WE WANT YOUR TRADE ON

MERIT

Home Trade

(By Vera Simpson)

primitive man first became possess-

ed of superfluities. As he could ex-

ist no longer on his own products, he

saw the advantages of exchanging

these products for others, which

history of trade is divided into five

classes, which I will not go in detail

to explain. These five classes have

an important part in the carrying on

of trade and commerce. Connected

with these five divisions are many

trade unions and associations, which are a great benefit, in that they help

goods to be cheaper, and also acquire

Trade has a very great meaning.

We will now take up the purpose of trade. In this case, the advantages

are given to the trader. Not jus

to one side of the trade, but to both sides. ,That is, a trade should be

made so as to benefit all traders. whether the trade be great or small. Taking up the problem in olden days

and even in modern times, one county yields certain foods, while other

counties yield other foods. If it were not for trade could not have s

variety of foods, and indeed could not exist throughout even one generation

has a very great meaning. It means that people should trade in their own

home town, and not in other towns, or with firms as some people do

'Patriotism" is a very good word to use in this case. Every citizen should

show patriotism to his own home town; as every citizen of the United States should be loyal to his or her

country. But the statement may

arise that patriotism is not shown

through trading in your own home town . Indeed it is patriotism goes

for the advantagement of the town

Home trade is advantagable not

whole. Therefore, every town or

munity as well as the merchant.

Home trade keeps the money in rir-

community would have no chance

whatever to prosper. For, when the

merchant sees that the people are go-

ing to patronize their home town mer-

chants, he in return, will show his appreciation by building better build-

or county.

on its own products altogether. But now, we must take up the subject of "Home Trade." This too,

a better quality of goods.

The News has heretofore failed to compliment the Lubbock county commissioners for the excellent graded road they have built from Lubbock south to the Lynn county line. It is quite an improvement over the old road, and we are sure is appreciated. over this highway regularly.

CIVIC VISION

One of the greatest needs of our western citizenry, especially in the lege at Lubbock, Texas. coming Eden, of all the great South west, (namely the great South Plains) both for our country districts, towns and coming cities, is civc vison. We should enlarge and lay well the foundation in all our plans of building enterprise for a coming empire on the great Plains of Texas. For we have all the natural resources in soil. in climate and in seasons, for the development and display of the most scientific methods of agriculture, horticulture diversified farming and poultry and stock raising of any spot on this continent and doubtless underneath these most beautiful and fer- Light and Power Company. tle lands of splendid soils, lies lakes of undeveloped oil and mineral beds that will in the no distant day add millions of dollars to the volume of our present growing commerce. And statement from the superintenthere is no location under the sunny dent, W. S. Anglin, it will be skies of the western horizon of the from 24 to 48 hours before the great Empire State that offers more in natural and actual resources, and in future development to our splendid body of law makers of the great of her public funds in establishing a ped in printing this edition. State of Texas in appropriating some great Technological college on the South Plains, and beyond any doubt, the city of Lubbock is the one geo graphical center and location for this great institution for several reasons:

First, because the institution would reach and benefit more real tax payers if located on the plains at Lubbock, than any other point in western

Second, because of the advantage in natural resources that the great western plains of western Texas has over other parts of the drouthy and broken regions of western Texas,, of growing and building a great school that would merit the pride of our

> **HOWELL'S** BATTERY **STATION**

> > Phone 125

Third, the institution would become self-supporting from the first hour of its opening, which doubtless would be a great inducement to the burdened tax payers of central and eastern Texas, who are ground down under heavy taxes in support of other State

On the north we have the great Texas Panhandle, which is fast becoming the grain belt of Texas, with her splendid soils and underground rivers of pure water, and a climate that cannot be excelled. Her undeveloped resources cannot be overestimated in diversified farming, stock raising and home building.

South of Lubbock we have the future corn and cotton belt of the great southwest, being above the insect and wevil line and our soils and seasons cannot be equaled for the growing of cotton, corn, maize, fine stock hogs and poultry; fruits of all kinds, by the traveling public who pass grapes equal to California; and with all these and numerous advantages not mentioned. we feel sure that the splendid educational board appointed by our honored Governor, will not fail to locate the Technological col-

-Financial Resources-

THE FINANCIAL RESOURCES OF A COMMUNITY ARE THE BAROMETER OF ITS PROSPERITY. Add to these resources and you quicken its advancement. Detract and you proportionately obstruct its progress.

This should evidence to all of us our individual responsibility toward our home town and its people. These people are your friends and neighbors. YOUR INTERESTS ARE KINDRED. Thus you should take no personal action in any community matter without taking into consideration just how it will effect all those living here.

You can safely bet, folks, that every Dollar you remove from the commercial and industrial life of Tahoka deprives just that much employment and vocation from someone who needs it. And when you remove employment and vocation, you will remove from our midst those individuals who are dependent upon it for the sustenance of their homes and families. THIS IS AN ABSO-LUTE IRREFUTABLE FACT.

You may think we have enlarged upon this matter, folks, when we refer to your INDIVIDUAL ACTS as being so highly important to the welfare of Tahoka. To the contrary it should make plain the paths that are opened to all of us in extending the cooperation we owe our wonderful community.

To begin with when you need Merchandise or Service-BUY IT IN TAHOKA. This simple procedure keeps your money at home, banks it here, pays the obligations of our people and thus finds itsself on its way back into the channels of local commerce and trade-and even back into your own pocketbook from whence

Stop and think a moment, friends, of the transactions involved in a procedure of this kind. THINK OF THE EMPLOYMENT MADE POSSIBLE in the handling of these Dollars and the business transactions ensuing as a result of the keeping them among

In contrast, picture in your minds the result of spending or sending these Dollars away from our city. By so doing you have side-tracked in a single action, a substantial portion of our commercial industry and transferred to some distant community assets that are a DISTINCT LOSS TO TAHOKA AND ITS PEO-

We claim the keeping of our money at home, friends, is the first step in the building of a 'real city'. And from the standpoint of yourself-should be the easiest. To begin with, MERCHAN-DISE AND SERVICE IS HERE IN ABUNDANCE. Thereis not a business man in Tahoka today but who is ready to serve you to your utmost satisfaction both in quantity, quality and price.

BEFORE YOU TURN THIS PAGE we want you to glance through the list appended herewith and realize this is so. And they are only part of the entire number who are ready, not only to serve you, but also our community-TAHOKA. Think it over.

ANG ON PINTO-W USH DOWN TOTH' L IND SAVE CHING!

"There to the West in memory I see
"The Frontier Gem," thus the Post was styled,
But now ungainly spot; neither shrub nor tree
Is left to mark its beauty undefiled.
Historic ground! Van Dorn there once held

And chivalrous Hood first commanded thee, Even Kirby Smith there sang his roundelay In chorus joined by gallant Fitzhugh Lee."

An autumn day more than three score years ago found the military authorities and the settlers of Camp Coloradowhich was called the "Frontier Gem"preparing for an unusual incident. Col. Robert E. Lee of the United States army was in Texas inspecting the posts and word had been received from Fort Griffin to expect his arrival there the next morning.

Everyone was busy, whether a soldier or a civilian, getting ready for the visit. Lee was not only popular in military circles but he was loved by the people, and it was planned that the celebration should be one of the most brilliant affairs ever undertaken along the farflung line of civilization.

Camp Colorado nestled on the banks of Jim Ned Creek, a beautiful stream in the heart of West Texas. The early set-tlers were made up of the brave and chivalrous men and noble women who had hearkened to the call of the wild. Prominent among these settlers was the Granger family from old Virginia. The Grangers were social leaders in the post and their prestige was increased by the beauty of Miss Catherine, an eighteen-year-old daughter, who had won the title of "Queen of The Frontier Gem." She danced gracefully, was a brilliant conversationalist and could ride her black steed, "Cherokee Chief," with all the dexterity of a

Cossack. Catherine had her way in most things at home, even as all other pretty girls have had their way from the beginning of history. But on one issue her will which could only mean one thing—that and the will of her parents would not sooner or later a break would come beharmonize. She was in love with Wallace Sowell, a young man of mystery in the settlement, who followed the buffalo duced. Colonel Lee was himself opposed hunters on their great drives and ruthless slaughter of the "kings of the
prairie." There was nothing particularly
objectionable about Wallace to the
Grangers, but they were F. F. V.'s,
proud of the family history, and their
hearts were dead set on a match between
the girl and a handsome young lighten.

ors due a ranking officer, by the military authorities. The citizenship also welcomed him with open homes and glad acclaims, for even at that early day he had won the admiration of many people over the nation. After a short rest the Colonel had a consultation with the commanding officer of Camp Colorado, who was either Van Dorn or Kirby Smith. And when a thorough report had been given regarding activities against the Indians who were depredatdiscussion in an unofficial way, a matter that was pressing very heavily upon the while the arranged program was being carried out at the crude buildings of the little post, busy hands were fast

buyers to give them their freedom.

It was in the closing remarks of this

discussion that he who afterwards became the great Southern General, said: "I pray that wisdom and justice might guide all my countrymen and that the peace and strength of the Union shall not be broken, but if disruption unfortunately comes, may God and my conscience and the traditions of Virginia be my guides. I must bow to the will of the home people."

hearts of all those old soldiers just at | moving in the kitchen of the Granger

Back in the North and East the dark clouds of civil war were fast gathering and Robert E. Lee had discerned it. The tween the slave states and those states

home. Two or three of the best cooks among the darky mammies were enamong the darky mammes were engaged dressing turkeys, baking hams and making pies and cakes for a big reception to be given there that night. Catherine was busy with the rest and while a soft smile played upon her face, like the sunbeams that danced through the autumn foliage outside, she was not Wallace Sowell had not been asked to the entertainment and had planned an adventure with her to which she agreed, nevertheless it was fraught with grave danger and her young heart

was troubled. The perfect night with a full moon hearts were dead set on a match between the girl and a handsome young lieutenant whose ancestors had enjoyed the highest social standing in Virginia since Revolutionary times.

| A question of states and seven the girl and a handsome young lieutenant whose ancestors had enjoyed the highest social standing in Virginia since Revolutionary times.

| A question of states are question of his country. He thought that it was wrong for the people of the North, who had really introduced slavery into the United States, and who had won the favor of lieutenant who had won the favor of shoved up against the flames and seven love and revere his memory.

It was an Indian summer day when Lee arrived at the post. He was received with all the formalities and honors due a ranking officer, by the milisuspected the truth when an investiga-tion disclosed that "Cherokee Chief's" stall in the barn was empty, shielded her daughter by announcing that the girl had suddenly become ill.

The entertainment went on but it was more like a funeral than a brilliant social function. Colonel Lee was denied the pleasure of dancing the Virginia Reel with the "Queen of the Frontier Gem," as had been promised, and while the assembled crowd was tripping the light fantastic toe to the music of Bob Morgan's fiddle, Catherine Granger, Wallace Sowell and John Sheen—a daring boy of the frontier-were rapidly riding southward. Their destination was a little settlement eighty miles away, on the banks of the San Saba

It was midnight when the full moon, now rolling high in the heavens, began to play hide-and-seek with broken, swiftflying clouds. Catherine was tired and it was decided to strike camp, although a very dangerous country, infested with Indians, was being traversed. The three saddle blankets were quickly converted into a very comfortable pallet on the ground and the girl bade to retire. "You sleep now," jokingly remarked John Sheen, "while we stay up with the clouds and the Indians, not as guardien. clouds and the Indians, not as guardian

angels, but as guards for an angel."
"That is very kind of you," replied Catherine, "but remember I am not a bit selfish. You needn't devote all of your time to me. Share it with my horse, Cherokee Chief, and see that none of your redskins get him."

A gentle rain began descending shortly after the tired girl had fallen asleep, and the two boys were busy the rest of the night keeping her dry by the use of their slickers and coats. Once they heard the terrific beating of hoofs, and thought that Indians were approaching. Rocks on a hillside not far away rattled and scattered, but lightning flashes only revealed a big herd of stampeding buffalo running across the point of a ridge away to the east; apparently the fear of an Indian attack was allayed.

Time passed quickly enough in spite of the discomforture of the two boys. Along toward morning the clouds lifted and when the sun sent its first stream of yellow and gold flying across the hills,

eral strips of bacon were bro

eral strips of bacon were broken forked-stick nearby.

"A royal feast awaits the declared John Sheen, with a two his eye. "That is said in the course," retorted the girl, who opened her eyes and looked in the tion of the fire. "But no quee enjoyed any kind of a feast mon going to enjoy my heat am going to enjoy my breat

lovely morning, for I'm hung Soon the three were partal sunrise repast a long way in and in a wild country. Cathe and in a wild country. Cathers unafraid, however, and said that "gallant escorts" had brought guns and more slickers they might spent a better night. The boys had scarcely died away when a yell came from the crest of hill. One glance told the story of Indians were riding toward the and there was hardly time to get thicket which fortunately was a side to the designers of course I say i frown my awfule too little clothing but I do not recal my eyes or peer fore such unequal femininity excep wife was with n very unattractive demn female and thicket which fortunately was a demn female attifety yards away. The horses was should create a beauty brush and preparation of the female, and were made to resist the attack.

The red men rode completers to gaze intently to the thicket several times, letting to gaze intently to men so awfully, warlike yelps. # Two Great Texas Institutions The School for the Blind The School for the Deaf and Dumb

TEXAS SCHOOL FOR THE BLIND.

"Know thyself." This is an old saying and a good one. However, there ought to be another saying similar to it. "Know thy government." Most of us have come to look upon the administrative power down at Austin as a kind of force, operated in every direction for the guidance of collection of taxes and the guidance of the country. F. F. Braylette. human activity. We fail to see the constructive work, the unselfish accomplishments, the noble ends that result from our contributions and the service rendered by the representatives we

An effort will be made in this story to acquaint the reader with two state institutions. The one being maintained for the blind; the other for the deaf and dumb: No citizen of the Lone Star state, familiar with the purpose of these two institutions, wants to see retrench-ment of a kind that will handicap the good work of both schools, which help marvelously towards the conservation of man and woman power and the extension

of happiness. Before telling you of the work that is being done at the blind institute to help unfortunates, we want to awaken your heart to what it means to be afflicted in this manner. Earth's beauties are marvelous. How we love to look upon the beauty of springtime and of autumn, the winding rivulets, the mountain peaks, and the faces of friends and loved ones.

All of this is lost to those who are blind. It is a terrible loss and your state government is trying to brighten and help make useful the lives of those deprived of such blessings.

To see the boys and girls, hundreds of them-some like our own brown-haired and soft-cheeked little ones at homeonly blind, learning to sing and play music and smile through the darkness is an inspiring spectacle. It challenges us to a higher and a greater support of the state's constructive program.

The blind school was established more than three score years ago, with Dr. S. W. Baker, a grand old pioneer of Texas, as superintendent. The first child was admitted on December 29, 1856, and it would be interesting, if possible, to follow up the work from that distant date until February 9th, 1923, when as a result of the efforts of Hon. Clarence E. Gilmore reilroad commissioner, mem-

A troop of making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the making it a high misdemeanor or a felriver seemed to make the make the making it a high misdemeanor or a felriver seemed to make the make I have hoed corn and cotton many days with bare-footed girls and women—as death rate of those wounded in battle good and as modest girls and women as from 90 per cent to about 10 per cent. with bare-footed girls and women-as I have ever known. These girls and women were not embarassed to the slightest degree because their toes and heels were exposed to the world's cruel gaze, but they would have blushed crimson had some accident disarranged their flowing skirts of calico or cotton checks and exposed an inch of ankle. So it is merely a change of custom and stylea swap, as it were. We could see feet | woman's field of usefulness to the kitchthen, but no ankle; now feet must be en, parlor, back yard and cotton patch hidden, but the man has been removed have been removed, permitting woman from the ankle. Woman was modest to step out into the big world and give then, and woman is modest now. She to the needy world the possibilities and obedience to custom and style is true

woman our eyes are permitted to gaze more of women than or feast or frown upon. I meant to say we see more of women than we used to see because women have been emancipated from the home and given the freesider it. We see a dom of the professional, commercial and larger per cent of each industrial world. In my early days woman we behold, women could be seen only in the home, thanks to the style except on special occasions when they atmakers and the mo- tended church services or social gatherdistes, and double ings. Except on the special occasions thanks and many bows noted women were in the kitchen, the to the designers of bathing costumes. parlor, the back yard or the cotton fields, Of course I say it is awful, and I always and it was understood that her activities were limited to the fields or places mentioned. Occasionally a woman was permitted to be an assistant in the school, but there was not a very warm welcome for her there, and many good women and men of ancient vintage shook their heads and said home was the only safe place for women. True, indeed, there were a few notable exceptions, even as there were notable exceptions long before the days of which I have written. In every age of the world there have been pioneer women "who blazed their paths where highways never ran." Frances Willard preached the gospel of temperance in our own time and started a movement which drove the saloon from our land and will go on from victory unto victory and triumph unto triumph until the whole wide world is bone dry. Years ago Grace Darling flew in the face of conventionalities, forsook the kitchen and the miracle of the age. and the parlor and gave her life to rescuing drowning sailors. Because of her heroic service there are now life saving people going to a watery grave. When a movement which has reduced the

> And in every age of the world there have

been heroines like Joan of Arc and Flor-

but one day the Creator whispered into admit. We know that in our courts of proved conditions in the Texas Legislaher ear that she had a larger life, and she might let that life flow over into any channel that moved for the betterment of the world or the glory of God. And so today we see more of women than we used to see. In truth we see her everywhere there is work to be done or problems to be solved. Women went into the laboratories, and by patient, painstaking work found that there was in thousands of tons of dirt in the western mountains a grain of radium, and in this grain of radium were cures for thousands of people afflicted with loathsome, destroying diseases. She lived on one poor meal a day and she burned midnight oil until a way was found to draw this tiny bit of radium from the mountain side and give it to the world's sufferers. A woman went to the head of a municipality of a Kansas town where law had long been trodden under foot, and in one short year drove the gamblers and the bootleggers and the highjackers from the town and set up a reign of law and order. Woman donned spot-less robes and went to the couches of the sick and the suffering, and by her skill, her watchful, wakeful vigils and her tender ministrations has touched the rosetint of health into thousands of pallid cheeks. Yes, we see more of women than we used to see, and wherever they have appeared their work is the marvel

I am constrained to say that man, working alone, has failed in many things. As a tiller of the soil he has seen production decrease as the soil grew old and weak and destroying insects grew in number. Perhaps woman will find, just as she found hidden away in tons of earth in the northwest the priceless pearl of health, that which will restore the wasted properties of the soil, and slay the insects that rob our farmers of the fruits of their toil, and the ground will again give its full harvest to the grainaries and factories of the world. Man has for centuries reached the Gospel of Jesus Christ, His love and His power to save, and yet there are teeming millions ence Corday, who struck blows in behalf | who have never answered the call to salvation and are groping their way through a world of darkness and doubt, with no lights beyond. May we not hope that woman may bring to the pulpit a logic so irresistible, a pathos so pure and so pleading that every hearer of the Word will bow in lavish homage before the mangled form which was thrown from Calvary's rugged tree for the healing of the nations? In law-making man has proved a failure, and today was and is obedient to custom and style, wraped up in her mind and heart and we see under a system of burdensome hand. The world needed her and called | taxation the treasuries of state and na-

justice the rich and the poor do not fare alike, and every week we see criminals whom we know have committed heinous offenses against their fellowmen and against society turned loose with bloody hands upon an outraged people. May we not hope that woman, into whose ear the Creator whispers when she is in doubt, telling her what is right and what is wrong, will give to the world better laws, and a better judicial system, under which the highest and the lowest may work out their destiny unhampered and justice may sit enthroned with ermine unsullied and unsoiled?

I looked in on the Texas Legislature

one day last week. I have looked in on every session of the Texas Legislature for twenty years or more. I am not, and have never been a merciless critic of our law-makers. I have found them, as a rule, men of good ability; patriotic men who worked hard-who did their best for their state and sorrowed because they could not do more. But a great change has come over the legislative body. Years ago one could hardly sit in the legislative hall or the gallery on account of the clouds of smoke and the scent of amber that came from over-full cuspidors. And in days gone by the Texas Legislature was a very noisy body. Chaos reigned most of the time, and when a member tried to speak only those who were very close to him could hear what he said. And the conduct of the law-makers toward each other was not always what it should have been. Many of them engaged in wordy wars on the slightest provocation; they some times hurled ink wells at each other's heads. The Legislature of the present session is different-very different. It is an orderly body. I saw no clouds of smoke, neither did I catch any sickening whiffs of amber. Two or three members spoke while I was present, and while the accoustic properties of the hall are very poor, I could hear the speakers dis-tinctly. The conduct of the members toward each other was all that any one could have asked. What worked this great change for good? I will not say, for it may be that I do not know. It may be that a change has come over men who serve as legislators the last few years, and they are more careful of conduct and demand better conditions than they used to. But I saw in the body of law-makers a neatly dressed, pretty little woman, the first woman elected to the Legislature in Texas. There were flowers on her desk-and, by the way, flowers were seen on the desks of several members. I take it that the male members of the Legislature are someher, and she responded nobly. For ages | tion empty, with no money to pay the | what like myself. I know I behave bet-But in saying we see more of women now than we used to see I did not have in mind the percentage of the individual ind

ture are due largely to the presence of the pretty little woman who is a member of the law-making body. And the little woman who is serving her state as a law-maker has succeeded in having a good law-a law in the interest of humanity—written upon the statutes. I read in the daily papers that the woman member is tired of the legislative grind. It is but natural that she should be, for it is a hard and tedious grind, with hardly enough salary to meet actual expenses. I am sure the woman member longs for the quiet of home and the companionship of her children, but she has rendered, and is rendering her state a service, and she will remain. Next session there will be more than one woman

Some years ago I visited the National House of Representatives and lo, a woman was there in the person of Miss Jeannette Rankin. At that time a war cloud was brewing, and pretty soon thereafter a vote was taken on whether the United States should declare war against Germany. When it came time for Jeannette to vote, she declared she couldn't vote for war-and she cried! It may be that Jeannette was right, 'though I felt she was wrong, but to me Jeannette in tears was the sublimest spectacle ever witnessed in our Congress; and I can not believe our country will ever be wrecked when votes are cast with tears in the eyes of the voters. Jeannette made a speech in Congress one day and it was charged that she lost her supporters. The maker of the charge did not say whether the loss of supporters meant a drop of hosiery or a loss of votes, but any way Jeannette was de-feated for re-election. But there is another woman member of Congress now, and there will never be another session of the National law-making body without a feminine name on the rolls.

The other day I was in the home of a sick friend. The doctor came, and lo, she was a woman. Two weeks ago I met with a class of young people who are studying journalism, and lo, all were women. A few years hence the angered man who rushes into the editorial sanctum to whip the editor will face a pair of brown eyes and cherry lips, and will lose the battle even before the argument begins. And I predict the lip stick in the sanctum will mean more courageous editorials and a cleaner press that will be worth more to the country.

Yes, I see more of women than I used to. In truth, women are everywhere and in everything. They are the best part of the love story, the principal feature of every marriage, the heroine of every

# Musical Progress of Texas

By E. CLYDE WHITLOCK

Secretary Texas Music Teachers Ass'n.

Information from El Paso is given un-

der several heads.

School Activities.—Music department has just been started in the El Paso Junior College. The High School and the Junior College combined under the direction of Miss Maybelle Shelton, gave "Bohemian Girl" and "The Mika-Music memory contests are held in been founded with Helen Cooper Wil-

monic Orchestra, Anton Navratil, conthe El Paso Symphony Orchestra, P. J. Gustat, conductor, has been reorganized. Between the two orchestras the city hears one symphony concert each week.

Musical Clubs.—The Woman's Club,

the MacDowell Club, and the Women's Choral Club do splendid work. The Orpheus Club of fifty voices gives two concerts annually with noted soloists, and in connection with the Women's Choral Club, Charles J. Andrews being director of both, gives oratorios and cantatas. The Civic Music Association was founded this year with the purpose of enlarging the number of persons interested in good music by giving high-grade con-certs at a low price. 'A membership of 10,000 is aimed at.

Concerts.—The Philharmonic Society and the Woman's Club bring noted artists to the city each year. t the highest cas ployed. It is a successful to the successful to

Fort Worth.

Fort Worth has been a city noted for its large attractions. It shared with Houston the distinction of being the only two cities in the state which ever had a recital by Caruso. The Chicago Grand Opera Company appeared in the city three successive years on a guarantee basis involving about \$20,000 each year. Galli-Curci was heard in opera in Fort Worth before she was in New York. One of the achievements of which the city is most proud is the production of grand opera entirely with local resources—phony gives a six weeks' season each principals, orchestra, chorus and scen-

S. Losh rehearsals are now under way. for "Lohengrin," representing the fifth season of local opera, a record which it is believed no city outside the large musical centers has equaled for productions on as large a scale. Fort Worth is the residence of Mrs. John Lyons, president of the National Federation of Music Clubs, and one of the most influenthe schools. A school of opera has just | tial women in musical affairs in America today. Three major colleges each liams at the head, which expects to pro- have strong music departments. The duce "Martha" and "Pagliacci" during Harmony Club is one of the largest and the season. Harmony Club is one of the largest and most influential organizations of its Orchestras.—The El Paso Philhar- kind in the state. Both the Harmony Club and the Euterpean Club bring anductor, is continuing its concerts and nually a large number of outside artists. The public school music department, under Miss Alva C. Lochhead, has conducted for a number of years music memory contests with increasing interest and success.

Houston.

Houston has long been active musically and displays evidence of solid development along conservative and permanent lines. The main activities as seen by the public seem to center mainly around the clubs. The Girls' Music Study Club devotes itself to the study of music historically and nationally. The Y. W. C. A. mixed chorus is in its first year, while the Women's Choral Club is in its eighteenth, both under the direction of Hu T. Huffmaster. The Treble Clef Club is in its twenty-first year and is directed by Mrs. R. L. Cox. these clubs bring outside artists to the city. A new organization this year is the Music Council, made up of local talent only, and giving concerts on Sunday afternoon free to the public.

San Antonio. Information has not been received from San Antonio, but as this city is perhaps the musical pioneer of the state, an effort will be made to enumerate some of its activities. For a generation San Antonio has had an orchestra. At

tion of Sam the six weeks. By this means a full or-under way, chestra personnel is obtained and con-tain announced list of musical works, certs of the first rank are given. The orchestra is under the capable direction of Julien Paul Blitz. An organization called the String Players was formed last year and is filling a unique place in the musical life of the community. Musical conditions in San Antonio are somewhat different from any other city of the state on account of the presence of Fort Sam Houston, one of the large permanent military posts of the country.

Waco. Waco has an organization of a type which any musical center should have, but which few do have. This is the Chamber Music Society, organized for the performance of works of a more intimate ,nature for the instru-ments of the string family and harp and piano. This and the Ensemble Club gave musical programs with community singing twice each month last season at the Municipal Club House. Miss Gussie Oscar and Dr. A. G. Armstrong, dean of the English department at Baylor University, have presented many concerts by visiting artists.

General Musical Activity. There are certain general features of musical education and musical activity which require some explanation and no-

There has been a growing interest all over the country in serious musical endeavor among the youth and in no way is this better illustrated than by the spread of the plan to give high school credits for work done in music with teachers outside the schools. This plan has not been established to any great degree in Texas as yet, but is gaining headway each year. It is an important step forward, especially for the talented student who can not afford to sacrifice either his general education or his musical study at a time when every year counts. Abilene was the first city in Texas to inaugurate this plan, with Corsicana a close second. The plan is still

ery and costumes being all Fort Worth and a concert is given each week for sic Memory Contest. In these contests As a means of musical education radio and at the contest are to identify both the selection and its composer, upon hearing the selections played. It is surprising how permanent the effects of these contests are and they will, result in a greatly increased knowledge of standard music among the young people. Corsicana was the first city in Texas to introduce this contest.

A few years ago the State Department of Education, through a committee of prominent musical educators, established a series of standard courses for music work in the high schools of the state. Work done in accord with these courses or their equivalent may be credited on the same basis as any other work in the high schools, hour for hour, and such credits are already recognized for entrance by many of the large colleges of the state. The University of Texas now has this matter under consideration also. This is one of the most important developments in musical education in Texas in many years, and when taken advantage of to its fullest possibilities will greatly expand the usefulness of the school music courses.

Band instrumental music always has been popular in Texas. Many towns have municipal bands-bands that are wholly or partly supported by the citizenship. Such bands have done much to promote love for music in our state and are to be commended for their efforts in behalf of musical progress.

In considering this subject from the standpoint of development within the past year, there is one feature of present musical activity which can definitely come within that period and which can not be overlooked in a musical survey. This is Radio. The expansion of this device has been enormous within the past year, and the time has already arrived when almost every home either has a machine or has access to one. The leading newspapers of the state have taken the lead in furnishing programs

of good music and it is probable that they will find it advisable to offer more and more of the best in music. Many a person who has been laboring under the impression that he could not understand or enjoy music of the higher class, has picked up such a concert over the radio while sitting in his own armchair at home, before a good fire, and to his surprise found that he liked it. Probably by no other means have musicians and the general public been brought so closely together for their mutual understand-

In a survey such as this in which most of the facts have to be obtained from other sources it is inevitable that some errors of statement and serious omissions of important personages and organizations will occur. Such omissions are not intentional and are the result of the conditions under which this article has necessarily been written.

In conclusion, it may be said that every evidence points toward increasing interest in, demand for, and knowledge of good music, and it may be confidently hoped that the remarkable development of the past ten years will continue for another decade.

THE END.

NEFF COUNTY IS PROPOSED.

A new county in Texas is proposed to be named Neff county, in honor of Governor Pat M. Neff. It would be created out of the counties of Navarro, Limestone, Freestone and Hill, with Wortham as the county seat. It would be about 60 miles in length and 12 miles in width. It is doubtful if the measure is put through at this session of the legislature, for the session is far advanced and the remainder of the time will be a busy period with the lawmakers without their fighting over the creation of a new county, but the preliminary stages are being arranged so that it may be possible to enact the measure two years hence. However, it is not impossible that some quick move ment of this vast radio audience and a | will be made and the new county creat-

Several extensive beds of iron mineral ore in Cass County, East Texas, are owned by Barringer, Terrell & Johnson of Philadelphia. These gentlemen recently inspected the beds and stated that they would soon begin developing the properties.

GIRLS TO CAN CHICKEN MEAT.

Members of the domestic science classes of the Texas Woman's College of Fort Worth, are making preparations to can chicken meat on an extensive scale, to be used at the college later in

Besides the art of canning chicken meat, the demonstration will include roast beef, steak and soup stock.

GIFTS TO LIBRARIES.

Gifts aggregating in value more than \$15,000 were made in the year 1922 to thirteen libraries in Texas, the gifts ranging in value from \$100 upward. Reports of these were made to the State Library at Austin, which acts in a helpful and advisory manner to many of the small libraries. The largest single gift was \$10,000.

TEXAS IDEAL FOR COTTON MILLS.

H. L. Hagerman, expert mill man and engineer of the J. E. Sirene Co. of Greenville, S. C., who was in Texas recently on a tour of inspection for his company, says that conditions for textile manufacturing in Texas surpass those of the New England States. He is compiling estimates for four cotton mills to be erected in Texas in the near

ANOTHER YOUNG PREACHER.

Greenville, Texas, comes forward with the claim that Mayo Cleveland is the youngest liscensed preacher in the world. Mayo is 8 years old, son of Mrs. W. G. Cleveland of Greenville. He delivered his first sermon to a large congregation at the Kingsville Baptist Church of Greenville, Feb. 12. His first sermon was well delivered and well

FORT WORTH AGAIN LEADS IN POSTAL RECEIPTS.

Fort Worth again led the United States in postoffice receipts, this time for January, compared with the same month last year, when its increase was 38.17 per cent. The postal receipts for January in Dallas amounted to \$243,189, an increase of 16.5 per cent; Fort Worth, \$182,761, an increase of 38.17 per cent, and Houston, \$119,857, an increase of 13.33 per cent.

HELIUM IN THE PANHANDLE.

Tests made by the Department of the Interior are said to have shown that the gas from the Panhandle, near Amarillo, in certain portions is very rich in helium content, with the supply in considerable quantity.

The rock pressure of the completed wells varies from 420 to 730 pounds in the shallow wells and very much heavier in the deep wells. The heat value is unusually great.

ENCOURAGEMENT FOR POETS.

It is not often that amateur poets are encouraged, but the Baylor College for Women at Belton is doing that very thing. The second annual high school poetry contest has been announced and competitors have until April 16 to send in their contributions. The winner is to receive a literary scholarship in Baylor College amounting in value to more than \$100, but if the winner be a boy he will receive a prize of \$20 in gold.

NEW SUGAR REFINERY.

It requires money to build a sugar refinery, much more than is needed to drill forty oil wells, so the profits must be large if the investors are to receive any returns. The sum of \$5,500,000 will be required to build and equip a sugar re-finery at Texas City, the foundation of which is to be begun in March and which is to be completed in time for the next Cuban sugar crop. The company has been financed, officers elected, and contracts let for building and machinery.

GROWTH OF A. & M. COLLEGE OF TEXAS.

The annual report of the A. & M. College of Texas for the year 1921-22, has been issued from the press. This annual report shows that 2,864 students were enrolled in the college during 1921-22. Almost every county in the state is represented in the student body, and students from 21 other states in the Union and from 13 foreign countries also were represented.

AIRPLANE WILL CARRY EIGHT MACHINE GUNS.

An airplane equipped with eight machine guns and capable of firing approximately 5,000 rounds was tested by Brigadier General William Mitchell, assistant chief of the Air Service, at Kelly Field, San Antonio, Feb. 5. The plane is the first that has ever been equipped 1 number of machine guns. periments have been made

of the initial test were

FORT WORTH PLANNING GOLDEN
JUBILEE.
Fort Worth's golden jubilee, celebrat-

ing her fiftieth birthday, will be held San Jacinto Day. The celebration is be-ing planned by the city, business men and old settlers of the community.

DOME TO BE ILLUMINATED.

The dome of the capitol building at Austin is to be illuminated so that it will be a shining mark, and seen from afar. The dome has not heretofore been dark at night, but the few lights that have shown from it are not considered commensurate with the importance and dignity of the building, hence a survey that was recently made to determine the illuminating possibilities.

HEAVY TRUCKS BARRED.

Wichita County has some new paved highways and is proud of them. In order that they may not be soon destroyed the county commissioners have decided to bar all trucks carrying more than three tons. The commissioners contend that it would be better to permit two trucks carrying three tons each to pass over the road than to permit one truck carrying six tons or even five tons or four tons. It is understood the ruling has been accepted without argument.

DAMMING THE GUADALUPE.

Damming the Guadalupe has been popular in the last few years by towns and cities along its channel. The Texas Central Power Company at Cuero for several years has had a dam across the Guadalupe river near Cuero which has developed 700 horsepower. At a cost of \$75,000 the company has raised the height of the dam and equipped a new COTTON MILL EXPERTS TOUR hydro-electric plant which enables it to generate 1,500 horsepower.

PERMIT FOR NEW HOTEL AT AUSTIN.

Permit to erect a \$500,000 hotel at Congress and Seventh avenues, Austin, was issued to the Baker Hotel Company Feb. 10. It will be operated on the European plan. The site is 92x160 feet. The building will be twelve stories high and have 215 rooms. The plans provide for future additions with 185 rooms, or 400 altogether. The hotel is expected to cost approximately \$1,000,000.

\$10 BUYS 100,000 GERMAN MARKS.

Morris Stein of Marshall purchased through a New York bank recently 100,-000 marks in German currency for \$10 of United States currency. Before the World's war, German marks were worth 24 cents each. Mr. Stein came to America sixty years ago from Germany and has lived in Marshall during the entire time, with the exception of four years that he served in the Confederate army.

PREDICTS DECREASE IN LUMBER.

Pine lumber production in the South will decrease steadily and the bulk of this lumbering will have ceased entirewithin fifteen years, predicts John H. Kirby, chairman of the board of the Kirby Lumber Company and the Kirby-Bonner Lumber Company of Houston.

TEXAS COTTON MILLS PROFIT-

ABLE. Roscoe Ady, industrial commissioner of Fort Worth Chamber of Commerce, has compiled a report on the profits of 17 cotton mills in Texas. The report embodies 17 mills out of 21. Profits of some of the 17 mills range as high as 25 per cent. In many instances the mills have been financed by local capital. New England and other outside textile interests have bought several of the

GRADE CROSSINGS STILL FATAL. Warnings repeatedly appearing in the newspapers about the danger of grade crossings to automobilists seem to have no affect in reducing casualties from this source. Ninety-nine persons were killed in automobiles at railroad grade crossings in Texas during September, October and November of last year, according to figures prepared by the Railroad Commission, an average of more than one death a day.

A little caution and less hurry on the part of auto drivers will materially reduce grade crossing accidents.

FRANCISCAN MONKS BUILT

IRRIGATION SYSTEM. Workmen excavating for residential foundations near the San Juan Mission at San Antonio have uncovered additional portions of the acqueduct built more than two centuries ago by the Franciscan monks for irrigation of their fields near the mission.

These ruins, added to those which were uncovered about twenty-five years ago, have enabled scientists to describe accurately the surroundings of the

famous old mission in its prime. The scientists sent from the University of Texas declare a veritable Garden of Eden surrounded the mission in the early days. Tropical flowers and fruits grew in abundance in fields stretching out from the mission for nearly half a mile in every direction, irrigated by the mounted with four guns. acqueduct water system the monks have devised. The water was from the San Antonio river. that hour.'

COUNTY FARM AGENTS.

County farm agents must qualify for their work if they expect to get places in Texas. Fifteen men were examined recently at A. and M. College for appointment as county farm demonstration agents, positions for several of them being available immediately, and at the same time eight women were examined for home demonstration work.

METER READERS BLAMED.

Senator Clarke of Schulenburg appears to believe that the meter readers who give in the figures upon which his electric light and gas bills are based, do not read the meters correctly. He does not say so in those words, but he has introduced a bill prohibiting managers and employes of electric and gas companies from reporting registrations for light and gas at a larger amount than is actually registered by meters or causing meters to register larger than the actual amounts used.

SCHOOL CHILDREN'S PER CAPITA IS \$13.

S. M. N. Marrs, State Superintendent of Public Instruction, has announced a supplemental apportionment of the available school funds of \$3 a child, which brings the total for the current scholastic census to \$13 per capita.

This additional allowance was made possible by the bill signed by the Governor, appropriating \$3,000,000 out of the general revenue fund to supplement the school fund. None of this is to be used for salary increases, but only for prolongation of terms.

NORTH TEXAS.

A party of cotton mill experts which has been considering the location of a 12,000-spindle cotton mill in Texas re-cently made a tour of North Texas cities to inspect towns making a bid for the

In the party were M. L. Cannon of Concord, N. C., capitalist; L. W. Robert Jr., textile engineer of Atlanta, Ga.; C. E. Calder, president of the Texas Power and Light Company, and John W. Carpenter, vice president of the Texas Power and Light Company of Dallas.

STATE OF TEXAS ON CASH BASIS.

On March 1 the State of Texas will again be on a cash basis after having been operated on a deficit since last September, says C. V. Terrell, State Treasurer. He added that on March 1 it is expected there will be approximately \$10,000,000 in the State treasury to the credit of general revenue.

Treasurer Terrell declared that the collection of delinquent taxes is better this year than last, which is a strong indication that the financial condition of the State is much better than one year The deficit in the treasury last September, when payment of warrants from general revenue was suspended, was over \$1,000,000, which grew to a peak of about \$3,000,000, while the deficit at the present time is slightly above \$1,000,000, and is being daily decreased.

PORT OF CORPUS CHRISTI.

Port development at Corpus Christi is expected to get underway early in the summer. Between \$5,000,000 and \$6, 000,000 will be expended, according to authoritative estimates, in order to construct such a port as Corpus Christi has determined to have. The Federal government is to provide \$2,500,000 for the entire project and the first installment of \$750,000 will be available this summer. The City of Corpus Christi has voted bonds to the amount of \$2,500,000 and the County of Nueces has voted \$1,-000,000 bonds, and the state is expected to give some aid. The entire work is expected to occupy about two years. First in order will be the dredging of the channel from the jetties to Corpus Christi, about 21 miles, and then turning basins, wharves, docks and a terminal railroad must be constructed. Corpus Christi expects to attain recognition as one of the best and safest harbors along the gulf

PRINTING THE NEWS.

During the mid-winter meeting of the Texas Press Association at Austin, Feb. 8-9, an editor made these observations in respect to the kind of news that is usually printed in newspapers:

"Would you rather read about a man who smashes a tin pan over his wife's head, or about a man who kissed his wife good-by before he went to work?

"Would you rather read about a man who put rat poison in his wife's cup of tea, or about the man who arose in a prayer meeting and spoke sincerely on his duty to society? "Would you rather read about a wom-

an who killed her husband in a fit of jealousy, or a full report of a sanitary board on health conservation, or child welfare?

"We do not expect you to answer these questions. Every editor must take your tests into consideration when he proceeds to tell you the latest news. The day may come when good actions

will receive as much attention as bad

conduct. But the clock has not struck

ING TECHNOLOGICAL COLLEGE. March 2 has been definitely decided upon as the date on which to hold the West Texas jubilee celebration at Sweetwater to commemorate the authorization of the Texas Technological College.

By a vote of 24 to 5, the Bledsoe bill, creating the Texas Technological College, an institution of higher learning, to be located in the western part of Texas, was passed finally by the Senate Jan. 29th, and signed by Governor Neff Feb. 10th.

the Senate Jan. 28th, and Senate Jan. 28th, and Senate Jan. 28th, and Senate Jan. As it stands, the bill calls for a total appropriation of \$1,002,500, divided as follows: \$150,000 for purchase of college site, \$500,000 for buildings for the fiscal year 1923-24, and \$350,000 for buildings for the fiscal year 1924-25. The only appropriation called for immediately in \$2,500 to pay expenses of commission to lois \$2,500 to pay expenses of commission to locate site for the college.

Under the provisions of the bill, the college

Under the provisions of the bill, the college will be located in the western part of the State by a board consisting of the chairman of the State Board of Control, the State Superintendent of Schools, the presidents of the State University, A. and M. College and College of Industrial Arts, a majority of whom can fix the site for the college.

This institution is to have its separate governing board and its own president, independent of other State institutions.

Appropriations are \$150,000, available Sept. 1 of this year, to purchase land to be used as a site; \$500,000 for the fiscal year ending Aug. 31, 1924, and \$350,000 for the following fiscal year for buildings and equipment.

year for buildings and equipment.

It is to be a Federal land grant college, and is to be co-educational. It will have a board of

is to be co-educational. It will have a board of nine directors to serve six years, the terms of three expiring every two years.

The bill establishes a college for white students to be known as the Texas Technological College, to be located north of the twenty-ninth parallel and west of the ninety-eighth meridian, giving thorough instruction in technological control of the twenty-ninth parallel and west of the ninety-eighth meridian, giving thorough instruction in technology. nology and textile engineering from which a nology and textile engineering from which a student may reach the highest degree of educa-tion along the lines of manufacturing cotton, wool, leather and other raw materials produced in Texas, including all branches of textile engineering, the chemistry of materials, the technique of weaving, dyeing, tanning and the doing of any and all other things necessary for the manufacturing of raw materials into finished

The college shall also have complete courses The college shall also have complete commercial in the arts and sciences, physical, social, political, pure and applied, such as are taught in colleges of the first class, leading to the degrees of bachelor of science, bachelor of arts, bachelor of literature, bachelor of technology, and all other degrees given by nology and any and all other degrees given by colleges of the first class; and particularly to give instruction in agricultural pursuits and

domestic husbandry and home economics.

In addition to the courses provided in technology and textile engineering, the college shall offer the usual college courses given in standard senior colleges of the first class and shall be empowered to confer appropriate degrees to be determined by the board of directors and shall offer four-year courses, two-year courses, or short-term courses in farm and ranch hus-bandry and economics and the chemistry of soils and the adaptation of farm crops to the peculiar soil, climate, and condition of that portion of the State in which the college is located and such other courses and degrees as the board of directors may see fit to provide as a means of supplying the educational facilities necessary for that section of the State, and it shall be the duty of the board of directors to furnish such assistance to the faculty and stu-dents of said college as will enable them to do original research work and to apply the latest and most approved method of manufactur-

All male students attending the college shall be required to receive such instruction in milibe required to receive such instruction in mili-tary science and tactics as the board of direc-tors may prescribe, which shall at all times comply in full with the requirements of the United States Government now given as pre-requisite to any aid now extended or hereafter to be extended by the Government of the United to State institutions of this character and all such white male students shall, dur-ing their attendance to the college, be subject to such military discipline and control as the board of directors may prescribe.

MATERNITY ACT PASSED BY SENATE.

By a vote of 17 to 8, the Senate passed finally the bill accepting for Texas the benefits of the Federal Maternity and Child Welfare Hygiene Act, known as the Sheppard-Towner Act.

Under the terms of the bill Texas would be found with the Federal Government. match funds with the Federal Government to provide for the administration of the maternity welfare provisions. This would mean a total of \$75,000 a year for two years, half being paid by the Federal Government and half by the State.

Provisions of the act would be administered through the Child Hygiene Bureau of the State Health Department.

GOV. NEFF RECOGNIZES MEXICO.

Governor Neff signed and filed with the State Department the House concurrent reso-Obregon Government of Mexico, and declaring that the State of Texas is pleased with the administration of President Obregon, and also congratulating the people of Mexico upon the "new era of peace, prosperity and amigable "new era of peace, prosperity and amicable relationship which has been established with

BILL FOR RECIPROCITY IN INSURANCE PASSED.

The Quinn bill for reciprocity in insurance was passed Jan. 24 so far as the House is concerned, receiving a vote of 80 to 25. It provides that any insurance concern from another State or a foreign country that desires to operate in Texas must not only comply with the erate in Texas must not only comply with the Robertson act and other Texas provisions, but Robertson act and other Texas provisions, but meet any additional requirements that its home State or country exacts of Texas companies which seek to operate in them. It was said that the act will require outside companies to pay about \$200,000 more fees annually into Texas than at present Texas than at present.

> FIRST PAYMENT ON SCHOOL APPORTIONMENT.

The State Board of Education Feb. 3 made The State Board of Education Feb. 3 made the first payment of \$2 on the per capita apportionment of \$10 due the public schools for the year 1922-1923. This will amount to \$2,-594,478. There is not money yet available for the payment of State aid appropriation, as there is still a deficiency in the general revenue.

A number of independent districts will not receive the apportionment at this time, on account of failure to file depository bond, or on account of having persons on the School Board who are financially interested in the depository.

TO STOP PROFESSIONAL DEPLE TEXAS HOUSE AND SENATE.

The House adopted Feb. 12 an are the present fishing laws, by which a depletion of streams in specified to be stopped. Representative Fands of the bill, said that it would stop who send their catch to the city for the bill prohibits the said of t JUBILEE CELEBRATION COMMEMORAT-

Stories for Boys and Girls

**BUFFALO COMES** BACK

The buffalo is coming back. The picturesque animals which once thundered across the prairies in such vast herds but which are known to the present generation chiefly by the . figure on the fivecent-piece, are now over five and onehalf times as numerous as they were 20 years ago, according to Dr. T. S. Palmer, of the U. S. Biological Survey.

In 1902 when Congress made the first and only appropriation of \$15,-000 for their pur-

chase and maintenance, there were only 1,750 of these ox-like animals alive. Now there are over 10,000 in existence, 6,000 in Canada and approximately 4,000 in the United States. There are 1,250 in the nine U.S. Government herds alone and all but about 130 of these were born on the reservations. The largest herd is in Yellowstone Park and is made up of 506 bison. Montana Bison Range has 388, the Wichita pre-serve 128 and Wind Cave 71.

Colonel Charles Goodnight's herd of buffalo in the Texas panhandle is a very large herd. By inter-breeding the colonel has developed what he terms the 'Cattalo," a cross between a buffalo and a native Hereford cow.

Just how old a buffalo gets to be is not known. As far as the records show the Methuselah of the species is one in Paris which is said to be 31 years old. The oldest buffaloes in the government herds are a venerable cow on the Wichita preserve now 24 years old, and Kalispel Chief, the leader of the Montana herd, now 20 years old.

It is known that the cows begin to breed in their third year. When they stop is a biological mystery. There is a record of a cow breeding in her twentysixth year and one on the Wichita preserve had a calf at the age of 22.

The staked plains of West Texas was a favorite ground for millions of buffalo. They ranged from the Red to the Rio Grande Rivers in countless numbers and were monarchs of a wide domain until exterminated by white buffalo hunters. Fort Worth, Texas, in the early days, was the largest trading point in the Southwest for buffalo hides. In the late seventies buffalo hides sold as low as \$1.00 per hide, and the best buffalo steaks seldom sold for more than 5 cents per pound.

The American bison (or buffalo) ranged almost entirely west of the Mississippi River. No buffalo were ever seen east of the Hudson River or Lake Champlain.

#### THAT AWFUL TENTH CENTURY.

During all the known history of the world there was never a century worse for humanity than the tenth in Europe. With superstition the one great thought, the people, great and small, turned into ignorant beasts. Bathing was unknown, food was eaten only with the hands, even agriculture was forgotten. The people huddled here and there in the most miserable of huts. Shoemaking became a lost art. People wore rags or straw for the foot, and rags, straw or untanned skins for clothing. Horses were uncommon and the European world was deserted by learning of all kinds.

It is a hard task to even attempt to

tell what happened in the ninth, tenth and eleventh centuries, because there were no contemporary historians for about two hundred years, and all we know is from the writings of the Moors. The Popes appear to have been in con-trol and they fought Emperors and Kings until Europe was covered with anarchy. Rome was prey to terrible disorders with violence, bribery and assassination. Infamous women ruled almost the entire world, cities fought among themselves, cities fought cities and all was chaos until a republican sentiment came through the Greek, Indian and Moorish stragglers who came drifting along during the eleventh and twelfth centuries, and from that period the modern Europe began.

#### RACING FOR BRIDES.

Among some of the less civilized peo-ples of the world, matrimonial affairs are much more lively than they are in

Parents belonging to the Elk tribe of American Indians have the right to dispose of their daughters when they are old enough to wed. If a girl does not approve of the husband selected for her, she need not marry him provided she can outrun him.

In the reservations are vast mounds which are used for religious ceremonies,

and around the base of these are tracks. As soon as a girl has signified her desire to get rid of her suitor, one of the chiefs of the tribe ascends to the top of the mound, and sits in such a position that he has a clear view of the track at its

The woman stands on one side of the mound and the man on the other. At a given signal they start running in the same direction around the mound. If the man overtakes the girl before she has completed three rounds, he can claim

The three-wheeled automobile which was introduced here some time ago but which was laughed off the roads is becoming popular in England. It is very convenient and economical.

#### TWO GREAT TEXAS INSTITUTIONS

(Continued from Page 2.) is only after this proves a failure that manual instruction is adhered to.

The visiting editors were given an opportunity to see what has been done in oral instruction and the program showed marvelous results. The demonstrations of rhythm work, of interpreting from lip movements and the actual oral progress of those pupils who formerly could not utter a sound, were all simply wonderful. The demonstrations by blind, deaf and dumb pupils also elicited much interest. Miss Mamie Heflybower's class showed better than anything else, we think, just what can be accomplished. We cannot imagine a more pitiful sight of absolute helplessness than a child who cannot see or hear or speak. How gigantic the task to do salvage work there. Yet one of Miss Heflybower's blind-deaf pupils has mastered an ordinary typewriter and she can write better than many of us who operate typewriters. Indeed, they have brought that child out to where she is smart and capable, and she takes great interest in affairs of the world.

Isn't it wonderful that Texas-our grand old state—is doing things of this Haven't we a right to feel proud as citizens? And shouldn't we freely give unstinted support to such undertakings? It means more self-supporting people; it means less ignorance and consequently less vice; and above all, it means greater happiness to the little hearts involved.

Perhaps the citizenship at large has not stopped to think on the value of this service. We all know of course that there is a school for the deaf down at Austin, and we know many people are sent there. Have we not, however, looked upon it as more of a place to take care of such unfortunates than a place to recreate them and save them from a monotonous and useless life? Have we thought about them being trained to be efficient in many trades and professions? Have we thought about them finding through education and training a world of their own in which they can render service and be happy

Know thy government! Learn what a big and noble and helpful institution it is. Such a knowledge will inspire you with greater charity and patriotism. No Texas editor went to the blind and the deaf and dumb schools at Austin on the 9th day of February and saw what was being down there, who did not resolve in his heart to be a better citizen, to open a greater soul to the needs of humanity, to have a more perfect faith in the wisdom and the honesty of our government officials.

There are questions upon which we differ; there are issues that divide us; there are conflicts now and then that cause unkind words and bitter thoughts. But at the doors of such institutions, as I have tried here to tell you about, we can all stand together with uncovered heads, and every polical element can unite in saying: "This is the accomplish-ment of a great people; this is the re-sult of that good that after all dwells somewhere in practically every heart."

### DOLLARS AND SENSE

(Continued)

who pays all these bills? "Are we of this generation teaching the young men or the young women of this nation to save any-thing to pay tax on? Are we teach-

ing them in any way to support the government that protects them? Are we teaching them to appreciate the people who do support the government? Are we even teaching them to accept the free education that the tax payers provide for them?" We must have better schools for all the children especially the children of the country. And it is going to take more money to get better schools. but not tax the honest to God honest tax payers any more for schools. Let's fix things so that all the people who spend all their money on themselves will have a chance to keep up the institutions that make America a fit place for them to live. We believe every man, women and child, should be taught to help support the public school. No, it would not hurt the poor family. Any family that was too poor to use these essentials was too poor or was too thrifty to use these nonessentials would not have to pay the tax on them. After all is the problem of of the public school in America a question of dollars or just good common sense?

Dancing Made Easy.

On Willie's return from his first his Aunt Amelia indancing lessor his Aunt Amelia in-quired, "Well, Wille, how did you like your dan-ing lesson?" "on," he replied, "It's casy; all you have to do 's turo around and keep wiping your feet."

TESTED RECIPES.

Prune Charlotte.

2 cups prune pulp (cooked).

1 cup chopped walnuts or pecans.

1 teaspoon vanilla.

2 tablespoons gelatine.

½ cup cold water.

2 cups whipped cream.

Rub prunes through coarse sieve, add nuts and vanilla. Soak gelatine in cold water until dissolved; melt over hot water, add to the other mixture; mix well. Whip cream fold into mixture, pour into wet mold, chill until firm. Unmold and serve with whipped cream on top.

Date Loaf. Date Loaf.

eggs. tablespoons butter.

cup sugar.
package dates (seeded). cup nuts.

1½ cups flour. 2 teaspoons baking powder. 1 teaspoon vanilla. 1/4 teaspoon cinnamon.

disease. The familiar comparison is that of the body to the furnace. We must give it good fuel and remove the ashes and cinders in order to obtain the proper and whole use of food. It must be prepared rightly, then properly eaten to be digested well. Digestion is that process by which food is made ready for use in the body. The process is carried on in the mouth, stomach, small and large intestines.

The food enters the body through the mouth, and here the first process of digestion begins in mastication (chewing the food). Many people do not realize the importance of proper mastication, and really it is, in my mind, the most important, because without it all other agents are handicapped. During mastication, food is mixed with the saliva, which softens and moistens the food, and contains digestive juice that changes Leaspoon cinnamon.

Cream sugar into lightly beaten eggs, add butter (melted). Sift part of the flour over nuts and dates. Sift baking powder with the rest of the flour into the first mixture. Then add the floured dates and nuts, also vanilla and cinnamon. Mix all well. Pour in a well-greased and floured pan. Have oven hot. When you put in, lower fire and gradually increase until done. It is done when firm to touch, usually taking from 30 to 45 minutes to bake.
