PRICE TEN CENTS

TRAIL DUST

By DOUGLAS MEADOR

The agony I experience in losing money may be responsible for my disenchantment of gambling. The pleasure of winning perishes when the cubes fall the other way and I am obliged to part with what was mine for a brief interval. In addition I have a theory that someone's work produced the money which gamblers exchange, and as a matter of professional policy, a gambler should not work. Now I have heard the story about the man who went to Las Vegas in a \$7,000 Cadillac and returned home in a \$70,000 bus.

No man is wealthy enough that he can afford to lose a friend, even at the expense of his pride and the admission of a mistake.

Plane travel has many advantages in the conquering of distance and the salvaging of time in a world that demands more from each minute. In addition there is the frequent view from above the clouds which transcends most earthly pleasures and frees the spirit to enjoy the ecstasy of strange, wild beauty. The great mountain ranges of white vapor and the deep valleys of shadows changing constantly into new and fantastic patterns, is like watching the fabrics of a dream being woven into a tapestry of fate.

Health has the same value as rocks if it is not used. Beyond a reasonable security, an estate that remains dormant defeats the purpose of work which created it. The world is filled with opportunities for helping others less fortunate than ourselves, and the world in which we live offers more pleasure than any age since the beginning of time.

If you are good, don't tell me. Grant me the privilege of making the discovery alone and the pleasure of telling others.

The elements of truth are so fragile that they can be distorted into another shape through careless conversation.

Hope never needs repairing before it can be used again.

COME TO CHURCH SUNDAY

Secure Future Seen For Social Security

IF YOU have been worrying about the future of Social Security by the time you are perhaps eligible to receive the monthly checks, you can quit worrying. The Social Security has in four trust funds, enough money to operate for 75 years. The authority is Ray Purcell of Plainview, Social Security representative (and a

member of the Matador Lions Club) who made the principal address Tuesday at the regular luncheon meeting of the Matador Lions Club.

"Social Security was born in chaos, during the depression," Lion Purcell declared, "and it was estimated at the time that the fund would have \$22 billion by 1970. Instead, Social Security has \$37.8 billion to meet its requirements. The reason is that more people are working at higher wages and that interest earned by the trust funds is higher than originally estimated.

"Social Security is paying approximately \$500,000 into Motley County each year in benefits, which includes the disabled, widows, children and benefits to students.

"Some people have questioned the advance in Social Security costs. This is to provide funds to increase payments to meet the increased cost of living," he declared.

Plaques Awarded
During the meeting four plaques were awarded in the Lions Annual Christmas Lighting and decoration contest. Mrs. W. F. Jacobs received first place in the business place division (Matador Variety), and Bob Stanley Pharmacy received second place. First place plaque in the homes division went to Mrs. Bob Stanley and second place went to Mr. and Mrs. Glenn Woodruff.

In a report of the Christmas baskets committee, all members reported for duty and the baskets were delivered promptly and without incident.

Arctic Storm Hits Low Blow in State

Mercury Drops To 3 Degrees

A MASSIVE arctic storm affecting much of the nation struck the Panhandle of Texas Sunday and dropped the mercury to its lowest point this winter. The storm, accompanied by high winds, dumped snow in the upper Panhandle and Eastern New Mexico, stranding motorists and slowing traffic in many areas.

No moisture fell in this area while anxious farmers and stock-

men watched the fast-moving clouds, hoping for relief from the winter drought conditions.

The coldest recorded here was reported by County Agent Bill Pallmeyer, who maintains the US Weather Bureau instruments. The mercury dropped to 3 degrees above zero Monday night or early Tuesday morning. The reading was made at 8 a.m. Tuesday. Mr. Pallmeyer recorded a total of 11.56 inches of rainfall for the entire year of 1970. The average is 20.43 inches.

Lubbock reported 3 below zero Tuesday morning. The winter conditions may worsen before they get better, according to forecasters, who saw possibilities of snow today in some areas of the lower Panhandle.

Driving winds have intensified the low temperatures part of the time since the arrival of the storm. Farmers and ranchers with livestock responsibilities have experienced some discomfort in feeding, but otherwise the storm has been taken in the stride of West Texans. It has, of course, provided an excellent topic of conversation.

Ranch Project Meeting is Set Here Tonight

A MEETING is scheduled here tonight at El Matador Restaurant by the Panhandle-Plains Supporters of the Nance Ranch Project at the West Texas State University, according to an announcement by Dr. Charles M. Smallwood, dean of the School of Agriculture. The meeting is scheduled at 7 p.m.

Agricultural and business leaders from Quitaque, Paducah and Matador, have been invited to the dinner, Smallwood, said.

Speaking at the dinners will be James Potts, Amarillo, president of Taylor-Evans Feedstores, Carroll Doshier, Claude, farmer, rancher and businessman, and Smallwood.

Similar meetings are being conducted throughout the Panhandle. The purpose of the Nance Ranch project is to raise \$100,000 to finance the construction and equipment needed to make the ranch an agricultural research center.

Included in the budget are allotments for the erection of a 300-head capacity experimental feedlot, the acquisition of 150 head of commercial cows, and purchase of \$45,000 research equipment.

The WTSU School of Agriculture acquired the famed George Nance Hereford Ranch from Mrs. Lucille Nance Jones, widow of George Nance, and her husband, L. L. Jones. The 2,393-acre ranch, located 5.5 miles east of the campus boasts many improvements, but needs extensive remodeling, Smallwood said.

Symposium Slated By Rolling Plains Fertilizer Dealers

What's new for fertilizer dealers? The answer to that question plus a number of other topics relating to the fertilizer business will be highlighted at a Rolling Plains Fertilizer Dealers Symposium at Seymour on January 13.

The program will kick off at 9:30 a.m. in the Community Room of the Farmers National Bank, announces County Agricultural Agent Bill Pallmeyer. It is being sponsored by the Texas Agricultural Extension Service, Rolling Plains Economic Program (R-PEP) and Texas Plant Food Institute.

According to Pallmeyer, the purpose of the symposium is to provide fertilizer industry representatives an opportunity to review business management principles, new fertilizer technology and current research data and recommendations.

1971. You've changed. We've changed.

Change. That's what it's all about this year. And that's what we mean by putting you first.

These are uneasy times. There are major concerns. About pollution. About safety. About the economy. About your hard-earned dollar. We know.

For the past 10 years Chevrolet research people have questioned thousands of people on every subject from rising taxes to the size of the glovebox in their cars.

We've found that price and maintenance costs, trade-in value and quality have become tremendously important.

Your car has to work. It has to last. And each new model must have more built-in value.

At Chevrolet, we understand. You want meaningful change. And our aim is to give that to you, as you'll see in the 1971 Chevrolets.

Caprice. The biggest, most luxurious Chevrolet ever. A complete change.

Bigness in itself is nothing. But if it allows you to lengthen the distance between the front and rear wheels (which we did), then you've got something.

You've got a smoother ride. The idea in the 1971 Caprice was to give you the looks and comfort of a six- or seven-thousand-dollar car, without asking you to pay anywhere near that much for it. And above all, to build in as much dependability and security as possible.

So we changed the body structure for 1971, too. We made it stronger. And we made it quieter by putting a double layer of steel in the roof.

Caprice, as you can see below, is a lot of luxury at a Chevrolet price.

Vega. The littlest Chevy ever. It wasn't changed from anything.

Before building Vega, we read everything we could get our hands on about little cars. We talked to owners. We studied little cars up one side and down the other and, literally, tore them apart. We found out what made them tick, or why they didn't tick.

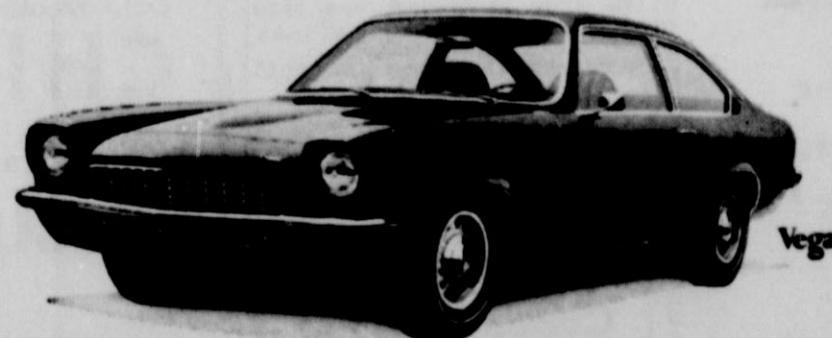

What ticked were gas economy and dependability. What didn't were underpowered engines, cramped quarters and getting blown around in the wind.

In our little Vega, everything ticks. It's not just another little car. You didn't want that. It's one little car that does everything well.

CARD OF THANKS

We wish to express our sincere appreciation and gratitude to the host of neighbors, friends and relatives whose many acts of kindness, love, sympathy, concern and service during the illness and recent death of our beloved husband, father and grandfather, Newton Fletcher, meant so much.

The telephone calls, cards, visits, both at home and at the hospital, messages of concern and sympathy, the lovely food so lovingly prepared and served, the floral offerings and memorial gifts and the messages in word and music so beautifully given were all a great comfort. We also appreciate the service rendered by the members of the Masonic Lodge, who acted as pallbearers and had charge of the Memorial service conducted at the cemetery. Sincerely,

Mrs. Elizabeth Fletcher;
