Pastor is Lions Speaker

Christmas Concept Traced in Address

The 25th of December was once a pagan holiday in the Roman Empire. Christians conceived the idea of using the date to honor the birth of Jesus Christ without observance of the Romans. The actual birth date of Jesus is not known, but the December 25th date has remained through almost 2,000 years.

Concept of Christmas was the subject of an address Tuesday by Rev. James Hancock, pastor of the First Baptist Church here, at the regular luncheon meeting of the Matador Lions Club.

Matador Matadors 1964 football squad and coaches were guests of the Lions for a fried steak luncheon, served buffet style. Rev. Hancock was introduced by program sponsor Lion Glenn Woodruff.

Rev. Hancock traced the custom of observing Christmas in various countries of the world, including Greece, Ireland, Spain, Denmark, Russia and Palestine. He then defended the inn-keeper on the night of the birth of Jesus.

"Most pastors have criticized the inn-keeper," he said, "but I believe he may have actually been a hero. An inn in Bethlehem at the time Jesus was born offered very little to the traveler. It was a building which merely sheltered men, women, children and animals all in one room."

Bethlehem was crowded and the inn must have been far less desirable than a manger with clean straw. Certainly it was private, and perhaps the inn-keeper gave Joseph and Mary the best he could offer.

Report of Committees
Lions President Freddie Welling heard a report of various committees assigned for the busy holiday season. Lion "Pappy" Campbell said he was completing a list of "certified" needy families who would receive baskets of food from the Lions.

Contributions from Lions members were pooled and divided among the three coaches, Charles Johnson, J. E. Edwards and Kenneth Barr. In a brief address Coach Johnson said the 1964 season had been the "roughest" during the nine years he has been here.

Christmas Observed in Program Presented by El Progreso Club

Mrs. Ben Keltz, Chairman of Home Life was leader for a Christmas program at regular meeting of El Progreso Study Club held in the home of Mrs. G. E. Hamilton on Thursday, Dec. 10.

She used as her introduction: "Everywhere, everywhere, Christmas to-night," by Phillips Brooks, and also a short story by Angelo Patri, entitled "A Time of Enchantment."

Mrs. J. R. Whitworth brought the Christmas story, "Miracle of the Hands." She brought out the thought of how many things are done with the hands and how they cooperate with the brain to do the many necessary tasks. She mentioned the many memories of things done by the hands of mothers and fathers for their children. She brought the idea of how a friendly handclasp can raise the spirits when they are low.

"Beautiful hands," she said, "are those used for others... there are the hands that are lifted in praise and prayer... many beautiful songs have been written about hands."

She gave a number of Bible verses on the use of hands, and closed with the question, "Do our hands show the marks of service?"

COUNTY AGENT PALLMEYER SAYS:

Would you like to keep your Christmas tree for a long time after Christmas? Live trees with the roots wrapped in a ball of soil are sold to be planted outdoors after Christmas, and those expected to live include arborvitae, Arizona cypress, eastern cedar and shortleaf pine.

The overall agricultural outlook for 1965 takes on a complexion pointing to an increase in demand as well as an increase in supply of farm products. Farm prices and incomes, however, are expected to remain relative stable.

Markets for farm products on the home front will continue to expand due to economic growth, rising consumer incomes and population growth. Looking to the foreign market, agricultural exports in fiscal 1964-65 are anticipated to continue at a high level, though somewhat below the record setting total of \$6.1 billion last year.

Producers of agricultural commodities, however, will still be confronted with large supplies of farm and ranch products. Both livestock and crop production are expected to increase slightly, while carryover stocks remain large.

gives color, dissolve four pounds of bluestone, blue vitriol or copper and three pounds of rock salt in one gallon of water. Soak the "logs" for three weeks, turning them end for end frequently, letting them dry thoroughly before trying to burn. Burn only one log at a time, as it will burn several hours and give off rainbow colors. These "logs" also make unusual Christmas gifts.

Leaving crop stubble as long as possible after harvest serves as a food source for many game birds. Quail, dove and turkeys often have a difficult time finding food during winter and early spring, and crop residues plus the seed of native weeds make one of the best food sources for wild game.

I have a few copies of "Christmas Time at Home," which is a book of recipes handy at Christmas time. Included are appetizers, beverages, breads, cakes, candies, confections, desserts, meats, pies, puddings and salads. If you would like a copy, let me know.

will probably be slightly lower in 1965.

The total gross income realized by farmers and ranchers will maintain the level of the past two years. This income includes cash receipts, government payments and non-money income. Furthermore, only small increases in production expenses are in prospect as compared with increases in recent years.

Outlook material prepared by John McHaney, Extension Economist, Texas A&M University.

Pesticides properly stored during the winter months will retain their activity and can be used the following year. Wettable powder or dusts should be kept in a cool, dry place, with bags sealed to keep out moisture.

Liquid materials should be stored in the original labeled containers because the carrier or active ingredients may be corrosive to other metal containers. All bottles or cans containing liquids should be tightly sealed to prevent loss of activity by vaporization.

Waggoner Carr Sels Vote Record

A post-election review of 3,100,000 Texans who were statewide voting totals shows that only 89 per cent of the qualified to vote actually made it to the polls on November 3. Total number of ballots cast—2,760,788.

Not all of those who went to the polls voted in all the races. In Travis County, for instance, 3,461 of the 67,419 who cast ballots failed to vote in the presidential race. Elsewhere around the state, 52,304 Texans who voted in the governor's race did not vote on the lieutenant governor's race, which placed next on the ballot.

Highest vote getter, in this election and in Texas history, was Atty. Gen. Waggoner Carr. He racked up 1,901,038 votes. Gov. John Conally was next with 1,877,137. Lt. Gov. Preston Smith was third, with 1,833,747.

Christmas Can Be Dangerous Unless Precaution Taken

Can Christmas really be dangerous? It certainly can.

The Christmas tree — focal point of festivities — can be a serious hazard. Every year you hear about a holiday "accident" when a tree is ignited and someone is burned.

Help protect your family by taking some precautions when you get your tree.

If you live in the part of the country where you "cut your own," choose a growing tree — not a dead one.

If you purchase your tree, select one which has not been allowed to dry out by prolonged storage. Test it for freshness by bouncing the butt-end hard on the ground, pulling at the needles at the end of the branch and rubbing your finger across the stump. The tree is fresh if the needles do not shower down, and if the stump is sticky with resin.

When you take it home, stand the tree in water or snow outdoors until you are ready to use it. Bring the tree indoors just before Christmas and remove it as soon as it has served its purpose.

The larger the tree, the greater the hazard, so avoid selecting one any larger than you need.

Just before setting up the tree, saw off the trunk at an angle at least one inch above the original cut.

Support the tree well with a sturdy, broad base.

On the market today are some fireproof aluminum foil trees. Unfortunately, these have their potential hazards, too.

If you choose one of these trees, light them from a distance. Use colored spot lights or some similar lighting. Avoid putting regular ornamental lights on this type tree. The foil is an excellent conductor of electricity. If there is the slightest short or fraying of insulation, the tree itself becomes charged with a full current of electricity.

Traditional icicles, however, are relatively safe to hang on your tree. They are made of metallic tin and metal lead. But if your youngster eats them, they are insoluble and should cause no great harm.

As the holidays approach, make preparations for your family to have a safe Christmas.

State Quota For November Draft Up Over October

The state draft quota for November called for 307 men, compared to 236 for October, according to an announcement last month by Col. Morris S. Schwartz, state Selective Service director.

The state quota of 307 for November is the Texas share of a national call for 8,600 men, all for the army.

The State Selective Service director also announced that state draft boards issued calls for mental-physical examinations in November to around 2,900 males, all of whom were 18-year-olds.

Colonel Schwartz stressed however that these youths will not be considered for armed forces service at this time. Males married at age 18 and those known to be in school at that age were not examined.

The November call for Armed Forces Physical examinations, held Nov. 9-10 in Plainview included Seab Roger Washington and Charlie Bert Watkins from Motley County, in a group of

32 from Hale, Swisher, Floyd and Motley counties.

In the group ordered for induction were James Dennis Smith and Amador Zunigan Enriquez of Motley County and Roy Lynn Roper of Swisher.

Bill Seale Named New C-C Director

Public Alerted on Holiday Accidents

Austin, Tex. — The Texas Safety Association today issued its annual "Accidental Death Alert" for the 1964 Christmas-New Year holiday period. The 11-day alert begins at 8 a. m. Thursday, December 17, and coincides with the annual death watch of the Department of Public Safety. In appealing to all citizens to be on the alert for hazards, TSA President Quincy V. Tuma of Houston, said it is estimated that

105 persons will be killed in traffic and 45 persons in other accidents. "However, this traffic toll can be reduced if everyone will put safety first — at home, at work or behind-the-wheel," he added. He challenged citizens to accept their moral responsibility to conduct themselves in a safe manner and to practice the Golden Rule. "Be thy brother's keeper." Last year, during a nine-day holiday period, 132 persons lost their lives in accidents in Texas. There were 84 persons killed in traffic and 48 persons killed in other types of accidents.

Christmas Eve took the heaviest toll in traffic deaths — 14 persons. Christmas Day and New Year's Day had 13 fatalities each. The Association President pointed out that traffic fatalities for the first 11 months of this year increased about 12 percent over the same period in 1963. "This trend, plus the fact that December is one of the most dangerous months of the year for traffic and that both Christmas Day and New Year's Day this year occur on a Friday, increasing the possibilities of highway travel, could bring the total figure for 1964 traffic deaths to the 3,000 mark. In 1963, traffic deaths reached a record-high with 2,729 persons killed. As of December 8th this year, traffic fatalities were only 87 short of that figure.

Most Deadly Month
Last year, December was the most deadly month of the year. In addition to 312 traffic deaths, there were 180 deaths from home accidents, 34 deaths from work accidents, 69 deaths from public accidents, and 50 deaths from other types of accidents. In non-motor vehicle deaths, fires took the highest toll with 75 persons killed in home fires and 6 in fires in public places. Falls took 66 lives, 48 in home accidents and 18 in public accidents. Eighteen persons died in firearm accidents — 10 at home and 8 in public places. Poisoning by gases and vapors took 13 lives in the home and suffocation took 10 lives. The total accidental deaths for 1963 was 5,999. In closing, Tuma said: "If we are to stop this needless loss of human lives, we must accept our moral responsibilities for the safety of fellow citizens — and, we must stay alert to stay alive."
