Little Interest Manifested in V Loan. Lynn County's Qnota \$18.600. 8 More Days.

Victory bond sales in Lynn county, as reported by the two local banks, up to Thursday night, aggregate 83,350. Only eight more days remain for the county to raise her quota of \$18,600. Will we fail to do our part in this last Liberty loan drive? Are you sure that you have purchased all the bonds you possible can? Lynn County has never yet failed to go over the top, and even better, in all the bond campaigns that have been launched. Our quota is small compared to the amount set for adjoining counties to raise. Several effort to raise the desired quota, and the results obtained has been discouraging indeed. Lynn County citizens, will we fail our boys now, who have died for us, just because peace has been declared? Several Lynn county boys spilled their life blood that we might live in peace and happiness, so lasting peace

County Chairman, C. H. Cain has received a genuine German helmet and quite a number of medals made from German cannon, which will be given away to Liberty loan workers during the campaign. A committee will be appointed to decide as to how the helmet will disposed of.

Let's do our duty, by buying our share of these bonds. The local banks are ready to help you to secure a bond in any denomination. Get yours today.

For convenience sake, Calumet Baking Powder is packed in 10, 20 and 30-cent sizes.

For 30 cents you get a full pound (16 ounces) net weight.

Of course, the larger the size the bigger the saving in buying-but remember that the 10-cent size shows a double saving compared with most other brands.

The value of Baking Powder is quality not quantity. It is leavening strength that counts. You cannot judge it by the size of the can nor the amount you get for your money. You must determine its worth to you by what it does, not by what it is, by the amount you are required to use in your baking and the results it gives.

A 10-cent can of Calumet will go twice as far as a 10-cent can of most other powders.

Owner Should Have Extinguisher Handy and Keep Close Watch on Electrical System.

SWEEP GARAGE FLOOR OFTEN

Gasoline Tank Should Never Be Filled If There is Open Flame Near-Go Over Connections to Discover Any Leak.

Fire is really the greatest danger with which the motorist has to cope Not that automobiles are in the habit of catching fire regularly, but the fire, when it does come, is sudden and un-heralded. Furthermore the everyday handling of gasoline makes one careless, a warning in itself that is seldom heeded. There are so many ways in which a car can catch fire that it is the duty of every motorist to see that all possible steps are taken to prevent such accidents. A few suggestions follow that may assist in warding off the danger.

Keep Fire Extinguisher Ready.

First of all have a fire extinguished and keep it ready at all times for use. Many motorists carry them on their cars and thus reduce their insurance rates. This is the best practice, but an extra extinguisher in the garage is never out of place. The small, com pact pump type is advised, as it is the best for fighting gasoline or oil fires and can be used safely around electrical apparatus. Some owners have ing purposes, but its use for this purpose, even if practicable, is hardly wise. The extra few drops may mean a lot should the car catch fire on the

Do not let olly rags or waste lie around the garage. Keep them in a metal container and sweep the floor It prevents the spread of fire. Keep the engine clean, especially the sod pan. See that there is a small hole in it under the carburetor drip. If there is none by all means make one.

Keep Flame From Tank.

Never fill the gasoline tank with an open flame near. Likewise see that the funnel used makes metallic contact with the tank. It has happened that static electricity generated by the gasoline flowing tarough the funnel has sparked the trank and caused a serious explosion. Make sure that the tank does not leak, particularly when the tank is located under the cowl. It is well to go over all gasoline connections occasionally to detect

Install a gasoline shut-off where it can be readily reached. Some cars have them in an out-of-the-way place that is difficult to reach in an emer-Always shut off the gasoline when leaving the car in the garage This is even more important when an open-type coal stove is used for heating the building. A strainer should also be installed in the feed pipe if there is none on the car, and sediment should be removed once a month.

The electrical system should also be watched and the connections kept tight, for a loose or grounded wire may start a fire. When cleaning the angine with a brush use one with no metal parts; a short circuit caused by the metal on the brush may ignite the Easy to Get at Spring Leaves and gasoline used in cleaning.

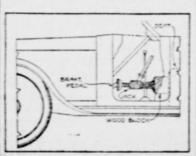

Should a fire start in the carb reter shut off the gasoline and start the engine, as racing it will soon draw all the gasoline from the carburetor, Sand can be thrown at the base of the flame, the hood.

The last suggestion is not the least important-read this again.

ENAMELING TO PREVENT RUST

Ordinary Material Which Dries Quick ly Is of Little Use, as It Chips Off Rapidly.

In order to do away with rusting of parts beneath the hood black ename ing may be resorted to with good ef fect. It is possible to get black ename today which when properly applied looks little inferior to the baked-or variety. Ordinary enamels which dry quickly are of little use, as they chip and flake off quickly. Parts to be enameled should, if possible, be taken off and cleaned with a stiff wire brush The enamel should be applied with a stiff varnish brush. The enamel may take as long as a week to dry and care must be used to have an atmos phere free from excessive dust; that neans not to dry it in the upper story of a hay barn. Parts that may be enameled to advantage include steel fan blades, pulley arms, brackets and elbows, nuts that are not often dis turbed, exposed pieces of shafting. pluion-wheel centers, operating rods collars, etc. Even a cylinder casting may be so treated, as a good ename will stand heat without blistering.

FITTING A NEW CARBURETOR

Care Should Be Taken That There It No Looseness to Cause Vibration and Broken Flange.

In fitting a new carbureter be sure hat there is no looseness to cause vibration, because if there is a broken flange will be the inevitable result. If vibration is present a small iron bracket should be installed from a nut on the engine frame to the instrument to steady it, also taking the strain off the intake pipe.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such

conditions. Many send for a sample bottle to see what Swamp-Root, the great kids liver and bladder medicine, will do them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. HOW TO AVOID BACKACHE AND NERVOUSNESS

Told by Mrs. Lynch From Own Experience.

Providence, R. I.—"I was all run down in health, was nervous, had head-aches, my back ached all the time. I was tired and had

no ambition for anything. I had taken a number of medicines which did me no good. One day I read about Lydia E. Pinkham's Vege-table Compound and what it had done for women, so I tried it. My nervousness

and backache and headaches disappeared. I gained in weight and feel fine, so I can honestly recommend Lydia E. Pinkham's Vegetable Compound to any weman who is suffering as I was."—Mrs. ADELINE B. WHAT THE ROW'S ALL ABOUT TOLD SO ALL MAY KNOW

This Italian situation can be summed up pretty much as follows: You are all familiar that Italy runs

down into the Mediteranean in the shape of a long boot leg. All around the eastern coast of Italy is that great Adriatic sea.

At the head of the Adriatic sea at the top of Italy is Venice, and across the narrow part of the sea in what

was Hungary, is Trieste. The countries on the other side of the Adriatic are principally Montenegro, Herzgovinia, Dalmatia, Bos- have full right to this coast line. nia, Coastland and a few of the smaller little sections.

Under the terms of the treaty the other side of the Adriatic certainly belongs to Italy.

No one disputes that.

But England and France made a treaty with Italy which now they cannot carry out.

Italy says that it has been buncoed and it looks pretty much that way, although that is somewhat tempered with the thought that England and France just can't fulfill their part of the agreement.

Another view of the situation was published in the Paris Petit Parisian on Tuesday and cabled to the Austin American as follows:

"President Wilson proposed that Fiume, which is not mentioned in the treaty of London, should be a free city, but attached to the Jugo-Slav customs system and further that the London treaty should be subjected to a total revision.

"Italy refused to accept his proposal, whereupon President Wilson withdrew, leaving Italy alone with the representatives of the other signatories of the treaty.

"During the meetings of the representatives of the signatories, both Premier Orlando and Foreign Minister Sonnino were most conciliatory, Orlando, especially having asked repeatedly on what condition France and Great Britain would consent to give Fiume to Italy.

ITALIAN QUESTION STUMBLING BLOCK

DEADLOCK IN PEACE CONFER-ENCE BROKEN, COUNCIL, OF FOUR ANNOUNCES.

Paris.-There are indications of weakening on the part of the Italian delegation and a disposition to withdraw their demands for the Delmatian Hinterland if permitted to have the coast, the coastal watershed and Fiume.

President Wilson is inflexible in his position that Fiume shall not be annexed to Italy, thus bottling up Jugo Slavia.

The Italian premier, Vittorio Orlando, while not attending the session of the council, had a series of private conferences and arranged a meeting with Premier Lloyd George with a view to seeking a plan of adjustment.

One compromise proposed to the Italians, making provision for the recognition of their claim to Fiume in exchange for the abandonment of their claim to the Dalmatian coast, was re-

In the meantime Premier Clemenceau and Lloyd George and President Wilson are busily considering the question of the future of Kiau-Chau Baron Kakino and Viscount Chinda of the Japanese delegation.

The American delegates declare emphatically that President Wilson is determined not to yield on the Fiume question. As America was not a party to the London treaty, the president refuses to discuss controversies arising over the Dalmatian coast and other countries covered by the secret treaty signed in Italy, France and Great Britain.

The council of four decided to discontinue its hearings on the Chinese and Japanese claims to rights in Shan tung province and agreed merely to terminate Germany's rights in China in the peace treaty, leaving the settlement of the respective rights of China and Japan to the German concession until a later date.

Don't Want to Add More Trains.

Austin, Texas.-B. F. Bush, regional director of the United States railroad administration, in charge of lines in the southwest, pictured a rather gloomy view for the common carriers for 1919 in his statement to the railroad commission in opposition to a general restoration of pre-war passenger service on Texas railroads. He said the federal administration does not want to put on any additional train service unless some community is actually suffering.

Alvarez Executed By Firing Squad

Vera Cruz, Mexico.—General Franeisco Alvarez of the anti-government forces has been executed at the hands of a firing squad. Alvarez was captured recently in the battle in which General Aureliano Blanquet, minister of war in the Huerta cabinet, was killed. Many thousands of persons surrounded the barracks when the execution took place. He was absolutely calm and evinced no fear and declared he was prepared to die.

Appointed on State Accident Board.

Austin, Texas.-Captain E. R. York, veteran of the Spanish-American and world wars and former assistant adjutant general of Texas, has been apsecretary of the Texas industrial accident board to fill the vacancy caused by the resignation of Mrs. Hortense Ward of Houston.

County Buys Victory Loan Notes. Dallas .- By unanimous approval the Dallas county commissioners' court aided materially in subscribing the ounty's quota of the Victory loan when \$70,000 of interest and sinking fund was invested in notes. The money came from a fund set aside to retire county bonds bearing 41/2 per cent interest. In addition to aiding the loan materially the county will make one-fourth of 1 per cent interest on the sum in-volved, as the Victory loan notes bear

interest at 4% per cent.

WILSON SAYS FIUME CANNOT GO TO ITALY

EXPECT ITALIAN DELEGATION WILL WITHDRAW FROM THE CONFERENCE.

OPPOSES SECRET TREATIES WILL TAKE IT BY TAXATION

Italians Cling to the Secret Treaty Annulled By Their Acceptance of the Fourteen Points.

Paris.-In a statement just issued by President Wilson explaining his position on the Adriatic question, he declares that Fiume can not become a part of Italy. He points out that every condition concerning the Adriatic settlement has been changed since Italy entered the war upon the promises of the pact of London, the Austro-Hungarian empire having disappeared. He notes that new states have been created for which Fiume is the natural outlet to the sea, and also contends that the strategic necessity pleaded in behalf of Italy's claim to the Dalmatian islands no longer prevails, as the Austrian naval menace has ceased

In issuing his official statement on the Adriatic question President Wilson let it be known that he desired once again to call attention to the fact that there were certain well-defined principles which have been accepted by the peoples of the world as the basis for a lasting peace. The United States delegation simply re called this in order that there should be no deviation from these principles.

When Premier Orlando received President Wilson's statement he immediately called a full meeting of the Italian delegation.

President Wilson's emphatic declaration that he will not yield on the Adriactic question has created the most profound sensation in the peace conference. He has thrown down the gauntlet to the supporters of secret treaties in a manner which almost took away the breath of the delegates who have been urging compromises on points covered by many secret documents and at variance with the president's fourteen points.

President Wilson's sweeping declaration, while aimed directly at the Adriatic problems, also reaches the Kiau-Chau controversy, in which Japan relies on secret agreements made with Great Britain, France and Italy in 1917, to support her claim to the concessions held by Germany in Shantung.

The peace delegates generally re gard President Wilson's statement as a challenge which once for all will dispose of the question whether secret document, of which many nations participating in the war were ignorant, are to figure in the peace following an armistice in which all the allies pledged gave no regard to secret treaties.

Vittorio Orlando, Italian premier, has delayed his intended departure for Rome long enough again to sit in conference with the other members of the council of four-Premier Lloyd George, Premier Clemenceau and President Wilson.

Rebuilding of Devastated SUNDAY SCHOOL France

Ravages of Warfare and Deliberate Hun Policy of Destruction Make It the Work of Years.

By LLOYD ALLEN,

Special Staff Correspondent.

ARIS.-France is beginning to rebuild the scores of villages destroyed by shell fire during more than four years of war. The task is enormous; it will require years of effort, but it will be carried on by the French government with only a small amount of outside aid and a German

It is impossible for outsiders to try to take on more than a relatively small part of the reconstruction work in France because first estimates show the total damage amounts to something like \$13,000,000,000, or approximately the amount raised by the first three Liberty Loans in America. It's strictly a national job, this replacement of 500,000 wrecked homes, 100,-000 of which are mere heaps of stones.

fund, collected as indennity.

America is going to contribute some millions of dollars worth of material to the rebuilding of devastated France through the American Red Cross. Our aid in this direction alone will be valuable. It will consist of the distribution of supplies bought by the Red Cross for the active war work it carried on, which are now stored in the Red Cross warehouses and not needed urgently by the American

Large as the Red Cross relief will be in actual dollars, it must still be viewed as first aid work rather than the taking on of a program of actual reconstruction, that is, the actual rebuilding of demolished cottages.

MAN MADE IN THE IMAGE OF GOD.

LESSON TEXTS-Genesis 21:26-28; Ephedans 4:20-24; Genesis 2:7-9. GOLDEN TEXT—God created man in

dis own image,—Gen, 1:27.

DEVOTIONAL READING—Psalms 8.

PRIMARY TOPIC—God Gur Creator and father, JUNIOR TOPIC-What God Expects

From His Children.
INTERMEDIATE TOPIC-Loyalty to Our Heavenly Father.
SENIOR AND ADULT TOPIC-The Dignity and Worth of Man.

I. The Creation of Man (Gen. 1:26

1. Time-when the earth, his home, was ready for him. The order in creation shows design on the part of God. He anticipated man's need in storing the coal in the earth, piling up minerals in the rocks, storing electricity everywhere, causing the water to gush from the valleys and hillsides, preparing plants and herbs for the healing of man's injuries and food and raiment adapted to every climatic

2. His nature (vv. 26, 27). He was created in the likeness and image of God. This act was preceded by a special counsel of the Godhead. It was said, "Let us make man." This precludes the foolish and wicked assumption that man ascended from or through the brute. He came into being by a special creative act of God. This creative act is confirmed by Christ (Matt. 19:4; Mark 10:6). With such testimony we can dismiss the evolution theory as to man's origin as a human vagary. This likeness and image is not physical and bodily, but intellectual, (Eph. 4:24), and moral, (Col. 3:10). Man is spirit, soul and body (1 Thess. 5:23). God's likeness is reflected in man's tripartite nature. As there is a trinity and unity in God so there is a trigity and unity in man. Spirit is the highest part of man, that which makes it possible for him to know God. The soul is man's selfconscious life, the seat of his emo-tions and desires. The body is the seat of the senses, the agency by which he knows the world. God made man with a personality capable of having fellowship with himself, with whom he could share his glory.

3. His rank and power (vv. 26, 28). Man, the last in creation, was placed above all else, over all the rest of creation. Being in the likeness and Image of God, he was fitted to rule. How far short man comes of living up to the position given him by the Creator! The first man was not a savage, neither a baby. Fresh from the Creator's hands he possessed such lofty powers of intellect as to enable him to name the beasts as they passed before him. (Gen. 2:19, 20).

II. Man Alone in Paradise (Gen.

Adam had a most beautiful place in which to live, "Pleasant to the eyes, and good for food" describes his surroundings. His environment was in keeping with his nature. Eden was only fit for him in an unfallen state. As soon as his nature was wrecked out he must go. Paradise with all its splendor could not satisfy man. His heart was desolate. Reciprocal love is the only thing that can satisfy the heart of man. Animals of all varieties surrounded him, but none were adapted to be his companions. To ac centuate this need God caused the animals to pass before Adam. He was differentiated from all the animals in that he was a personality. He was endowed with the power of love, there fore only a being who could love in return could satisfy him. To meet this need woman was made for man They had minds alike; they had spir Itual natures allke; therefore they could commune together about the things that surrounded them and about God.

Man was made from the dust of the ground and woman was taken from his side. She is therefore one re move further from the earth than man. The fact that woman was made from man's rib points to unity, similarity and equality. God charged this first pair with the responsibility of replenishing the earth, (Gen. 1:28) Marriage is a divine institution and most sacred; for God made them male and female and performed the first marriage ceremony. In view of this, polygamy and divorce are grossly criminal. Marriage is the fountain head of all life, religious, social and national, therefore corruption here is

Mr. Gladstone was once heard to remark that if all the wits of men were to be united in one brain, that man would be unable to appraise with perfect justice any single moral action. "The shades of the rainbow," he wrote, "are not so nice, the sands of the seashore are not such a multitude, as are the subtle, shifting, blending forms of thought and of cir cumstances that go to determine the character of one act. But there is one that seeth plainly and judgeth

Restored His Health.

J. B. Ragless, carpenter. 210 W. 60th St. Chicago, Ill., says: "My back gave out completely and I had to quit work, I could hardly endure the pain in my back and nights I tossed and turned, imable to sleep. Often in the morning my back was as stiff as a board, so that I couldn't stoop to dress myself. When I did manage to bend over, everything before me turned black. My head seemed to be whirling and sometimes I was so dizzy I had to grasp something to keep from ialling. The kidney secretions were irregular in passage, getting me up at night and they burned cruelly. I lost my appetite, was weak and listless and went down twenty-five pounds in weight. After I had given up hope, I was persuaded to use Doan's Kidney Pills and they cured me. Soon after, I passed an examination for life insurance and I'm glad to say my cure has lasted."

T-Bar Happenings

We were visited by another good rain Sunday night, also little hail.

Gordon King, of Abilene, is visiting home folks here at the present writing.

Several people from this community were in Tahoka Monday.

There was a large crowd at Sunday School Sunday. We hope every one in the community will decide to attend this service, and help uo make it the best in the county.

There will be church at the school house next Sunday at 11 a. m. Everybody is invited to come.

A large crowd was at J. N Nelms' at the singing, and all reported a good time.

George Henry and Cecil King were in the Redwine Community Sunday.

Misses Pauline and Wilma Bohannon spent one day the first of the week with the Misses Henery's.

Mr. and Mrs. G. W. Short and family visited W. L. Kuykendall one day the first of the week.

Miss Tula Kuykendall spent the day the first of the week with Miss Bulah Estes.

It's rain! rain! But we are not ready to say go away.

Wheat and oats are doing so well; quite a bit of feed coming up; most all the farmers are in readiness to plant cotton as soon as it gets dry enough to get in the fields.

The frogs out this way are keeping up a cheerful chant.

Several of Mrs. Rogers' near neighbors came in with teams and plows some days back and finished her lisiting. Mrs. Rogers lost her life companion, a son-in-law and five grandchildren with the Flu in the winter, and they were late coming home to farm from their stay at Hedley, Texas.

The Needmore school closed Friday, the 18th., after a successful term; something over half the pupils making their grades. Since so many of the pupils were only in a few months this is a good record.

Little Mary Greathouse has room on the closing day.

Quite a number on this Route were Tahoka visitors this week; Messrs. J. E. Morgan, John Flemming, Buck Briley, Edd Gadberry, John Ray, W. J. Faries, R. B. McCord, Walter and Judd Turlie, were among the number.

To Relatives of America's Soldiers and Sailors

Your relatives serving with the colors will soon be back in civil life. They may be at home now. For your protection, and for their own, they undoubtedly have taken out insurance with the United States Government.

You should impress upon your relatives in the service the vital importance of keeping their insurance with the United States Government. Write Lynn West went to Tahoka to them without delay-or tell them personally, if you can-that they may retain insurance with the United States Government even after they leave the military service.

The privilege of continuing their Government insurance is a valuable right given to soldiers and sailors as part of the compensation for their heroic and loyal services. If the soldier or sailor permits his insurance to lapse, he looses that right, and he never will be able to regain it.

But if he keeps up his present insurance-by the regular payment of the monthly premiums-he will be able to change it later into a standard Government policy without medical examination. Meantime he can keep up his present insurance at substantially the same low rate. The Government will write ordinary life insurance 20 payment life, endowment maturing at age 62, and other usual forms of insurance. This will be Government in surance at Government rates.

Many men will come out of the war physically impaired and will therefore, he unable to obtain any life insurance protection whatsoever for themselves and their families, unless they keep up their present insurance with the United States Government. Uncle Sam's insurance may be continued and converted into standard Government policies, regardless of the men's physical condition.

Miss Birmah Small Receives Soldier Letter

A. E. F. Mar. 7, 1919. Miss Birmah Small, Tahoka, Texas, Dear Friend

I received your letter a few getting along fine, and getting fat as a hog. I have some little French girls about your size that stay in the same house that I stay in, (I have graduated from me too Parley vons Francia. I have lots of fun with them learning them English, and it helps to pass the time away. The and the little American girls is, that they are so earnest about everything they do or say, and they are not nearly so mischievous. I suppose it is the conditions they have lived under for the past four years, that has made them so quiet. A piece of chocolate candy, a smile and a kind word and they are your friends for life, and it is not uncommon for one of them to say: Papa was killed at Verdun, or the Argonne," or some other place. So you see most of the little American girls really have a whole lot to be thankful for, after all. Very few of the little French girls have nice clothes to wear like their little friends over in America. Most of them wear little black dress in mourning for some one lost in the war, and they all wear wooden shoes. and they look real comical; sometimes the shoes are almost as large as they are, and you can almost hear them coming before they get in sight.
