Howard County Junior college came out of its first year of operation only \$1,750 "ahead."

The district's financial state ment, at the end of April showed exactly \$1,749.49 "surplus" of income over expenditures.

This is a very narrow margin, and admittedly too narrow for the college to make any expansion this next year on the same revenues. The "surplus" also does not take into consideration reconversion costs, which have yet to be met by the college.

The HCJC district is proposing to increase its local tax income by getting approval at the polls July 26 for authorization to increase its tax levy from 20 cents to 50 cents on the \$100 valuation.

Trustees do not plan to use the entire 30-cent increase that would State Ad Valorem be authorized; think they probably will meet the college needs on a 40-cent levy.

This would provide something over \$30,000 additional from local tax sources, counting county tax valuations at about the same as the

On a tax roll of approximately \$16 million, and with the 20-cent levy, the college collected during the past year \$31,404.47.

It has coming (but not yet received) \$5,500 in state aid. It also has coming (but not yet collected) about \$19,000 from the Veterans Administration as payment of tuition of GI's who are in

Reuther Says Shortage Of Steel Planned

WASHINGTON July 21. Walter P. Reuther, president of the CIO United Auto Workers, contended today the program of steel corporations is one of "planned scarcity calculated enhance profits and to fortify their monopoly hold over basic industry."

Declaring that the industry is engaging in "big business featherbedding," Reuther said if it "cannot or will not equip itself to produce the steel required for full employment, then the government must be prepared to see that the steel is produced."

In a statement prepared the Senate's small business subcommittee which is investigating the capacity of the industry in relation to probable future demands, the union leader said:

"We shall need 100,000,000 tons of steel for full employment in the United States in 1950. Witnesses from the steel corporations assert that 80,000,000 tons will be enough for the next five or ten

"If (their) plan is carried out it will mean 14,000,000 workers unemployed by 1950. It will mean that 2,000,000 of the 7,000,000 motor vehicles we probable shall want to buy in that year cannot be produced. It will mean that some 200,000 auto workers will be thrown out of their jobs."

WASHINGTON, July 21. (P)-President Truman said today the nation has surged to a pinnacle but must strengthen its defenses against inflation

In a special mid-year economic report to Congress, the Chief Executive declared that production now is running at a rate of \$225,000,000,000 a year far surpassing anything in history, and "We can place the high pro-

duction and the high employment that we have today on a firm foundation of enduring prosperity and peace."

But threaded through a 30,000 word document were four Cscorn, coal, construction and com-

merce overseas-named by Mr Truman as developments which mean that "inflationary problems may become stronger."

Terming price reductions still necessary in many areas, the President said they must not be swamped in a wave of speculative caused by the forecast of a short corn crop or by a wave of new wage and price boosts pegged to John L. Lewis' coal con tract settlement

Mr. Truman said there are as yet "no grounds for real alarm nor for general speculative increases in food prices" arising from the forecast of a corn harvest 20 percent below last year's. But in the event real shortages

Jerusalem Jews

155,000 Now Restricted In Holy Land

JERUSALEM, July 21. (AP) - A dusk-to-dawn curfew was ordered today for 90,000 Jerusalem Jews, bringing to 155,000 the number of Jews under curfew restrictions here, in Haifa and in the Natanya area.

The action followed a new outburst of violence which left three dead and 23 wounded in 48 hours. The British army was ordered to lock in the Jewish quarters here from 7 p. m. to 5 a. m. daily "until further notice."

Some 50,000 Jews in Haifa already were under a similar curfew. About 15,000 at Natanya have been under martial law for a week as a result of the kidnaping of two southeast part of Cross Plains. British army sergeants.

Fear of repercussions for the deportation from Haifa of 4,500 or more uncertified Jewish refugees were expressed in official quarters. hours included a British policeman ambushed in Haifa Saturday night. a British soldier blasted to death near Natanya Sunday afternoon, and a Jewish civilian wounded while participating in an attack early today on the Stella Maris army signals camp near Haifa. An official government announcement said two British soldiers and laste Saturday. one British policeman and an Arab civilian were seriously injured dur-

ing the two-day period. The outburst of violence-climaxed by an attack on a British army division headquarters-came within a few hours after a special United Nations investigation com-

mittee left the country. During the height of last night's disorders Jerusalem was lit up with the blaze of tracer bullets and parachute flares.

Republic Head Urges UN To Consider Issue

BATAVIA, Java., July 21. (AP) - President Soekarno said by radio tonight the Dutch were attacking his Indonesian Republic by land, air and sea. He appealed to the world to force the United Nations security council to take

up the issue. A Dutch communique said Dutch warplanes had attacked Republican airfields in Java and Sumatra because Indonesian fighter planes were ready for action.

The Dutch, declaring they would not attack either the civil population or non-military objectives, were attempting to immobilize harassing anti-aircraft guns at the field and the Republican air force, believed to number about 40 obsolescent Japanese planes, many in

poor repair. The Republican radio, over which Soekarno appealed, said Dutch artillery had opened fire south of Bandoeng, 100 miles southeast of Batavia. The report said two Dutch planes using rockets attacked Tasik Malaya, in West Java, and that other Dutch aircraft had strafed a Soerakarta-

Sraden railway train. The United States and Great Britain made an offer to their 'good offices" to try to effect a settlement.

The Dutch government said it was using its armed forces reluctantly to establish conditions 'more favorable" to the implementation of the Cheribon Independ-

ence agreement. The Dutch foreign office, in memoranda handed to U.S. and British ambassadors, said the Soekarno government was "totalitarian in inspiration," kept hostages and lacked full support of the is-

land people. Gen. Soedirman, Indonesian commander, spoke after Soekarno and said his side still hoped for a peaceful settlement, but that he had ordered the nationalist army (of about 200,000 troops) to counterattack every time the Dutch struck at them.

Indonesian broadcasts and other sources said the finely equipped Dutch army of about 120,000 men, using mostly U. S. lend lease and 69-year-old man was charged with slav border, and that in each case surplus military equipment, was they withdrew after battle to Yugo- striking simultaneously at numerous points.

> victory by scoring six unearned Saturday night. runs in a nightmarish seventh ina scratch single.

Rodriquez Mounts Rubber Tonight

Gerry Rodriquez will go hillward tonight in quest of his seventh pitching victory when Big Spring squares off with the Midland Indians in the rubber game of the three-bout set. Game time is 8:15 o'clock, scene of action Steer park.

Rodriquez's foe could be any one of three men-Ozzie Kolwe. Lefty Grove or Weldon Stewart. A banner turnout is expected. The series had already drawn more than 2,000 paid admissions. Tuesday night, when Odessa's Oilers move in for an abbreviated series, will be Ladies night.

caught Melillo flat-footed off first -so deceptive that his own team mates were asleep at the switch. Leamon Bostick accepted the ball but Gaspar Del Toro, who should have been in on the rundown, was not immediately aware of what was going on. He hesitated to

Henceforth, the Speaker of the House becomes the third man in the line of succession to the White House. Today, with Harry Truman elevated from the vicepresidency to the White House, that means that Joseph Martin, who presides over the House, would become president in event the President became incapable of serving.

Mr. Martin, of course, is a Republican, but the nation could have lots of far more inferior talent than those possessed by the Speaker. He could make a good president, but that is besides the point.

Proponents of the change, which must be accepted in the real spirit of democratic rule, point out that this puts in line a man who was elected to his position by popular vote. But what they neglect to say is that it was a popular vote from one of more than 300 congressional districts. It is possible that such a district might not include all or even one large city. Moreover, the issues in district races are often local, and it is not infrequent that personalities constitute the real issue.

Against this, the previous line of succession placed the Secretary of State next to the vice-president. The Secretary, therefore, was invariably a figure of national importance and, as a general rule, one with ability without great consideration to politics. During our history, their calibre has, with some exceptions, been somewhat higher than that of the Speaker of the House. Perhaps, and we are sure everyone hopes, there will never be need to test the new line of succession.

Cosden--Our Important Citizen

The occasion for the annual stockholders meeting of Cosden Petroleum corporation here today should be an occasion for reminding Big Spring of the important role of Cosden in the community.

It goes without saying that Cosden through its refinery and its general offices, makes a singular contribution to the city and area. To meet the demands for motor consumption and fuel oil, Cosden today is processing 500,000 barrels of West Texas crude each month. In addition, it somehow is managing to load another 255,000 barrels monthly at its docks to help meet the unprecedented demand for petroleum products. All of this is felt not only in the payroll, but indirectly in increased traffic for the T&P and in a bustling truck transport industry.

Beyond this, however, Cosden has made significant contributions to the progress of this area. Its aggressiveness and progressiveness have set a pattern worthy of emulation by business both large and small.

Most of all, however, Cosden has proven itself to be a public spirited institution. It has fulfilled the obligations of good citizenship. Its busy officers have found time to shoulder their share of civic responsibilities. Even among the rank and file of workers, the spirit is such that it is difficult to find a group happier in its work and more eager to do its part in community undertakings.

Thus, on this occasion we believe we speak for Big Spring and a wide area of West Texas in giving a hearty salute to

LADY OR THE TIGER

Hal Boyle's Notebook

Country Cousin's Side

NEW YORK. P-There is a little tale behind the following note from a newspaper society

"Mr. and Mrs. Ronald Chatfield Clutch and their charming children, Gloria and Junior, have passed up the country this season and are vacationing at Bide-A-Long-Wee on the Jersey coast.

The Clutches changed their plans and left for the seashore after receiving this leter from Ronald's odd cousin, Egbert: "Dear Ronald,

What I have to say in this letter has nothing to do with the fact the \$1,500 worth of oil stock you sold me a year ago is now cheaper than mail order house wallpaper.

'But if you and Sandra Ellen and the kids are planning to come here this month, as you have for the last ten years, I would like to put it on a sound basis, as you fellows say in the big city.

I don't want you to think from this that I am still mad at you Junior-my wife, Adeline Mae, jokingly calls him "The Plague" -for shooting six of my best hens with his air rifle. .

"And I bear no grudge because our hired man, after watching you lie in bed till noon, got big ideas and quit me and went to the village to open an insurance business, right in the middle of "No. Ronald, family ties are

a matter of fact. I don't believe we have been offered a chance

you of any embarrassment by suggesting that you pay us the New York apartment while you're out here. Adeline Mae as usual, as we really never

farmers have to buy most of their stuff from the stores nowadays. I think about \$20 a day-\$600 for the month-would be about right for the meals. There is also the matter of a \$69.50 repair bill for the tractor Junior fix the barn myself.

Ellen and Gloria all these summers, she's decided to go to New York and become a model. I know she's bowlegged and her front teeth never quite straightened out, but she's determined. "So if you'll let her go back to New York and bed and board with you for six months or so while she's going to a fashion model school, I'll waive any

"Well, what do you say, Ronwithout you.

Your country cousin,

Egbert

Big Spring (Texas) Herald, Mon., July 21, 1947

Washington Merry-Go-Round-Drew Pearson

Big Racketeer Can Be Deported

WASHINGTON .- It's not generally known, but the kingpin of American gamblers, once the biggest liquor racketeer in the country, Frank Costello could be deported from the United States if anyone really wanted to get tough about it.

Frankie Costello, who put one New York judge on the bench, who dominates the swankiest gambling houses around Miami and New Orleans, who controls the one-arm bandit and slot-machine racket of Louisiana, and who runs several large roadhouses in New Jersey, migrated here from Italy around 1895 and became a naturalized citizen in At the time Costello took the

oath of citizenship, however, he glossed over certain things which, if discovered in the record of any other less powerful person would cause him to lose his citizenship and be deported. For instance, Costello did not tell the government, when he took the oath as a citizen, that he had previously served a term in jail for carrying a concealed

Even more important, a new citizen of the United States takes an oath to uphold the laws and constitution of the United States.

Yet at the very moment Frankie Costello was taking his solemn oath as an American citizen, he was also engaged in the largest scale violation of the Volstead Act and the 18th amendment in speedboats with machine guns. who operated a powerful fleet of trucks and rum-runners, and who brought more liquor into the U. S. A. perhaps than any other man in America.

The 18th amendment at that time was a very definite part of the constitution. And while Costello was holding up his right hand and solemnly swearing to uphold the constitution, he was also engaged in violating it.

Ordinarily this would be considered good and sufficent grounds for revoking Costello's citizenship and sending him back to his native Italy. WHO WRITES TAXES It is estimated that the CIO

and A. F. of L. between them. with their members' families constitute at least 40 per cent of the nation's taxpayers.

However, when it came to expressing their view on tax legislation before Rep. Harold Knutson's house ways and means committee, here is how the two big labor organizations rated:

They were given exactly 28 minutes. Chairman Knutson gave the AFL 15 minutes while the CIO got 13. In contrast, here is how Knutof big business. To-help write the 1949 tax bill, Knutson has appointed a special tax advisory committee, most of whose members are already on record for reducing higher bracket taxes and for imposing a sales tax regarded by most economists as hitting low-income groups much harder than big incomes. Here are some of the members of the Knutson advisory committee:

son stacks the cards in favor

John W. Hanes, part owner of Martin Aircraft; director Pan American Airways, American Superpower, U. S. Lines, Johns-Manville, Bankers Trust; partner in Barney and Co., investment bankers, and owner of the biggest orchid greenhouses in the world.

Cheever Cowdin, member of the National Association of Manufacturers' tax committee, chairman Universal Pictures, Transcontinental Air Transport; Director Curtiss-Wright, Douglas Aircraft, Ford Instrument Co., Sperry Gyroscope, Waterbury Tool, Canadian Universal Films and Big U film exchange.

John F. Connelly, general counsel of Minnesota Mining and Manufacturing Company, who is on record as favoring a retail sales tax.

E. H. Lane, president of the Lane Company, Inc. of Alta Vista, Virginia, who, is on record as favoring a 5 to 10 per cent sales tax.

E. H. Lane, president of the Lane Company, Inc. of Alta Vista, Virginia, who is on record as favoring a 5 to 10 per cent

sales tax. Roswell Magill, Wall street tax lawyer, ex-governor N. Y. stock exchange: trustee of Mutual Life Insurance and the Macy foundation, who favors a large sales

Meanwhile, no representative of any of the big four farm organizations was appointed to Knutson's advisory committee. That is how the GOP congressman from Minnesota wirtes our

PROTECTING ROYALTY

His royal highness, Prince Abdullah of Yemen, won't know it until he reads it here, but the secret service men assigned to guard him have been most assiduous.

The other night the colorful Arabian leader and his visiting colleagues were guests at a state department party. The Prince, whose native land is far rea guest drinking a "scotch and soda" and he asked for a similar drink. In a moment, a secret service man was at his side with a glass of iced orange

The Prince sipped the juice, but protested that the color was

different from the drink he had seen in another guest's hand. "Oh, yes, it is, your Highness," said the secret service man. "The difference in color is accounted for by the fact that your drink is the type re-

served only for royalty.' POCKETBOOK CONGRESSMAN Add to the list of pocketbook congressmen the name of Rep. Ross Rizley, Okla. Republican. A pocketbook congressman is one who puts the pocketbook interest ahead of the public interest, and the bill introduced by Rizley exempting the big gas companies from certain types of regulation by the Federal Power Commission certainly appears to

put him in the pocketbook class. For it so happens that Ristry's law firm is listed as representing Republic Natural Gas, Panhandle Eastern Pipe Line and Cities Service, one of the bigges gas distributors in the country. Apparently overlooking the fact that congressmen are supposed to operate for public good. not for the benefit of themselves or their law firms, Rep. Rizley wrote a bill forbidding the Federal Power Commission from regulating interstate gas transactions, preventing it from scrutinizing or regulating the cost of producing or collecting gas, and in some other respects permitting the gas companies to thumb their noses at the commission and previous rulings by

the supreme court. Just who wrote the bill for Congressman Rizley is not known, but since his law firm represents the gas companies, speculation should not be difficult. At any rate, after gas company representatives testified extensively for the bill, with the Federal Power Commission testifying against it, the bill was rammed through the House of Representatives with scarcely a chance for congressmen to read the hearings. In fact, the hearings weren't made available to other members of Congress until a few hours before the final

Meanwhile Senator Ed Moore of Oklahoma has introduced a companion bill and is all set to rush it through the Senate. Note-The justice department has been looking into the law firms of one or two congressmen to see what revenue they rerive from clients for whom they introduce legislation and do lobbying favors.

The Nation Today—James Marlow—

Red Tape Blocks Flood Control

a little flood control in your neighborhood or for your town? It'll take time and trouble. The big, national flood control

plans are worked out by the U.S. corps of engineers on orders from Congress. But if you-you means a group -want your pet idea included

in, or added to, the national plans, this is how you go about

1. You tell your Congressman. He digs around in Congress to get some action started. 2. Generally, at this stage, you

get action. Congress tells the U. S. engineers to make a check on your idea. 3. The engineers give it a quick

once-over to see whether it looks good at all or is just another idea for spending government money. 4. If the engineers think your request has merit, they tell Con-

5. This means more milling around in Congress which probably will tell the engineers to dig deeper. 6. Back go the engineers to

your place. They make a better check this time; they may even hold a hearing so people can talk for or against it. 7. Then the engineers report

back to Congress on the hearings and what their second check shows. 8. More milling around in Congress. If Congress thinks maybe something should be done with your idea, the engineers are told

to dig still deeper. 9. Now the engineers go to work and figure how much the flood control for you will cost, how long it will take to do it. there.) Maybe they'll hold more hear-

ings right in your home town. 10. After this third going over, (the engineers draw up a final report for Congress and send it there. 11. This final report to Con-

gress is turned over to a com-

mittee which handles flood con-

trol. 12. The committee holds hearings so people for and against your idea can speak their piece. 13. Then, if the committee thinks the engineers' flood control plan for you should be carried out, it tells the House and

14. If the House and Senate

WARSAW-A-Two representatives of the Polish National Catholic Church of America of Scranton, Pa., have arrived in Poland for a three-month study of missionary and relief work. They are Reverends John F. Swierczewski of Chicago and Adam Walichiewicz of Reading,

Senate so.

WASHINGTON, P-You want vote for it, the plan for you is included in a big bill that okays a number of flood control plans.

15. The engineers now are all set to go to work, except for this: they can't do the job unless Congress votes money for it. Approving a job and voting money for it are two different things.

16. So then the appropriations committees in Congress hold

hearings on your plan to see whether they'll okay money for 17. If the appropriations com- ..

mittee approve, they tell House and Senate. Usually House and Senate follow the committee recommendations. 18. Once the money is voted, the engineers have a clear field

to go ahead and set up some flood control for you.

You Are Invited to Drive America's Newest Fine Car -The Frazer Manhattan Is Here!

This is good news for you who love a really fine automobile-for you who appreciate beauty and distinction, advanced engineering and master craftsmanship in a motor car. For Kaiser-Frazer has designed and built the car for you. Technically, it obsoletes all prewar standards of design-proves, in its lines, its colors, its mechanical perfection and its supremely luxurious riding qualities, what vast progress has been made since 1941. The greater your experience with prewar fine cars, the greater will be your appreciation and desire for this one!

The Frazer Manhattan is built for you who want the ultimate in personal transportation. Into it have gone

the fruits of long experience and years of tests. Upon it have been lavished the genius of pre-eminent body designers, automotive engineers and custom stylists. There has never been a car like this before—never such perfect balance of poise and power.

You are invited to see and drive the Frazer Manhattan -to inspect its beauty of line and color, its superb two-tone Botany broadcloth upholstery, its luxurious roominess and many important new safety features. Then take the wheel—and compare the ride with the best you have ever known! You will be glad that Willow Run is building better than a car a minute and Lat, consequently, we are delivering now!

Markets

NEW YORK, July 21. (AP)— Individual stocks edged forward today although many market leaders did nothing or many market leaders did nothing or continued to give ground.

A little buying and short covering again was credited partly to the per-sistence of inflationary psychology and the belief business would remain at a high level for some time to come.

Dealings slowed appreciably after a fairly active start and mild irregularity fairly active start and mild irregularity ruled near midday.

Allied Chemical and Standard Oil (NJ) made new tops for 1947. Ahead at intervals were Douglas Aircraft. Bethlehem. United Aircraft. N. L. Central. Grest Northern Railway. Philip Morris and General Electri. Occasional losers included General Motors, Chrysler, Goodyear. Bears. Roebuck. American Telephone. North American Anaconds. Kennecott, Westinghouse. Armour and Public Service of N. J.

Bonds were uneven and cotton futures improved.

strade lambs and yearlings that carried lower bids at 10.30 o'clock; some medium to good shorn yearlings 15.00-17.00, old sheep 5.00-9 00.
