Have you ever seen a Razorback pushing a wheelbarrow down a street in Tahoka. Well, you should be a sight to see and I hope to be in that town next Saturday. The Arkansas Razorbacks and Texas Longhorns will tangle on television for the West Conference Championship. The Longhorns are No. 1 in the nation and also put that title on the line several weeks ago. Bill and I made a little wager on the game and if the Longhorns win Bill will push me in a wheelbarrow from his station at the Lynn County News office. Unbelievable happens I will Bill from the Lynn County News office to Chancy and Son's Station. This event will take place Saturday at 4:30 p.m. The game is completed. Miss it. Past Days In Lynn County

Tahoka's school grounds will undergo extensive improvements next spring and summer, if plans now being made are fulfilled.
Tuesday the school board employed J.A. Pruitt, Big Spring engineer, to draw plans for building a football stadium, a bus house, levelling and landscaping the campus, and possibly other projects.
Whether or not the work will be done depends on the outcome of an application for WPA labor which will be filed in the near

future. However, district WPA supervisors have given the trustees assurance of that organization's cooperation.
Tahoka's part of the project will be to furnish material for the work, and the board proposes to secure this from the old South Ward building and possibly the older portion of Central Ward building.
Mrs. Luallin's Sunday School class of 14 year old girls had a party in the home of Mrs. Carl Owens Monday night at 7:30.

There were thirteen girls present, including Misses Jewell Young, Billie Lee Burleson, Dorothy Fulkerson, Ethel Good, Dorothy Treet, Billie Margaret Riddle, Dorothy Conway, Betty Lou Ivey, Vinita Cooper, Doris Latham, Joan Owens, and Mary Beth Roddy.

Upon approval of the appointment by Washington authorities, C. A. Lawrance, assistant county agent here for several years, will become superintendent of the Lyntegar Rural Electric Co-operative, Inc. His approval is expected within the next few days. His successor as assistant county agent has not yet been announced.
Mr. Lawrance's work as assistant county agent has been solely in connection with the various Government agricultural programs. He is capable and efficient and is believed to be eminently well qualified for the position to which he has been appointed by the Lyntegar board of directors.
Harry N. Roberts of Lubbock, who prepared the plans and specifications for the Lyntegar project, has been officially named as the engineer. John Heck of Wilson is president of the board of directors and Hon. Tom Garrard of Tahoka is attorney for the concern.
The project takes its name from the fact that it lies principally in Lynn, Terry, and Garza counties. One line will also extend into Hockley counties. Headquarters are to be in Tahoka, as this is the most central point. It is hoped that actual construction work may begin about January 1.
It has also been announced that there will be some slight change in the work of the local county agent's office, but according to Mr. Jones and his assistant, Mr. Lawrance, such change will be confined to minor details, and about the same office force will be required as heretofore.

man Reid, Allen Luallin, Odean Millman, R.L. Bosworth, Bryan Wright, Felix Macha, Buster Pitts, James Price, J. G. Adams, Dick Bosworth, Lester Adams, Wayne Coffee, Frank McGlaun, J.H. Dyer, D.F. Reddell, Finis Connolly, Tom Hale, and Mr. and Mrs. Owens.

The new O'Donnell First Baptist Church has been completed and a week from Sunday, May 28, the building will be formally opened with appropriate ceremonies, to which all members, former members, and friends are invited. Rev. J.A. Lunsford, pastor, tells the News.
The new building is of brick, two story, modern in design, and is a distinct credit to the fine town of O'Donnell. The main auditorium has a seating capacity of 400 people, and there are 18 Sunday School classrooms.
The structure, which surmounts the basement built several years ago, has a value of \$16,000, Rev. Lunsford said.
A number of Tahoka people will probably attend the opening.

Mr. and Mrs. F.T. Carson of Washington, D.C., are expected to arrive Friday of this week for a visit here with Mrs. Carson's parents, Mr. and Mrs. W.L. Knight, and sister, Mrs. J. Emory Nance.
Mr. and Mrs. M.L.H. Baze of Brownfield visited Mr. and Mrs. I.M. Draper Sunday.

SCS Report

GOING GOING GONE
"Gone with the wind" is a tragic story that happens too often of the nation's most productive topsoil. Every spring, somewhere, it's the same story-damaging winds sweeping soil from fields with costly consequences.

Much of this wind-blown soil ends up in fencerows and ditches, resulting in costly clean-up jobs. Dust entering machines may shorten their life span. And dust entering the sensitive nostrils of men and animals reduces their efficiency.

Blowing dust and dirt create problems and inconvenience for a lot of people, but for farmers, the most serious result is economic. Loss of fertile topsoil may mean reduced crop yields. Wind-borne soil and sand particles also have an abrasive effect on young plants. In addition, weed seeds and chemical residues may be moved across farm boundaries.

Soil is the farmer's bank. It won't stand too many promissory notes says Richard Christie of the Soil Conservation Service. When the soil is gone, man must go, and the process does not take long.

Proven control measures can reduce wind erosion. Among these, minimum tillage provided the best protection. But regardless of tillage practices remember that heavy crop residues on or near the surface will protect the topsoil. These residues are a by-product of many Agricultural crops, they should be put to use and not abused by burial or destruction.

Soil Conservation is soil insurance. Insure your future by the management of residues, to protect our land from erosion. America belongs to us all, let us all preserve it for our prosperity.

The following letter appeared in "Dear Abby" which we feel is worth passing on: Dear Abby: I am a plastic surgeon and a very

busy one, but I am not too busy to write this letter asking you to please implore parents (especially mothers) to never—and I repeat, never—allow their children to stand up in either the front or back of an automobile while it is in motion.

These last few weeks I have been called upon to make some heart-breaking repairs on some very beautiful little faces which had been pitifully mutilated from accidents that came about in just this way. All it takes is one abrupt stop for a youngster's face to meet a windshield, dashboard, or the back of the front seat with such force as to break face bones, knock out teeth and cause disfiguring injuries.

Today, I nearly wept while I worked with an eye surgeon for nearly two hours in a vain effort to save the eye of a little boy who had been standing in the back seat of his mother's car when she slammed on her brakes. The child's eye was gouged out as he struck the ashtray. If you will print this I will be grateful. — an M.D. in L.A.

We would like to add: Cars can now be equipped to protect children of any age and children can be taught to use safety belts or harness—especially when parents set the example. It would be far better to take action now than to spend the rest of your life regretting the fact that you didn't.

Reports that on weekends alone during the first 9 months of 1968, the number of automobile occupants who lost their lives in accidents was 559. Only 29 were wearing safety belts, according to Highway Patrol figures, 259 had safety belts available but unbuckled, 114 did not have the devices installed, and in 157 cases, no report was made on whether belts were available or not.

It would be a good practice to give your seat belts a close inspection occasionally. Points to check are: 1. Webbing—Is it frayed at the edges or does it show any other signs of wear? When you tighten the belt and apply pressure with your body, does it hold tightly or does it slip? 2. Anchorage—Are the belts solidly anchored with reinforcements plates in place? Is there any sign of the floor in the anchor area resulting out?

3. Buckles—Is there any sign of wear on the metal to metal parts? Has the spring on the release weekend so it can be released too easily?
Don't wait for an accident to prove the worth of seat belts to you. If the loss of a loved one's life or your child's beautiful face is disfigured from now on the worth of seat belts will be proven to you. Don't learn the hard way. Install and use seat belts.

Bill Griffin, County Agent, Says....

The fire in the fireplace during the upcoming Holiday Season can be made to reflect the cheerfulness of the occasion even more by adding multi-colored flames.

Chemical treatment of the material to be burned can result in green, red, blue, orange or purple flames instead of the usual flame from wood.

Calcium chloride can be used to produce orange colored flames, copper chloride-blue, potassium chloride-purple, strontium nitrate-red, lithium chloride-carmine, and copper sulfate-emerald green. Dry pine cones, small chips or blocks of wood can be soaked in these chemicals for the multi-colored flames. Most of the chemicals can be purchased from chemical suppliers or drugstores.

To treat the cones or wood, a plastic pail and an onion sack are needed. The cones or chips are placed in the sack and immersed in a solution containing one pound of the chemical thoroughly dissolved in one gallon of water. The bag must be weighed so that all of the material is completely covered and soaking should last for at least 10 minutes.

After soaking, place the treated material on newspapers to dry and then they will be ready for use.

The county agent adds that newspapers can be turned into "logs" which will burn with a rainbow of color. Simply tie the loosely rolled newspapers with heavy twine and soak them in a solution of four pounds of copper sulfate and three lbs. of rock salt dissolved in a gallon of water. After allowing these "logs" several days for drying, they may be burned just as wood.

Because we have requests for this information throughout the year, I am passing it along in advance of the Holiday Season and early enough for preparing the material for Christmas use.

The time has passed for guessing at what plant food nutrients are needed for top crop and pasture yields. There is no need to guess because too many factors are involved.

The best source for getting information on plant food needs is from a soil testing laboratory. The Extension Soil Testing Lab is located at the South Plains Research and Extension Center, Route 3, Lubbock, Tex. Soil scientists who do the soil testing have knowledge of the amount of nutrients removed from the soil by a given yield on a crop. By making certain soil tests they can determine how much of the crop's can be supplied from the soil and how much must be added through fertilizer application to get top yields.

Alert farmers test their soil before planting to determine its ability to supply the necessary nutrients for top production. If the soil test shows the soil is short on a certain nutrient, fertilizer of the recommended kind can be supplied before deficiencies show up in the growing crop and yield is reduced.

Low production means a higher unit cost and less potential profit while high yields have the opposite effects upon crop production.

Soil testing, the county agent believes, is a necessary part

of today's agriculture. Maximum yields produce at the lowest per unit cost are a must and the basis for both is a fertile soil.

Linda Huffaker, CHD Agent, Says....

To restore the non-stick quality to Teflon, scrub it with a plastic scrubber but never a metal pad or scouring powder. Once a week scrubbing should renew both old and new types of Teflon finishes.

To remove unsightly stains and restore the utensil to an almost new look, use a special commercial cleaner designed for Teflon or use this recipe: In the utensil boil one cup water, a half cup household bleach and two tablespoons baking soda for 5 to 10 minutes or until the stain disappears. Wash pan thoroughly and oil before using.

A well-designed toy costs no more than an ordinary toy but it is more valuable to a child. Christmas toys should be selected carefully as any other purchase.

Look for toys that are washable, have no breakable parts, are sanitary, made of safe materials and do not have too many details.

Buy toys that let a child use imagination and creativity. He has plenty of both.

A child is interested in what he can do with a toy; a parent usually wants one that looks real.

Wooden blocks, stylized boats, trains, cars, hand puppets, puzzles with large pieces, some movable machinery, baby dolls and doll houses are good choices for young children.

Small children need toys that they can grasp easily. Older children are able to manipulate more complicated toys.

Work To Begin On Lynn Co. Roads

The Texas Highway Commission today approved development of 13 miles of Farm to Market Roads in Lynn County as part of the 1969 Texas Farm to Market Program.

District Engineer Oscar L. Crain of the Texas Highway Department said estimated cost of the work is \$62,000,000.

Work in this county includes: From US 380, 6.0 Mi. W. of Tahoka, S. to FM 2053.

The work will be under the supervision of H. M. Ables, Sr. Resident Engineer, of Lamesa, Texas.

Work authorized for this county is part of the \$27.1 miles of Texas Farm and Ranch to Market Roads earmarked for development in the new program.

The program lists 214 projects in 138 counties. Estimated total cost is \$22 million.

Mileage included in the program totals 237.2 miles of new roads with an estimated cost of \$10.3 million.

The remaining 589.9 miles, to be developed at an estimated cost of \$11.7 million, was designated previously and is being constructed in stages.

The additional mileage brings the designated Farm and Ranch to Market Road system in Texas to 39.5 thousand miles. This is equal to 1 1/2 times the combined total of all State - maintained highways in the six New England States.

Plans call for an eventual FM-RM system of 50 thousand miles. Originally conceived to get the former out of the mud, the network has contributed to the economic and social well being of millions of rural Texans.

Tahoka High Happenings

BY BETTY OWEN

At 3:05 on Wednesday afternoon all of the Tahoka schools let out for the Thanksgiving holidays. Everyone seemed to be extremely ready for a holiday, teachers and students alike. About the only bad thing was going back on Monday.

Last week, I failed to recognize Toni Leverett for receiving the Most Beautiful title and David Rogers for Most Handsome.

The National Honor Society met last Monday in the home of Suzanne Warren. Yearbook chairman, Cathy Leverett, gave out our new handbooks. The Chapter decided to send Yolanda Chapa's and Deryl Sherrill's names for consideration towards the national merit scholarship. After this, Mrs. Dorothy Davis of Sanders Elementary School in Lubbock spoke to us on her work at Mountain View School for Boys at Gatesville. This is the maximum security guard school for delinquent boys. She gave a unique and interesting speech on these boys and showed and read some of the works which they had done.

Mrs. Maude Singleton came to speak to the Seniors and any others interested about the selective service system. Monday, Mrs. Singleton is area supervisor for all of Northwest Texas, under Colonel Morris S. Swartz, State Director of Selective Service. She was sponsored by Judy Gattis and her father, Eldon Gattis, for this assembly.

Last Tuesday the varsity boys were victorious over Slaton, although neither of the girls teams won. Monday night, the Junior Varsity and Varsity boys were defeated by Brownfield. Tuesday night, Tahoka will go against Stanton.

The FFA and FHA chapters will hold their monthly meetings Wednesday. The FHA program is on the degrees of achievement one can obtain by work in her home, community, school and personal life. Program chairman are Donna Edwards and Yolanda Chapa.
