Exhibit Of Rail road Efficiency.

Unique Demonstration of the Progress Made in Railroad Work in the Last Thirty Years. By Santa Fe System.

Recently a large number of railroads applied to the Interstate Commerce Commission for an increase in rates owing to the great increase in the cost of operation, including higher wages, reduced hours of service, cost of materials and supplies, cost of safety appliances on every car in service, steel mail cars and the probable order requiring all passenger equipment to be built of steel in the near future, block signals and a general improvement in tracks and machinery also imposing adlitional costs by reason of National and State supervision of operating and accounting, but the Interstate Commerce Commission refused to grant the request, while they admitted that costs had increased, they stated that the railroads do not show proper efficiency in operation eed of increases in rates their equests may be considered.

As a public demonstration that needn't be surprised. the railroads have been efficient. even far beyond those of other countries and other industries in this country, the Santa Fe Sys-

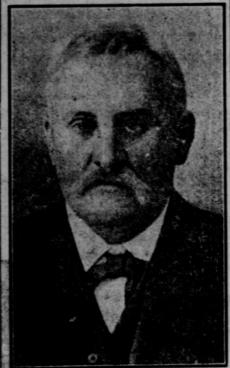

The Development Dollar.

There is no part of our circulagress as the development dollar. t is the empire builder. It is the st active, generous and peaceful our legal tender and it is conntly seeking to develop our laat resources. It opens our mines, ilds our factories, our railroads d our large industrial enterprises, nd it is always a busy dollar.

Its inordinate desire for activity nd its forgiving spirit makes it a rget for legislation and rather han lie idle, it will submit to most y legislative handicap and plead uilty to most any charge, providl it is permitted to return to its ppointed task without delay. Its nerosity makes it the most popur dollar in circulation for where er invested, it makes a free and uitable distribution of values to joining property. TEXAS NEEDS GREAT @ MEN

V. PROGRESS.

REEK civilization gave us the arch and made it possible to build structures that support great weights. The Phoenicians made the first boat and the Harbor of Phoenicia became the birthplace of the navies of the world. Since the beginning of creation, we have depended upon men who can build for our progress. We need in State government builders who can construct an arch strong enough to support the ponderous machinery of Twentieth Century civilization and create conditions that will make Texas the birthplace of the world's progress.

THE BIRTHPLACE OF PROGRESS.

Nature has given Texas the framework of a magnificent civilization and poured the riches of the universe at her feet. Our rivers, lakes, valleys and hills are a triumph in creation. God has done everything He could for Texas and we now await the master hand of government family attended church at Three to awaken to vigorous activity the wealth, talent and enterprise of the people and to raise our civilization to magnificent heights of progress and bring glory and renown to our citizenship. Texas needs great men.

The Borrowed Dollar.

Debt has been pictured by many 1858. She was a member of the writers as a hard taskmaster and the Methodist church from early borrowed dollar is the most abused of urrency, but it is nevertheless a development dollar, as it possesses volame and activity, two of the most imof four children, outliving all of portant factors in our progress to a them several years. She had greater degree than any other form of egal tender. When in the hands of operators not familiar with its purposes and habits, it sometimes creates havoe and ruin, but it has rescued many a sinking enterprise, has performed deeds of industrial heroism and it has been the burden bearer of industry.

No man or animal possesses the active instincts of the borrowed dollar. When in bad hands it quickly returns to its owner or moves rapidly on through the channels of trade until it finds a competent hand to guide Vverybody in the great South it where it can glorify its creator without being railed at by incompeias fought our battles, built our cities and developed the industry and commerce of the country. During times of prosperity efforts have been made ing adversity, we send emissaries to plead for its return and it is sought after by every important enterprise in the country.

Idle dollars, like idle men, are no good to a community but the charge against the borrowed dollar. No one will borrow money and let it lie idle. Idleness is its mortal foe and is certain destruction. The borrowed journey and return heavily laden with the fruits of its toil or it will perish. No other form of currency possesses such compelling forces of activity as the borrowed dollar.

We are already heavy borrowers. No accurate figures are available, but estimates furnished by county clerks, bankers and other reliable sources, justify the following estimate:

Farm Property\$200,000,000 City Property Public Service and Utility Corperations . ublic Debts

\$1,100,000,000 An effort to separate the borrowed dollar as between home and foreign proved futile, altho it is important information in this disucssion.

The borrowed foreign dollar is the most constructive dollar on the financial horizon, as it combines activity and volume and brings new money

Meddling Men

Sure Way of Success Is Mind Own Business

By REV. MADISON C. PETERS

tattling, sly-whispering and impertinent meddling men have succeeded them and are trespassing constantly on the community with their tongues.

The busybody is remarkable for his health. He can live on anything; he usually carries with him a bag of reputations made up in cold hash so that he doesn't have to stop for meals. He has long legs and can go a thousand miles at a jump, while he has great genius for smelling. His peculiarity is acuteness of ear, for he can hear as much through a keyhole as from a door wide open. · harper grandered formation diseases ..

When Commodore Vanderbilt was asked how he made so much money, he said he made half of it by minding his own business and the other half by not minding other people's business.

The reason why men succeed who mind their own business is because there is so little competition. There are many people so busy minding other people's business that I wouldn't be a bit surprised in the resurrection day to see some of these everlasting snoops getting out of the wrong

Without any intention, perhaps, of doing injury to your neighbor, a careless remark may be seized by a babbler, and as a snowball grows by rolling it, so does a story by telling; it passes through the babbling tribe, growing larger and larger, and darker and darker, and by the time it has rolled through Babbletown it has assumed the magnitude and blackness of.

Philip de Neri was visited by a woman, who accused herself of slander. He bade her go to the market, buy a chicken just killed and still covered with feathers and walk a certain distance, plucking the bird as she went. The woman did as she was directed and returned, anxious to

know the meaning of the injunction.

"Retrace your steps," said Philip, "and gather up, one by one, all the feathers you have scattered." "I cast the feathers carelessly away," said the woman, "and the wind carried them in all directions."

"Well, my child," said Philip, "so it is with your words of slander; like the feathers which the wind has scattered, they have been wafted in many directions. Call them back now if you can. Go, sin no more."

By ANNIE G. MURRAY

' It is undoubtedly true that the sense of parental responsibility is diminishing rather than increasing. Numerous conditions are combining to encourage this spirit, and these conditions may be detected in some of the institutions of which America is so proud, notably in the public schools. I do not believe that any teacher can take the place of a parent, or that any school can be a good substitute for the home.

Kindergarten instruction in the public schools has produced its benefits, but the principle has been extended so that it money and getting the greatest satissometimes has included, unintentionally, no

doubt, practically the entire care through the day of children who are hardly more than infants.

The authority and affection of the home are in some measure superseded by those of the school, and it is well known that parents are tempted to take advantage of the kindergarten system to shirk parental responsi-

For children of tender years the home influence, if it embraces what can be called a home, should be the controlling factor in instilling family

The old-fashioned child over whom parental authority was exercised much more effectively was quite as bright and good as the new-fashioned child for whom discipline has been so universally relaxed.

It is a hopeless plan to attempt to improve the mind or the moral nature of children under ten years of age by placing them in what practically are prisons.

The home is the only natural place for the child, and our efforts ought to be directed to making it in all cases the fittest place.

Annie G. Murray

Teach Children Beauty of the **Flowers**

By William F. Curtis, Jr.

Children should never be allowed to pluck flowers, even in the field and hedges, merely to throw them aside; they should be early taught reverence for this floral beauty which is around them and never be permitted wantonly to break down boughs and branches, or fill their laps with buttercups and daisies only to leave them withered in the sun, discarded and forgotten.

The young should cherish their flowers as wisely as, and more tenderly than, they cherish their gold or silver pieces in their money boxes. The exquisite beauty of even the humblest blossom can only be ap-

ciated by the eyes which gaze on it with attention and affection. If the wild thyme, or the shepherd's purse, or the cuckoo's eye, or any one of the tiny blossoms of the sward and hedgerow were but as rare as sapphires are, the whole world would quarrel for them; but nature has sown these little treasures broadcast with lavish hand, and scarcely any one is grateful.

The garden is a little pleasure of the soul, by whose wicket the world can be shut out from us. In the garden something of the golden age still lingers; in the warm alleys where the bees hum about the lilies and the stocks, and also where the lime leaves and the acacia flowers wave joyously as the west wind passes.

A true lover of a garden counts time and season by his flowers.

A Profitable Bunch of Beef Cattle.

Many Reasons Why More Cattle Should Be Raised.

When Tick Is Finally Exterminated No Section of Country Will Be Better Suited to Industry-Aid in Keeping Up Soil.

(By D. T. GRAY and W. F. WARD). The work of eradicating the "Texasfever" tick is progressing satisfactorily in the south; every year new areas are freed from the tick and with the progress of the work there comes an added interest in all kinds of cattle production. When the ticks in one section of the country are exterminated, renewed interest begins to be immediately manifested in the beef cattle business, as the southern farmers now realize that the "Texasfever" tick has been practically the only drawback to the cattle business in the past. When the tick is finally exterminated no section of the United States will be better suited to beef production than the south, because of its mild climate, long grazing season and cheap lands.

There are many reasons why the southern states should raise more beef. First, the south, under the present system of farming, has thousands of acres-and good ones, toowhich are not being used at all. Statistics tell us that only about forty per cent. of the tillable or arable land of the south is being used. Sixty per cent, of the land is lying idle and returns to the owner not a cent in wealth. All of the lands cannot be used as cotton lands, because, first, there are not enough people to work the lands in any such way, and second, many of these acres are not suitable for cultivation. In fact, many acres that are now under cotton cultivation should be turned into permanent pastures and grazed with live stock. No state can become wealthy item is one that many farmers are when only forty per cent. of the land trying to reduce.

MORE BEEF IN SOUTH capital is being used. The grocer, or the hardware merchant, could not possibly make a profit on his business if he used only forty per cent. of his capital. And the farmer cannot hope to be successful in his operations until he begins to make use of at least a reasonable proportion of his capital. No farming business can be made successful when only \$4,000 out of a possible \$10,000 is being used.

Then again beef cattle should be more generally introduced because of the good they do in building up and maintaining soils. Under the present system of cotton farming the soils are becoming poorer and poorer. With the introduction of cattle the soil will begin to be built up.

A third reason why beef should be more generally produced in the south, is that there is a demand for it, and the demand should be met in order that the money be kept at home. At the present time the south produces but a small proportion of the meat that her people consume. Packing houses are now being built throughout the south, and good markets are assured for the beef animals which the farmer produces.

Beef cattle are peculiarly suited to fit into the farming operations of the south. The farms are large, and many acres are not being used because of the lack of sufficient labor. At present there is no better way to put the whole farm to work than by introducing beef cattle into the system of farming. They require but a small amount of labor in addition to that used upon the average cotton farm. The hog, while he deserves a prominent place upon almost every farm, cannot be made to use all of the large uncultivated areas on the farms, for he is not strictly a grazing animal. Many farmers who have the large uncultivated areas are not now sufficiently skilled in the handling of live stock to introduce sheep or dairy cattle, as the sheep and dairy business require more skill than the beef business Then, too, the dairy business requires an increase in the amount of labor used upon the farm; and the labor

TRY ONE ACRE NEXT SEASON

Most Successful Farmers Are Those Who Are Working to Get Large Crops Off Few Acres.

faction out of farming are not the men who are trying to cultivate the largest number of acres, but are those who are working to get the largest crops off the fewest acres. The best farming, the best paying farming and by far the most satisfactory farming in every respect is the farming that is done to secure bales from an acre instead of cultivating acres to secure a

Only the most energetic men are willing to cultivate two acres in order to obtain what one acre ought to produce. Only those who use muscle instead of brain are willing to do twice the necessary work in order to obtain a bale of cotton. There is not a lazy bone in the make-up of the man who tills three acres for one bale of cot-

BAG HOLDER IS CONVENIENT

One of the Most Handy Devices Farm er Can Have Around Farm Is Shown in Illustration.

This illustration explains the construction of a convenient bag holder. The weight, hung as shown, rests

A Handy Bag Holder.

against the back of the upright post and holds the bag at the desired

NOTES

Cucumbers are fit to gather for slicing when full grown.

Keep wood ashes where the pigs can eat of them at any time. Never throw fruit of any kind into a basket or box. Lay it in gently.

Watermelons are ripe when the stem of the melon commences to turn

Pumpkins have a tough rind and need not be gathered before frost kills the vines. Alfalfa pasture seems to be par ex-

cellence for a hog, and it should be grown where possible. When the boar pigs are about five months old they should be separated

from the rest of the herd. The vitality of the sow is lowered

by poor sleeping quarters and the pigs when born are apt to lack vigor. The dairyman who does not under-

stand the elementary principles of feeding is not abreast of the times. The man who feeds for milk or beef

can afford to handle nothing but animals which make economical returns. It is false economy to breed from poor cows; better sell three of them, and with the proceeds buy one good animal.

Summer squash should be gathered when half grown. Winter squash should remain on the vines until cool weather.

Heating the whey to 155 degrees will improve its feeding value and also eliminate many of the objectionable flavors found in cheese. Apples should be picked as soon as

they have reached full size and color and not allowed to remain on the trees until they begin to drop off. Good, comfortable sleeping places for the sows through the winter months have much to do with the

number of pigs at farrowing time. The market wants clean timothy and will pay a price far beyond its feeding value; for that reason it pays to grow what the market calls for.

One peck of sliced pumpkin mixed with two quarts of wheat bran, given to the family cow at night, will increase the quality and quantity of the

Considerable attention has been paid by the creameries the last year or two to ice cream making, and it has proven a very profitable side line of the creameries.

AFTER 7 YEARS

Was Cured by Lydia E. Pink. ham's Vegetable Compound Waurika, Okla.—'I had female trou-

bles for seven years, was all run down
and so nervous
could not do any. thing. The doctors treated me for dif. ferent things but did me no good. I got so bad that I could not sleep day or night. While in

this condition I read of Lydia E. Pink ham's Vegetable Compound, wrote to Mrs. Pinkham for advice. In a short time I had gained my average weight and am now strong and well.—Mrs. Sallie Stevens, R. F. D., No. 8, Box 31, Waurika, Okla.

Another Grateful Woman. Huntington, Mass.—"I was in a ner yous, run down condition and for three years could find no help.

years could find no help.

"I owe my present good health to Lydia E. Pinkham's Vegetable Compound and Blood Purifier which I believe saved my life.

"My doctor knows what helped me and does not say one word against it."

— Mrs. Mari Janette Bates, Bor 134. Huntington Mass

134, Huntington, Mass. Because your case is a difficult one doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Con pound a trial. It surely has cured many cases of female ills, such as in-flammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, and nervous prostration.

MEAN MAN.

"Now, John, if I were to die you would weep over me and tell everybody what a good wife I was."

"No, I wouldn't, believe me." "Well, I would for you, just for de-cency's sake. And that shows I'm not half as mean as you are."

When the Minister Scored. In a contribution to the Christian Register, Thomas R. Slicer tells this: "Some men the other night, in conversation with me, knowing I was a minister—and it is the spirit of this time to put it up to a minister terms at least of gentle satire-said: We have been discussing conscience, and one of them said, 'I have given i definition of conscience; it is the ve micular appendix of the soul,' and they laughed. And I said, 'That is a goo definition in your case; you neve know you have it until it hurts you.

Coachman Had to Earn Bequest A quaint paragraph appears in the will of Mrs. Julie Hall of Brighton, England. At the reading of the w the other day it was found that she had bequeathed £100 to her coach man, provided he is in her service al her death, and "if I do not die through or from the effects of a carriage accident when he is the driver.

Then they did not laugh."

And many a man makes a strenuo effort to recognize his duty so that he will be in a position to dodge it.

A LADY LECTURER Feeds Nerves and Brains Scientifically

A lady lecturer writes from Philade phia concerning the use of right foo and how she is enabled to withstan the strain and wear and tear of be arduous occupation. She says:

"Through improper food, imperfe ly digested, my health was comple ly wrecked, and I attribute my recor ery entirely to the regular use Grape-Nuts food. It has, I assure you proven an inestimable boon to me. "Almost immediately after beginni

the use of Grape-Nuts I found a grat fying change in my condition. The ter rible weakness that formerly pr trated me after a few hours of work was perceptibly lessened and is no only a memory-it never returns. "Ten days after beginning on Grape Nuts I experienced a wonderful

energy, and continued use has entir ly freed me from the miserable i somnia and nervousness from which I used to suffer so much. "I find Grape-Nuts very palatal and would not be without the cris

crease in mental vigor and physic

delicious food for even a day on al consideration. Indeed, I always carry it with me on my lecture tours. Read the little book, "The Road t

Wellville," in pkgs. "There's a reason Ever read the above letter? A one appears from time to time. The are genuine, true, and full of hu interest.

SYNOPSIS.

surviving crew of his wrecked whaler in hiding on the coast. A giant rufn named Roscoe, had murdered Field and his two companions, after the exter had revealed the location of an ormous ledge of pure gold. Roscoe then is command of the party. It develops at the ruffian had committed the murwitnessed by Cayley. Roscoe plans capture the yacht and escape with a load of gold. Jeanne tells Fanshaw, her of the yacht, about the visit of the to capture the yacht and escape with a big load of gold. Jeanne tells Fanshaw, owner of the yacht, about the visit of the sky man and shows him the stick left by Cayley. Fanshaw declares that it is an Esk mo throwing-stick, used to shoot darts. Tom Fanshaw returns from the searching party with a sprained ankle. Perry Hunter is found murdered and Cayley is accused of the crime but Jeanne believes him innocent. A relief party goes to fird the searchers. Tom professes his love for Jeanne. She rows ashore and enters an abandoned hut, and there finds her father's diary, which discloses the explorer's suspicion of Roscoe. The ruffian returns to the hut and sees Jeanne. He is intent on murder, when the skyman swoops down and the ruffian flees. Jeanne gives Cayley her father's diary to read. The yacht disappears and Roscoe's plans to capture it are revealed. Jeanne's only hope is in Cayley. The seriousness of their situation becomes apparent to Jeanne and the sky-man. Cayley kills a polar bear. Next he finds a clue to the hiding place of the stores.

CHAPTER XV .- Continued.

"Why, I found an unmistakable reference to it, and though the exact lothree or four hours' exploring by daylight would enable us to find it. But even if I hadn't minded leaving you asleep here, unprotected, in the hut. I doubt very much if I could have found it at night. But what's the mystery you were about to reveal to me?"

No." she said; "tell me more about your discovery first. What was the reference in the journal?"

He rose and took down from the shelf the big leather-bound volume which was proving itself, with every hoor their greatest treasure.

it's over here, toward the end," he girl. a, "in that last winter when the Walrus came oh, here we are." He seated himself on the bunk beside her, and began to read.

March 10th.-We have just spent an arduous and fearful week upon the task of unloading the wreck of the whaler. The weather has been severe quarters of a gale blowing most of the storage of our supplies." time. The men are inclined to be rebollious over my driving them out to

wait for it to moderate.

happened before we unloaded her of her stores, our plight would have been utterly desperate. Of stores in the ordinarily accepted sense, she had but a scanty supply, and those of a miserably inferior description; but she contained half a cargo of whale oil in barrels, which now that they are landed will settle the problem of fuel for us as long as the last survivor of our company can hope to remain alive, And fuel is, after all, the only necessity which this land itself does not supply us with. Of course we shall have to forego the delights of bear steak when our ammunition gives out, but walruses we can kill with harpoons. And with these and scurvygrass, which we gather in the valley every summer, there is no danger of actual starvation.

"We holsted the harrels of blubber out of the whaler's hold with a hand tackle, sledged them ashore along the floe and the crown of the glacier to Moseley's cave, which seemed to be the most convenient place to store

Cayley laid down the book and

"That's the place, I'm perfectly sure," he said. "It evidently faces the glacier, but it must be very near the beach, for they wouldn't have hauled those barrels any further than

"Is that all he says about it?" "It's all he says directly, but there's a reference just a little further along which made me all the surer I was right. . . Let's see."

He opened the book again and ran his eye down the page. " '-A hundredweight or so of spermaceti and two barrels of sperm oil we took directly cation wasn't given, it was plain that to the hut'-here, this is what I was looking for.

"The knowledge we get by experience often comes too late to be of any great service to us. I made some mistakes in stripping the Phoenix, which I should not repeat now. For instance, carrying her pilot house, with infinite labor, up to the cliffhead for an observatory. It is thoroughly impracticable for this purpose. I doubt if I have visited it three times since Mr. Moseley's death-'

"He was the astronomer and botanist of father's expedition," said the

Cayley read on: "But now that I have learned my lesson, I have but little to apply the knowledge to. The Walrus is, I believe, the most utterly wretched hulk that ever sailed the seas-ill-found, detestably dirty and gain, and it will be immensely valuliterally rotting to pieces. We shall, however, get enough planks and tim--hitterly cold (-10 degrees Fahren- bers out of her to build a shed or two heit being the mildest) and three- near the hut, for the more convenient ticular or immediate use for, doesn't

Again he closed the book. "That's what I was looking for," he said. "You skins there will supply what is, at this work in such weather, but I dared not see they brought that stuff down from moment, the most vital of our wants. the cave to these sheds; so the cave That big sack appears to contain would be almost irevitably the first feathers; and those walrus tusks will aler, she will go cowa like a plum- hiding place they would think of serve any number of purposes-forks how many feet deep by this time, and a big plum pudding, in a tin, you

Whereabout on the cliff is the observatory, Philip?"

"I was wondering about that. I've flown across the cliff a number of times, but have never seen anything of it. He may have wrecked it; taken it down and used it for some other purpose.'

'No," she said: "he'd hardly have had time for that. There weren't many more pages to write in the journal when he made that entry."

She fell then into a little abstracted stlence, which the man did not know how to break. But presently she roused herself and came fully back to the present, back to him.

"Did you succeed in accounting for the thing you asked me about last night, the mark on the map right here where they built the hut afterward?"

"I didn't find anything about it in the journal, but this morning, before breakfast, when I went outside the hut, one glance at the fact of the cliff accounted for it fully. The cliff is split right here, from top to bottom, by a deep, narrow fissure. The fissure is full of ice, which I suppose hasn't melted for a thousand years. No summer that they could have in a high latitude like this would ever melt it, certainly."

The girl laughed and rose from her place at the rude table.

"Well," she asked, "are you ready for my discovery now?"

She took down his pocket electric bull's-eye from the shelf behind her, held out a hand to him and, on tiptoe, led him, with a burlesque exaggeration of mystery, out into the storeroom. As completely mystified in reality as she playfully pretended to want him to be, Cayley followed.

She went straight across the storeroom to the rear wall of the hut, the wall that backed squarely against the sheer surface of the cliff, flashed on the bull's-eye for a second, apparently to make sure that she had chosen the right point in the wall, then, letting go his hand, she stooped and picked up a stick of fire-wood which lay at her feet. With this she struck pretty hard upon the planking. The sound which the blow gave forth was as hollow as a drum.

Cayley started. "A cave!" he exclaimed. "A cave here!-Oh, I see. It's a cold cellar they made by cutting a hole in the ice that filled the fissure. And why do you suppose they boarded it up?"

The girl laughed delightedly. Evidently she had not, as yet, developed the whole of her discovery. She flashed on the light again.

"Look!" she commanded. In the center of a little circle of wall which the bull's-eye now illuminated Cayley saw the barrel of a rusty hinge.

"You see," she went on, "it's a door, and they only nailed it up the other day. There's a nail-head somewhere here that's quite bright. I caught the glint of it while I was rummaging before breakfast, and that was what made me look."

Cayley darted back into the living room, returning almost instantly with the broken-handled pick.

In less than a minute, with a prohigh, but narrow cavity, the sides of cliff, but the floor and ceiling solid

Despite the fact that the girl's excitement over the discovery of the cave had, for a moment, carried Cayley along with it, he was not greatly surprised, and not at all cast down when, at the end of five minutes of hasty exploration, it was made evident to them that the ample supply of stores which they sought was not to be found here.

Jeanne herself would not, perhaps, have entertained so high a hope had she learned of the reference to the other cave which Cavley found in the fournal before she herself had chanced upon the mouth of this one. As it was, his theory that the stores were to be found in a cave vaguely situated along the s. ier, made little impression upon her, she was so sure that day. they had been right here, under their hands.

When their investigation made it clear that whether he was right or not, certainly she was wrong, she was bitterly disappointed. Cayley was aware of that, even as they stood here, side by side, with no light to see her face by. She said nothing, or very little, but he knew, nevertheless, that for just this moment all the life and courage had gone out of her; knew that the slight figure there, 'so close beside him, was drooping, trembling a little.

He laid a steady hand upon her shoulder. Almost instantly, under his touch, she turned to him, caught with both hands at the unbottoned edges of the rough woolen jacket he wore, and, sobbing a little now and then, but otherwise in silence, simply clung to him, that little hole in the ice?"

He did not offer, with his arms, to draw her any closer, to turn what was a mere instinctive appeal to the protection of his strength and courage, into an embrace. He kept a hand on each of her shoulders, more by way of support than anything else, and waited

a moment before he spoke. "After all," he said at last, "what we've got here is just so much clear able to us, though it isn't what we expected. The fact that it is their superfluity, the things they hadn't any parless valuable to us. That pile of bear

them to hustle everything out of great lump of spermaceti, it will keep us supplied with candles all through the winter. I can't imagine why they didn't use it themselves, except on the theory that the longer they lived here, the more they grew like beasts; the more content with the beast's habit of life, and the more inert about taking the trouble to provide themselves with such of the comforts and decencies of life as they might have had. So you see, we may find among the things they had no use for the very ones that will help us most."

The cutting in the ice did not go very far back in the fissure, and they were soon at the end of it, and without having made any new discovery of importance, either. There was a little of cast-off articles of various sorts, chiefly clothing which future privations might make useful to them. There was a great frozen lump of brownish-green vegetation, which they afterward identified as the edible scurvy grass to which Captain Fielding had referred in his journal.

That was all, or they thought it was, but just as they were about to retrace their steps to the hut, Cayley happened to glance up. The roof of the cave was not very much higher than it had to be to permit him to stand erect in it, something under seven feet; but here at the further end of it he saw a circular, chimney-like hole, about two feet in diameter, leading straight upward through the solid ice in the fissure.

CHAPTER XVI.

Footprints.

Nature had nothing to do with the formation of it, so much was clear enough. It had been cut out by hand. and evidently with infinite labor.

Flashing his bull's-eye over it did not enable him to see the end of it, but it did reveal a series of notches running straight up the two opposite surfaces. The only purpose they could serve would be to make possible the ascent of the chimney.

Jeanne followed his gaze, and then the two looked at each other, completely puzzled.

"Some one must have made it," she said; "and it must have been frightfully hard to make-a tunnel right up through the ice like that. But what in the world can they have made it for?"

"I've no idea," he confessed, "but it goes somewhere, and I mean to find

"Don't follow it too far," she cautioned. "It would only need one foot slip off one of those icy notches to bring about a dreadfully ugly fall."

"One couldn't fall far down a tube of that diameter, unless he had completely lost his nerve, for there's always a chance to catch one's self. And you're to remember that I'm used to falling. No, I'll be as safe up there as I would on a turnpike. Yes, really."

With that and a nod of reassurance, he scrambled up into the mouth of the long chimney. He had taken his bull's-eye with him, so the girl was left in the dark. She dropped down on the heap of bear skins to wait for him.

She had no means of measuring the time, and it seemed a perfectly interminable while before she heard testing squawk, the rude door swung Cayley returning down the ice chimopen, and they saw before them just ney. Had she known how long it realin feeling seriously worried about aim, which were the naked rock of the but not knowing, she attributed the seeming duration of his delay to the tedium of sitting in the dark with nothing to do. Even at that, she was | ivory, anyway." conscious of a feeling of relief when she heard him call out to her once of the list. more, cheerfully, albeit somewhat hollowly, from the chimney's mouth: 'Jeanne, where are you?"

"Here, just where you left me."

"Here! All the while! You must be half frozen. I've been gone the better part of an hour."

"I didn't know how long it was, and I kept thinking you'd be back any minute. . . . But where in the world have you been?"

By the time she asked that question they had groped their way back into the storeroom and thence into the living room of the hut, and by now she was looking at him in the full light of

He dropped down, with a rather explosive sigh, upon one of the bunks, and poked tentatively at his thighs and shoulders as if they were numb with fatigue.

be allowed to use the razor." "I suppose I could make you one,

He had come, apparently, to the end

"Well," she said, "I suppose might find something to do with almost any one of those things; some of them will be useful, certainly. And it's pleasant, somehow, to think of our little pilot house, all snowed in, up there on the cliff-head, and of our inside passage leading up to it."

"That's quite true," he said. "I suppose it's all romantic nonsense, but it | must appear. He was not to be exdoes give one a certain feeling of sesecurity. . . . However," he went on, "we're not reduced as yet to anything as intangible as that as a subject for giving thanks. You haven't seen the whole of my list yet. I've saved the best till the last."

He turned the paper over in his hand as he spoke. She did not attempt to read what he had written, but sat there beside him, her hands clasped about one knee, her eyes upon the booted foot which was poised across he said. "that chimney is five miles the other, and waited rather tensely

"It's not so very much, but it will mean an immense lot to us. What people die of in the arctic is not so more often of disgust and weariness and exhaustion. Your father knew "The observatory," she hazarded, that, and he set apart from his gensuch to men in their plight, to be used against emergency. I'm sure that's them away. Part of them are left. I wish he could have known to whom mocking seriousness. "It's more like- a little cask with brandy in it, a goodjar of dried eggs, three tins of condensed milk, a big ten-pound box of

His voice broke off there sharply, fissure, and then tunnelled down, or but without the downward inflection up, the whole depth of the clift. It she would have expected had he must have taken them weeks to do it, reached the end. So she looked quickly and curiously up into his face. As quickly, her eyes sought the bit of pa-

"You didn't finish," she said. "There

"I thought too late. Oh! it's noth "Have been!" she echoed question- ing, but it caught me-rather, and I thought I would spare you the twinge "No, because it's all snowed and that finding it had given me. I might met: and if that event should have when the sight of the Aurora drove and spoors for one thing. As to that dark, of course, as a pocket. But know-Cross & Blackwell's But there

some sort of an air of festivity to their next Christmas."

The girl rose from her seat beside him and going over to the window, stood for a while gazing up the beach.

It was just about the same time in the afternoon that it had been yesterday when he set out, a-wing, to find her, and had come flying down out of the sky to drive away the sudden nameless terror which had beset her. That thought led him, now to visualize some sticks of wood, rather too wasn't very easy to write. But that on the beach near where he had found first word is telescope. And then her. Thinking that it would be a good time to get them and drag them in, he got a harpoon line, and it was the girl's question what he meant to do with the rope, which caused him to tell her what part of the beach he intended to visit. He asked her then if she cared to come with him, but, after a moment's hesitation, she declined.

"It will be high time for supper before you can get back," she said, "and I'd better stay here and get it ready. that is, unless I can help you."

So he set off alone. For awhile the occupation of setting

what Cayley had predicted. A rather ly was, she would have been justified you?" she asked. "Because, unless their disordered living room to rights and getting the supper started were sufficient to take the whole of the girl's attention. But later, when it was or a sort of one. It would be genuine a question merely of waiting for the pot to boil, and of not watching it so that it would boil sooner, she moved restlessly to the door and stood there. before the hut, gazing down the beach in the direction Cayley had taken. He was already out of sight around the headland.

She wished she had gone with Philip, and she gazed with straining eyes toward the narrow bit of slanting beach around the base of the headland which was the place where he pected yet, not for a long time, probably, for his progress, dragging those great sticks he had set out to bring

home, must be slow. And then, even as she looked, she saw him, not moving slowly with his burden, but running-running at his topmost speed, like a man in fear of something.

Instinctively she moved forward to meet him, and this move of hers enabled him to see her. He slackened his pace instantly, and waved her back toward the hut. She obeyed that imperative gesture of his, without hesitation, but still remained in the doorway, watching him as he rapidly drew

nearer. When he -had got near enough so that she could see his face and read, more or less, what she saw there, she again moved forward to meet him. and this time he did not wave her back. When he came within arm's reach of her, he caught her and held her tight in his two hands.

"What is it, Philip?" she asked, searching the depth of his eyes and trying to plumb the horror she saw in them. "What happened out there?"

"Nothing-happened. But I saw something there that made me anxly that they took it to pieces, and then sized pot nearly full of beef extract, a lous for your safety. . . . It's all right now you're safe. Nothing has happened here, has there, while I have been gone?"

"Nothing. What could have happened, Philip?. It can't be anything that you're afraid to tell me," she went on, for he had not answered her. 'There can't be anything you'd be afraid to tell me now-not after yesterday."

"Oh, no; it's not so bad as that, but I saw that I had been wrong to leave you, even for that little while. You see the sight of the place brought back to my mind what you had told me yesterday of the terror you had felt there, and of the thing that you saw in the twilight. And so I looked

Two room house on 100x200 foot lot, three blocks from square, (Lot 1. Block 72), Town of Tahoka.

Austin, Texas. 2-5 J. B. Walker, Agent, Tahoka, Tex.

Wednesday morning Ben King left Tahoka, going about 20 miles northwest of town to help move a 16x32 house that Walter Forrester gave his sister, Mrs, R. J. Roberts, who will have it moved to her home place here in Tahoka.

To Move Forrester

House To Town

In some parts of the world this would be a great undertaking, but in Lynn county or in fact almost any where on the Plains, distance does not count much. After a house is once on wheels it is only a matter of driving, one or one hundsed miles is all the same out here over the level prarie. No creeks to cross or hills to climb or go around, just a matter of course and distance.

this year makes it necessary to Read The News And Patronize Its Advertisers --- It Pays.

Essie Ketner Died Very Suddenly.

Last Thursday morning the gloom of despair gathered around Ketner home when it was known that little Essie Ketner was sick unto death.

Drs. Inmon and Turrentine were summoned very early in the morning and pronounced the attack diabetis in its worst form. Then began a fight for the precious life which lasted until seven o'clock in the evening; but skill and loving hands failed in their efforts and the spirit of Essie returned to him who gave it.

The little Maid attended school Monday and Tuesday, but feeling indisposed Wednesday remained at home. It was late in the night when the attack began to assume a serious character.

This is one of the saddest deaths

MADE FAMOUS BY DICKENS

One by One They Have Undergone Changes.

One by one the places made famous by Charles Dickens have undergone such changes that they are hardly disstreet, Southwark borough, among the last of these places are now being ed up and very soon this characteristic place of ...ckens-land in London will have passed away, the "housing committee" having detered for sanitary reasons that it nust be obliterated. The Church of St. George the Martyr, which stands at one end of the street, is the house of worship immortalized as Little Dorrit's church, and on this account is visited every year by thousands of American admirers of the great novel-Near the other end of the street was the Marshalsea prison for debtwhere Little Dorrit's father, a man with "a mild voice, curling hair and irresolute hands," as the years passed by became gray-haired and venrable and was known as "the father of the Marshalsea," a title if which he grew to be ridiculously vain. And this character (much of the color of which Dickens is said to have taken from that of his own father) is one of the st pathetic in any of his novels. But the medical officer for the district says it has long had a wicked reputation, and London cannot allow such a degraded and unhealthy spot to remain, no matter what its romantic and historic interest. Long before the days of Dickens this corner of Southwick was known as the hiding place of highwaymen and debtors of the werst description.

RICE DISHES.

Rice being a starchy food, takes the ce of potatoes, and is much easier ested, as there is less of the cel-se in the rice. It is an ideal food and in combination with meats, eggs or milk, forms a balanced ration, a perfect combination of proteid, fat and

In many of the eastern countries In many of the eastern countries rice is the main article of food, and if the endurance of the Japanese is due largely to their food, it proves to be a valuable one. One of the characteristic dishes of our own country in the south is the Creole Jambalaya. It is prepared with all kinds of meats, fish and fowl; the only invariable ingredient is the rice, the other things vary according to the supply on hand. The following is a recipe right from

Cut a pound of fresh pork into dice two onlons fine. Put a large onful of sweet lard into a deep n, and when hot add the pork ns, and let them cook brown; en add a pound of chopped ham and arter of a pound of Vienna sau-Next add a bay leaf, a sprig of ley, two cloves and salt and two ts of soup stock or water. When ng hot add a cup of well-washed Boll until the rice is tender. stirring frequently. Serve very hot, seasoned with cayenne and chili

nous in the south is red beans with rice, prepared as follows: Soak over night a pound of red beans, then sim-mer for four hours in two quarts of water; add a tablespoonful of but-ter, a small onlon, minced, half a red pepper (the hot variety), and continue the simmering process for two hours longer. Serve with boiled rice. This is a balanced ration.

Escalloped rice with onions makes a most appetizing dish. Put a layer of cooked rice into a buttered dish, add a layer of parboiled onions or chopped uncooked onion, bits of butter, a few dashes of salt and pepper, then more rice until the dish is full. Bake until the onlons are tender. Turn out on a platter, surround with sausages and

WAYS OF USING THE ANCHOVY.

This dainty little Mediterranean dds a zest to any dish to which it is added. They are immediately pickled or salted as they are taken from the water, and come to us in many dif-ferent preparations: The anchovy paste, which is useful in many ways, as a flavor to macaroni or salad, essence of anchovy also used as a flavor, anchovy butter, anchovies pickled and in oil, and simply salted; they are every one most appetizing. When serving cod or white fish with a white sauce, a little anchovy essence adds greatly to the flavor of the dish.
Added to a plain batter sauce it makes
a decidedly different dish.

Olives stuffed with anchovies are ost dainty and zestful as an accompaniment to a salad.

Anchovies a la Millionaire.-This recipe, which the name indicates, is not for every day use, but is certainly ne worth, having for a state occasion.

This may be served as a canape. epare some neat squares or rounds toast, butter them and spread thickly with the following paste: Stir in a double boiler the yolk of an egg. two tablespoonfuls of butter and two teaspoonfuls of anchovy paste, a teaspoonful of mushroom catsup, six olives finely chopped, and half a cup of cream. Cook together until smooth. Be careful not to let it boil, then a half cup of whipped cream and garish with halves of anchovies boned and soaked in milk. Lay the strips so that the ends meet at the top. Either

rve at once or chill and serve cold. Canapes of Anchovies.—Have some ound pieces of bread cut with a biscult cutter and fried in deep fat. Chop me hard-cooked eggs, season with chervil and chives. (Chervil looks much like parsley when growing, but has a characteristic flavor.) Place the chopped eggs and herbs in a dish and mix with a little mayonnaise, chopped olives, pepper and sait.
Spread this mixture on the bread and lay strips of anchovies lattice work shion over them. Garnish with pars-

THE USEFUL TRAY.

The revival of the tray, and its many uses as a labor saver, would make a long story. The tray of greatest importance is the invalid's tray, and now one sees such beautifully matched sets of china for the inva lid's tray that being served in bed need be only a pleasure. The tray may be as rich and expensive as one's purse permits. Those of some rare old embroidery or dainty design in chintz, framed in mahogany, are very choice and delightful to possess, as they may express one's individuality; such a tray need not be expensive, and will be a joy forever. The little useful bedroom tray is common to all, holding the matches, candle stick, pitcher and water glass. This may be of china, with the articles to match. Those of glass may be kept bright and shining on a tray of nickel or silver.

The breakfast tray is a great faworite abroad, and is becoming more and more popular here.

The maid in a small family finds it especially helpful, as she may carry the tray with the breakfast steaming hot, and go back to her work without a dining table to set and clear away. On days of extra work an hour in the morning thus saved is a great help towards the day's labor.

For a Sunday night supper or for a midnight lunch there is nothing so useful as a tray. The arrangement and placing of all the food and dishes can be quickly done and a chafing dish of a cup of tea or cocoa finishes the service, which may be carried to the living room or library and there

There is the nursery tray with unbreakable dishes which may be thrown on the floor without injury. These are decorated with Mother Goose designs. Then the soup set with tray is another which is well liked.

The bread and milk set has its own tray. For the little folks this is very

Napkins to use with a tray should be small.

A large tray, not too large to be cumbersome, is a great step-saver in clearing and laying a table. One or two trips from the kitchen and pantry will carry much that is used.

Economy should be used in saving time and strength as well as in saving

We want to get the maximum comfort from the minimum labor, and we hall any device or advice which will belp us to meet that end.

dined today.

SOME RICE DISHES.

Rice is not costly; it is very wholesome and nutritious and may take the place of potatoes most satisfactorily.

Rice With Tomato.-Prepare rice by washing and adding a cupful to two quarts of boiling water. Cook until tender, then add a cupful of tomato stewed and seasoned with a little sugar; add salt, pepper and thicken with a teaspoonful of flour cooked with one of butter. Mix with the rice lightly, not to break it or make it mushy, and bake in the oven for twenty minutes.

Rice With Cheese .- To one cup of boiled rice add one-half cup of grated cheese, a little butter, one-half cup of sweet cream. Season with salt and pepper and bake in the oven until firm. Rice served with chocolate sauce is well liked by many as a dessert. An-

other sauce is nice rich grape juice. Rice Custard .-- Add a cup of boiled rice to a rich custard made with a pint of milk, one-half cup of sugar and the yolks of two eggs. Cook in a double boiler, flavor when cool, mix lightly with the rice and mold. Serve

Another rice custard is made by putting the boiled rice into the eggs and milk before cooking, and bake the

Rice and Stuffed Onions .- Cook until tender four good-sized onions and ne and a half cups of rice. Remove the centers from the onions and fill with buttered crumbs. Bake until brown. Pile the rice on a dish, place onions on top, and serve hot.

Rice With Curry.-Boil three-fourths of a cup of rice in salted water until tender, then pour into a bowl that has been rinsed with cold water. Let stand a minute then invert on a plate. Sprinkle with curry, dot with bits of butter and serve.

Its Kind. "A shoemaker has a looking-glass sort of life, hasn't he?" "How so?"

"Doesn't he reverse all usual rules by starting with his 'last' work first?"

Distinguished. "He has a punch that made him famous. "Prize-fighter?"

"No. Expert mixologist."

Pretty Sure. If a man who has a product of his own to sell can continue to think well of it after he has interviewed two or three people who are trying to keep him from finding out that they really want to buy it, he is pretty sure to posess the elements of success.

"Oh! You Kid." When the average boy insists on spotless collar every day one may be sure that he is leaving his childhood behind and that the responsibilities of life have begun.

WHERE WIGGINS FELL DOWN

Employer Now Realizes That There Are Such Things as Grandmothers of Office Boys.

Outside his own cleverness there is aothing that so delights Mr. Wiggins as a game of baseball, and when he gets a chance to exploit the two at the same time he may be said to be the happiest man in the world. Hence it was that the other day, when little red-headed Willie Mulligan, his office boy, came sniffling into his presence to ask for the afternoon off that he might attend his grandmother's funeral, Wiggins deemed it a masterly stroke to answer:

"Why, certainly, Willie. What's more, my boy, if you'll want for me I'll go with you.

"All right, sir," sniffed Willie, as he returned to his desk and waited pa-

And lo and behold, poor little Willie had told the truth, and when he and Wiggins started out together, the latter not only lost one of the best games of the season, but had to attend the obsequies of an old lady in whom he had no interest whatever .-Harper's Weekly.

"WHY SHOULD I USE CUTICURA SOAP?

"There is nothing the matter with my skin, and I thought Cuticura Soap was only for skin troubles." True, it is for skin troubles, but its great mission is to prevent skin troubles. For more than a generation its delicate emollient and prophylactic properties have rendered it the standard for this purpose, while its extreme purity and refreshing fragrance give to it all the advantages of the best of toilet soaps. It is also invaluable in keeping the hands soft and white, the hair live and glossy, and the scalp free from dandruff and irritation.

While its first cost is a few cents more than that of ordinary toilet soaps, it is prepared with such care and of such materials, that it wears to a wafer, often outlasting several cakes of other soap, and making its use, in practice, most economical. Cuticura Soap is sold by druggists and dealers everywhere, but the truth of these claims may be demonstrated without cost by sending to "Cuticura." Dept. 23 L, Boston, for a liberal sample cake, together with a thirty-two page book on the skin and hair.

His Part in the Proceedings. Clarence is a darky who is as proud of piloting Mr. Hillside's costly automobile as Mr. Hillside is of owning it. "Well, Clarence," said a neighbor, "I saw you in the Taft parade, but you didn't have the president in your car, I noticed." "No, sir," the chauffeur answered. "I didn't have the president, but I had a reporter, and I reckon Mr. Taft might have talked up there on the hill all night long and nobody in town would have knowed about it next day if it hadn't been for me and that reporter."-Exchange.

Where It Points.

"For whom is she wearing blackher late husband?" "No, for her next. She knows she looks well in it."-Judge.

CONVENIENCE OF DIVIDING FALL AND SPRING HOG HERDS

By This Method Farmer Will be Able to Distribute His Time Equally, Economize in Room, Sell When Markets Suit Him And Furnish Customers Kind of Pork Desired.

(By C. C. BOWSFIELD, Illinois.) er, who raises as many as 100 hogs in a year, ought to divide them into spring and fall herds. By ute the labor to suit his convenience, economize in room, sell when the mar-ket suits him, and furnish his custo mers on short notice, any kind of pork desired, from suckling-roast to prime

The thoroughly practical man can turn hogs into money very rapidly, but the business needs to be on a scale extensive enough to enable him to operly divide his fields and buildand to make thorough experients, with different types, and different kinds of food.

I have observed two or three bad failures recently, which were caused primarily, by the old and erroneous idea that hogs do not require much ground room or forage.

In raising perk for the market, the

farmer ought to keep in mind these vital points: Cost of feeding, danger of disease or sickness, and range of

Starting the season with 50 to 100 pigs just weaned, the owner should provide pasturage of some kind. I would give this lot of young animals one mess per day, of brain and shorts moistened with slops, skimmed milk or whey. This is ample in a grass-lot of five or ten acres.

Clover is excellent for forage, but artichokes and rape are better. A

Laittle corn souked in water is good when the pigs begin to show growth.

What they reed above all else, howver, is the range, with just about such a line of food as would be required to give young cattle a steady to be available toward the end of aturiummer. The hogs can be allowed to

o the harvesting themselves. This will give firmness and sweetless to the fesh, and could be used ight through the fall, instead of corn. ly preference would be to give the nal month to a dressing up with orn. This crop being ready in Octo-er, the fattening process can be

ALFALFA PEST

rushed through the month of November, or until conditions are right for marketing.

The clearest profit is made in ten months, at which age, the hogs ought to average 250 pounds. Animals that get good pasturage, and about such a diet as I have described, are pretty sure to escape disease. It is essential to have plenty of pure water in the

The farm should include three or four small fields, securely fenced, so that one kind of forage could be rested, while the other was used. Then again, if the owner detects fever or other sickness in the herd, it is easy to segregate those animals which are affected. Prompt action along this line, may prevent heavy loss.

Dipping is another essential, and as it is neither difficult or expensive, it ought to be attended to, twice each summer. With this kind of hog farming, cholera will not be known, and the stock will get a steady growth, from beginning to end.

If the weather be severe, when it comes to the last month of feeding, the hogs should be kept in clean, roomy pens, but even to the last day, they should have some succulent forage-plant to eat. Clover or alfalfa is suitable for this, and carrots are excellent, in connection with the corn,

It is for the good of the animal, and of course for the owner's pocket, that a program of this kind be marked out. Feeding 50-cent corn, for six or eight months, will not do. Farmers must learn that forage is natural to the hog, and that it will give the growth at a small cost.

Allowing full rental value for the land, the cost of all food supplies, and the wage value of the time taken up in the care of the stock, from the date of birth, to the marketing 100 hogs 10 months old averaging 250 pounds, can be turned off, at a cost not ex-

It may be done for a little less, but if it is to be a business proposition. let it be figured as a business man would count the expense. With careful experimenting and observation, for several years, I get no figures very far from \$7 for a marketable hog weighing 250 pounds.

Keep Up Cow's Condition.

To keep up the condition of the cows and to supplement the pasture a little wheat bran and flaxseed meal can be profitably fed all through the summer.

egg punctures in the midst of the egglaying season, with the punctures WORKS INJURY fresh and new. As one punctures may contain anywhere from a few to over 30 eggs, probably 10 or 15 on the average, this single plant presumably contained between 1,200 and 1,300 eggs at the time it was observed. If these hatched and half of them developed into female beetles and 80 per cent of the latter passed the winter, this plant might in a year give rise to over 150,-

> The alfalfa weevil has no natural enemies, except frogs and toads, both of which are by far too few in numbers to greatly restrict the ravages of

Two Pastures Better Than One-Victous Animal Should be Killed-Provide Shelter.

The breed of white hogs is rapidly disappearing from this country.

Free range for hogs does not mean that they should be allowed to run over our neighbor's farm. With good fence wire as cheap as

it is today it is an easy matter to divide up the hog pasture into convenient lots.

Two pastures are better than one, because while the hogs are feeding in one field the other will be recovering and later furnish much more attractive feed than as if both pastures

The vicious hog that is forever breaking out and causing trouble for one's neighbor cannot be killed too quickly.

It is a good plan to provide summer shelter for the hogs on a high spot where the wind will have a full sweep.

Cow of Quality.

It is unofficially reported that a Jersey cow ownd by a member of the American Jersey club, of New York, in a year's test gave 14,452 pounds of milk. The average daily was 39 6-10 pounds milk and 2 pounds and 1-7 only a bird .. - Puck. ounces of butter.

Feed for Dairy Cows. High-priced feed and low prices for milk or its products is a very undesirable combination, but it is sometimes economy to submit to a present loss, rather than allow a milk flow to go by default.

Sheep on Pasture. If too many sheep are confined on a pasture they will eat the grass roots right out of the ground.

DEATH BEFORE 100 YEARS IS SUICIDE

Prof. Munyon Says Ignorance of Laws of Health Explains Early End of Life.

NOTED SCIENTIST HAS **ENCOURAGING WORD** FOR DESPONDENT MEN AND WOMEN

"Death before 100 years of age has been reached is nothing more or less than slow suicide. A man (or woman) who dies at an earlier age is simply ignorant of the laws of health."

Such was the original and rather startling statement made by Professor James M. Munyon, the famous Philadelphia health authority, who is establishing health headquarters in all the large cities of the world for the purpose of getting in direct touch with his thousands of converts.

phia health health authority, who is establishing health headquarters in all the large cities of the world for the purpose of getting in direct touch with his thousands of converts.

Professor Munyon is a living embodiment of the cheerful creed he preaches. Virile, well poised, active and energetic, he looks as though he would gasily attain the century age limit which he declares is the normal one. He said:

"I want the people of the world to know my opinions on the subject of health, which are the fruit of a life-time devoted to healing the sick, people of America. There isn't a building in this city big enough to house the people in this State alone who have found health through my methods. Before I get through there won't be a building big enough to house my cured patients in this city alone.

"I want, most of all, to talk to the sick people—the invalids, the discouraged ones, the victims of nerve-wearing, body-racking diseases and allments—for these are the ones to whom the message of hope which I bear will bring the greatest blessing.

"I want to talk to the rheumatics, the sufferers from stomach trouble, the ones afflicted with that noxious disease, catarrh. I want to tell my story to the women who have become chronic invalids as a result of nervous troubles. I want to talk to the men who are 'all run down,' whose health has been broken by overwork, improper diet, late hours and other causes, and who feel the creeping clutch of serious, chronic illness.

"To these people I bring a story of hope. I can give them a promise of better things. I want to astonish them by showing the record of cures performed through my new system of treatment.

"I have taken the best of the ideas from all schools and embodied them in a new system of treatments individually adapted to each particular case. I have no 'cure alls,' but my present method of attacking disease is the very best thought of modern science. The success which I have had with these treatments in this city and all over America proves its efficacy. Old method

WHEN THE LUCK CHANGED

Groceryman at Last Could Believe That Things Might Be Coming His Way.

George H. Earle, the Philadelphia financier, was talking in Washington about high-over high or rankfinance.

"There's a certain type of financier," said Mr. Earle, "who, in his greed for wealth, loses his humanity. He becomes, in fact, a fac simile of Peter Brown.

Peter Brown was a Conshohocken grocer. He was delivering some groceries in his wagon one morning when he ran down and badly injured an old lady. The old lady sued him and got big damages. A few months later Brown was on his rounds again when he ran down and crippled an old man. The man also sued, and so large were the damages awarded him by a generous jury that poor Brown found himself actually on the verge of ruin.

"One morning about this time Brown's young son rushed into the shop in great excitement. 'Father!' he cried. 'Father! mother's been run over by old Gobsa Gold's 90-horse- den! power touring car.'

"The grocer's eyes filled with tears, and in a voice tremulous with feeling he exclaimed: 'Thank heaven, the luck's changed at last!""

Easy to Arrange.

"Do you know what a fortunate little boy you are?" rather patronizingly inquired a young lady of the laddie whose mother is her dearest comrade. 'Here, I invited mamma to go away for a lovely time with me, but she wouldn't because it wasn't a place where we could take children, and she thought she'd rather be at home with you. But I don't blame her," as the wide eyes grew wistful, "for I think I'd rather stay at home also if I had a nice little boy like you!"

"Why don't you get one?" queried the child, briskly. "I'll tell Dr. Johnson to bring you the next one he finds, if you like!"

DISTEMPER
