Gets Prosperous

DEL RIO. (P).—Quemado valley, nestling in purple-clad hills along the Rio Grande, is fast turning into a rich agricultural region under the impetus of irrigation. Its virgin acres are being tilled by 1,100 persons who have come to make their homes in this hitherto undeveloped spot. Less than a year ago only 600 persons resided in the valley.

ago only 600 persons resided in the valley. A giant canal that winds 35 miles through the valley from the Rio Grande finally empties back into its source. The canal joins the border stream 12 miles below Del Rio. Que-mado valley lies 27 miles south of Del Rio along the Rio Grande. About 5,000 acres of the valley are under cultivation but backers of the project estimate that approximately 15,000 acres are tillable. The area under development is nine miles long and averages two and three-quarter miles in width. In the early days the valley was given the name of "quemado," meaning burnt, but present occu-pants consider this a misnomer. Hills topped profusely with color-ful cineso give them a distinctive tint.

which causes the celebrant to see grotesque visions. This religion, about which little has been written, is the so-called "Native American church," and it competes with the orthodox Chris-tian church for the allegiance ot the Indians, few of whom now be-lieve in the ancient religion that was theirs before the white man came. Rites of the Native American church are a curious mixture of certain observances of the Chris-tian churches and rites that have long been practised by Indian tribes in the United States and Mexico. The revelations made by the Senate munitions in vestigating committee have come so rapidly that the average citizen is probably pretty confused. But, in his confusion, he is unquestionably developing a very strong resentment against the men who make vast fortunes out for contributions to the debate as average session of Congress, there should be a strong move for nationalization of the arms traffic, it would hardly be surprising. Just how such program would work out, however, in a world where other nations continue to permit the munitions trade to lie in private hands, is another question. It is possible that negotiations with foreign capitals would have to precede any such step. Tor one thing that the investigation has shown clearly is that the munitions trade is an international affair. It may be that only joint international action can put it under proner metricing.

It may be that only joint international action can put it under proper restrains.
