EARLY rising was never one of my better habits. Having been a town kid, I could sleep later, not having to catch a school bus. Some years back, I worked the graveyard shift on a daily newspaper, which prompted the Missus to let me sleep past noon. After six years of this, it is no wonder I am not an early riser.

Tuesday morning was one of those days. Had to arise earlier than usual to be present at a 6:30 Scout Committee meeting. Gosh, my alarm clock isn't awake at that time of day. Will have to remind the Scout Executive that I could not find any page in the Scout manual setting 6:30 a. m. as a favorable meeting time.

LOCAL items are just as much of this newspaper as club, church, and local events. These items are of interest to out of town subscribers. If you have such items of interest, please call the News office on Monday and help us localize your hometown paper. The number to call is 998-4888.

## Conditions Right For Ducks

Playa Lakes in the Lynn County Soil and Water Conservation District have proved favorite stop-over areas for ducks this year. More than usual numbers have been seen over previous years.

The ducks are paired and beginning the annual northern migration flights. Plentiful water and good feeding conditions have caused the flights to stop in this area.

Feed is good because much of the grain sorghum stubble and diverted acre fields planted to sorghum is still on the land and have ample grain left for the migrating ducks.

### Bill Griffin, County Agent, Says

County Agricultural Agent Bill Griffin says that many people have asked about the chemical composition of mesquite seed and from a recent release from Texas A&M University he reports their findings.

The mesquite bean is 41.9 percent crude protein, .53 percent phosphorus, .48 percent potassium and .06 percent calcium. The bean and the pod are 11.0 percent crude protein, .10 percent phosphorus, .86 percent potassium and .06 percent calcium.

The mesquite pod alone has 7.6 percent crude protein, .09 percent phosphorus, .83 percent potassium and .08 percent calcium.

Griffin says that mesquite beans would make fair livestock feed, but it must be remembered that it takes a lot of beans to make a pound of feed. Also mesquite does not make a bean crop every year and uses large amounts of water. If this water were used to grow grass, up to four times more feed would be available.

This was taken from the last issue of "Range Management Notes".

FOSTER E. DUDGEON

Dudgeon takes part in mission U.S. Air Force First Lieutenant Foster E. Dudgeon, son of Mr. and Mrs. Rush Dudgeon, Rt. 2, Tahoka, recently took part in a successful ground support mission near Pleiku AB, Vietnam.

Lt. Dudgeon, an AC-47 Dragonship pilot, scrambled to the support of friendly forces ambushed by enemy forces in a tea plantation 11 miles southwest of Pleiku.

The Dragonship crew provided flare illumination for the friendly forces and fired into the enemy mortar positions until they were silenced.

Lt. Dudgeon is a member of the 4th Air Commando Squadron at Pleiku.

A 1960 graduate of Tahoka High School, the lieutenant received a bachelor of science degree in agricultural economics from Texas Technological College in 1966. He was commissioned through the Air Force Reserve Officers Training Corps program the same year.

on April 8, 1968. Mrs. Frances Dunagan and Mrs. Elnora Curry are in charge of the program.

Mrs. Johnny Raindl is president of the organization and she urges everyone in the county who is interested in our boys and girls in service for our country to attend the meeting.

After the program and short business session, refreshments will be served.

## Pamphlet Available On Overseas Mailing

An illustrated pamphlet - Mail For Servicemen - outlining the expanded program for airlifting letters, packages and other military mail overseas at low postal rates is now available at the Tahoka Post Office. Postmaster Charles Townes announced today.

The postmaster added that "as a result of new legislation and action by President Johnson we are now airlifting more than 75 per cent of all mail going to the military men and women stationed abroad. We hope this guide will help more American families be familiar with these services and use them."

The eight-page pamphlet illustrates three services for airlifting parcels at rates the average family can afford, the speedy service now available for newspapers and news magazines to most overseas bases, the special rates for books and similar educational materials, and how to mail sound-recorded personal messages. The guide also provides parcel wrapping instructions, information on the time it takes parcels to reach Vietnam and other bases from major U.S. cities, and pointers on the correct way to address military mail.

A family sending a 10-pound package from Tahoka to Vietnam, for example, pays only \$2.75 on a package marked "PAL" while the air parcel rate for the same package is \$6.59. Postmaster

Townes said.

On parcels weighing less than 5 pounds it might be more advantageous for a family to use the older (SAM) Space Available Mail service, which provides surface transportation to the port of embarkation and airlift overseas. A four-pound SAM package to a European military post from Tahoka costs only \$1.10. On packages weighing under two pounds, air parcel post is often the patron's "best buy" for through airlift service, the pamphlet suggests.

Copies of the pamphlet have been distributed by the Tahoka Post Office to all local families known to have relatives serving in the military forces overseas; however, a copy may be obtained at the post office by any family which did not receive one.

**The Philosopher**  
**Try Farm Products**  
  
 (Editor's note: The Sandhills Philosopher on his Johnson grass farm comes up with a speculative idea this week, his letter reveals.)  
 Dear editor:  
 I don't want to appear money mad but I was looking back through some two-weeks-old papers because I didn't have any fresh ones on hand and I got to reading some more about the gold situation.  
 As I now understand it, the gold crisis developed because a lot of speculators started running the price up, from \$35 an ounce, which the United States was trying to maintain, to as high as \$45 and while I haven't been able to understand why we didn't unload at that \$10 an ounce profit, since we own most of the gold anyway, and switch to tin foil or sodawater bottles to back up our currency, that's not what is now engaging my interest.  
 What I'd like to know is how do you get in touch with those speculators?  
 I would like to turn them loose on farm products.  
 Take eggs for example.  
 For some time now egg producers have seen the price pegged at about 30¢ a dozen, when it costs more than that to break even.  
 NOTICE—I am no longer responsible for any debts, other than my own. Jim Bingham. 27-3tp
