walk or drive without a border planting. Have only one or two small well kept annual beds rather than numerous beds which require constant work to keep attractive. One should be able to enjoy the garden rather than be a slave to it.

In selecting plants, consider the soil and climatic conditions in your area. It is much easier to select plants suited to a given area rather than attempt to modify the soil and environment to suit a given plant. Native and adapted plants will provide more pleasure and enjoyment for the amount of care expended than any of the exotic plants.

### Bill Griffin, County Agent, Says.....

Consider the maintenance requirements as you plan your landscape development. Simplicity in design is the keynote to keeping down labor costs and eliminating or reducing time consuming operations.

A few plants thoughtfully selected for their interesting and changing form, texture and color may eliminate many hours of cleaning beds and clipping hedges. Understand the future space requirements of the plant in relation to its proposed planting area. If it is going to require constant pruning to keep it in bounds, it would be better to select another plant.

Eliminate unnecessary borders along drives and walks as border plantings tend to emphasize rather than hide these elements in the landscape. Rather we should allow the lawn to meet the

### NATIONAL ELECTRICAL WEEK MEANS PROGRESS FOR YOU IN MORE WAYS THAN ONE

Some of the printed materials that Reddy's Area Development Department has created are displayed by one of Reddy's co-workers.

Advances in electric appliances, equipment and electric service — all to make living and working better for all of us — are acknowledged during National Electrical Week.

But other services for the betterment of our city which Reddy happily performs may not come to mind.

For example, Reddy has co-workers trained in helping you to attract new business and industry, to aid you with ideas in ways to keep your city looking smart as well as beautiful, to help you with printed materials necessary to tell new industrial prospects why your city is a good one.

And, right now, Reddy has a new film ready for showing to your clubs and organizations. It's called "Money Grows Here" and shows in beautiful color the advantages that new industry can have by locating in our area.

## Young Farmers Hold Meeting

The O'Donnell Young Farmers held their monthly meeting at the O'Donnell Elementary School. Fourteen members were present and many guests attended.

The program was given by Dr. Wilson of Occidental Chemical Co., who lives in Houston. The subject of the program was fertilizers. Dr. Wilson brought out that management is the key factor in using fertilizer in farming operations. He also stated that it is much better to use a thimble size amount of the right fertilizer than a tub full of the incorrect fertilizer.

Dr. Wilson felt that fertilization of dry land was profitable, but warned against making an evaluation of the program with the naked eye. The amount of net profit should be the criteria for success, he pointed out.

A question and answer period followed the program and was helpful to all attending.

Refreshments were served by the O'Donnell Young Homemakers. The next meeting will be March 3 at the O'Donnell Elementary School.

## Morton Wins Close Game With Varsity

A three-point spread was all that meant the difference in the Bulldogs winning over Morton Tuesday night, with Morton winning by a score of 74-71.

The ball game was tied 71-71 in the last few seconds of play, with Morton going ahead to win with a basket and free toss. If Tahoka could have held, a one point margin would have given the game to the Bulldogs.

Howard Casey, West Texas District Official

## A Special Report To Texas Businessmen

West Texas district official, Howard Casey, of the Pennsylvania Insurance Company, Lubbock, Texas states that the vast company operations in some forty-five states show tremendous growth and expansion in 1967-68 and even greater service and financial assistance to the Texas business man in 1969.

Casey states that this 70-year-old financial giant is supplying millions of dollars to Texas business owners through a special self-employed program. The company has been supplying this money need for many years to farmers, ranchers, construction industry, machine trades, retail and wholesale owners, and the professional man like doctors, attorneys and teachers.

The Pennsylvania Insurance Company has some of the top brains of the industry to run the diversified operations. The millions of dollars that we are supplying to the self-employed man is to fill a gap in his business through a fixed amount of money coming to him and his family at a very critical time. As you know, the self-employed man stands alone and he would not have aid like the working man even though he pays the high cost of taxes and has many thousands of dollars invested in his farming business, con-

struction business, etcetera!!!

Self-employment compensation is our major business and we are now supplying the Texas business man with many thousands of dollars in money that will help him keep from selling off his land and property and spending his life savings down to the last dollar.

A large per cent of our nation's farmers lease their land and when they lose their health and go out of business they have nothing to sell off. This special program is for the business operator only and not for the working man. Banks and Production credit offices approve this program over Texas for farmers and other business owners because they know the need must be met.

Scouting is always thought of as hiking, camping and fun. But Scouting is more than this. It is a great force in building good Americans, and developing finest character.

A SCOUT IS...  
**TRUSTWORTHY**

Whether at work or at play our dealings with other people are based on trust. If we can't trust people, the great work of strengthening the American way of life would soon come to an end. We want to be worthy of great trust.
