There are very few people around who dislike cold weather any more than we do. Our thermostat is just set for hot weather and we cannot get winterized but we will be glad to see the first freeze just as soon as it will not hurt the maize.

Even though we dislike cold weather, we will rejoice to see all these heavy, sticky, annoying flies go to wherever flies go to.

We suppose it is the same

We suppose it is the same every year, but it seems this year they have been unusually annoying. It is just one of those little things that helps take your mind off your big troubles.

It is nice to see new business people in town and making an effort to up-date their busi-ness. Mr. and Mrs. Sam Mor-man and Mr. and Mrs. Tom Cordle have recently purchased the old Miller's Cafe here and are giving the place a go-

This unique method of presenting the power of the gos-pel makes it a real pleasure to hear him. Brother Milner, to hear him. 1965 Survey Indicates **Higher Average Speed**

Texas motorists are driving a bit faster than they did last year, the Texas Highway De-partment's 1965 Speed Survey

Jo Larson

the Department's Planning Survey Division to determine traffic needs, was made public

Another report comparing average daytime speeds with average speeds at night was released at the same time. It makes it clear that darkness

does not necessarily bring a slow-up in driving speeds. In Texas, the speed limit for passenger vehicles, pickup trucks and buses is 70 miles an hour during the day and 65 at night. For large trucks the daytime limit is 60 miles an hour and 55 at night.

As in 1964, the data for the Speed Survey was obtained through the use of a radar speed machine.

An effort was made to cam-ouflage the survey operation at each of the 31 locations where the checks were made For this reason, it is believed

that the speeds are indicative of the normal driving habits of Texas motorists.

More than 34,000 vehicles, including passenger cars, trucks and buses, were check-

The survey found 10,2 per cent of the passenger cars exceeding 70 miles an hour. The 1965 survey found only 0.6 per-cent of the buses exceeding 70, compared to 0.4 per cent last year.

The average speed for all vehicles was 58,6 miles an hour. This compares to 56,6 miles an hour in 1964. The average speed for passenger cars was 61,2 miles an hour, compared to 58.8 miles an hour last year.

The average speed for trucks was 53.1 miles an hour, compared to 51.8 in 1964. For buses, the average speed was 63.3 miles an hour, compared to 62.4 in 1965.

For the day and night report, more than 7,800 vehicles were surveyed-5.381 during the

surveyed--5,381 during the day and 2,454 at night at five

locations. Although the average day speed was 59.8 miles an hour, compared to a slight drop to 58.2 at night, 16.5 per cent of the night drivers were exceeding the posted speed lim-it, 65 miles an hour.

John R. Miller left Wednes-day morning for Winfield, Kansas to be at the bedside of his mother, who is critically ill in Newton Hospital there.
