parker film a chance to see it Wednesday with the feature picture, here Aug. 4 or 5.

Elliot Cowden made a business trip to Odessa Monday.

Clyde Thomas of Big Spring was a business visitor here Monday.

Dr. D. W. Ellis visited at Odessa Monday afternoon.

Paul A. Carter is here from Dallas on a business trip.

H. J. Hawley of Dallas is here transacting business.

Ed. W. Owens, geologist for the Wentz Oil company, who covers this territory by airplane, is here from San Antonio on a business mission.

Miss Margaret Moody of Fort

## Fire--

(Continued from page 1)

tainly glad to know it; we can take care of the rest."

He said he would return to Midland Wednesday, and intimated he would begin construction soon on another station.

## CHARGE ACCOUNT RECORDS SAVED

In spite of the quick spread of the flames, charge account records of the Ever-Ready Auto Service were saved, station attendants rushing into the office and bearing them out before the fire engulfed the south side of the building.

Workmen instrumental in saving those and other records were Arch Ponder, Homer Surratt, Jerry Phillips and Havel Landrum, the the only ones on duty at the time.

## MRS. VAN HUSS TURNS IN ALARM

Mrs. Bill Van Huss turned in this afternoon's fire alarm.

She was at work in the old Self-Serve grocery location, into which Van Huss had moved a tumbler and some lumber for converting the building into a tailor shop.

She smelled smoke, but thought it was from a cigarette. A moment later she was informed by someone on the street the Ever-Ready Auto Service was afire, and she telephoned the fire department.

The station was almost a snafu of flame even then.

Van Huss was able to get all his furnishings out of the building before water from the fire hose inundated his establishment.

Stockton is visiting her sister, Miss Jessie Moody.

I. D. Parmley is here from Houston on a business trip.

## Self-Serve Store At New Location

Removal of A. W. Stanley's Self-Serve grocery to the former Texas Music company location, on south Main street, was announced this morning. The music store and Conner Electric moved across the street adjacent to the Umberson cafe.

Bill Van Huss plans to move soon his C. George Cleaners business into the Loraine street building vacated by Stanley.

## Ball Park--

(Continued from page 1)

## OILERS CINCH 1ST HALF FLAG CHASE

ODESSA, June 19.—Odessa's Oilers cinched first place in the first half of the Permian Basin league season here Sunday by defeating the Wink Wildcats 13 to 3.

Rip Hanson, who allowed Wink only five hits and one walk in the first seven innings, retired from the game in the last half of the seventh when he injured his bad foot. An injury earlier in the season had kept him out of the game for several weeks.

## Sen. Connally--

(Continued from Page 1)

He served as sergeant major in the second regiment of Texas Vol unteer infantry in the Spanish American war. He was in the Texas legislature from 1901 to 1904 and was prosecuting attorney of Falls county from 1906 to 1910. He was a congressman from 1916 to '18 when he left the house to join the army. He served as captain and adjutant of the 22nd infantry brigade, 11th division in the World

war. After the Armistice he returned to congress, to which he was regularly re-elected until 1928 when he was elected U. S. senator from Texas.

Senator Connally is chairman of the committee on public buildings and grounds and a member of the powerful finance committee, foreign relations committee, and privileges and elections committee.

## SHORT 10 CENTS IN PAY

CARROLLVILLE, Wis. (UP)—Joseph Subjak, former truck driver on a OWA project, was surprised recently to receive a check for 10 cents through the mail. The check from the government was sent when secretaries checking a payroll sheet found that Subjak had been shorted a dime on his check.
