County Red Cross Chapter To Begin Appeal Campaign

The Lynn County Chapter of the American Red Cross will launch its annual appeal to the residents of our area for funds to support its community wide services, and to provide our share of the costs of its services to be carried on in this country and the world by the National Red Cross organization in 1968-69 according to V. F. Jones, Lynn County Fund Chairman. The organization terms its campaign an S. O. S. (Support Our Servicemen) appeal, with the slogan "Help Us Help".

This year the American Red Cross faces a crucial financial situation. Rapidly mounting demands for its services in Vietnam have compelled the organization to increase its budget for services to the Armed Forces more than \$4.17 million. "Two Catastrophic disasters, in Alaska and Texas, have forced the Red Cross to draw heavily on its disaster funds in order to help several thousand families rebuild and repair their homes and otherwise return to normal living.

Mrs. Edward Bartley, Drive Chairman, announced that the Drive will start March 18 at 9:00 a. m. The business houses will be contacted.

Monday night the Tahoka Home Economics Girls will make a house to house canvass from 5:30 p. m. to 6:30.

Wilson Lions To Sponsor Contest

Saturday, March 23, the Wilson Lions Club Queen Contest will be held in the High School Auditorium. Watch for contestants' pictures along with sponsors names in next weeks issue. Weldon Meador is chairman of the contest and Dale Sides, Elementary Principal, is advertising manager. This year's contest is sponsored by sixteen Wilson businessmen.

Wilson 1967 Lions Club Queen is Miss Carolyn Schneider, daughter of Mr. and Mrs. Frank Schneider of Wilson.

Abrupt Weather Change Brings Variety And Severe Storm Alert

Tahoka and other county areas experienced an abrupt change in weather over the weekend, with Saturday being a typical Spring day and Sunday bringing rain, fog, storm alerts, colder temperatures and light moisture turning to snow sometime early Monday morning.

Light to moderate snow fell most of the day Monday, with winds whipping it into one and two foot drifts. Temperatures went into the 20's Monday night with a bright sun and warmer degree readings melting most of the snow by Tuesday afternoon.

Several area schools were closed Monday all day, with

some sending students home early. Tahoka School dismissed classes Monday noon, to resume Tuesday morning.

Area roads were slick and dangerous due to the snow and freezing moisture. Small drifts were reported locally on a few city streets and farm roads.

The first three months of 1968 has been good to area farmers, with moisture content being more than enough to record excellent sub-moisture. About the only complaint the farmers have is that the weather has hampered cattle feeding and making fields too wet to plow.

Cecil Owen Car Stolen Thursday

Swift action by Lynn County Sheriff, Carl Spears, resulted in recovery of a stolen car owned by Cecil Owen, Tahoka. The vehicle was reported stolen Thursday morning by Mr. Owen.

Sheriff Spears was notified around 6:45 a. m. Thursday and a description was put out by radio. The authorities were notified by 8:30 a. m. that the Owen car was in Big Spring. By 12:11, the vehicle was back in Tahoka.

Two teenagers, ages 13 and 15, in custody in the Lynn County jail have issued statements to Sheriff Spears, admitting theft of the Owen car. According to the sheriff, the youths have admitted theft of seven vehicles in Lubbock, Tahoka, Big Spring, and Brady.

Pony League To Hold Meeting

The Tahoka Pony League will hold a meeting Thursday, (today) March 14 at 7:30 p. m. in the Lyntegar Warehouse.

All interested parties are urged to attend.

A. N. Crowson Out Of Race

As most of you probably know I have filed as a candidate for Commissioner, Precinct I, but due to death in my family that called me away to East Texas, I failed to get my election dues in, in time to qualify for this Commissioner race.

My check was returned marked, "too late to qualify." I hold no ill will toward anyone but myself for neglecting this. I want to thank all my friends and supporters for their encouragement in this race, up to now.

No one could be more disappointed than I.

Sincerely,
A. N. (Alfred) Crowson

Basketball Here Saturday Night

The Stoneagers battle the Teenagers in a whopping basketball game Saturday night at the High School gym. Three games will be played, beginning at 7:30. Games to be played include the Senior girls dating

ly opposing the Senior mothers. Also the Senior boys will stand up to their dads and last but not least, the battle of the sexes, the Senior girls battling the Senior boys.

Mr. and Miss THS

Two Tahoka Seniors have been named, "Mr. and Miss THS" in balloting by the student body last week. Miss Lexi Adams and Cliff Thomas were selected to represent the student body of Tahoka High School.

Miss Adams is the daughter of Mr. and Mrs. Lester Adams and Cliff is the son of Dr. and Mrs. Skiles Thomas. Runners-up in the contest were Elva Jo Edwards, granddaughter of Mr. and Mrs. Carroll Edwards and Richard White, son of Mr. and Mrs. Martin White.

Be 'Weather-Wise'; Know The Rules For Severe Weather And Tornadoes

Our area has been included in severe weather alerts this season, one for severe thunder storms activity and one for possible tornadoes. As this seasonal activity intensifies, the Lynn County News, in cooperation with the local fire department, civil defense and law enforcement officers, has agreed to publish safety information concerning tornado activity.

Anytime the area is under a severe alert and known threatening storms are in the vicinity, a storm watch force begins operations immediately. Two-way radio communication speeds storm information to all watchers.

If a confirmed tornado is in the air or on the ground, and heading in the direction of Tahoka, the warning siren will be set off. The siren will be activated for a series of

four wavering tones, which definitely means that it is time to seek appropriate shelter.

At no time, during an alert should persons call the civil defense, fire department, police or weather bureau for storm information. This information is related during an alert by radio and television, and gives storm facts related to storm center areas.

The warning siren is for your protection. It is a signal for you to seek shelter. This should be done in an orderly manner, keeping calm and help prevent public excitement and panic. Too many times, residents take to their vehicles watching storm clouds and driving around. Your car should be used only to transport you and your family to a shelter or safe area.

Joy-riding during an alert causes confusion and possible accident danger and hampers emergency vehicles from doing their job. All streets should be kept open for emergency use only.

The difference between life and death can be evaluated by following storm safety rules. Here are a few that should be studied and remembered for future use.

1. When time permits, go to a tornado cellar, cave or an underground excavation. There is no universal protection against tornadoes except underground excavations.
2. If in open country, move at right angles to the tornado's path. If there is no time to escape, lie flat in the nearest depression such as a ditch or ravine.
3. If in a city or town, seek

inside shelter, preferably a strongly reinforced building. Stay away from windows. In homes, the corner of the basement toward the tornado usually offers greatest safety. Too, taking cover under heavy furniture against inside walls will offer some safety.

4. If in school, stay inside, away from windows, remain near an inside wall on the lower floors when possible. Avoid auditoriums and gymnasiums with large, poorly-supported roofs.
5. Equalize inside pressure in the home or building by opening windows or doors on sides away from the tornado.
6. Keep tuned to your radio or television stations for latest tornado advisory information. The only time you

week. Such abrupt and swift changes remind me of a favorite Oklahoma Panhandle saying, "If you don't like the weather, just wait a minute." I can remember one instance, that driving within a ten-mile span I experienced sunshine, dust, rain, hail, and snow. Now this isn't just another tall tale of which there are many about Oklahoma weather, especially during the Dust Bowl days. I'll not mention any of these as they are too way out for believing.

These severe weather alerts are nothing to be taken lightly. I lived in Tornado Alley and formed a great respect to heed such warnings. It wasn't uncommon for our area to be under alert six days out of seven and more often than not, several confirmed twisters would be present. The Woodward, Oklahoma twister was the worst I've seen. It's memory is about as famous as Pearl

Harbor. I suggest you read and absorb the tornado information in this week's News.

NOTICED an amusing sign over the weekend. "Keep America Beautiful. Get a Haircut." Naturally this was a barbershop advertisement. As you know, last week the local garden club observed State Arbor Day with tree planting ceremonies at the school. A good attendance of students, school officials and local residents were on hand to observe planting of a Crepe Myrtle.

While there, I heard comment that plans have been discussed to do some landscaping in front of the High School. This type of project involves considerable expense. Several members of the garden group expressed desires to help and some businessmen present said they might consider cash donations. This is what I call community spirit and will keep an eye on the project just to see if there is any follow-up or if it was just idle conversation.

WELL, enough of this rambling on. The News staff has been prodding me to get busy with the rest of the paper. One of these weeks I am going to let them write the weekly column.

should call the weather bureau or authorized personnel, is to report a tornado.

Tornadoes can occur any place in the United States. In our area they happen most frequently from March through September. Weather conditions can be hot, sticky days with southerly winds and a threatening, ominous sky. An hour or two before a tornado, topsy-turvy clouds appear sometimes bulging down instead of up. Rain, frequently hail, precede the tornado with a heavy down-pour after it has passed.

They can occur anytime during the day or night and move from a westerly direction, usually from the southwest, traveling about 25-40 miles per hour.

Student Council Holds Election

Politics and campaigning was the scene at Tahoka School last week, with nominated candidates seeking positions on the Student Council.

The election was completed after several runoffs and the following students were elected: Jane Owen, President; Steve Roberts, Vice-president; Alta Hale, Secretary; Judy Gossett, Treasurer; Leslie Jones, Reporter, and Doug Taylor, Parliamentarian.

Several officers will go to San Antonio April 4-6, to attend the state convention for Student Council officers. While there they will attend the opening days of the HemisFair.

Thomas Places At Denver City Meet

The Tahoka squad will travel to Odessa this weekend for the West Texas Relays. The two-day meet is Friday and Saturday, March 23 the team will go to Coahoma.

Slaton will be the first meet for the Junior High squad. They will enter events there tomorrow.

Tahoka's track squad showed continued improvement at the Denver City Relays Saturday. Team points were piled up by Cliff Thomas, totaling 26 points. Thomas placed 1st in the 330-yard intermediate hurdles and 1st in broad jump. He ran the 330 in 42.6 and stretched out in the broad jump for 21.0.

Services for Mrs. Roscoe, 78, Coleman, who died Saturday, were held at 2 p. m. Coleman. Survivors include a daughter, Mrs. Jessie James, Tahoka, and a son, J. D. Roscoe, Lubbock.

T. D. Dunlap, Jr., Post, visited his brother and sister-in-law, Mr. and Mrs. Billy Jack Dunlap and family over the weekend.

Application Period For Federal Crop Insurance Opens In County

The application period for All-Risk Federal Crop Insurance protection on irrigated cotton opened today for a limited time in Lynn County.

Mike E. Custer, FCIC representative from the District Office at Lubbock, said the program being offered for the 1968 crop year remains much the same as last year except for some minor adjustments. "About 13 insured farmers in the county shared during 1967 more than \$2 million in Federal Crop Insurance payments made in Texas for losses on cotton, grain sorghum, and wheat crops due mostly to drought, flood, excessive moisture and wind."

"This added an estimated \$27,000.00 to the county farm economy and helped to offset financial losses due to poor crops," Custer says.

The All-Risk FCIC insurance plans guarantee farmers an established amount of good quality production based on yield history of the land, amount of risk involved and estimated costs of production. FCIC by Congressional Act is allowed to insure only production costs or the farmers' investment in his crop.

When crop production falls short of the guarantee due to drought, excess heat, flood, too much moisture, insects, dis-

GORDON-SOUTHLAND NEWS
Mrs. Edmund Wilke

SNOW! Once again we awoke to find the ground covered with snow. Had a nice rain on Sunday and now this morning it is snowing. Who could ask for anything more?

At least one family in this community had real good news this past week. Mrs. Aubrey McNeely received word that she and her family had won an "Expense Free" trip to the Ozarks, staying at a beautiful lodge at Bella Vista, Ark. for four days and three nights. Mrs. McNeely said that she signed up for the trip when they attended the Fat Stock Show in Dallas last Jan. Congratulations! How about me going along as part of your family?

Congratulations to Mr. and Mrs. Mike Riney (Marian Eckert) who are the proud parents of a fine baby boy born early Tuesday morning, March 5 at Mercy Hospital in Slaton. The grandparents are Mrs. Norma Eckert of Southland and Mr. and Mrs. F. D. Riney of Wilson.

Congratulations to Polly Martin, Southland Senior and top-notch basketball player. She has received an invitation to go to Wayland College and try out for a place on their basketball team. The try-outs will be on March 30 and Polly, we are all rooting for you. This is a real honor, to be chosen for these try-outs!

Mr. and Mrs. Milton Gindorf and Shelly from Dallas, were here during the week-end visiting friends and relatives.

Southland's Track Team participated in the Denver City Track Meet this past Saturday with the following results: High Jump-Joe Basinger, first place with 5-11 1/2; Pole Vault-Bill Bevers, first place with 12-0. Southland was in Division II and had 24 team points. Congratulations, boys!

Rev. and Mrs. H. W. Hill and Darrell will be moving to Anton soon where he will be the pastor of the Central Baptist Church. This community is certainly losing a fine family and preacher, but our loss is Anton's gain. I, for one, have really enjoyed knowing this family. May God bless this family richly in their new location.

Mr. and Mrs. Delmar Wilke and two daughters have recently returned from a trip to Dallas and LBJ Lake.

F. W. Callaway, Weldon McGehee, Herman Dabbs and Edmund Wilke returned Wednesday from a fishing trip to Falcon Lake. Seems the weather wasn't very pleasant all the time that they were down there, so they didn't get to fish very much. I heard the weather got better later in the week, so guess this bunch should have stayed a few more days. I guess the men came home during the rest of the Hackberry Gin weekend.

Edmund, Sherri, Darrell and Yours Truly attended some of the Regional Basketball games that were held in the Municipal Coliseum on Saturday and witnessed some mighty fine ball games. I think the game between the Springlake girls and the Stratford girls was one of the best girls games that I have ever seen. Now that is what I call "real ball playing". We also saw Mr. and Mrs. Herman Havis there.

Mrs. Bertha O'Keefe from Andrews, spent the weekend with her mother. Mrs. Lena Lieske. They attended church at Grace Lutheran in Slaton on Sunday.

**Bill Griffin,
County Agent,
Says**

Buying fertilizer for the lawn and garden need not be a task. Saving money may be important, but the economics of buying a few bags of fertilizer are not as important as buying quantities. However, you can save by avoiding small packages.

You may pay 10 to 20 times more for fertilizer in the one-pound size compared to an 80-pound bag. Farm-sized bags of 80 pounds are not too much fertilizer for anyone with a vegetable garden, flower beds and a lawn.

All fertilizer containers must be properly labeled. This means there is no excuse to be misinformed about the merits of the product, although you may be misled by extravagant claims in words and pictures. Read the label before you buy.

Don't be misled by claims of how many square feet a fertilizer will cover. What counts is whether you are applying enough of the proper material to give your plants the nutrients they need.

Soil tests can be used to determine the kind and amounts of plant food needed for lawns and gardens as well as for field crops and pastures.

Information on soil testing is available from my office.

Ornamental plants will be more resistant to disease and make faster recovery from insect attacks when they are properly fertilized.

For the beginning gardener, a standard mixture such as 5-10-5 or 5-10-10 is suggested. More complicated mixtures can be used after experience has been gained, says the county agent. He adds that it may be easier to measure rather than weigh fertilizer. A pint of 5-10-5 is equal to about one pound, but other fertilizers may differ from this measure.

Method of application may depend on the type of plant material to be fertilized. Broadcasting by hand is the easiest method and with experience, an even distribution can be obtained. Take care, not to get the fertilizer on the foliage of evergreen plants. Watering in is a good idea to prevent burning the foliage, he says.

The most laborious but possibly the best method for fertilizing trees and deep-rooted shrubs is by means of holes punched or bored in the soil. Using a crowbar is not easy work, but adequate soil moisture now will make the job easier. A soil auger or soil probe can be used if available.

The amount of fertilizer needed varies considerably, depending on the age and size of the tree. A safe

method is to use 2 to 4 pounds of 8-8-8 for each inch of tree trunk diameter at breast height. Also, use half this dosage if 10-10-10 or 15-20-0 grade of fertilizer is used.

For shrubs, the amount to use depends on size. For small evergreens, 2 to 4 pounds of 5-10-5 per 100 square feet is suggested. For larger shrubs, the application may range from 2 to 15 pounds per shrub, the larger amount being for a shrub 12 to 15 feet in height and equally as wide. Local nurserymen or the local county agent can supply additional information on fertilizing ornamentals.

Moisture Halts Terracing Plans

THIS PICTURE SHOWS RAINFALL STORED IN LEVEL ROWS BETWEEN PARALLEL TERRACES. CONTOUR FARMING WILL DO A GOOD JOB OF STORING WATER WHEN EACH ROW IS PUT ON THE LEVEL.

Due to large amounts of rainfall during the winter and early spring, many of the farms planned for terracing will not be completed this year.

"Much of the future terracing can be contained in land that does not exceed foot per 100 feet of fall. A proper system of contour farming is established," Fred Graff of the local Soil Conservation District said.

The following chart, showing the findings of the South Plains Research and Extension Center at Lubbock, is an excellent example of the importance of reducing runoff.

South Plains Research & Ext. Center

PERCENT SLOPE	1/ DRYLAND	Pounds of Lint per acre		
		4-INCH PREPLANT	PREPLANT + IRRIG.	IRRI. AVERAGE
0.0 (No Runoff)	272	354	434	353
0.2 (2.4"/100')	154	281	370	268
0.5 (6.0"/100')	154	272	288	238
0.9 (10.8"/100')	98	225	373	232
1.2 (14.4"/100')	96	253	317	219
Moisture Average	153	277	257	

Data from the following table indicate that up to 32.4 percent of the rains causing runoff will be lost to runoff on soils having no more than a 6-inch fall per 100 feet. This small amount of slope is presently considered good, but contour farming will help store much of this runoff.

Moisture Level	percent runoff 1963-1966			
	0.0%	0.2%	0.5%	0.9%
Dryland	0	23.6	32.4	19.7
Preplant Only	0	20.0	18.0	29.2
Preplant + 1 irrigation	0	18.6	21.3	29.2

In Lynn County, similar results can be obtained by controlling runoff. A good system of contour farming will provide greater water distribution. Greater water distribution will provide the operation unit with a more sound economical operation. Remember with rainfall, it's not what you get, it's what you keep that makes the crops.
